[Anand,Viswanathan]

1.d4 I had an idea in the ♕b3 Grunfeld that I had wanted to try. In Wijk aan Zee, Kasparov entered the same system

against Svidler, but he had another idea in mind. Now it was my chance. **1...Nf6 2.c4 g6 3.Nc3 d5 4.Nf3 Bg7 5.Qb3 dxc4 6.Qxc4 0-0 7.e4 a6** Svidler repeats the Hungarian system. **8.e5 b5 9.Qb3 Nfd7 10.h4** Kasparov played e6, but I assumed that Svidler had improved on that. **10...c5 11.e6 c4** I had briefly acquainted myself with the theory of this move, but had concentrated on Black's alternatives. **12.Qd1 Nb6 13.exf7+ Rxf7 14.h5 Nc6 15.hxg6 hxg6 16.Be3** This is all theory. The main move is 16... ♗g4, but Svidler had something else in mind. **16...Bf5!** Svidler said that he was surprised that this natural move had hardly ever been played. **17.Ng5** Obviously, the difference between ♗f5 and ♗g4. I thought it would be better not to follow Lputian-Sokolov blindly, so when I saw this plan, I decided to go for it.This is the sort of thing one shouldn't really do this without developing all his pieces, but if you already played h4 on move 10, then it doesn't matter. However, this move isn't totally illogical. White wants to play g4 and ♗g2 instead of placing the bishop on e2. Still, Black seems to be OK after this move.

[17.Be2 Nb4 18.Rc1 I remembered that Lputian-Sokolov had reached this position. e5! Later I discovered that this was played in Kroeze-Van Haastert Wijk aan Zee 1998. (No, not Hoogovens, but Sonnevanck!). I havent' checked everything, but it looks good for Black.]

[20...Qd7! Svidler. The idea is that Black can now meet f3 with ♖xf3. It is difficult to analyse a position like this. White has many options - he can play the immediate f4 or interpolate ♖d1 and ♖d8 first or ♗g2 and so on. The usual cop out "unclear" seems called for!]

11...Bg4 12.Qxe3!? I strongly recommended this move in my analysis 4 years ago. **12...Nc6 13.d5 Nb4!?N**

New attempt to solve the opening problems. **14.Bb1** ⇔ d; ♕d7 **14...f5** Black aspires to open the game, in order to make use of his advantage in development. Another move with a similar idea, that deserves attention, is:

[14...Re8 15.Rhe1 *(15.a3 f5 16.axb4 Bxb4)* 15...Bd6 16.c5 f5 17.cxd6 fxe4 18.Bxe4 Qxd6 19.a3 Bf5 It's not easy for White even remove black's king to backrank. 20.Qd4 c5 21.dxc6 Qxd4 22.Rxd4 Bxe4 23.Rdxe4 Rxe4 24.Rxe4 Nxc6]

[15...Bf6 16.Rhe1]

16.a3 It's not so clear, whether the attempt to use Black's bad knight position, was much better: **16...Na6 17.h3**

[17.Rhe1 Bf6!? Nice tactical hit. But, unfortunately for Peter Svidler, it's not enough for win. 18.b4]

17...Bxf3 18.Nxf3 Rae8 19.Rhe1 The idea of this move - to force Black to take the c-pawn, and open the c-file and ⇗ a7-g1 for the white pieces. **19...Nc5 20.Bc2 a5 21.Kb1** ±/= White has advantage in this endgame because of the weak black pawns. White's bishop is also stronger in comparison with the black knight, especially in case of a play in two sides. A general plan of White in this position - to take black pawn on a7 and run with his a-pawn. But Black has good chances for counterplay, because his pieces are very active. **21...Qb6 22.Nd4!?** Peter Svidler doesn't see the necessity to protect his b-pawn. More important for him is to activate his rook and attack the pawns at the queen side. **22...Bf6 23.Qd2 g6?!** A serious mistake. Black needs to protect his c-pawn at first. After this move White forces an endgame with an extra pawn. **24.Nb5 c6 25.Nc3 cxd5 26.cxd5 Rc8 27.Na4!? Nxa4 28.Bxa4 Bc3 29.Re6! Qxe6 30.dxe6** In the last 10 moves White greatly enlarged his advantage and now has an extra pawn. But he still needs to work hard in order to convert his advantage for a point. **30...Bxd2 31.Rxd2 Rc7± 32.Bd7 Ra8 33.e7 Kf7 34.e8Q+ Rxe8 35.Bxe8+ Kxe8 36.Rd5 b6 37.Rd6** White wants to create a passed pawn on the h-file. **37...Rb7 38.Kc2 Ke7 39.Rc6 Kd7!?** An interesting decision. The ending ♖+♗ against ♖ is theoretical drawn, but in a practical game it is frequently not so easy to do it. In this game Vladimir Malakhov demonstrates perfect knowledge of theory. Also possible to play: **40.Rf6 Rc7+ 41.Kd2 Rc6 42.Rf7+ Ke6 43.Rxh7 Ke5 44.h4 Rc4 45.Ke3 Rc2 46.b4 Rb2 47.Rh6 axb4 48.axb4 f4+ 49.Kf3 Kf5 50.h5 g5 51.g3 fxg3 52.Kxg3 Rb3+ 53.Kg2 Rb2+?** After this move White takes black's last pawn. Therefore, much better was: **54.Kg3 Rb3+ 55.Kg2** **½-½**

A) 14.a3 Nd5 15.Bxe7 Nxe7 16.Bxb7 Rxb7= The alternative would have been 17.Qf3 which stops Black's idea to push further with b5-b4, but that is a clear drawback of White's last move - it weakens the b3-square. He is not afraid of getting mated, like it would easily happen in the middlegame (with ♕♕). **22...Ra8!** Black has a clear plan of counterplay - pushing his queenside pawns, which allows him to maintain the balance. **23.Rxa8+**

1.d4 d5 2.Nf3 e6 3.c4 c5 4.cxd5 exd5 5.g3!? To the best of my knowledge this move is a genuine novelty and further testimony, if any were needed, to Bent Larsen's seemingly inexhaustible quest for the original. However, the idea - exchanging on c6, advancing the e-pawn to e5 and then basing operations around the 'strong-pointing' of this pawn and the consequent cramping effect on black's position - is certainly not new. Indeed, at move 10 we will found ourselves back in 'known territory' -others have pointed there knight at the c4 square via the more prosaic d3 and Nbd2. My only reservation about this particular exposition of white's idea is that placing the knight on c4 loses the option of kicking black's knight from d5. This, it seems to me hinders white's ability to find a convincing plan once he has done all the obvious things (ie about move 13). For this reason, I think an alternative, also relatively rare method of supporting e5 is worth a look. I have, strangely encountered it twice in my recent praxis:

12.Bb3 The negative aspect of the manouvre ♘f5-e7-g6 is that White can establish a ♘ on d4. Together with the companion on e4 this gives a number of attacking possibilities.
[12.Be2 Bb7]
12...Bb7 13.Re1 Ne4N A logical and seemingly strong novelty. The idea is to blockade Whites f- ♙ and at the same time to challenge the ♘ on d4. Blacks plan is to play ♘ f5. **14.Bh4** Perhaps threatening to check on d6, but it also allows Black to develop in an explosive way.

1.d4 Nf6 2.Nf3 g6 3.c3 Bg7 4.Bg5 d6 5.Nbd2 c5 6.dxc5 dxc5 7.e4 Nc6!? Vladimir Kramnik employs the rather rare continuation. As usual, it was played after deep home preparation and came as a real surprise for Peter. **8.Bc4** The most natural reply. **8...0-0**

A very concrete approach - White has to waste a tempo on protecting the knight, while Black is ready to put pressure on White's centre along the d-file. **9.Qe2** After this move White is well prepared to meet the standard c7-c5 advance, but the vulnerablity of the ♙d4 offers Black more counterplay. **9...h6 10.Bh4** The most natural way of protecting the pawn. **10...Nh5** Obviously, this move is aimed at solving the problem of the passive light-squared knight. The vulnerable state of White's queen gives Black an additional tempo for the fianchetto. **11.Qe3 b6 12.0-0-0 Qc7N** A logical novelty - the ♘c6 was clearly misplaced, so Vladimir removes in order to free a way for the c-pawn. **13.Bg3 e5 14.Bd5 Bb7!** Black reasonably doesn't hurry with the c6-c5 advance.

Candidates Tournament (6) 17.03.2016

An emphatic victory for Anand. Let's have a look at the game to see what really went right for him and wrong for Svidler. **1.d4 Nf6 2.c4 g6 3.Nc3 d5** Svidler is one of those top level grandmasters who doesn't like to play the Berlin. He sticks to the normal lines of the Ruy Lopez. **4.cxd5 Nxd5 5.e4 Nxc3 6.bxc3 Bg7 7.Qa4+ Qd7 8.Bb5** Allowing Svidler to play the Marshall was not in Anand's plans. **8...c6** Although this is the main move in the position, Anand thought for a good ten minutes. Why? Because Svidler has got this position 13 times in his games and all the while he had chosen b4. Although this is the main move in the position, Anand thought for a good ten minutes. Why? 13.d5 e6 This came as a bit of a surprise to Anand. But Peter was mainly trying to play very concrete chess.

14.Be3 exd5?! Although this is very thematic. It is extremely dangerous. The main reason being that the two bishops on c1 and c2 are opened up against the black king. **15.Rad1 Nc6** This was a critical position where Anand took a lot of time. There are a lot of captures. As Anand correctly pointed out, the main question for him was whether to take on b5 or not. On one hand keeping the a-file closed keeps the rook on the back rank safeguarding it. On the other hand the rook doesn't take part in the game. It is a very difficult decision to make and almost impossible to see what possibilites may arise after say eight to ten moves. But this is where intuition comes into picture and Anand felt that bringing the a1-rook into the game was more important and that explains his next move.

[15...d4+- 16.cxd4 Bxe4 17.dxc5 Qb7 18.Rfe1 Nd7+- 19.Ba6 Qc7 20.Bb5 Nf6 21.Bd4]

16.exd5 Ne5

[16...Ne7 17.c4 Nf5 18.Bf4]

17.c4 Rfe8 18.Rfe1! This move might be natural for a player like Anand, but for us who from a young age are taught about the relative value of the pieces, it is not easy to consider a such a move. Once you see it, though, and you realise that the bishop on e4 will be a complete monster, breathing fire in both directions... **18...Nxf3+** This is what Svidler had prepared, but it falls just short.

[18...Ng4 19.Bc1]

19.Bxf3 Be5 At this point I went into the tournament hall to check out what exactly was going on. I expected Anand to be looking happy while Svidler would be on the board with his head in his hands. But the scene I saw was completely the opposite. Peter had just captured the rook on a8 and was moving around confidently. Anand on the other hand was nervous, fidgety, biting his nails and looked as if he was the one on the back foot. But it was clear that Vishy was calculating the details of his final attack, anxious to make sure that his opponent had no defensive resources. And in the above position he picked up his knight and

made the best move 20. ♘g5! **20.Re2!** Svidler came back and saw this move. I thought that he would think for a while before making his move but he blitzed it out. He was showing that he had things under control. **20...Bd6**

[20...Qd6 21.g3 Re7]

21.Rde1! Once again the only move. There is an attack on both the h7- and f7-pawns. **21...Qf5** This move was also made quickly. **22.Bc1 Rxe2** At this point Peter once again stood up from the board and started walking around. Anand was making his final calculations, the other players were all coming to the board, disbelief showing in their faces. Nakamura stood right next to Svidler's seat for almost a minute. He just didn't want to leave. He checked the scoresheet, then the board and couldn't believe that Anand was just winning. He went back to his board, Anand lifted his hand and once again made the only winning move in the position. **23.Rxe2!** The rook defends the knight and now the threat is ♕g6. Black doesn't really have a way to stop the attack. **23...b5** With the engine on it seems like a trivial win here but on the board when you see moves like ♕e1+ followed by ♘e2, those are tense moments!

[23...Qb1 24.Qc3 Bf4 25.Re1 Bxc1+- 26.Rxc1 Qb4+- 27.Qe5]

[23...Be5 24.h4]

24.g4! Svidler resigned as he saw no point in continuing. His bluff of playing quickly had not worked. Many of you might be wondering why this is the only move. Wouldn't h3 also win? The point is subtle. The h3-square has to be kept for the knight to control g1. **24...Qb1?**

[24...Qf6 25.Bb2 Qf4 26.Qc3 f6-+ 27.Qxf6 was a way to avoid an immediate defeat, but doesn't really serve any purpose as after Qxf6 28.Bxf6 bxc4! 29.Re6 Bf8+- the position is technically winning. It won't be so difficult for a player of Anand's calibre to turn this into a full point. 30.g5]

25.cxb5 Qxb5

[25...Rd8!! Suddenly the back rank weakness turns out to be the critical factor in the game. 26.Qb2 Qxb2 27.Bxb2]

26.Qc3 Qb4 27.Qf6 Qd4 28.Qxd6∓ Qd1+ 29.Kg2 Qxc1 30.Re7 Qb2+- Like a gentleman Svidler analysed the game with Anand, kept a very calm face in the press conference, and showed great sportsmanship. Anand on the other hand had made his point clear, he was looking for another Candidates victory! **31.Qc7 Ba6!** wins! **32.Qc6??** however loses in an amazing fashion.

1.e4 Shah, Sagar Sergey usually begins with 1.e4 but every now and then you see him opening with his king's knight. So it didn't come as such a huge surprise for Svidler. **1...c5 2.Nf3 Nc6 3.Bb5 e6** Svidler is known all over the chess world for his Grünfeld. But there was a brief period betwee 2007 to 2009 where he played the Slav Defence. In the Candidates 2016 this became the main weapon of Peter who had excellent results with it. Draws against

Karjakin and Nakamura and a win against Aronian. Shah, Sagar: 'Svidler is known all over the chess world for his Grünfeld. Draws against Karjakin and Nakamura and a win against Aronian. ' **4.0-0 Nge7 5.c3 a6!?** This is considered a tad passive as Black transposes the game into Queen Gambit Accepted territory. Especially because the move c5 will come with a loss of of tempo (c7-c6-c5). But Black would like to say that the way White has made use of his extra tempo is not particularly the best by playing a2-a4.

[5...d5 If Black was able to get in ♗d7-c6 here he would be completely fine. But that is a long way off and White has shown that he is better in this line. 6.e5 Bd7! 7.Re1 Nf5 8.Bf1 Be7 9.d3 0-0± and this symmetrical structured position is simply torture for Black. [5...Qb6 6.Na3 Ng6 7.Re1 Be7 8.Bf1 d5 9.exd5 is the sharp tactical line which Svidler looked at great depth before the game. exd5 is certainly the main line when the theory runs into pages. 10.d4 0-0 11.Nc2 c4 12.Ne3 Be6 13.g3 Qd8]

[7.d3 Ng6∓ followed by ♖ac8, the doubled pawns on the kingside don't really affect Black whereas the bishop pair might become an extrmely potent force. 8.Re1 Be7 9.Na3 0-0 and Black has no real problems.]

7...Nxd5 8.d4 cxd4 9.Nxd4!? As Svidler said after the round, "Sergey is used to doing this everytime against me. I prepare all the lines against him and he comes up with a move that I haven't looked at in the morning prior to the game!" Although this move might not be as popular as 9.exd4 it is not without venom. Basically if Black would take on d4 then after exd4 White gets a nice initiative after exd4 threatening the d5 break. On the other hand, if you don't take on d4 then you are not able to fully unwind. Shah, Sagar: 'As Svidler said after the round, "Sergey is used to doing this every time against me. On the other hand, if you don't take on d4 then you are not able to fully unwind.' **9...Bd7** Peter made this move quickly. Even though he hadn't revised this line before the game, he remembered that ♗d7 was the main move. That was where his theoretical knowledge ended, but it was important for him to bluff to his opponent that he was well prepared. You can see how over the board psychology plays an important role in the games of these top players. **10.Bf3!?** A nice piece of prophylactic thinking. Black wanted to take on d4 and follow it up with ♗c6, so White simply retreats his knight. **10...Nxd4** Although this wastes time it secures the excellent c7-

square for the black queen. **11.Qxd4 Bc6** ♘g4 followed by ♘e5 is one of the common ideas in this position, so Karjakin prevents it with his next move. **12.Nd2 Qc7 13.Nc4 b5**

[13...Rd8= 14.Rd1 *(14.Ne5* is another option for White but after *Nb4 15.Qf4 Bd6)* 14...f6 15.Qg4 is liked by the engines but Svidler didn't even consider this move for a second. 14.Qe5 0-0-0 15.Qxc7+ Kxc7 Black's next idea is to put his bishop on c6. Overall his position is quite harmonious. **16.Ne5 Be8 17.c4 bxc4 18.Nxc4** This might be a good positional exercise for anyone who might want to learn about good bishops and bad bishops and prophylactic thinking. Currently the bishop on d3 is not so great. It is desperate for the e-pawn to move ahead and open up the b1-h7 diagonal. However, Svidler willhave none of that. He just shuts off everything with this next fine move. Shah, Sagar: 'This might be a good positional exercise for anyone who might want to learn about good bishops and bad bishops and prophylactic thinking. Currently the bishop on d3 is not so great. The king can be well placed on e3 or it may become a target for some small tactical tricks. **22...Kb8**

[22...Nf4 23.Ne5! Kb6 24.Nf7 Rd2 25.Rxc5∓ Kxc5 is not bad but it is not in the spirit of the position. 26.Bc3 Rdd8 *(26...Rhd8=* Black is not worse but White is also doing fine. *27.Ba5)* 27.Ba5]

23.Ne5 Rc8 Svidler's play is natural and there might not be such a great point in going into the details of whether ♖fd8 was more accurate before ♘d7 or ♖fe8 before the knight move. As things stand Black has the slightly better game but Sergey has things under control. **24.a4 Be8 25.Nd3 Bd6?!** This idea of ♘c4+ exchanges a pair of minor pieces and reduces White's difficulties. **26.Bd4 Bg6 27.Nc5 Bxc5 28.Bxc5=** Now it is just equal. **28...Rc6 29.b4 Rhc8 30.a5 Bd3** After a subsequent ♘d5 the position will peter out and the players agreed to a draw. It can be said that the game was a success for Svidler as with the black pieces he was able to put substantial pressure on his compatriot. **31.Re1** Followed by doubling of the rooks on the c-file, and ... ♘c5, puts more pressure on White. **31...Rd8 32.Rad1 Bb5 33.h4 Kc8 34.Rd4↑ Rd7**

[35...e5 36.Bg4∓ The e-pawn is isolated and the bishop is coming next to c6, this is quite a depressing and

one-sided position in Black's favour.]
36.R4e3 Nd5 37.Rxe6 Rxe6 38.Rxe6 Nf4∓ And Black definitely has pressure. **39.Re4** was an option, but once Svidler saw that he could go into a slightly better endgame with nothing to worry about, he immediately exchanged the queens.

16.0-0 Caruana isn't interested in going d4 immediately. Instead he tries to strengthen his position with ♘e3. **16...Nc5** Although ♗g5 wasn't such a huge threat, Svidler prevents it. **17.Rd2** At first sight this move looks pretty illogical as the knight on g3 is sort of dominated by the pawn on g6. The knight could have been placed better on e3. However, White's idea now would

surely be to break in the centre with d4.
17...Rae8
[17...Nfe4 18.Nxe4 Nxe4 19.Rc2]
18.Rfd1 Nfe4 19.Nxe4 Caruana is taking it slow. He wants to maintain maximum pressure in the position before committing to anything.
19...Nxe4?! Peter loses his patience and breaks in the centre but this is exactly what Caruana was looking for. This completely justifies the placement of the knight on g3 as it gets to the e4-square.
20.Rc2 a5
[20...g5 21.Be3 The enemy rook is already on the first rank so it is time to take the rook from one side to the other. a6? This is incorrect. Sitting at the place where he was did not give the orientation of the board and pieces when he had worked on this endgame at home! Often we have a question in our minds - What exactly differentiates a strong 2550 GM from a super strong 2750 GM. This game should answer that question. **1.e4 c5 2.Nf3 d6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 a6 6.Bg5 e6** This was first played by Tartakower against Rubinstein in 1929. **7.f4 Be7 8.Qf3 Qc7 9.0-0-0 Nbd7 10.Bd3 b5 11.Rhe1 Bb7** Now this is a very safe variation for White and one in which he hardly ever loses. [17.exf6 Qxg3-+ All of White's mistakes were just imperceptible. It was as if one would not know the reason why Black won. In the first game we made a considerably short draw, so I had a bit more time to prepare for the Grunfeld which was more or least given against Peter. **1.e4 c6 2.d4 d5 3.exd5** Against Mamedyarov I've played the calmer system with Bf4. This time I wanted to get a bit more complicated position, so 3.f3 felt like a decent choice. **3...cxd5 4.c4 Nf6 5.Nc3 e6 6.Nf3 Bb4 7.cxd5 Nxd5 8.Qc2 Nc6 9.Bd3 Ba5 10.a3 Nxc3 11.bxc3 Nxd4** I must confess that I didn't expect this line from Peter, so I only barely remembered my file. Last year, during the Mexico World Championship, he used the English opening to transpose to a reversed Boleslavski variation of the Sicilian. (See Morozevich,A (2758)-Grischuk,A (2726)/Mexico City MEX 2007/CBM 120/[Marin] (1-0, 42)). Both games have some strategic elements in common: The structure of both sides will more or less be immobile and Morozevich will mainly play on the light squares. **9...b6 10.0-0 Bb7 11.d5** But this really is a rare line. **11...Bxc3** Black immediately neutralises the fianchettoed white bishop. **12.Bc4 Bg7**

[12...Qd6 13.Rb3 Bg7 14.e5 Bxe5 15.Nxe5 Qxe5 16.Re1

A) 16...Qd6 may have been a better possibility to retain equal chances in a complicated position. Before defining the queen's intentions, he should have improved the placement of all other pieces to the maximum, with, say 17.Bg5 f6 *(*Now, *17...Re8 18.Rbe3* leaves the bishop in an uncomfortable situation.*)* 18.Bh6 Rf7 19.Rbe3 when I would slightly prefer White. The threats of d4 (with the possible insertion of the moves ♗d2 and/or e4) force Black be on permanent guard. Playing for the standard ...f5 would justify White's strategy, for instance Bc8 20.Re6 Bxe6 21.dxe6 Qxd1 22.exf7+ Kh8 23.f8R#!±;

B) 16...Qd4 17.Qxd4 cxd4 18.Rxe7 Rc8 19.Ba3 Rxc4 20.Re8+ Kg7 21.Bf8+ Kf6 22.Rf3+ Kg5 23.h4+ Kh5 *(23...Kxh4!-+* Now, the generally desirable *24.Re5* would leave the queen terribly misplaced.*)* 24.Rxf7 Nd7 25.Rxh7+ Kg4 26.f3+ Kf5 27.Rf7+ Nf6 28.Re4 Rc1+ 29.Kh2 g5 30.g4+ Kg6!-+ 31.Rg7+ Kh6 32.hxg5#]

13.Qe2 Qc8 14.Bb2 This is a thematic move. If White succeeds in exchanging

queens under favourable circumstances, his pressure on the queenside combined with a latent kingisde expansion (something more difficult to achieve with queens on the board!) would leave him with a long-lasting plus.

[14.Bg5]

[14.e5]

18...Nd7 19.h4 h6 20.Re1 White has been moving his minor pieces around, aiming to provoke as many pawn advances as possible. On the queenside, Black has created for himself some weaknesses, but in the centre he is quite solid. This is precisely the area which White should focus on during the next phase of the game.

[20.Qf4 Kg7 21.h5 g5]

20...Qc6 Svidler concentrates his rooks in the centre. **21.Nh2** My feeling is that, starting with this moment, Morozevich' "hyper-modern" play crosses the limit of admissible risk. Many players, like, for example, Svidler and Mamedyarov, played the Budapest Gambit when they were young. Playing a gambit seems like a good idea for a growing player since it helps him to learn about the value of the pieces. 1.e4 c5 2.Nc3 d6 3.Nge2 Nf6 4.g3 Nc6 5.Bg2 g6 6.d3 Das ist eine seltene, aber durchaus spielbare Variante. **6...Bg7 7.h3 0-0 8.0-0 Rb8** Diesen Zug muss man eher früher als später machen, weil die Idee von Weiß darin besteht, auf c6 zu nehmen und dann e5 zu spielen, um die schwarze Bauernstruktur zu zerstören: **9.f4** Weiß will auf c6 nehmen, dann a5 spielen und ♙e3- ♙b6 folgen lassen.

Sonst kommt man immer wieder zu demselben Stellungstyp.

[9...Nd6 10.dxc5± 1-0 Polgar,J (2699)-Corrales Jimenez,F (2585)/ Khanty-Mansiysk 2011/CBM 145 (52) Bxa1 11.cxd6]

10.Qxe4 Das ist die klassische Spielweise - alle spielen es, niemand bekommt etwas. Weiß sollte versuchen, die Spannung im Zentrum so lange wie möglich zu halten. **10...Bf5 11.Qe3** Das ist die Idee des Zuges 10.e5.

1.d4 Nf6 2.c4 e6 3.Nc3 Bb4 4.e3 0-0 With this move Black avoids the Exchange Variation of the QGD (arising after 4...exd5) and shows that he is ready to play the Semi-Tarrasch, or as it was known in the USSR, the Improved Tarrasch Defence. Many players simply hate the Karlsbad structures. **5.Bd3 d5 6.Nf3 c5 7.0-0!?** This is a very interesting idea to avoid the theoretical lines. [Martin,Andrew D]

Our first game this month features an exciting King's Indian, where Svidler shows respect to Robert Byrne by employing one of his opening systems. **1.e4 e5 2.Nf3 Nc6 3.Bc4 Bc5 4.c3 Nf6 5.d4 exd4 6.e5** 6.♗e3 is no longer automatic here, as White players try to find a way around lines with a quick ...c7-c5. **6...d5 7.Be2 Ne4 8.cxd4 Bb4+**

This method of counterplay gains in strength when c4 is unprotected. Good timing by Svidler. **9.Bd2**

[9.Nbd2 0-0 10.0-0

A) 10...Bf5 11.Nb3 f6 12.a3 Be7 13.Be3 fxe5 *(13...Qd7!)* 14.dxe5 Qd7 15.Nbd4;

B) 10...Bg4 11.h3 *(11.Nb3* looks a bit more dangerous now, but Black can lie on the ropes with *f6!* and soak up the pressure: *12.Be3 fxe5 13.Nxe5 Bxe2 14.Qxe2* Psakhis,L (2625)-Gentilleau,J (2220)/Andorra 1995 and now *Qe8!* would have been best, with plenty of counterplay. *15.f4* whilst the d file can be opened, looks premature. Black acheived good prospects in the following recent game:*)* 11...Bh5 12.Nb3 f6 13.exf6 *(13.Be3 fxe5 14.Nxe5 Bxe2 15.Qxe2 Qe8* White's queen has enjoyed a world tour, but I prefer Black in this final position. *)* 13...Qxf6 14.Be3 Rae8]

9...Nxd2 10.Nbxd2 0-0 11.0-0!? Really going for it, but White has burned his bridges already by playing h4 and then castling long. **11...f6 12.Rc1**

[12.a3 Ba5! was the best try, initiating complications and keeping Black's advantage to a minimum: *(12...Bxd2! 13.Qxd2 Re8 14.Rac1 fxe5 15.Bb5* was a serious alternative, but Svidler cannot see a reason why he should not capture on f3. If he moved on with *e4* we might have seen an extraordinary sequence: *16.Bxc6!? bxc6 17.Ne5)* 13.Bb5 Ne7 14.Qc2 Bf5 15.Bd3 Bxd3 16.Qxd3∓ Ng6 17.g3 c5 18.b4 cxb4 19.Nb3 bxa3 20.Nxa5 Qxa5 21.Qb3∓ fxe5 22.Rxa3 Qd8 23.dxe5 Qd7 24.e6! Qxe6 25.Qxb7∓]

12...Kh8

[12...fxe5 13.dxe5 a6 *(13...Qe7 14.Nb3 Nxe5* looks completely winning for Black. I think I prefer *15.Qxd5+! Nf7 16.Bc4)* 14.a3 *(14.Nb3 Re8)* 14...Ba5 15.Nb3 A very picturesque final position. Touchdown! Bb6 put up sterner resistance, but even there]

[12...a6 13.a3 with total control, although as Black wins quickly one can hardly be critical. *(13.Nb3 Re8 14.a3 Bf8)* After 13...Ba5 14.b4! Black can comfortably allow his pawns to be doubled, as the d5-square is then covered and he can occupy d4. Bb6]

13.Nb3 Bg4 14.a3 Be7! 15.Re1 fxe5 16.dxe5 Rf4! Absolutely necessary, to block lines.

[16...Qd7 17.Nfd4 *(17.Rc3 Rad8?* After this, White is swept away. *18.Bb5 d4 19.Bxc6 Bxf3 20.Rxf3 Qxc6 21.Rxf8+ Bxf8 22.Qd3)* 17...Bxe2 18.Rxe2 Nxd4 19.Nxd4 c5 20.e6 Qd6 21.Nf3]

17.h3 Bh5 18.Nc5 Bxc5 To the end White will be labouring to get rid of the advanced Black pawns. This is classic King's Indian play by Svidler, who first drains all the life out of White's attack and then completely takes over the position. Caruana is already struggling to find a way to revive his initiative. **19.Rxc5? d4 20.e6 Bg6 21.Bd3 Qf6 22.Ng5 Ne7 23.Bxg6 hxg6!** Undermining what is left of the White centre. What becomes clear is that the white king is by far the more vulnerable of the two. **24.Ne4 Qxe6 25.Ng5 Qf6 26.Re6 Qf8 27.Rxg6 Rh4** Another excellent move, opening lines.

[Gormally,Daniel]

1.d4 Nf6 2.c4 e6 3.Nf3 Bb4+ 4.Nbd2 0-0 5.a3 Be7 6.e4 d5 7.e5 Nfd7 8.Bd3 c5 A line that has been essayed by McShane amongst others. Black's play is not as aggressive as in other King's Indian lines, but he remains solid nonetheless. **9.h4 g6 10.h5**

[10.cxd5 exd5 11.h5 cxd4 12.Nb3 Nc6 13.Bf4 Re8 14.hxg6 leading to an ending which is extremely difficult to evaluate, although my feeling is that Black's chances are no worse. fxg6 *(14...hxg6 15.0-0 Bf8 16.Re1* just looks bad *Qb6 17.Qc2 Bg7 18.e6 Rxe6 19.Rxe6 fxe6)* 15.0-0 Nf8 16.Nbxd4! Nxd4 17.Nxd4+- Ne6 18.Be3 Rf8 19.Qd2 Bc5 20.Nxe6 Bxe3 21.Qxe3 rather favours white, as the black king remains exposed Bxe6 22.Rac1 is disastrous After the direct Rf7! Black would have faced an impossible task, trying to keep all the loose strands of his position together. 23.f4 Qd7 24.Qd4 Raf8! with the threat of ♘b6, is rather killing.]

[10.b4+- cxd4 11.Qe2 Nc6 was another way to play, immediately trying to hit on the pawns. In general Black's armada of pawns looks rather impressive, but they can also become weak and overextended, and whats more his king lacks long-term protection. 12.cxd5 exd5 the most direct route although this requires some courage - the queen looks vulnerable on h3, but in reality Black has no way of taking advantage of that, as his own position is too loose. 13.e6 Nf6 14.Ng5 Bxe6 15.Nxe6 with a seemingly very strong threat of ...♗g5, but the problem is that this runs into fxe6! when Black's position collapses like a pack of cards: 16.Qxe6+ Kg7 17.0-0 Nh5 *(17...Qd7)* 18.Nf3 a6 19.Ng5 Rf6 20.Qe2 Qd6 21.Re1 h6 22.Ne6+ is another option, giving space for the queen on b3 for example, but probably not necessary Kf7? 23.Bxg6+! Kxg6 24.Qg4+ is a good example of the perils that can befall Black Objectively Black already had to think about taking passive measures with Kh7 but this is a hard decision to bring yourself to make. In any case Black's task would remain unpleasant after 25.Qxh5 Rg8 at least with the plan of ... ♘f8-e6 etc.. 26.Ng5+ Kg7 27.Re6! but players like Jobava are loathe to adopt such a passive policy - this is why they are 2700. He would rather fall on his sword than fade away quietly. In another game Black elected to advance on the kingside immediately: Qxe6 28.Nxe6+ Rxe6 29.Bf4 Rd8 30.Rd1 Rf6 31.Rd3 Kh7 32.Rg3 Rdf8 33.Qg4 R6f7 34.Bxh6! was Del Rio de Angelis,S-Movsziszian, K La Roda 2009. And White's achievements on the queenside are significantly more telling than Black's rather slow advance on the kingside; he went on to win a few moves later.]

[10.Qc2 cxd4 11.cxd5 exd5 12.h5]

10...cxd4 11.Qc2 Nc5 A logical

continuation of his previous strategy, that is to create a clump of pawns on the kingside that will cramp White.

[11...Qe8 12.Nb3! Regaining material, and winning. Nc6 13.Bf4 dxc4 14.Bxc4 Nb6 15.Bd3 Nd5 16.Bh6 Bd7 17.Qe2+- Qd8 18.Nbd2 Rc8 19.g3 Qc7 20.Kf1 Na5 21.Bxf8 Rxf8 22.Qe4 f5 if anything rather favours Black, as his queenside clump is more dangerous than the trumps White holds on the other side of the board. Of course the computer crunches out 23.exf6!→ without a second thought. The attack works because the black king is too exposed. Nxf6 24.Qe5 Qxe5 25.Nxe5 Bc6 26.Nxc6 Nxc6 27.hxg6 hxg6 28.Re1! Ng4 what else? 29.Rxe6 Nce5 30.f4 and White, a pawn to the good but a much safer king, must be winning. The immediate Nxd3 is premature after 31.Rxe7 Ne3+ 32.Ke2 so White prepares this idea, so he will have mate on g5 at the end Nf5 33.Reh7 Nxb2 34.Rh8+ Kf7 35.R1h7+ Ng7 also leads to a very dangerous attack The alternative 36.Rxf8+!? Is not as crushing as it looks at first sight. Kxf8 pretty much forced, 37.Rh8+ Kf7! 38.Rb8]

12.cxd5 exd5

[Doubtless though, a month ago Svidler would have found the winning line 12...Nxd3+! 13.Qxd3 Qxd5! in his sleep, but as indicated before, fatigue had no doubt kicked in.]

13.Nxd4 Nc6 14.N2f3 Nxd4!?

Logical, but as it turns out, too weakening. Allowing your king to be denuded so early in the game isn't really advisable against someone with the aggressive intentions of Svidler. But in general I find it hard to believe that this variation will catch on for Black, as his opening position looks rather horrible in any case. The g5-pawn is an obvious target for White, and active play is hard to come by. **15.Nxd4 Qc7 16.Bf4 Nxd3+ 17.Qxd3 Qc4 18.Qxc4**

[18.Qd2]

18...dxc4 19.Rc1 b5 20.Nxb5 Rb8 21.Nd6 Rxb2 22.Nxc4?! True to his style, Svidler is playing as directly as possible. Leaving the queenside to the winds, he is staking all on a direct mating attack. But for once Svidler, who greatly impressed with his play in the 2013 candidates, and dazzled even more with his press conferences afterwards, quoting incredibly complex variations and lines here there and everywhere, is let down by his calculation in this ultra-sharp position. Surely fatigue was weighing heavily on him at this point, as after the exhausting tournament that was London, he went straight to the Bundesliga, then on to this event. **22...Ra2 23.hxg6 fxg6 24.Bh6 Rd8 25.0-0 Be6 26.Nd6? Bxd6 27.exd6 Rxd6!** Now Black is in time to defend his weak points. **28.Rfe1 Kf7?? 29.Rc7+! Rd7 30.Rc3??** A comedy of errors has appeared on the board. But it is easy to sit there with a computer program at home and critique - during the game you don't have that luxury. **30...Bd5 31.Rd1 Rb2 32.Rcd3 Ke6 33.Re1+ Kf6 34.Red1** Now the ending probably slightly favours Black, but Svidler was at least able to hold on for a draw - to lose such a game would have been quite an injustice! **34...Ke6 35.Re1+ Kf6**

21...Nd7 Black misses a good defensive opportunity: **22.Rb1**
[22.Ba3 Rfe8 23.Bb4! Nc4]
22...Rfb8 23.Ba3? An absolutely wrong sacrifice of this crucial pawn.
[23.Nf3 Bb3 *(23...Rxb1 24.Bxb1)* 24.Bd3 *(24.Bxb3 Rxb3 25.Rxb3 Nxb3 26.Nxe5 Nxe5 27.Qxe5* may be a better way for White to hold on. *Re8!?)* 24...Bc4]
23...Nc4 24.Nxc4 Qxc4! After this active move it is Black who plays for a win. **25.Bb4 a5 26.Bd3 Qa2 27.Ra1 Qd2 28.Red1 Qf4** The simplest continuation. **29.Qxf4 exf4 30.Be7 Re8 31.Ba3 Bb3 32.Bb5 Bxd1! 33.Bxd7**

5...a6 6.Bf1 A very popular move nowadays. White would like to avoid some critical lines. **6...d5 7.d3**

[7...g6 and 8.exd5 was also tried. *(8.Bg5 Bg7 9.c3 h6 10.Bc1 Qc7 11.h4)* The other possibilities are 8...exd5 and 9.d4 cxd4 is another main move. 10.Nxd4 Bg7 11.Nxc6 bxc6 12.Bg5 Be6]
8.e5 Nd5 9.c4
[9.Bg5 Be7 was an option again, but Carlsen preferred to keep his ♗ pair. In the event of 10.Bxe7 Black can play immediately Qxe7! with a promising position. 11.g3 was also interesting. Black gives up his strong ♗ to destroy White's ♙ structure. It is difficult to judge which factor has bigger importance. 0-0 12.Nbd2 b5!? probably Svidler wanted to play this ♙ sacrifice and play on the light squares. Black is really missing his bishop here, but on the other hand, he is a pawn up. 13.h4 Bb7 14.Bh3 h6 15.Nf1 Rfd8 now the ♖ can be trapped. 16.N3d2 Rac8]
[9.g3 Be7 10.Bg2 and Black has no problem. *(10.h4 h6* and Black's position is completely solid. Leko-Adams, London 2012 *11.c4 dxc3* This is the difference. That is why Svidler went to c2 with his bishop. *12.bxc3* looks a little weird and could have been met effectively by *b5! 13.c4 Nb6 14.Nc3 bxc4 15.dxc4 Qxd1!* Black has managed to avoid the f4 idea, but his bishop on h5 is out of play, while the knight on h3 is just temporarily misplaced, as it will soon be improved through f2. *16.Rxd1 Na5±* Svidler-Sargissian, Ningbo 2011 *17.Nd2* would have been met with *Nd7!↑* which gives a strong initiative for White.*)* 10...b5 11.Nbd2 Bb7?! 12.Ne4
A) 12...Qc7 13.Bg5 0-0 *(13...Bf8* was played recently in a top game: *14.c4 dxc3 15.bxc3)* 14.Bxe7 Ncxe7 is forces the take on b3 and Black gains a very unpleasant advanced ♙. 15.h4 Rad8! and Black drives his ♘ to c5 and it looks nicely placed. 16.a4 is the most common move.;
B) 12...h6?]
9...dxc3 10.bxc3 Rb8
[10...b5 11.c4 Nb6 12.Nc3 bxc4= Immediately 13.dxc4 would have still been too early. Black can play Qxd1 14.Rxd1 Be7!∓ with a slight advantage. *(14...Nd7* similar to the previous line. *15.Ne4 Ndxe5 16.Nxe5 Nxe5* with a double-edged fight. *17.Bb2)* Probably 15.Be3 was the best waiting move, because

Black also has difficulties finding a useful move. 0-0 16.Ne4]

11.Bb2 b5 Both players are following theory. The upcoming positions are considered to be nicely playable for both sides. All the pieces are on the board, which ensures a complicated game where the stronger player might try to outplay his opponent with either colour. **12.Nbd2** Svidler had already two games for this. White wants to play d4 at a good moment, but of course, this requires long preparation. **12...Be7 13.Ne4 0-0** Typical prophylaxis against ♘ or ♗g5. **14.Rb1** From the 12th move, White prepares for d4. This time he protects the e4 ♙. **14...Nb6** Also a usual move, preparing for ♖d8.

[Black can also force a draw by 14...Bb7 15.c4 Nb6 16.Ba1]

15.Ba1N The first novelty of the game, White would like to go back with his knight to e3 and then, d4 finally becomes possible. **15...Bb7** This is the standard setup and the idea of the previous ♕c8 move. Black would like to play ♗f8 and be ready to push d5 at a good moment. **16.c4 b4**

[16...bxc4 17.dxc4! White has to sacrifice his ♕ with Qxd1! 18.Rexd1 Nb4 Only Black can be better. 19.Nc3? Bxf3-+ 20.gxf3? g5!-+]

17.Qd2?! This seems like an inaccuracy. The last preparation for d4, but this allows Black's strong reply.

[17.d4 cxd4 18.Nd6 Ba8 *(18...Bxd6± Now the exchange of the a5 pawn for the e5 one favours White. White seems to have an edge here. On 19.exd6 White simply answers Qxd6 and the e5 ♙ become vulnerable. Maybe 20.Nxd4 was slightly better, as the e5 pawn is not really hanging. Nxd4 21.Qxd4 Qxd4 22.Bxd4!?)* 19.Nxd4 Black is also OK here. Nxe5 20.Nxe6 Nf3+ *(20...fxe6 21.Bxe5)* 21.Qxf3 Bxf3 22.Nxd8 Bxd6 23.Nxf7⇄ and the ♘ goes to d4. Rxf7 is an interesting alternative. White would like to provoke a weakness on the kingside with the threat of d4. 24.gxf3 Rxf3! 25.Bd4]

17...a5! Excellent timing by Carlsen. White's last ♘ move left the pressure from the important e5 ♙, so Black can immediately start the action.

[17...Nd7 18.Qf4∓ Black is much better. after Qc7 19.Qg3]

18.Qf4 Nd7 19.Qg3 Ba8 Black keeps the e5 pawn protected and, at the same time, attacks the pawn on a5. **20.h4?** This typical move is a mistake. White would like to open the back rank and avoid the pin after ♗g4. The initiative passes to Black and Carlsen does not let it slip away anymore.

[20.d4 cxd4 21.Nxd4 Nxd4∓ Thanks to the pair of ♗s and passed ♙, Black looks very nicely placed. 22.Bxd4?! White would like to protect the a1 ♖ and threaten ♗xc6, but after Bxe4! 23.Rxe4 Nc5 24.Rg4 g6]

20...a4! A very strong move! Black prevents d4 and can exert pressure on the d3 weakness and soon, the a5 ♙ will be hanging as well. **21.h5 h6 22.Qg4** Svidler tries to activate his ♗ from a2. **22...Qc7!** Keeping the pressure on the d3 ♙. **23.Nd6**

[23.d4?! is not so good, because cxd4 24.Nxd4 Nxd4 and Black has avoided everything, White cannot continue the attack. For example: *(24...Ncxe5 25.Qg3)* 25.Bxd4 Bxe4 26.Qxe4 Rfd8∓ 27.Bd3 Nf8]

23...Ncxe5! 24.Nxe5 Nf6 25.Qd1?

This allowed a tactical blow, which actually Carlsen judged too risky. **25...Bxd6 26.Qxa4 Nxh5 27.Qd1 Nf6 28.Ng4!** This was Svidler's plan, when he took back with the ♗ on d4, but unfortunately for him, it does not solve the problems. **28...Nxg4 29.Qxg4 e5!** A great positional move! Black protects the d3 ♖, fixes c3 and frees the c5 square for his ♗, where it puts very strong pressure on f2. The additional weaknesses on c3 and a5 are too much for White to hold the position. **30.f4 Rbe8 31.Re3 f6!** Carlsen activates his pieces.

[31...f5 32.Qg6 getting back the e5 ♙.]

32.Rbe1 Qf7 33.f5 Svidler tried the last trap with the threat of ♖h8 ♔xh8 ♕xh6 and mate on g7, but of course, this doesn't work on this level. **33...Bc6!** A cool defence against the ♖h8 and it also creates some threats of destroying White's position. **34.Rh3 Kh7!** White cannot avoid losing a piece. **35.Bb2 Ra8 36.Bc1 Rg8**

[36...Rxa2!-+ 37.Bxh6 also led to Black's advantage after gxh6 38.Rxh6+ Kxh6 39.Re3 Qh5!∓ White has serious problems with the a5 ♙. Black is clearly better. 40.Rh3 not the best, because Be8 41.Rxh5+ and White has Bxh5! to attack the d5 ♖. 42.Qh4 Ra7! 43.Be2 Kg7 44.Qxh5 b3 The two ♖ will give unpleasant counterchanches for White. 45.Qg6+ allows some counterplay for White. Kh8]

37.Re2 Bf8 38.Rf2 Re8!-+ 39.Be2 was the best chance, although Black has various ways to remain better here as well. **39...e4 40.Qh4 exd3** The following line is forced: **41.Bh5 Re1+ 42.Rf1! Rxf1+! 43.Kxf1 Qe7 44.Rxd3 Qe5!∓** and Black is better. Of course not **45.Qg4? Be8!+-**

[45...Bd6 46.Bf7-+ Rf8 is not possible. 47.Be6 Kh8]

46.Bg6+ is also good to prevent ♕e4. **46...Bxg6** was too early **47.fxg6+** and ♗xf2 is only a check. There is no reason for Black to hurry with this plan. **47...Kh8** was slightly better **48.Rd7 Bd6** followed by ♗g3. The computer immeditely finds the strong **49.Bxh6! Qa1+ 50.Kf2 Qxa2+** This was the critical position where I think Carlsen missed a winning combination or just did not want to risk a miscalculation. Black wins after a fantastic tactical blow: **51.Kf1! Qb1+ 52.Kf2!! Qc2+ 53.Kg1** and Black has too many threats. ♖xg3, ♕h3 and the simple ♗xd1. **53...Qb1+ 54.Kf2-+** with an extra ♙ and a strong attack. **54...Qb2+ 55.Kf1**

The queen on the c2-square is supporting the centre and also indirectly monitoring the c-file.

14...Be6 15.Bxe6 Rxe6 16.c4 Nxe4 Svidler can claim to have positional feeling on a par with that of his opponent. It helps him to realise, that he has to succeed with the pressure against White's centre. **17.dxe4 a5 18.c5 Bf8 19.Qb3 axb4!** The pawn sacrifice on the h6-square was surely anything but a dream solution for the defender. Black has achieved significant pressure against the central pawns and White could hardly claim to have achieved the optimal coordination of his pieces. **20.axb4 Rxa1 21.Rxa1 b6 22.b5 Nd4 23.Nxd4!?** Kamsky has sensed very well, that the black pieces are quite exposed and the position is holding only with the help of tactics. **23...exd4 24.Qd5?** Chessplayers must fight against many enemies in the course of a game. One of the most dangerous in the home ranks is the unsatiable desire to win some of the opponent's material. White was probably frustrated by the meagre gains after the correct move 24. ♘xd5! and has decided to accept the risk and win an exchange. **24...Qxd5**

Sigeman & Co 28th (2)		05.05.2023

[Svidler,Peter]

This being my first classical tournament since the Grand Swiss 2021, I had a customary (somewhat intentional) quiet first round game vs Mishra, and then had the fun assignment of preparing for a Black game vs Boris. I've been facing that task for far longer than most of the field of the TePe Sigeman 2023 has been alive, and despite that, I tend to fail at it. And so it came to pass. Da dies mein erstes klassisches Turnier seit dem Grand Swiss 2021 war, hatte ich die übliche (etwas absichtliche) ruhige Erstrundenpartie gegen Mishra, und dann die lustige Aufgabe, mich auf eine Schwarzpartie gegen Boris vorzubereiten. Ich stehe dieser Aufgabe schon viel länger gegenüber, als der Großteil des Feldes des TePe Sigeman 2023 lebt, und trotzdem neige ich dazu, dabei zu versagen. Und so kam es, wie es kommen musste. **1.e4** I was ready to play 1.d4 Nf6 2.c4 d6, so this move is giving me an out - I could still play 1...c5 here, or anything, really. Ich war bereit, 1.d4 Sf6 2.c4 d6 zu spielen, also gibt mir dieser Zug einen Ausweg - ich könnte hier immer noch 1...c5 spielen, oder irgendetwas anderes, wirklich. **1...e5 2.Nf3 Nc6** But no, I was pretty set on this idea, having noticed that Boris appears to dislike allowing the 3. Nc3 e5 4.d4 e4 lines, meaning I was very likely to get Aber nein, ich war ziemlich auf diese Idee fixiert, nachdem ich bemerkt hatte, dass Boris die Varianten 3.Sc3 e5 4.d4 e4 anscheinend nicht gerne zulässt, was bedeutet, dass ich sehr wahrscheinlich **3.Bb5 Nf6 4.d3 d6** ...this position, in which he has been playing 5.d5 fairly consistently in recent years. 6.Nbd2! There is really no excuse I can offer for not looking at this before the game, this is far from a novelty, and the engines love it, too. Es gibt wirklich keine Entschuldigung dafür, dass ich

mir das nicht vor der Partie angeschaut habe, das ist alles andere als eine Neuerung, und die Engines lieben es auch. **6...0-0?!** There aren't any good choices as such, but this is a little bit too artificial. Es gibt an sich keine gute Wahl, aber das ist ein bisschen zu künstlich. **7.0-0 Bd7** I went for this with some vague dreams of creating enough of the distraction by hinting at b7-b5 to maybe deter Boris from the most straighforward development but it was never going to be a realistic proposition. Ich bin mit dem vagen Traum angetreten, durch die Andeutung von b7-b5 genug Ablenkung zu schaffen, um Boris vielleicht von der geradlinigsten Entwicklung abzuhalten, aber das war nie ein realistisches Unterfangen. **8.Re1 Re8 9.Nf1!** Very nice move, making sure b5 is unplayable and preparing to grab more space with f4. Sehr schöner Zug, der sicherstellt, dass b5 unspielbar ist, und sich darauf vorbereitet, mit f4 mehr Raum zu gewinnen. **9...Bf8** Incredibly ugly choice, but I couldn't see any way to not play this. [15.d4 Ng6 16.Ne3!? was my original plan. I felt like I absolutely don't care about the rook on f8, and the d7 knight belongs on c5, therefore securing it from being kicked with b4 later down the road is very important. However, I became very worried I will get mated on the K side if White keeps the bishop on h6, castles Kingside and just starts amassing the forces to attack my king directly. Looking at it now, with the engine's help, I feel like both parts are sort of true, if that makes any sense: the position is extremely dangerous, but only if White plays very precisely. war mein ursprünglicher Plan. Ich hatte das Gefühl, dass mir der Turm auf f8 völlig egal ist und dass der Springer auf d7 nach c5 gehört, daher ist es sehr wichtig, ihn davor zu schützen, später mit b4 getreten zu werden. Ich wurde jedoch sehr besorgt, dass ich auf am K-Flügel Seite matt gesetzt werde, wenn Weiß den Läufer auf h6 behält, kurz rochiert und einfach anfängt, die Kräfte zu sammeln, um meinen König direkt anzugreifen. Wenn ich mir die Stellung jetzt mit Hilfe der Engine ansehe, habe ich das Gefühl, dass beide Teile irgendwie wahr sind, wenn das überhaupt Sinn macht: Die Stellung ist extrem gefährlich, aber nur, wenn Weiß sehr präzise spielt.]

15...Bd7 since 16.Na3 doesn't look all that hot we're at least forcing White to give us a protected passer on d4 - and perhaps even more importantly, some squares for our knights. The easiest way to make sure Black isn't worse either is to play Schwarz keine Möglichkeit hat, irgendeinen der weißen Bauern im Zentrum einzusammeln, ohne massives Gegenspiel zuzulassen, aber wir haben schließlich beschlossen, dass es wahr sein muss, und die Engine bestätigt, dass Schwarz hier nicht einmal ein kleines bisschen besser steht, da der Versuch, den c4-Bauern anzugreifen, unweigerlich dazu führt, e4-e5 zuzulassen, oft mit katastrophalen Folgen. 1.c4 c5 2.Nf3 Nc6 3.e3 e5 4.Nc3 Nf6 5.d4 e4 This relatively unexplored system of development could be called the "Accelerated Deferred Steinitz Variation". Black refrains from an early ...d6, maintaining the possibility of opening the centre with ...d5 at once. **6.Ne5** But now, he has to give up the

tension in the centre at once. **6...g6 7.Be2!?** A rare move. White refrains from building up a strong pawn centre for the sake of keeping the d-file open.

[7.Rb1]

7...Bg7 8.0-0 0-0 9.b3

[9.Rb1

A) 9...Ne7= In the absence of knights, the control over the d5-square as well as the space advantage lose relevance. 10.dxc5 Ne8= Black has come up with several new ideas after the more natural 11.f4 lately. One critical position arises after *(11.Nxf7 Rxf7 12.Nxe4)* 11...exf3 12.Nxf3;

B) 9...Re8 10.Nxc6 From a classical point of view, it looks as if White should have a big advantage. He has a natural development and a strong centre. However, in practice it is not easy to find a constructive plan, since Black does not have major weaknesses. dxc6 It may seem illogical to exchange the generally passive e7-knight, but White gets the possibility of putting pressure on the c-file. 11.dxc5 Not only preventing ♗g5, but also preparing ... ♔h7 followed by ...f5. Nd7 12.Qc2 *(12.Na4 Qg5 13.b4 Ne5* Dominguez Perez,L (2719)-Aronian,L (2786)/Moscow 2009. 9...cxd4 In many systems of the Ruy Lopez, this move is played almost automatically. In this position, its usefulness is questionable. The bishop is somewhat out of play on a4, because it does not contribute to increase the pressure against the (already non-existent) e5-pawn. Moreover, the b5-pawn will become a target soon, while the c5-square is slightly weakened.

[Playing against the b5-pawn too obstinately with, say 9...Ne7 10.Bb2 *(* The immediate knight manoeuvre *10.dxc5!?* may be more advisable. *Ne8 11.Nxf7 Rxf7; 10.f3 d6 11.Ng4 Nxg4 12.fxg4 Nc6 13.Nxe4 Re8)* 10...d6 11.Ng4 Nxg4 12.Bxg4 Bxg4 (preventing ...c5) would allow some counterplay on the opposite wing with 13.Qxg4!?⇄ f5 was played in two not too relevant games at a lower level.]

10.exd4 Re8 11.Bf4!N Immediately taking advantage of the first drawback of ...b7-b5.

[Under the changed circumstances, the central break 11.Nxc6 is less effective. Svidler probably feared that after a useful move such as dxc6 , the weakness of the c6- and

c5-squares may tell.]

11...d6 12.Nxc6 bxc6 13.Rc1 Going the natural way. **13...d5 14.Qd2**

[14.c5 a5 15.a3 Ba6=]

14...Ba6 15.Rfd1!? An interesting decision. White is ready to exchange the knight that seemed to lose stability in view of the threat of f2-f4, just created one move earlier (after h2-h3). In fact, White faces some slight problems of piece congestios, which prevent him from taking full advantage of Black's weaknesses along the d-file. **15...Rc8** Not an easy decision to take. Black avoids the exchange, hoping that White will not be able to coordinate his minor pieces. His immediate threat is ...b4. **16.h3 dxc4 17.bxc4 Nd7** Black gives up the plan based on ...b4. His last move restricts the c2-bishop and prepares ...d5.

[17...Qa5⩲ White's imperfect coordination makes the black pawns quite dangerous. The more brutal 18.Nxe4 *(18.Qc2 Rcd8 19.Rb1)* 18...Qxd2!? (As we will see, an useful move, anticipating the weakening of several squares along the e-file) 19.Nxf6+ does not yield any palpable advantage.The main problem is that the e2-knight remains passive and vulnerable. 18.Na4 Bf8 19.Bf1 By taking the knight away from the defence of the e4-pawn, White literally invites his opponent to play ...d5. It is not easy to find a way of delaying ♘d2-f1 in a constructive fashion, though.

[19.Rb1]

19...h5 Black cannot do without this pawn break, but White's superior development should offer him the best chances under the circumstances of central tension. **20.Qc3 Qf6 21.Be3 c5 22.Qa5**

[5.Qf3 c5 6.Bd3 Nc6⇄ Being slightly underdeveloped, White has problems preventing Black's counterplay on the dark squares.]
[The only game that actually reached this position went: 5.c4 c6 6.Nf3 White refrains from the more natural b3 followed by ♗b2, in order to avoid the exchange of the dark-squared bishops with ... ♗a3. This would not be a possibility after ... ♕c7. Bg4 7.h3 Bxf3 8.Qxf3 e6 9.cxd5 Qxd5 10.Qxd5 cxd5∞ Panno,O (2505)-Ricardi,P (2335)/Buenos Aires 1985/MCD (1-0, 38). We can notice that even here the queen was well placed on e7. Even the not too natural 11.c4 may have been preferable, winning a tempo over the game after Bb4+ 12.Bd2 Bxd2+ 13.Kxd2 , although I do not like the congestion of the black pieces around their own king. The paradoxical Nc6 was played in an old game at GM level. Although it seems that Black loses a lot of time, provoking the exchange on g6 at an early stage helps him define his general plan of regrouping. 14.f4 0-0-0 15.Ke3 h6 16.Rd1 Ne7 17.cxd5 Nxd5+ 18.Kf3 Nb6 19.Be2 Kb8 20.Rxd8+ Rxd8 21.Rd1 Rxd1⇄ Quinteros,M (2500)-Giorgadze,T (2495)/Hannover 1983/MCL (0-1, 46).

6.Bd3 Bxd3 7.Qxd3!? Qd7 8.f4 Such radical measures at this stage of the game are not too common. The whole plan would be less effective if Black had delayed the development of the queen's knight with 5...e6, because of a possible regroupment such as: 8... ♘fd7 9. ♘xg6 hxg6 Δ...♗d6, ... ♕e7, ... ♘a6-c7, ...e5, ... ♘e6. The way it is, the f6-knight does not seem to have good squares to which to retreat. **8...e6 9.Nf3 Be7 10.0-0 g6** It is not easy to criticise a move played by an ex World Champion twice (!) at such an early stage, but I fail to understand the point behind it. First of all, the indirect pressure against the h4-knight is released. Secondly, the battery ♕ + ♗ is set up in the wrong way (the queen should be in front of the bishop), failing to create any threats against the h2-b8 diagonal. **11.c4 Nc6** A very interesting position. It is not customary for Black to castle long in these lines of the Reti. **12.Rad1!?N** With both kings on the kingside, the plan based on b4-b5 would just create weaknesses, but the way it is the black king which starts to sense some danger. **12...Nb4?!** Black cannot not afford to lose so much time. **13.Qe2 c6 14.a3 Na6** This piece sacrifice is a logical consequence of Black's previous play, but is not entirely sound. Taking into account also his game against Galkin, I get the feeling that Kramnik is aiming for a slight change of style. He may wish to have the positional piece sacrifice in irrational positions in his fighting arsenal. In the present game, he will come close to justifying his adventurous play, while in the other game he will win outright. **15.b4 0-0**

[17...Ba4∞ Black is harmoniously regrouped, while the c2-bishop has problems finding an active diagonal. 18.Rd2 Rc8 19.Rb1 Bc6]

18.Be3 Nce6 This move is almost invariably played in this line, but usually at a slightly later stage. Black needs to activate or simply regroup his dark-squared bishop, with either ... ♗f8 or ... ♗d8-b6, both leaving the f6-knight vulnerable to an eventual ♗g5. The gneral view seems to be that it is better to make the useful piece moves first and only then weaken the king's position with ...h6. 19.Rfd1

[19.b4]

19...Rfd8 20.Bf4 Rxd1+ So in this position Black is down two pieces for a rook and a pawn, but he is hoping his initiative, combined with the weak squares around the white king, will provide compensation. Svidler, however, starts defending masterfully. **21.Rxd1 Bc6**

[21...Bd5 22.Bxd5 exd5 Black has recovered a pawn, and now he has obvious pressure. The a7-pawn looks dangerous but for the moment it is not going anywhere. 23.Rxd5 Rxb2]

22.Rd2 a5 23.Kf1 Kf8 24.Be3 Ke8 Trading the ♘ for the ♗ is risky. In many cases Black could always rely on invading on the 2nd rank and giving a perpetual with the ♘, as we saw in some variations. However, without this resource, Black is entirely relying on the lack of activity of the white ♘s, and the vulnerable position of the king, especially of the invasion point e2. If this is somehow patched up, the extra material and the passed pawn on the a-file will simply overwhelm Black. **25.f4 a4** Black has lost yet a little more material, but this time White's position actually looks very dangerous. For starters, he can't develop his queenside, which seems to allow Black a huge initiative, however Svidler has an ace up his sleeve. **26.Ba7!** This passed pawn will be the key of White's defence. By ramming it forward, he intends to tie down the black rooks, allowing him to comfortably develop and eventually exploit his material advantage. **26...Ra8 27.Be3 Rb8 28.Ba7 Ra8 29.Be3 1-0**

22.Nxc8 Bd4+ 23.Kh1 Rxc8 This is an interesting point to look at the position. White has the pair of bishops and has pressure on the c4 and a5 pawns. On the other hand, Black has a couple of well placed ♘s near the centre and can potentially put a lot of pressure on b2. It seems logical then that White must force Black into slowly but surely retreating. The best way to do this is by pushing out the centralised knights. Ivanchuk tries to manoeuvre around before committing to e4, but I think this gives Black too much freedom. **24.Bd5 Rd6 25.Rxf4 Bxc3 26.Bxf7+ Kg7 27.bxc3 Rf8 28.Raf1** Ivanchuk has shied away from committing to e4 at some point. Ivanchuk protects himself in the most obvious way possible, but things start getting murky. **29.c4?! Ra3 30.g4 g5?** This strange move seems to spoil the nice activity Svidler had achieved. The pawn can be taken without consequence, which gives Ivanchuk a strong advantage. **31.Rf5 h6 32.Rf6 Rxa4 33.Rg6+** White has an extra pawn and although Black is still active, it's hard to believe this is full compensation for the pawn. White's plan is now quite simple, he will untangle and win with his extra pawn. Black doesn't have any targets so as to be able to prevent this. **33...Kh7 34.Rd6 Kg7 35.Rd7 Kh8 36.Rf5 Ra2 37.Bg6 Ra8 38.Rf6 Re2** The position has simplified a little, and it doesn't help Black at all. 8...e4 9.Ne1 f5 10.Bb2 0-0 11.d3 One of the tabiya's of the 80's, this position has arisen hundreds of times. However, Black recently has shied away from what used to be the "only move", ♘a5, in favour of more restrained development. **11...Be6 12.dxe4**
[12.Rb1]
12...fxe4 Maybe the most natural move, but actually not the most popular. Areschenko had used ... ♕c7 earlier in 2011, but ... ♖c8 still has more adherents. **13.Bxe4 Bxc4** As opposed to the variation above in Erdos-Brkic, Black has played ♖fd8 instead of ♖ac8. This seems to me like it's a very slight improvement for Black. **14.Nc2**

[15...b6 16.Ne3 d4 17.Nxc4 dxc3]
16.Ne4 Hikaru feels it is time to snatch the pawn, something that becomes necessary sooner or later if Black doesn't take on d4 himself. This always comes with risk, however, as his structure is shattered and he is vulnerable down the d-file. However, in this specific instance he also does get the d4 square for his ♘, which is quite powerful.
[16.Na4 b6 17.bxc5 b5]
16...Bxe2 The most logical, with the threat of ♗b5. **17.Qxe2 d3 18.Qg4 Bxb2** This is an interesting Grünfeld scenario. Black is down a pawn, and it is certainly unclear if he will ever regain it. For the time being, White has a certain dominance over the centre with his minor pieces, and his rooks seem active, but these points might be illusory. First, the rooks are possibly on the best squares, but without coordination with the other pieces it is hard to believe they will cause much trouble. This draws attention to the fact that White's pieces in the centre look nice but are quite stuck. The ♗ on e3 defending c5, the one on d3 defending e4. True, the ♘ is powerful and controls a lot of squares, but its primordial role is to block the d-file. Black's game just seems easier. **19.Rad1?** Not a bad move, but coupled with thesubsequent moves, definitely the wrong idea. **19...Qc8 20.Qxc8** This was Hikaru's idea. To stubbornly defend the c5-pawn, as it seems it is poisoned. The problem with devoting yourself to the protection of a pawn, is that if for one reason or another this pawn is taken, the position frequently collapses. **20...Raxc8 21.Rxd3 cxb4** From a strategic point of view, it doesn't make any sense to exchange queens. However, Hikaru is relying on a simple tactical sequence to win material. What he might not have realised is that this material is more than compensated for; a fact that is far from obvious.
[21...c4 22.Rd7 b5 23.Rb1 Bg7 24.Nd6]
22.axb4 Aha, so this is the young American's idea, however Svidler has

seen further. **22...Rcd8 23.Rxd8 Rxd8 24.Rb1**
[24.b5 Nd4 25.Rb1]
24...Bg7 Sadly for White, his coordination is gone and all his pawns are weak. If he could hold on to all of them he would be doing great with his extra exchange, but that is just not going to happen. Svidler begins an initiative that does not stop until the end of the game. **25.h4 b5** White's pieces are just in all sorts of awkward places. Hikaru gives back the exchange, but it is too late and insufficient to equalise. **26.Bf1 a6 27.Nc5**

[34.Nxa6 Nxa6 35.Bxb5 Nc5 36.Kg2]
34...Nxd3 The king activity just doesn't compensate for the two pawns, Svidler with great technique wraps up the game. **35.Bxd3 Kf7 36.f4**

A) 39...a5 40.fxg6 hxg6 *(40...a4* Radjabov-Brkic, 2006 EU Cup *41.Bf5 a3 42.Be6 hxg6 43.Kd3)* 41.Bxg6 and Black has good counterchances, like in Erdos-Brkic, 2011. a4!? 42.Kd3;
B) 39...gxf5 40.Bxf5 and the question is not who is better... the only question is how many moves will White survive.
B1) 40...h6 41.g4 b4 *(41...Bf6!?* may have been what Svidler intended, as it was Areschenko's choice in his game against Koch. Luring the ♗ to f4 does have its pluses, but the ♖ on a8 doesn't seem to have an easy future. Future tests are needed. *42.g5 hxg5 43.hxg5 Bxg5 44.Kd3)* 42.Be6 a5 43.g5± seems to favour White a little. It's interesting to see what Svidler had intended to play in that case. a4 44.Bd7 is similar;
B2) 40...a5? 41.Bxh7 a4 42.Kd3-+ Be5 43.Bf5 Bxg3!? was a better way to proceed, and the game would've been rather interesting. White is very loose everywhere but still holds his pluses. 44.Bd7 seems to be the move that puts 'the question' to the immediate ♕c7.]
39...a5 40.f5
[40.g4 a4∓ is oh so unpleasant, for example 41.Bc2]
40...a4
[40...gxf5 41.Bxf5 h6 42.g4∓ Bf6

was a much better move, because it allows White to force Black's hand in the centre sooner. It doesn't equalise, but it certainly was a more stubborn move. 43.g5 hxg5 44.hxg5 This was probably what Hikaru was afraid of, as the ♘ on e2 now has no defence. However White has a nifty resource here. Bxg5+! 45.Kc2 a4 46.Bd7∓ and Black is again better, with a better structure and more targets, but the win is still far away.]

41.Bc2

[41.fxg6∓ is to no one's liking. Hikaru sacrifices another pawn in hopes that it will confuse Svidler. b4 42.gxh7∓ *(42.Bc2 b3 43.Bxb3 axb3 44.gxh7* The extra pawn will eventually tell, but Black has to overcome some technical difficulties. *Kb4)* 42...Bc3+ 43.Ke3 drops the a-pawn anyway. However this also was a better way of returning the exchange, for example: a3]

41...a3 42.Bb1 gxf5 43.Kc2 Kb4 44.Ba2 Be5 45.Be6 White has manged to recover his lost material, but at a great cost. His king is far away from the fight and the lone ♘ is no match for the combined forces of Black's passed e-pawn, ♘ and ♔. **45...a2**

[45...h5]

46.Bxa2 Bxg3 47.h5 h6 48.Kd3 Ka3 A very instructive exchange sacrifice by Svidler. He punished Hikaru's over-eagerness to defend his c5-pawn and after a couple of small inaccuracies after that, he was just relentless in his technique. **49.Bd5 b4 50.Kc2 Be5 51.Bb3 f4 52.Bd5 Bf6 53.Kb1 b3** is a very basic endgame, as the outside passed pawn will divert too much attention, not to mention it is Black who is more active now.

1.d4 f5 2.c4 Nf6 3.g3 g6 4.Bg2 Bg7 The French Defence allows a wide range of interpretations. Personally, I play this opening for the sake of getting an Isolani or a blocked centre, while the positions without pawns in the centre are a bit boring to my taste. **5.Nc3 d6 6.Nf3 0-0** Black has developed his queen to d5 anyway, but along the way he has activated the white king's knight. There is little or no strategic plot at all in this kind of position. Play is rather concrete and White's main hope lies in obtaining some initiative or advance in development. But in the event of simplifications, Black would be doing great. **7.0-0 Qe8 8.Re1 Qf7** Reminiscent of Black's queen retreat in the 3... ♕d8 Scandinavian, as, for instance, in Caruana-Carlsen, Tromso (ol) 2014. **9.e4 fxe4**

[9...Nxe4 Even if the kingside attack fails, the king's presence on the queenside may prove useful for sustaining the slow advance of the pawn majority. 10.Nxe4 fxe4 11.Rxe4

Here is a recent example with 24.fxe3 Rxe3 25.Rf1;

B) 11...Nc6 12.Be3 *(12.Qe2± Black is in no imemdiate danger, but White's position surely looks more active, Smeets,J (2620)-Tratar,M (2494) Warsaw 2013 (1-0, 50) Bf5 does not seem to bother Black too much: 13.Rh4 h5 14.Be3)* 12...Bf5 *(12...h6 13.d5 Ne5 14.Nxe5 dxe5 15.c5)* 13.Ng5 Qf6 14.Re6 Bxe6 After this exchange White finally has a small strategic plus, at least on the left half of the board. 15.Nxe6 Rf7 16.Bh3]

10.Ng5 Both players are eager to develop the queens as soon as possible. Strictly speaking, Black succeded in doing it first, but after the retreat to d8 he actually conceded this moral victory to his opponent. The last move has two possible purposes: slowing down Black's queenside development (...b7-b6 or ...♗c8-d7) or else starting a kingside attack with ♕h3/g3. White's intentions regarding his d2-knight are clouded as yet clouded in mystery. It could move to the left to put pressure on the black queenside or to the right, to sustain the attacking operation.

[10.Nxe4 , preparing long castling, may be a bit more venomous: Nc6]

10...Qxc4 11.Ngxe4 Nxe4 It is a good idea to clear matters in the centre as soon as possible. **12.Rxe4 Qf7**

13.Rf4N Bf6 14.Nd5 g5 Black's minor piece pressure faces White with difficulties completing his queenside development. The only way to solve the problem is to start the massive advance of the pawns, but this will create some weaknesses, too.

[14...Na6!?= With knights on board it makes less sense playing with an isolani: 15.Qb3 Kg7 In the absence of queens, Black cannot create kingside counterplay, being confined to defending in a very slightly worse position. Rather than avoiding simplifications, 16.Nxf6 would actually amplify them: exf6 17.Bd5 Qd7 18.Re4 Qd8 19.Qe3 Kh8 20.Re7 g5! Preventing White's main plan: doubling rooks on the d-file and winning the Isolani. 21.Bd2 c6 22.Bf7 *(22.Re1 cxd5 23.Qf3 Nc7* White is better coordinated and exerts some dangerous kingside pressure. In Yilmazyerli,M (2413)-Drasko,M (2459) Zenica 2013 (1-0, 37) the most promising continuation would have been *24.Qh5!?* planning to complete the development and combine the pressure in the centre with creating concrete kingside threats. 17...cxd5 18.Bxg5 Nd7 This is the most effective way of occupying the only open file. The king can be a useful defensive piece for the queenside minority. **19.Nxa8**

[White could have kept some tension with 19.Bxf6 Bxf3 20.Qxf3 Nxf6 21.Nxa8 The higher mobility of his pawn majority is compensated for by the weakness of the f4-pawn, though, making a draw the most probable result anyway. White is more or less forced to expose the more advanced

8.Qa4 This is an approved move in the 5...d5 line. White hopes for an exchange on c3, activating his bishop. **8...Nc7!?N** It is here that we can notice the

differences induced by the moves ...a7-a6 and a2-a3. In the 5...d5 line, 7...e5 would allow 8. ♘db5 with pressure on the weakened d5-square. **9.b4 a6** This will prove enough for equalising even though it may seem to be a slight concession. **10.Qb3 d5 11.a4 Be6!** The key to the exchange on c3. 15...Bxc4 Nowadays, this position is one of the hardest nuts to crack for the 1.e4-players. Apparently, Black has made several concessions regarding the placement of his pieces. The queen's knight has been developed in front of the c-pawn, preventing the natural undermining of the centre by means of ... c5, while the queen and the light-squared bishop are placed on exposed squares. This is likely to allow White win space in the centre with gain of tempo, but in practice things are less clear than that. To a certain extent, the situation is similar to that arising in some of the variations of the Benoni: Black's pieces display high but temporary activity; if driven away by the enemy pawns, he would be simply lost strategically, but it is quite amazing how often Black's dynamism is sufficient to prevent such a scenario. Besides, even if White manages to advance his pawns to d5 and c4, Black has good chances to block them, achieving an apparently precarious but in fact entirely defensible position; this situation resembles certain cases from the Gruenfeld Indian.
16.bxc4 The fact that this is White's main continuation clearly speaks for the

viability of Black's strategy. The exchange of pieces generally favours the side who is (or will be) lacking space, but this seems to be a concession White has to make since there is no other way to activate the rook along the b-file. **16...Qd7 17.Qg4 Qc6** One of the points behind 16.Bd3 is that Black is supposed to be forced to exchange himself on d3 before defending the b-pawn, thus helping White's development. **18.g3 Nf8 19.f4 exf4 20.Bxf6 Qxf6 21.gxf4** With this move White puts his bet on long-term factors: the supposed superiority of the bishop over the knight in open positions with pawns on both wings. **21...Qg6 22.f5 Qxg4N** This is not just a new move, but also the expression of a new concept. **23.hxg4 f6 24.Nf3** A thematical advance. The strong positional threat c6, which would lead to a huge advantage of space for White, practically forces Black's next move, which opens the c-file for the white major pieces and puts the c7-pawn in some danger. **24...Rad8 25.Kg2 Rd6** Forcing the bishop onto an exposed square. **26.Kg3 Nd7 27.Kf4 h6 28.Ke3** It is not easy to choose the best square for the queen. **28...Kf7** Black has no other choice than maintain his initiative. **29.Rad1** With his d-pawn attacked and pinned, Svidler finds no other way to maintain the material equality than attack the a-pawn. However, this will eventually leave the bishop misplaced, allowing to his opponent to draw without any problems. **29...Rc6 30.Rg1 Re7 31.Rd2 Rd6 32.Rdd1 Rc6** Judging the position statically, White has obtained a promising ending. He has an outside passed pawn and a long-ranged bishop fighting against a knight. However, an examination of the dynamic factors reveals the fact that Black's pieces cooperate perfectly, transforming the central pawn into a dangerous weapon. The bishop only seemingly controls the d4-square in view of the fork on e2 and is exposed to the threat ... ♖a8. **33.Rde1** The simplest way to avoid troubles but hardly offering chances for more, since after the exchange of rooks the most important squares along the bishop's diagonal are controlled. **33...Rd6 34.Rg2 Rc6 35.Rb1** Fortunately for White, his king is very near to the main theatre of operations. **35...Rd6 36.Ng1 Ne5 37.Ne2 Re8 38.Nc3 Rd4 39.Kf4** After having blocked the enemy pawn, the black knight finally eliminates it. The position is dead drawn. Instead, he could question the viability of Black's plan to install his knight on the relatively unstable e4-square by means of **39...Rd7!?** Suddenly, all the knight's retreats after an eventual f3 are either blocked by the own pawns or controlled by the enemy pieces. Black's best chance would consist of **40.Nd5!** making it clear that the bishop is also restricted in its actions. Now, after **40...Nc6** both **41.Ke3 Ne5 42.Nc3** and 30...cxb4 lead to roughly equal play. **42...Rd6?** is bad because of **43.Ne2** when **43...Rd7** loses immediately to **44.Kf4 Red8** is also not entirely satisfactory: **45.Ng1 Rd6 46.Nf3 Nd7** Obviously the only move to save the knight. **47.Re1±** The same structure as in the game has arisen, but the mutual placement of the minor pieces rather favours White. The bishop is more in the play, while the knight is more restricted. In case of **47...Re8 48.Rge2**

the weakness of the black castle could become a telling factor in the ending with major pieces, while the symplifying attempt **48...Re7?!** does not work properly because of **49.Ke3±** In positions with major pieces, there is no better complement to the weakness of the enemy king's position than the presence of an own passed pawn. **49...Re8** allows Black win too much time with **50.Rd1 Rd8 51.Red2** when after **51...Ke7** he can consider playing **52.Kf4** already, since his pawn is just as strong as White's. Maybe the gambit continuation **52...Re8!? 53.Ke3 Rd8≅** offers White more chances. Black has won a pawn, but he has many weaknesses while his knight is obviously unstable now. After **54.c3 Ne5±** 1-0 Oosterom,J-Rause,M/ICCF 2003/CT-1661 (36) both remaining minor pieces occupy stable positions but this is just a confirmation of the correctness of White's approach. By being a long ranged piece, the bishop not only keeps the enemy knight under control but also puts the c7-pawn under pressure and is ready to support the own d-pawn in case it becomes a passed pawn as a consequence of an exchange in this area. On the contrary, after the text move, neither of the minor pieces is stable. This leads to an uncertain situation where the knight disposes not only over the blocking d6-square, but also over several light central squares, which remained vulnerable after the exchange of the light-squared bishops and the advance of the central pawns. It is early to draw a definitive conclusion, but in our main game the versatile knight proved to be a worthy opposition to the long-ranged bishop.

1.e4 c5 2.Nf3 d6 3.d4 cxd4!? A very provocative opening which probably has every reason to be called 'Portuguese variation' because a large percentage of the games on it found in the database have been played by Portuguese players. I was suggested this setup by Kevin Spraggett who has lived in Portugal for many years and has picked up many ideas of his local colleagues. He has employed it as well. **4.Nxd4** One of the funniest variations I've ever seen is **4...Nf6 5.Nc3 a6 6.Be3 e5 7.Nb3** A new move. 'Theory' (in fact the whole system is still completely desert) is **7...Be6 8.Qd2?!** During the game I couldn't understand whether this was a blunder or a sacrifise. Normally in such a case it depends on the final result. Yet White gets some initiative for a pawn but it seems not at all sufficient. Instead White had an interesting opportunity **8...Nbd7 9.f4 b5 10.f5!** This I to be honest overlooked counting only on
[10.0-0-0]
10...Bc4! Gaining an important tempo. **11.0-0-0 Be7 12.h3 Qc7 13.g4 b4!** I think this is more precise than
[13...h6 14.Kb1 intending to penetrate with the king to c3. Rc8 15.a3 Bxf1 *(15...Bxb3 16.cxb3*-+ . However after the text Black's task is not at all easy. The ending is unusual and on the board I couldn't decide whether it was good or bad for me to change the bishop for one of his knights and where I should keep my pawns. I am not sure that my further play was entirely correct. In fact I was kind of moving back and forth searching for the right plan until something became clear. *Nc5!* was probably enough for a draw. Black has then a choice between *17.Nd5!!* I don't know whether I would find this move over the board but it is the only way to pose White serious practical difficulties. Now*)* 16.Rhxf1 Qc6 17.Qg2 a5 18.h4 Qb7 19.g5 hxg5 20.hxg5 is winning Rxc3? 21.gxf6 Rxe3 22.fxe7! might be just draw because Black's king or rook will be stuck defending the c5 pawn and it will be very difficult to make progress. Fortunately at this point I already saw the right setup. Qxe4 23.Qxe4 winning? I am not completely sure about that. Rxe4?! 24.Rxd6 is lost because the knight will not come back, for example]
14.Nd5 Going for an inferior ending. I was more concerned about **14...Nxd5 15.exd5 a5!** Now **16.Kb1 0-0**
[16...a4 17.Nc1 0-0]
17.g5 Rfc8! Not an easy move. Black is ready to give up his 'a' pawns since

White's ones on the kingside are vulnerable as well.

[17...a4 18.Nc1

A) 18...b3 19.cxb3 axb3!-+ Die pointe. White has to resign the fortress he's built. 20.Nxb3 I had to see that Bxb3 *(20...Rxa2* White's defence collapses and therefore he resigned. *21.Rc1* . I rejected **25.Bxc8 Rxd2?!** Activating Black's and White's pieces at the same time. **26.Rxd2 Qe3 27.Rdd1 a4 28.Bf5 Bb6?** Almost losing the advantage. **29.Rhf1 Qg3 30.Nd3 Qxh4?!** Still **31.Rc1!** Here I realised how wrong I had gone. Still there was a last chance - his time-pressure and I decided to try to use it by playing **31...Qd4!?** . At least Black is not risking to lose yet. **32.Rh1 Bd8 33.Rxh7?!** The following day Peter stated that the simpliest way to draw would be **33...e4 34.Rc8?!** Falling into a trap although not losing the game so far. **34...Qxd5+!!** Quite an untipical for an endgame piece sacrifise. 13.Bg5 A logical developing move.
[13.Qb3 -see Bareev-Sutovsky in CBM107.]
13...h6 14.Bxf6 Bxf6 15.Rd2 After this move the position of Black's b4 knight becomes quite foolish.
[15.Qb3!? is also possible: Re8 16.Rd2 Bg4 17.Rad1 a5 18.h3 a4 19.Qc4 Bd7 20.a3 Na6 21.d6 Kg7 22.Nd5± ½-½ Gyimesi,Z-Iordachescu,V/Tusnad 2005/CBM 106 ext (65)]
However, White shouldn't fear the exchange of the light-squared bishops!
15...Ba6 16.Qb3 Bxe2 In the following game Black equalized but White's play can certainly be improved:
[16...Qd7 17.Bxa6 Nxa6 18.Re1 *(18.Qc4!?; 18.d6!?)* 18...Rfe8 19.Rde2 Rxe2 20.Rxe2 Nc7 21.Ne5 Bxe5 22.Rxe5 Re8 23.f4 Kg7 24.h3 f6 25.Rxe8 Nxe8 26.Qb5 Qe7 27.Kf2 Nd6 28.Qd3 50 ½-½ Lputian,S-Kalantarian,N/Yerevan 1995/CBM]

Fortunately, the opponent is always there to help!
31...Qd8?? Curiously, I committed the same mistake against Grischuk (see CBM110). Do blockading pieces sometimes get tired of their thankless role? **32.d7!** Of course! This pawn cuts up Black's position like a knife. **32...Ne7**
[32...Re7 33.Qd2]

Khalifman: The game between the oldest and the youngest participants (age difference-45 years) was highly expected. I don't want to explain once more what the name Kortschnoj means in our city and young sociable Peter who had already proved his chess strength first of all winning 2 Russian Championship titles has also enough fans in St-Petersburg. After 6 rounds both were at 50% - just 1 point behind the leader so both had some expectations. Tournament fortune was, however, completely different. **1.d4** Huzman **1...Nf6 2.c4 g6 3.Nc3 Bg7 4.e4 0-0 5.Be2 d6 6.Nf3 e5 7.0-0 Nbd7 8.Be3 Qe7 9.Qc2 Ng4 10.Bg5 f6 11.Bd2 c6 12.d5!±**

1.e4 e6 2.d4 d5 3.Nd2 Nf6 4.e5 Nfd7 5.c3 c5 6.Bd3 Nc6 7.Ngf3 g6 This is one of the most typical replies to White's setup. Black intends to fianchetto the bishop, which he will free later by playing ...f6. From g7 the bishop will then put intense pressure on White's centre. For that reason, White has generally turned away from quieter lines and moved towards taking the bull by the horns with the violent thrust 8.h4! However, for this game we'll examine what happens if White plays in more standard fashion. **8.0-0 Bg7 9.Re1**

[Even the clever 9.Bc2!? seems to pose Black few difficulties either.

A) 9...Qb6 10.Nb3! reveals the point of White's previous move as he can now bolster the centre 0-0 *(10...c4? 11.Nbd2 Qc7 12.b3 b5 13.a4 b4 14.bxc4 bxc3 15.Nb1 dxc4 16.Nxc3±)* 11.Re1 cxd4 12.cxd4 f6 13.exf6 Nxf6 14.Bg5 with a slight edge for White;

B) 9...0-0! 10.Re1 cxd4 11.cxd4 f6! 12.exf6 Qxf6! The right way. Black prepares ...e5. *(12...Nxf6 13.Nb3* is slightly better for White; it's very important that he is able to overprotect the d-pawn, as this reduces Black's potential counterplay*)* 13.Nb3 *(13.Qe2 Qf7 14.Qxe6 Qxe6 15.Rxe6 Nb6 16.Re1 Nxd4* is also fine for Black*)* 13...e5! B1) 14.dxe5 Ndxe5 15.Qxd5+ *(15.Nxe5? Qxf2+ 16.Kh1 Nxe5∓)* 15...Be6 with good counterplay for Black;

It's interesting that in this line by playing normal moves, White seems to come under pressure. The key for Black is to play as actively as possible early in the game. Look out for moves like ...f6! ... e5! ... ♘g4! and ... ♘e4! And it seems that Black is not only fine, he can even push for a win. 12...Bg4 13.Ng5 cxd4 14.Qb3 e6 15.exd4 White has played the opening phase with great aggression, but such an approach is not without its risks. Black's position retains great dynamic potential, and over the next few moves, "Nepo" is able to wrest the initiative.

[15.cxd4?? would of course be most unfortunate after Qa5+]

Somehow I always end up annotating Andreikin's games. **1.e4 e5 2.Nf3 Nc6 3.Bb5 Nf6 4.d3 d6 5.0-0 Bd7 6.c4** This space grabbing system has been played quite a few times in recent years. **6...g6 7.Nc3 Bg7 8.Be3 0-0 9.h3** The pieces have all developed to their logical squares, and now Black has to make a decision. **9...Nb8** This move is new, but the idea is a typical one in these positions. Black offers the bishop trade in order to free up some space.

[Another possibility was 9...Nh5 trying to play in King's Indian style.]

10.Qb3!? White tries to force Black's hand on the queenside, though this move looks a bit awkward to me.

[10.Rc1 improves White's position while keeping the tension, and would probably be my choice.]

10...c6

[10...Bxb5 11.cxb5 and the open c-file would favor White.]

[10...c5 11.Bxd7 Qxd7 These positions typically give a slight edge to White, since the e3 bishop is more active than the g7 one.]

11.Ba4 Qc8 The queen ends up being rather misplaced here.

[11...Qc7 looks better to me, though it is less forcing since ♗xh3 isn't an idea now.]

12.Qd1 Na6 13.d4 White chooses the proper moment to expand in the center. **13...exd4 14.Bxd4 Be6** If White can consolidate, he'll simply be better. Black's best chance is to take advantage

of White's temporarily awkward pieces. **15.Qe2 Re8 16.Rad1 Nc5 17.Bc2** White has nearly consolidated, and if he succeeds he will have a large advantage due to the extra space and the weak d6 pawn. Black needs to act immediately.

17...Ncd7?

[17...b5! was definitely the best chance. 18.cxb5 cxb5 19.Nxb5 *(19.Qxb5 Bxh3!* This shot always has to be covered. *20.gxh3 Qxh3 21.Qe2 Ncxe4 22.Nxe4 Qg4+ 23.Kh2 Qh5+ 24.Kg2 Qg4+=* with a perpetual.*; 19.b3 a6* and Black should be fine.*)* 19...Ncxe4 and now the position is a complete mess. 18.Ng5! Now Black is close to lost.

18...Qc7 19.f4 Qa5 20.a3 h6 21.Nf3?!

[21.Nxe6 This is a simpler way to do it. Rxe6 22.Qf2 and White has too much. For example, if Rae8 23.b4! Qc7 *(23...Qxa3* Grabbing this pawn gets the queen trapped. *24.f5 gxf5 25.exf5 R6e7 26.Ra1 Qxb4 27.Ra4+-)* 24.c5! dxc5 25.bxc5+- Now that the d-pawn has been swept away, a combination of e5 and f5 will crush Black.]

21...Nh5?! This active try actually frees White a bit.

[21...Rad8 looks more resilient, and I don't see a clear way to proceed. The problem is that f5 can't be played due to the e-file pin, and the queen can't go to f2 because c4 is hanging. The computer wants to play ♕d3 for this reason, but you don't have to be an art critic to see why that move isn't pretty.]

1.e4 e6 2.d4 d5 3.Nc3 Bb4 4.e5 c5 5.a3 Bxc3+ 6.bxc3 Ne7 7.Qg4 This is the critical test to the Winawer line of the French Defence. Recently Black has had great problems and I still havn't seen anything convincing. During the last few years I have tried a few different lines myself in order to find something satisfactory. After 7...0-0 Black might survive somehow after a stubborn defence, but there is no easy road for Black and usually a lot of suffering on the way. Therefore when playing on the first board for Sweden against Russia I decided to go for a pawn sacrifice where Black gets a lot of activity and development advantage. Maybe this line is better for White as well, but at least he will need to be carefull. Playing Black against Svidler was of course an excellent test to find out if the line was working. **7...cxd4**
[After 7...Qc7 White can transpose to the game with 8. ♕xg7, but he also has the additional option 8.Bd3 with the idea cxd4 9.Ne2 dxc3 10.Qxg7 Rg8 11.Qxh7 when White no longer has the usual development problems. Having the Bishop on d3 instead of f1 is a great improvement.]
8.Qxg7
[Here 8.Bd3 is well met by Qa5!]
8...Rg8 9.Qxh7 Qc7 10.Ne2 Nbc6 11.f4 Bd7 12.Qd3 dxc3 This is all very well know variations, but from here on White has quite a few possible choices. **13.Rg1!?** This came as a surprise to me as I hadn't seen this move beeing play right at this moment, although the idea is well know. White would like to push g4 in order to control the f5-square and restrict the Black Knight on e7. Usually White takes the pawn on c3 either with the Queen or the Knight, when Black gets some counterplay along the c-file. Now with the pawn left on c3, Black must act different. **13...0-0-0** Black completes his development and prepares to push... d4 in order to support c3 and aslo to restrict the White Bishop on c1.
[13...Qb6!? has been played in two previous game of of totally three

15...Be8 A standardmanuvre for Black in this line. Black protects the d4-pawn and prepares the f6-break followed by ... ♗g6 at some point. It is necessary for Black to do something active before White has strengthen his position and developed his pieces. If Black manages to open up the center, then White's King will be in danger. **16.Rg3** A useful move. Now it will be possible for WHite to develop the Kings Bishop to g2 without having the g4-pawn hanging. Moreover

the Rook has a imortant work along the third rank where it protects against a possible comming ...d3-break.

[16.g5 was possible in order to prevent the ...f6-break. But here after Rh8 17.h3 Nf5 Black has excellent control over the light squares.]

16...f6

[In case of with the idea to play ...f6 next, White has the strong reply 16...Nd5 17.Qh7! as Svidler mentioned during the postmortem. *(17.g5* is better now then in the previous move, but even here Black can be satisfied after *Rh8 18.Rh3 Rxh3 19.Bxh3 Nde7* with control of the position.. *)*]

17.exf6 Nd5

[17...Bg6? can be met by 18.f5 but even stronger is *(18.fxe7! Bxd3 19.exd8Q+ Qxd8 20.cxd3* with a clear advantage to White and no sign of counterplay for Black.*)* 18...Nxf5 19.gxf5 Bxf5 20.Qc4±]

18.Qc4?!

[Here 18.Nxd4! was possible as after Nxf6 White can play the incredible 19.Nb5! which we both missed during the game. *(*After *19.Nxe6? Rxd3 20.Nxc7 Rxg3* things are completely different as now the e-file is open and *21.Nxe8* looses to *Rxe8+)* 19...Rxd3 20.Nxc7 Rxg3 21.Nxe8 Nxe8 22.hxg3 Rxg4 23.Kf2 with a clear advantage to White. The pair of Bishops are superior in this open position and the weaknesses of c3 and e6 will at least cost Black a pawn in the nearest future.]

18...e5 Now the center opens up and White need to act very carefully. **19.g5** This gives Black an excellent opportunity for an exchange sacrifice.

[Perhaps 19.fxe5 was more sensible, but Black has good couterplay here too after Bf7]

19...Bf7? A clear mistake, that even turned out to be decisive as after this Black never got any real chances to get back into the game.

[Necessary was 19...exf4! 20.Bxf4 *(20.Nxf4!?* should be considered. Allthough it looks very risky for White after *Nxf4 21.Qxg8* hes till has a lot of extra material and his king might find a safe spot on g1.*)* 20...Nxf4 21.Qxg8 and here Black has a very promising position after d3! 22.cxd3 Nxe2 23.Bxe2 Nd4 as mentioned by Svidler. Still there is a lot of material sacrificed and somehow White should be able to defend. However in practice this would have been an excellent choice.]

20.Qd3! Now threatening to push ...g6.

20...Bg6

[After 20...exf4 21.Qf5+ Kb8 22.Bxf4 Nxf4 23.Qxf4 White exchanges pieces and gets a clearly better endgame. The passed pawn on the Kingside will decide, sooner or later.]

21.f5 Bh5 22.Qe4! By blocking the advance of the e-pawn White eliminates every possiblity of counterplay from Black. **22...Rge8 23.Kf2** Going out from the X-ray attack. White is in no hurry and does best just to play some profylactic moves before going into action. **23...Bf7 24.Bg2 Nb6 25.g6 Bd5 26.Qg4 e4 27.f7 Ne5 28.Qf4 e3+ 29.Kg1 Re7 30.Bxd5**

[30.Rxb6! was another winning move.]

30...Nxd5 31.Qxd4 Nxf7 32.gxf7 Rxf7 33.Bxe3 Rxf5 34.Qxa7 Re8 35.Qa8+ Qb8 36.Qxb8+ Kxb8 37.Nd4 Nxe3

38.Rxe3 Rxe3 39.Nxf5 Re2 40.Nd4 Rd2 41.Rb4 The timescramble was over and Black resigned. Theoretically speaking White was doing well in this game, although giving Black some unnecessary chances.

Especialmente que no se puede quejar de los resultados obtenidos con la Eslava... **4.cxd5**
[For decades, Gelfand has been one of the great (if not just the greatest) specialists of the Rb1 system. However, in Dortmund 2006 Svidler employed a quiet positional line against him and achieved an excellent position. In Moscow 2006, Gelfand managed to defeat Svidler with this Anti-Grünfeld move order, only that he delivered the check one move earlier with Durante largos años, Gelfand ha sido uno de los mas grandes (si no el masgrande) especialistas dela variante Tb1. Sin embargo, en Dortmund 2006 Svidler empleó contra él una línea tranquíla y obtuva una excelente posición. [A novelty over Una novedad con respecto a 15...Nf8 as played in the fourth round game Svidler-Gelfand. The knight retreat looks like a solid option and eventually led to a quick draw, but has the drawback that it leaves White a free hand for developing his initiative. The idea behind Kramnik's move is to question the enemy queen's domination over the right wing as soon as possible. This will be the main theme of the next phase of the game. que se había jugado en la cuarta ronda en la partida Svidler-Gelfand. La retirada de caballo parece una opción sólida y había llevado a unas tablas rápidas en dicha ocasión, pero tiene la desventaja de dejar a las blancas manos libres para desarrollar su iniciativa. 18...Qe2!?

[A super-refined move. The immediate 18...Qg4 looks more natural, but Black has good reasons to provoke the move ♖de1. First of all (but not the most important), Black plans to play ... d5 and it could be useful to eliminate any possibility of pressure along the d-file. However, the essence is that the opposition of rooks along the e-file favours Black. In certain cases, the e3-bishop could remain pinned, while in others the exchange of rooks along the e-file would diminish

White's attacking chances on the kingside.]

19.Rde1 Qg4 20.Qh2

[20.Qxg4 hxg4 21.h5 looks tempting, but Black seems to have sufficient defensive resources. gxh5! *(21...Kg7 22.hxg6 Kxg6 23.Rh6+ Kg7 24.Reh1 Rh8 25.Rxh8 Rxh8 26.Rxh8 Kxh8* Apparently, everything is OK for Black, but the unexpected *27.Bxa7!?* (in the spirit of the first game of the Fischer-Spassky match) maintains better chances for White after *b6 28.a4!)* 22.Rxh5 Ng7! 20...d5 21.f3 Qa4 22.g4 Finally, White has managed to start a kingside attack which bears some similarity with the sharp lines of the Sicilian Dragon. It should be noticed that his own king finds himself in absolute safety, because of the absence of open files on the queenside. Finalmente, las blancas han conseguído lanzar un ataque en el flanco de rey que se parece a las agudas líneas de la variante del Dragon de la Siciliana. Cabe mencionar que su proprio rey se encuantra en absoluta seguridad, por la falta de líneas abiertas en el flanco de dama. **22...Bd6**

[22...hxg4? 23.h5!↑]

23.Qf2 Ng7 We can also notice some differences if compared to the Dragon, which favour Black. We have here an open file, which can always be used by the defending side for transposing to an ending by exchanging all rooks. This could happen if White tries to undermine Black's kingside fortress with Bd4, threatening Bxg7 and gxh5. Another aspect is Black's advantage of space in the centre (something unthinkable in the Dragon). Concretely, the presence of the d5-pawn restricts the activity of the white knight. También podemos observar ciertas diferencias con respecto al Dragon que favorecen a las negras. La presencía de una línea abierta ofrece a la parte en defensa simplificar la posición mediante el cambio de todas las torres. Por ejemplo. esto podía pasar en caso de Ad4, con idea de subminar la fortaleza negra del flanco de rey con Axg7 y gxh5. Otro aspecto se refiere a la ventaja de espacío en el centro de las negras, algo impensable en el Dragon. Concretamente, la presencía del peón de d5 en el centro restringe la actividad del caballo enemigo. **24.c4!?**

[24.Bd4 Rxe1+ 25.Rxe1 Re8= 26.Rg1 Be5!]

Given the tournament situation, Anand chooses the safe (nowadays) Marshall Attack. A couple of decades ago, this comment would have been pure nonsense. Teniendo en cuenta la situación favorable en el torneo, Anand elije el seguro (hoy en día) Ataque Marshall. Hace unas docenas de años, este comentarío no hubiera tenido ningún sentido. **8.h3 Bb7 9.d3 Re8 10.a4 h6** Black is in no hurry to consolidate his centre with ...d6, because he wants to keep the possibility ...d5, in the spirit of the Marshall Attack in reserve. Besides, the a3-f8 diagonal could be useful still, in case of an eventual ♘c3, which could eventually be answered with ... ♗b4. White will try to combine the pressure against the b5-pawn with the central plan c3 and d4, although this is connected with a loss of time. Curiously, the variation had been seen twice this year in games played between the same opponents, but with... reversed colours. **11.axb5** It is not easy to decide which is the correct move order.

15.d5 After Black's previous move, the threat against the e4-pawn became real. Therefore, White should do something about it. Svidler's move looks like a radical solution, but half-measures seem to offer Black good counterplay in the centre. As a curiosity, I would remark that in his youth, Morozevich frequently played the Chigorin Opening, which often leads to positions where two black knights fight against two white bishops. World-ch Tournament (1) 13.09.2007
[Marin,Mihail]

1.Nf3 This is precisely the starting move that led Kramnik to the highest peaks of his career. He abandoned it for the slightly more aggressive 1.d4 only with the occasion of his match against Kasparov. Later, he experimented with 1. e4, without too much success. Now, the cycle seems to start again. Dies ist genau der Anfangszug, der Kramnik zu den höchsten Gipfeln seiner Kariere führte. Erst anlässlich seines Matches gegen Kasparov gab er dies zugunsten des leicht aggressiveren 1.d4 auf. Später experimentierte er dann mit 1.e4, ohne allzu großen Erfolg. Nun scheint der Zyklus von Neuem zu beginnen. **1...d5** Svidler occasionally employed this move as an emergency exit after losing 3 games with the Gruenfeld in Morelia/ Linares 2006. His overall result in the closed openings was not really satisfactory either, but we can assume that for the World Championship he is better prepared. Svidler gebrauchte diesen Zug gelegentlich als Notlösung, nachdem er in Morelia/Linares 2006 3 Partien mit Gründfeld verloren hatte. Sein Gesamtergebnis in den geschlossenen Eröffnung war auch nicht wirklich zufriedenstellend, doch wir dürfen annehmen, dass er für die Weltmeisterschaft besser vorbereitet ist. **2.d4 Nf6 3.c4 c6 4.Nc3 e6 5.Bg5 h6 6.Bxf6 Qxf6 7.e3 Nd7 8.Bd3** No big surprises on White's part yet. This position formed part of Kramnik's repertoire in his chess youth, although in more recent years he has flirted with the ultra-sharp 6. ♗h4, too. Noch keine großen Überraschungen, was Weiß angeht. Diese Stellung bildete einen Teil von Kramniks Repertoire in seiner Schachjugend, obwohl er in den letzten Jahren auch mit dem ultrascharfen 6. ♗h4 geflirtet hat. **8...g6** Of course. A

Gruenfeld specialist would take the first opportunity to develop his king's bishop in fianchetto. Na klar. We just have to remove the b2- and c6-pawns. However, the presence of these pawns gives the game a rather closed character, without the possibility of active piece play as in Svidler's favorite weapon. On the other hand, White cannot crush his opponent by advancing his central pawns , which is a permanent danger for Black in the Gruenfeld. Die Struktur erinnert tatsächlich vage an einen Grünfeldinder. Wir müssen bloß die Bauern b2 und c6 entfernen. Doch die Anwesenheit dieser Bauern verleiht der Partie, im Gegensatz zu Svidlers Lieblingswaffe, einen ziemlich geschlossenen Charakter ohne die Möglichkeit zu aktivem Figurenspiel. Andererseits kann Weiß seinen Gegner nicht durch Vorrücken seiner Zentrumsbauern überrollen, was im Grünfeldinder eine permanente Gefahr für Schwarz darstellt. **13.Re1**

[Kramnik had had his share of experience with this position: Kramnik hat seine Erfahrungen mit dieser Stellung gemacht: 13.Qe2 b6 14.Rfe1 Kamsky,G (2645)-Kramnik,V (2710)/Luzern 1993/CBM 038/ [Ftacnik] (1-0, 36)]

14.Qe2 b6 15.Rad1 White is the first to have completed his development, but the relatively closed character of the centre prevents him taking immediate advantage of this circumstance. Weiß hat seine Entwicklung als Erster abgeschlossen, aber der relativ geschlossene Charakter des Zentrums hindert ihn daran, aus diesem Umstand unmitelbaren Vorteil zu ziehen.

15...a5!? This move is not so much dictated by ambitions of queenside expansion as by the desire to prevent the exchange of the light-squared bishops! This might sound a bit absurd: why would White exchange his "good" bishop for Black's "bad" bishop? In fact,

the situation is not as one-sided as it might look at first sight. Once the black bishop emerges on b7, the permanent threat of ...c5 questions White's stability in the centre. He would obviously need to place a minor piece on e4, but here we discover another aspect: at least two of his minor pieces are competing for this square: the bishop and the queen's knight! By exchanging the light-squared bishops, White achieves better stability and can prepare the thematic attack based on h4-h5, in order to increase his influence on light squares. Dieser Zug wird weniger von Ambitionen auf eine Damenflügelexpansion diktiert als vielmehr von dem Wunsch, den Tausch der weißfeldrigen Läufer zu verhindern! Die mag ein wenig absurd klingen: Wieso würde Weiße seinen "guten" Läufer für den "schlechten" von Schwarz tauschen? Tatsächlich ist die Situation nicht so einseitig, wie es auf den ersten Blick wirken mag. Wenn der schwrze Läufer erst einmal auf b7 auftaucht, stellt die permanente Drohung ...c5 die Stabilität des Weißen im Zentrum in Frage. Er würde offensichtlich eine Leichtfigur auf e4 platzieren müssen, doch hier entdecken wir einen weiteren Aspekt: Mindestens zwei seiner Leichtfiguren konkurrieren um dieses Feld, der Läufer und der Damenspringer! Durch den Tausch der weißfeldrigen Läufer erreicht Weiß bessere Stabilität im Zentrum und kann den thematischen Angriff basierend auf h4-h5 vorbereiten, um seinen Einfluss auf den weißen Feldern zu vergrößern.

19...c5!? A brave decision. If White installs his knight on e4, it might be simply too late for any form of counterplay. Eine tapfere Entscheidung. Wenn Weiß seinen Springer auf e4 installiert, könnte es für jede Form von Gegenspiel einfach zu spät sein.
20.Nxb5 Ba6 21.h5 Now and on the next move, Kramnik seems to have been animated by the desire to avoid any kind of complications. In doing so, he also reduced his chances for an advantage. 22...Rxd4 23.Rxd4 It looks as if Black has dangerous counterplay in the centre and on the queenside, but the position is anything but drawish. On the other hand, travelling from Europe to Mexico must have been quite tiring and the opponents know each other so well

since childhood, so that the abrupt end is not completely illogical. Es sieht aus, als hätte Schwarz gefährliches Gegenspiel im Zentrum und am Damenflügel, doch die Stellung ist alles anderes als remislich. Andererseits war die Reise von Europa nach Mexiko bestimmt sehr ermüdend, und die Gegner kennen sich von klein auf sehr gut, so dass das abrupte Ende doch nicht so unlogisch ist.

1.e4 e5 2.Nf3 Nc6 3.Bb5 a6 4.Ba4 Nf6 5.0-0 Be7 6.Re1 b5 7.Bb3 0-0 8.c3 A principial duel between two Marshall specialists is always interesting to watch. Un duelo entre dos especialistas del Ataque Marshall es siempre interesante de seguír. **8...d5 9.exd5 Nxd5 10.Nxe5 Nxe5 11.Rxe5 c6 12.d4 Bd6 13.Re1 Qh4 14.g3 Qh3 15.Qe2!?** It is remarkable that even in such a fashionable and ultra-analyzed variation it is still possible to find almost unknown ideas at a relatively early stage. In the main line, White hurries to place his bishop on the exposed e3-square. With his last move, Svidler expresses his belief that the higher priority is to expell the enemy queen from its threatening position. Es ist bemerkenswert, dass es selbst in einer derart aktuellen und weit ausanalysierten Variante noch immer möglich ist, in relativ früher Phase nahezu unbekannt Ideen zu finden. Im Hauptabspiel beeilt sich Weiß damit, seinen Läufer auf dem exponierten Feld e3 zu platzieren. Mit seinem letzten Zug verleiht Svidler seiner Überzeugung Ausdruck, dass es höhere Priorität hat, die feindliche Dame aus ihrer drohenden Stellung zu vertreiben. **15...Bg4 16.Qf1 Qh5** There is very little practical material available on this variation. Actually, this position can also be obtained if White plays 15. ♕d3

instead of 15. ♕e2, but Svidler's move order is more restrictive. Against 15. ♕d3, Black has an important alternative in 15... ♗f5. An even more curious move order is 12. ♕f1 (instead of the almost automatically played 12.d4) 12... ♗d6 13. ♖e1 ♕h4 14.g3 ♕h5 15.d4 ♗g4, with the irelevant difference that the variation is by one move shorter; see Kapengut - Malaniuk below. Zu dieser Variante gibt es sehr wenig praktisches Material. Tatsächlich kann diese Stellung auch erreicht werden, wenn Weiß 15. ♕d3 statt 15. ♕e2 spielt, aber but Svidlers Zugfolge restriktiver. Gegen 15. ♕d3 hat Schwarz eine wichtige Alternative in 15... ♗f5. Eine noch kuriosere Zugfolge ist 12. ♕f1 (statt des nahezu automatisch gespielten 12.d4) 12... ♗d6 13. ♖e1 ♕h4 14.g3 ♕h5 15.d4 ♗g4, mit dem irrelevanten Unterschied, dass die Variante um einen Zug kürzer ist, siehe Kapengut - Malaniuk unten. **17.Nd2 Rae8** This kind of move is played almost authomatically. 20.Ne4! In some other lines, White gladly places a rook on this square, offering an exchange sacrifice which Black accepts only rarely. Installing a knight here is a great achievement for White. 1.e4 e5 2.Nf3 Nc6 3.Bb5 a6 4.Ba4 Nf6 5.0-0 Be7 6.Re1 b5 7.Bb3 d6 8.c3 0-0 9.h3 Re8 10.Ng5 Rf8 11.Nf3 Bb7 12.d4 Re8 This game features an interesting theoretical dispute, because both players have included the Zaitsev variation in their repertoires recently.
13.Nbd2 Bf8 14.d5
[The main continuation is supposed to be 14.a4 but Svidler might have been impressed by his opponent's play after Na5!? in Volokitin,A (2662)-Morozevich,A (2731)/Biel 2006/CBM 114 [Marin] (0-1, 61)]
14...Nb8 15.Nf1 Nbd7 16.N3h2 Nc5 One of the possible continuations. Black intends to undermine White's advantage in the centre with ...c6 as soon as possible, which makes driving the bishop away quite useful.
[Both players had experience with Black in the line starting with 16...h6 17.Qf3 *(17.Ng4 ½-½* Naiditsch,A (2664)-Svidler,P (2742) Sparkassen Dortmund GER 2006 (5)*)* 17...Nc5 18.Bc2 c6 19.b4 Na4?! *(* In my comments to this game, I suggested *19...cxd5!? 20.bxc5 dxe4!* as a possible improvement.*)* and now, in Bruzon,L (2667)-Morozevich,A (2731)/Biel SUI 2006/CBM 114/ [Marin] (0-1, 55), White should have played 20.Bxa4 bxa4 21.c4±]
17.Bc2 c6 18.b4 In order to weaken Black's pressure over the centre, White has to weaken his queenside with this move. **18...Ncd7 19.dxc6 Bxc6 20.Bg5** In the long run, the exchange on f6 is supposed to offer chances for taking over the control of the d5-square. However, the weakness of the c4-square is just as significant. **20...Qc8!?** This slightly mysterious way of avoiding the pin (more natural would be 20... ♕c7) is aimed to maintain the control of the h3-c8 diagonal, besides the obvious pressure along the c-file. More about it later.
[20...h6!? is a specialty of Bacrot, who has defended Black's point of view in a few games. Black shows that he is not afraid of the exchange in f6 and provokes it immediately. 21.Bxf6 Nxf6 22.Ng4 Exchanging the reserve knight in order to reduce Black's control over the central squares (d5 in first line). Nxg4 23.Qxg4 Bd7 Black transfers the bishop to e6, in order to put the c4-square under onservation.
A) 24.Qd1 This retreat looks a bit passive, but deserves some attention on the basis of the fact that it was... Bacrot's choice with White! Rc8 *(24...Qc7 25.Re3 Be6 26.Bb3 a5 27.Bd5 Ra7 28.Qb3 Bxd5 29.Qxd5 Qc4?!* Black was OK and did not need to resort to such radical measures. *30.Qxc4 bxc4 31.bxa5 Rxa5 32.Re2 d5 33.exd5 Rxd5 34.Ne3 Rd3 35.Rc2±* Bacrot,E (2660)-Dervishi,E (2490)/Verona 2004/EXT 2005 (1-0, 73)*)* 25.Re3 Be6 26.Bb3 Re7 27.Rg3 Rec7 28.Rc1 Qh4 Black has regrouped in optimal way and has little to fear. The "bad" bishop is useful because it safely defends the d6-pawn. White needs

to use his rooks for the defence of his similar weakness on c3. (The usefulness of the white queen on d1 becomes obvious after *28...a5* when White can maintain the integrity of his structure with *29.a3* without having to exchange on e6 previously. To be compared with a similar situation after 24. ♕f3.) 29.Bd5 Bxd5 30.Qxd5 Rc4 31.Rf3 R8c7 32.Ng3 The knight cannot reach the optimal d5-square because of Black's pressure against the e4-pawn. Qe7 33.Qd2 Qe6 34.Rc2 a5 35.a3 axb4 36.axb4 g6 37.Qd3 h5= Naiditsch,A (2574)-Bacrot,E (2645)/Lausanne 2003 (½-½, 74);

B) 24.Qf3 Rc8 25.Bb3 Be6 26.Bxe6 (In principle, White would like to refrain from this exchange, which strengthens Black's control over the centre. However, in the long run he will not be able to avoid it without making some other concession. For instance: *26.Rec1 Be7 27.Rc2 a5* . Now, the bishop is not defended by the queen and White cannot maintain the tension in a favourable way. *28.Qd3 axb4 29.cxb4 Rxc2 30.Qxc2 Qb6* and the weakness of the d4-square offered Black sufficient counterplay in Akopian,V (2693)-Zhang Zhong (2639)/Wijk aan Zee 2004/CBM 099/[Wedberg] (½-½, 63)) 26...fxe6 . Now, Black has no problems at all in the centre and can even display some activity with a well-timed ...d5. 27.a4 White's only active plan is to weaken Black's queenside structure. 21.Ng3N White continues improving his position without clearing matters on the kingside yet.

[However, the immediate 21.Bxf6 makes some sense, in the way that it keeps the f1-knight on the track to d5. Nxf6 22.Ng4 Nxg4 23.hxg4 Bd7 This is the point behind placing the queen on c8. White cannot defend both the attacked pawns simultaneously. However, he will get good compensation in view of the centralized knight. 24.Ne3 Qxc3 *(24...Ra7!? 25.Bb3 Qxc3 26.Nd5 Qc8 27.Nb6 Qd8 28.Nxd7 Qxd7 29.Bd5 g6=* Hracek,Z (2620)-Beliavsky,A (2640)/Germany 2000/CBM 074 ext (½-½, 39)) 25.Nd5 Qc6 26.Bb3 Qb7 27.g5 Be6 28.Re3 Rec8 29.Qh5 a5!? 15...Qc7 Usually, Black transfers his king's bishop to g7 in this line. He can start doing that with or without developing the queen, although this can just lead to a transposition. In this game, Black has completely different plan, for which ...g6 is not useful at all.

11.c3

[White has been quite successfull with 11.Nc3 lately. By choosing the rare game move, Anand probably took into account the fact that Svidler himself had played 11. ♘c3 with White, which means that he had a good

understanding of the position. b4 12.Nd5 Na5 13.Ba2 Bc5 14.Bd2! Bxd5 15.Bxd5 Nxd5 16.exd5 Qf6 17.c3! bxc3 18.Bxc3± Qb6 19.Rxe5! 12.Nbd2 d5!? A brave decision, in the spirit of the Marshall Attack. However, the objective merits of the move are to be proved yet. **13.a5** Anand decides to maintain the game in a slow manoeuvring mode. With his last move, he physically prevents the thematical knight jump to a5. This static approach will prove quite unpleasant for Black.

[Actually, the consequences of the acceptance of the sacrifice are not easy to evaluate. After 13.exd5 Nxd5 14.Nxe5 Nxe5 *(14...bxc3?! 15.Nxf7! Kxf7 16.Qf3+±)* 15.Rxe5 bxc3 16.bxc3 Black's compensation for the pawn is restricted by the weakness of the f7-square. For instance Nxc3 can be met by 17.Qh5 Rf8 18.Bb2±, when White completes his development and retains an active position.]

13...dxe4 14.dxe4 Bc5 This seemingly active move does not really cause White any problems with the defence of the f2-square.

[The modest 14...Bf8 migh be just better, maintaining the own kingside defended.]

15.Qe2 Qe7?! Practically inviting White to play the next move. **16.Nh4±** Once the black queen's bishop has been developed to b7, this standard manoeuvre is quite unpleasant, because the f5-square is undefended. **16...Nd7 17.Nf5 Qf6 18.Qg4** White only needs one more move (♘f3) to build up an attack with his queen and all the minorpieces against the enemy king. Notably, all Black's minorpieces are relatively uselessly grouped on the other wing. **18...Ne7** This move loses a pawn, but it was hard to give an advice for Black.

[18...Rad8 19.Nf3 Kh8 *(19...Kf8 20.Ng5! hxg5 21.Qh5 Kg8 22.Bxg5+-* and the black queen is trapped. *)* 20.Bg5! *(20.Ng5 Rf8* and Black is alive.*)* 20...Qg6 *(20...hxg5 21.Qh5+ Kg8 22.Nxg5+- g6 23.Qh7+ Kf8 24.Qh6+ Kg8 25.Nh7)* 21.N5h4 Qd6 22.Bxd8+-]

19.Nxh6+ Qxh6 20.Qxd7 Red8? Just inviting White to grab another pawn. **21.Qxc7** Black will not really lose a piece, because after defending the c5-bishop with 21... ♖dc8 or 21... ♕d6, 22. ♕xb7 leaves the queen trapped to 22... ♖a7. However, with two extra-pawns and a better structure, White will have a

relatively easy technical task.

A strange move giving up the important e5-pawn and opening up the way for Black's g7 bishop.

1.c4 Nf6 2.Nc3 e5 3.Nf3 Nc6 4.g3 d5 5.cxd5 Nxd5 6.Bg2 Nb6 7.0-0 Be7 8.a3 0-0 9.b4 Be6 10.Rb1 f6 11.d3 a5 12.b5 Nd4 13.Nd2 Qc8 14.e3 Nf5 15.Qc2 Rd8 This is one of the most complicated tabyias of the English Opening, both in analysing and over-the-board play. White surely has some queenside achievements, but his

main problem is to formulate a coherent plan. In practice, White's play is frequently of a speculative character, aiming to take advantage of any imperceptible black inaccuracy. In my English trilogy I had come up with some improvements against the then fashionable plan favoured by Tiviakov, based on ...a5-a4 and ... ♖a8-a5. But in the meanwhile Black started playing more neutral plans, as if inviting White to show his hand. **16.Bb2** This is the most popular move, but chance made me discover what may be the clue to White's play. At the 2012 Olympiad I shared a room with Vladislav Nevednichy, who felt inspired to play the English Opening in a few games. He frequently asked me for general advice, but did not hesitate to share with me an over-the-board discovery.

[He called his 16.Re1 a fantastic novelty, without giving any further detail. Later, I examined the move and came to the conclusion that he was right. If White wishes to have a coherent plan, this should be based on ♘d2-c4. Against Tiviakov's ...a4 and ... ♖a5 this works very well, but against neutral plans it is harder to carry out. One possible idea of the last move is preparing ♗f1 followed by ♘c4 without facing the pin along the d-file. In other cases, when White switches to d3-d4, the rook is clearly useful on e1. Nh6 *(16...Nd6 17.d4↑; 16...a4 17.Bb2 Nd6 18.d4!?)* 17.d4! 16...a4 17.Rfc1 Nd6 There is no way White can play ♘c4 now. **18.Nde4 Nf7N**

[Kramnik deviates from 18...Ne8 which caused him a defeat at the hands of a then very young Carlsen in Carlsen,M (2801)-Kramnik,V (2772) London 2009 CBM 134 [Carlsen,M] (1-0, 43)]

[18...Bb3 19.Qe2 Nf7 is an important alternative. With the queen on e2, White looks entitled to play 20.f4!? Kozlov,G (2317)-Bukavshin,I (2517) Samara 2013 (½-½, 99)]

19.Ne2 With this move White practically embarks on a mutual waiting game.

[19.Nd1 is the introduction to a more coherent plan, which will fail to consolidate White's advantage against Black's accurate play, though. Bf8 20.Bf1 *(20.Qxc7 Qxc7 21.Rxc7 Rxd3 22.Rxb7 Nc4⇄)* 20...Rd7 21.d4 *(21.Nc5 Bxc5 22.Qxc5 Ng5)* 21...exd4 22.exd4 If allowed to play ♘ e3, White would achieve a comfortable regrouping. [The aforementioned game went 8...e6 9.e3 Svidler,P (2739)-Kramnik,V (2781) Moscow 2011 CBM 144 [Marin,M] (1-0, 44). In my old notes I wrote that 8...e5 "weakens the d5-square, justifying White's plan directed against the g6-bishop." As we will see in the current game, things are not that clear.]
9.e3 Bd6 Apart from the fact that it over-defends the (unttacked yet) e5-pawn, this move has some hidden merits, too.
[If 9...Bc5 10.Qe2 0-0 White can consider 11.Nf1 since ...e5-e4 would not interfere with the plan based on ♘f1-g3. 11...dxc4 12.Nxc4 Bb4+ This is a natural move, of course, but not the only good one. First of all, f1 may prove a good square for the king, depending on the circumstances.

[Secondly, the developing 12...0-0-0 is playable, too, since 13.Nxd6+? would lead to disaster on d3. Qxd6 14.Nxg6 hxg6∓]

13.Kf1 Nb6 14.Nxg6 hxg6 15.g5 Nh5 16.Qg4 0-0 17.Nxb6 This looks like a concession, but otherwise White risked to lose stability on the light squares.

11.axb4 b5!?N An interesting novelty, blocking the further advance of the b-pawn, which may become weak in the future. On the other hand, Blck also creates some weaknesses in his own camp. [11...Bf5 would once again be met with the exchange sacrifice 12.b5!]

12.d3 Svidler decides to switch back to the normal developing mode.

9.f4 Weiß kann ebensogut zuerst seine Entwicklung mit 9.Dd2 und 10.0-0-0 beenden,oder den Zug f4 mit 9.Le2 vorbereiten:

Candidates Tournament (9) 23.03.2014
[Negi,Parimarjan]

1.e4 It's never easy to know what Andreikin's first move will be... **1...c5 2.Nf3 d6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 a6 6.h3** This seems to be the 'in' thing these days. The explanation is probably more to do with the fact that theory is much less evolved here, so there is a lot of room for innovation... something rare in the main lines of the Najdorf.
[6.Be3 e5 7.Nb3 Be7 8.h3 Δg4... ♕f3...0-0-0... This is another in vogue line that came up only a few years ago, but has already been tried in a huge amount of games.]
6...e5 7.Nb3 Compared to the 6.♗e3 line mentioned above, White hasn't yet committed to ♗e3 yet, and he could try to make use of that. Unfortunately for him, it's not so easy to utilise that... although White does have a few interesting options.
[7.Nde2 is a more natural move - with the idea of g4... ♘g3... ♗g2, but now Black replies h5! and we get a tense middle game with a lot of slow manoeuvring since White can't easily get an initiative here.]
7...Be6
[7...Be7 would be an inaccuracy, as now Black doesn't threaten ...d5, and White could just go for 8.g4! Δ g5...h4...♗g2 etc.]
8.g4?! I really don't understand what Andreikin had in mind...later in the press conference he mentioned that he couldn't spend much time on the Najdorf and just decided to play this. Unfortunately for him, Black's life is just quite easy here after the natural ...d5.
[8.Be3 would convert to the 6.♗e3 line mentioned above.]
[8.f4 is a more interesting attempt to make use of the bishop still being on c1. Now obviously exf4 plays right into White's hands, so Black has to find more inventive ways to deal with

f4:

A) 8...Nbd7 ignores f5 altogether. 9.g4 *(9.f5 Bxb3 10.axb3 d5! 11.exd5 Bb4* will lead to a complicated middlegame, but Black seems ok at first.*)* 9...b5 10.Bg2 Nb6 *(10...h6* is probably better here *)* 11.g5 Nfd7 12.f5 Bc4 13.Na5 Rc8 14.Nxc4 *(14.Qd2* lets the bishop off the hook. *b4 15.Nd1 Bb5* with very unclear play Khismatullin,D (2714)-Duda,J (2563) Yerevan 2014*)* 14...Rxc4 *(14...Nxc4 15.h4±)* 15.a3±;

B) 8...b5!? 9.f5 *(9.fxe5 dxe5 10.Qxd8+ Kxd8* seems very solid for Black *)* 9...Bc8 Initially, I had considered this to be just ok for Black based on the computer assesments...but things might not be so simple: 10.Bg5

B1) 10...Nbd7! 11.Qf3 *(11.a4 b4 12.Nd5 Bb7* is very comfortable for Black*)* 11...Bb7 transposing to the game after 10...♗b7.;

B2) 10...Bb7 11.Qf3 *(11.Bxf6! Qxf6 12.Qf3* would have avoided ♘d7-♘xf6, and therefore give White a better version*)* 11...Nbd7 12.0-0-0

B2a) 12...Rc8 13.Nd5 *(13.Kb1 Rxc3! 14.Qxc3 Nxe4 15.Bxd8 Nxc3+ 16.bxc3 Kxd8⩱)* 13...Be7 14.Bxf6 Nxf6 15.Kb1 converts to the game.;

B2b) 12...Be7 13.Kb1 Rc8 14.Bxf6 Nxf6 15.Nd5 The computer claims that Black is simply better here, but I think it considerably mis-assesses White's attacking chances after exd5, and a future kingside pawn assault.

B2b1) 15...0-0 16.Bd3!? Nxd5 17.exd5± The kingside pawns are just pushing - White can always sacrifice them as well, while the bishop is ideally placed on e4. I would prefer White here...;

B2b2) 15...Bxd5 16.exd5 h5!? Black deals with the kingside threats...but h5 is also a big commitment...For instance White could just ignore h5-h4, and plan a later break with ♖g1...g3. 17.g3 *(17.Bd3 h4 18.Nd2∞* **Δ** ♖g1...g3. *)* 17...h4 18.g4 Nh7 19.Nd2 Ng5 20.Qg2 Qb6 21.Bd3 Bf6 22.Rhe1 Ke7 23.Ne4 Nxe4 24.Rxe4 Bg5= 1-0 (61) Grischuk,A (2785)-Wojtaszek,R (2701) Riga 2013;

B2b3) 15...Nxd5N 16.exd5 e4!? seems to be the best line to me. At least Black will have a clear way to continue due to the active dark squared bishop... 17.Qxe4 0-0 18.Bd3 Bf6⩲ An interesting position that needs to be analysed more certainly, but Black's play doesn't seem too hard to me.]

8...d5! 9.g5

[9.exd5 Nxd5 10.Bg2 seems a better try to me, as after Nxc3 11.Qxd8+ Kxd8 12.bxc3 At least the newly opened b-file gives White some

prospects to create threats against the black king. At the same time, Black should be ok objectively... Nc6=]

9...Nxe4 10.Nxe4 dxe4 11.Qxd8+ Kxd8 The king is temporarily misplaced, but White isn't developed enough to exploit that. **12.Bg2 Nc6**

[12...Bd7 seemed a simple way to continue as well, but as Svidler showed in the game, he doesn't have to hurry to try and equalise either. 13.Bxe4 Bc6=]

13.Bxe4 Kc7 14.Bd2

[14.Be3 looked more natural, but now after Rd8 White can't go 0-0-0.]

14...h6! The g5-pawn is somewhat awkward in an otherwise typical structure. This makes Black's life much easier.

15.h4

[15.gxh6 g6 16.0-0-0 Bxh6∓]

15...hxg5 16.hxg5 Rxh1+ 17.Bxh1 Be7 18.0-0-0 Rh8 Already White needs to worry about retaining equality. The g5-pawn is very weak, and White is barely able to keep it, but also there is no clear plan for White to continue. Andreikin wisely decided to just hold his position together, and prevent Black's ideas.

19.Be3 Rh4

[19...Rh5 doesn't win the pawn because of 20.Bf3!]

20.Bg2 b6 21.a3 a5 22.Re1

[22.Rh1 Rxh1+ 23.Bxh1 a4 24.Nd2 Nd4 isn't an equal endgame yet, so keeping the rooks gives White more flexibility in defence.]

22...g6 23.Nd2 Nd4 24.Nf3! Exchanging the knights is definitely in White's favour. **24...Rg4 25.Bh1 Bd6**

[25...Nc6 26.Nh2 doesn't really let Black achieve much either.]

26.Bd2 Nc6 27.Be3 Black's position looks extremely pleasant, but it's hard to find a way to break through here. Black repeated once more before trying to play on **27...Nd4 28.Bd2 Nc6 29.Be3 Bf5 30.Rg1 Rxg1+ 31.Nxg1** White has a better version of the endgame here, as he can generate some play with the threat of ♗d5 as well. Black doesn't really take much risk of course, but it's also quite understandable that he didn't see any reason to try on for something so minute.

Candidates Tournament (10) 25.03.2014

[Marin,Mihail]

120min/40+60min/20+(15min+30sec)

1.d4 7 **f5** 7 **2.Nf3** 22

[Kramnik's treatment of the fight for the centre strongly reminds me of the following variation: 2.g3 Nf6 3.Bg2 g6 4.Nh3 d6 5.Nc3 Bg7 6.Nf4 c6 7.d5 White sustains his d5-pawn with pieces, not wasting time for the strategically constructive c2-c4. This is how Korchnoi played on three occasions, winning each time! The best known game was Kortschnoj,V (2625)-Gurevich,M (2645) Rotterdam 1990 CBM 018 [Schussler] (1-0, 45)]

2...Nf6 11 **3.e3!?** 38 For decades, White has almost invariably met the Dutch Defence with g2-g3, but Black seems to be doing fine in the main lines of the Leningrad system lately. Little wonder that at the top level White is trying stepping aside, relying on his theoretical advantage of the first move in a non-

symmetrical position, rather than on long forced variations.

[The Wijk aan Zee winner had a similar approach in the last round of the tournament: 3.Bf4!? Aronian,L (2812)-Van Wely,L (2672) Wijk aan Zee 2014 CBM 159 [Stohl,I] (0-1, 38)]

3...b6 11:02 We can only guess which system Sivdler planned to choose against g2-g3, but in the absence of White's pressure along the long diagonal, a logical answer. This position reminds me of a small incident from my childhood. I was away from home for a few weeks when my father called to tell me he had bought a book on the Dutch Defence. I had no idea at all of the possible plans and ideas, but being caught by sudden enthusiasm I started "analysing" on my own the position after 1.d4 f5. I remember quite clearly that the current position became my main "tabyia" soon. Later, I was disappointed to learn that g2-g3 outrules my setup and switcehd to the 7...c6 Leningrad variation, which is the most critical nowadays, by the way. Anyway, the thing I wanted to highlight is that there must be some logical background to both sides' play, which made my then uninstructed mind take this direction.

[Actually, a more restrictive way of transposing to the ...b7-b6 setup is 3...e6 4.Bd3 b6 5.0-0 Bb7 6.c4 Bd6!? Truly hypermodern, reminiscent of the game Lasker-Bauer with reversed colours. Of course, nobody would allow the double bishop sacrifice nowadays, but the bishops' pressure may be disturbing anyway. In Alekhine's times,

A) The modern tendency (if we can call it as such in a rather unpopular line) is 7.Nbd2 0-0 8.Re1 *(8.Qc2 Nc6 9.a3 a5 10.h3 a4* Hertneck,G (2560)-Jussupow,A (2640) Baden-Baden 1992 CBM 033 [Jussupow] (0-1, 24)*)* 8...Ne4 9.Qc2 Nxd2 10.Nxd2 Qh4 11.g3 Qh5 12.Be2 Qg6 13.f4 c5 14.Nf3 Nc6∞ Aleksandrov,A (2614)-Peralta,F (2546) Warsaw 2007 (1-0, 34);

4.d5!?N 6:29 An original way of changing the fluent course of the game and a novelty as early as on move 4!!

4...Bb7 3:03 **5.Bc4** 1:49 This is the moment when White's approach starts ressembling Korchnoi's in the aforementioned games.

[Played before castling, 5.c4 offers Black easy development: e6 6.dxe6 *(6.Nc3 Bb4;* Actually, just few moves after the novelty, play could have transposed to some lines starting with 3...e6, for instance *6.Bd3 g6 7.Nc3 Bg7 ½-½* (7) Loncar,R (2455)-Lovric,B (2340) Tucepi 1996*)* 6...Bb4+! 7.Bd2 Bxd2+ 8.Qxd2 dxe6 *(8...0-0!? 9.exd7 Ne4 10.Qc2*

White has given away his ambitions for a pawn centre, aiming for free piece development. The f5-pawn ensures Black some space advantage, but in the long run may also prove a weakness. **9...Bc5** 8:59 The bishop has little scope and will also be exposed here.

[But the attempt for a more natural development to g7 after 9...g6 could be met with 10.Bd2!? When Black practically has to pick up the gauntlet with Qxb2 11.Nd4 Qa3 , hoping that he will survive the opening phase.]

10.Bd2 4:16 **Nc6** 10:19 Not having weakened the long diagonal, Black is not forced to take the pawn.

Candidates Tournament (2) 14.03.2014
[Negi,Parimarjan]

1.e4 c5 2.Nf3 Nc6 3.d4 cxd4 4.Nxd4 e5 The Kalashnikov! A rare guest at the top level, but Andreikin sticks with his strategy of surprising his opponents early on. **5.Nb5 d6 6.c4**

[White can also continue with the classical Sveshnikov setup with 6.N1c3]

6...Be7 To justify the Kalashnikov Variation's idea of delaying ... ♘f6, Black needs to keep the option of ♗g5 alive otherwise White will just have an ideal setup with c4. **7.N1c3 a6 8.Na3 Be6**

[8...Nf6 Here White needs to avoid the tricks related to ...b5, after that Black will find it hard to generate counterplay as ... ♘f6 prevents both ♗ g5 and f5. 9.Be2 *(9.Nc2* now it will be hard to control b5, as the following game shows: *Be6 10.Be2 Rc8 11.b3 0-0 12.a4 b5! 13.axb5 axb5 14.Nxb5 Nxe4 15.0-0 d5=* ½-½ (18) Kramnik,V (2759)-Radjabov,T (2756) Baku 2009*)* 9...0-0 *(9...Nd4* lets White get a pleasant bind after *10.Be3 Nxe2 11.Qxe2 Be6 12.0-0 Rc8 13.Rfd1 0-0 14.Rac1 Rc6 15.f3 Qb8 16.Nd5±* 1-0 (53) Maze,S (2553)-Degraeve,J (2523) Pau 2008*)* 10.Be3 Be6 11.0-0 *(11.Qd2* is also possible, as White shouldn't worry about ... ♘g4, but I like the idea of delaying ♕d2 for a few more moves.*)* 11...Rc8 12.Rc1 h6 *(12...Nb8* doesn't look like a worrying plan for White. *13.Qd2 Nbd7 14.f3 h6 15.Rfd1 Ne8 16.g3 f5 17.exf5 Bxf5 18.Nd5± ½-½* (86) Muzychuk,A (2587)-Kovalevskaya,E (2405) Eilat 2012 *)* 13.Qd2 *(13.f3 Nd4 14.Bxd4 exd4 15.Qxd4 d5!∓; 13.Kh1!?* After seeing the 13. f3 variation, this move's idea is apparent. White wants to play f3 next...and doesn't want to give up his bishop on g4. A possible way to continue although the assessment isn't clear: *Ne8 14.Qd2 Bg5 15.Nc2 Bxe3 16.Qxe3* with slightly better chances.*)* 13...Ng4 14.Bxg4 Bxg4 15.Nc2! I don't think White should play ♘d5 - after that ... ♗g5 becomes viable for Black. Here, ... ♗g5 would just weaken the d6-pawn. *(15.Nd5 Bg5 16.Nc2 Be6 17.Rfd1 Bxe3 18.Ndxe3 Qh4 19.f3 Rfd8 20.a4 Qg5 21.b4 Ne7 22.Ne1 Nc6=* ½-½ (25) Polgar,J (2682)-Radjabov,T (2740) Baku 2010*)* 15...Be6 16.b3 f5 No other plan is apparent, but Black isn't prepared to open up the position. *(16...Bg5 17.Bxg5 Qxg5 18.Qxg5 hxg5 19.Rfd1±)* 17.exf5 Rxf5 18.Rfd1 Qe8 19.Ne4 Rd8 20.Bb6 Rd7 21.Ne3 Rf4 22.f3 Qg6 23.Kh1± 1-0 (74) Leko,P (2743)-Nataf,I (2526) Istanbul 2000]

[8...f5 has been tried a few times by Radjabov. Now the simplest option seems to be: 9.Bd3!? f4 *(9...fxe4 10.Nxe4±)* 10.g3 Nf6 11.gxf4 exf4 12.Bxf4 0-0 An interesting pawn sacrifice, but at first glance it is still Black who has to prove enough compensation. 13.Bg3 Be6 *(13...Ng4 14.f4±; 13...Bh3 14.Nc2 Kh8 15.f4 Rc8 16.Qd2 b5 17.0-0-0*

bxc4 18.Bxc4 Nb4 19.Bb3±) 14.Nc2 Ng4 15.f4 h5 16.Be2!± 1-0 (56) Andriasian,Z (2600)-Jurcik,M (2481) Yerevan 2014]

9.Be2 Bg5 10.Nc2

[⌓10.0-0 is probably a better move order to get the same position, but I believe Svidler felt it doesn't make a big difference. Bxc1 11.Rxc1 Nf6 12.Nc2 converts to the notes to 11...♘f6 in the main game.]

10...Bxc1 11.Rxc1 Qg5 Andreikin tries to make use of White's delayed 0-0, but I am not sure if it's any better than the normal lines.

[11...Nf6 12.0-0 0-0 is the normal way to continue. 13.Qd2 Qb6 *(13...Qb8 14.Rcd1 Rd8 15.f4 exf4 16.Rxf4 Ne5 17.Rxf6 gxf6 18.Qh6 Rd7 19.Ne3↑* 1-0 (41) Amonatov,F (2616)-Rahman,T (2291) Dhaka 2013 *)*

A) Another interesting way to continue is 14.Qxd6!?N Qxb2 *(14...Rfd8 15.Qa3 Nd4 16.Nxd4 Rxd4 17.Rfd1±)* 15.Qd3 **Δ** ♘d5, and White should be able to maintain some pressure.;

B) Black has a solid position, but he doesn't have any clear way of counterplay either. So White can just continue to improve his position as well: 14.Rfd1 Rfd8 15.b3 Rac8 16.Qe3 Qxe3 17.Nxe3 Nd4 18.Kf1 Kf8 19.Nc2 Nxc2 20.Rxc2 Ke7 21.Rcc1 Rc6 22.f3 Rdc8 23.a4 Nd7 24.Kf2 a5 25.Rd2 Nc5 26.Bd1 Rb6 27.Nb5 f5 28.exf5 Bxf5 29.Rc3 Rf8 30.Re3± *(30.Bc2* was a blunder in the game. *Bxc2 31.Rdxc2 Ne4+* ½-½ (47) Svetushkin,D (2588)-Bacrot,E (2705) Calvi 2013 *)*]

12.0-0 Rd8 13.b4

[13.Nd5 Rd7 seems very awkward for Black, but it's not clear how White should break through. *(13...Nf6 14.Nc7+ Ke7 15.Qd3)* 14.Qd3 Nf6 15.Nb6 Rd8]

13...Nf6 14.Qd3 0-0 15.Rfd1 Rc8

[15...Ne7 could be a better move, preparing for ♘d5, but White's position is slightly more pleasant anyway. 16.Qg3]

16.Nd5! b5

[16...Bxd5 17.exd5 Ne7 *(17...e4 18.Qg3 Qxg3 19.hxg3 Ne5 20.Ne3±)* 18.Ne3± **Δ** c5...and Black doesn't have an easy way yet.]

[16...Rfd8 would have still held Black's position together, but White's position is still pleasant.]

17.Qg3! A brilliant idea. Black has two different ways to take a pawn now...

17...Qxg3

[The key line to calculate for White was after 17...Nxe4 18.Qxg5 Nxg5 19.Nb6! Rb8 20.Rxd6 Rxb6 21.c5 Nd4 22.Rxd4! Rc6 23.Rd2 Bxa2 24.Ne3 Be6 25.Nd5 gives White a very pleasant endgame despite being a pawn down temporarily.]

20.f4! Suddenly it's not so easy to deal with the simple threat of f5.

[Andreikin probably expected 20.Rxd6 and now Black would be fine after Rfd8 21.Rxd8+ Rxd8=]

20...f5

[20...Rfd8 21.f5 Bd7 22.Bxc4±]

[Lenderman,Aleksandr]

Hello Everyone! This is GM Aleksandr Lenderman with Moscow Grand Prix round 8 game of the day. I decided to choose the draw between Svidler and Mamedyarov because I thought it was a good complex battle between the leaders of the tournament. **1.e4 e5 2.Nf3 Nc6 3.Bb5 a6 4.Ba4 Nf6 5.d3 b5 6.Bb3 Bc5** According to my database this is the first time Mamedyarov has played this line in the Ruy Lopez. In general though Mamedyarov plays many different options even on move 1. **7.Nc3** When Mamedyarov chose 6... ♗c5, he was probably basing his preparation on Svidler's recent game against Ding Liren, in which he replied with 7.c3, and Black got a good position in that game.
[7.c3 0-0 8.0-0 d6 9.Bg5 h6 10.Bh4 g5 11.Bg3 Ba7 12.Nbd2 Na5 13.Bc2 Nh5 14.Kh1 Nc6 15.Bb3 Na5 16.Bc2 Nc6 17.Bb3 Na5 18.Bc2 Nc6 1/2 (18) Svidler, P (2741) -Ding Liren (2759) Shenzhen CHN 2017]

[12...Rae8 13.g4↑ is also very good for White.]
[12...h5!? is the engine suggestion but of course this move might be very dangerous and I'm not sure if this move will have many followers. I guess it remains to be seen whether 12. h5!? withstands deep home analysis.]

13.Bxa8 Rxa8 14.g4 Qe6 Black is just down an exchange but he has positional compensation in the two bishops, soon control of the centre, and also very importantly Black has been able to neutralise White's attack. **15.Nh4** A possible move but I am not sure if it's the best move.
[15.Be3!? Perhaps it was worth considering just exchanging Black's strong bishop and trading off some pieces. Bxe3 16.fxe3 d5 17.Nd2± and neither I nor my engine see enough compensation here for Black.]

15...d5 16.Nf5 Bc6 17.Qe2
[17.Nxe7+ Bxe7 18.Qe2 was also a try for an advantage, not allowing the black knight to be strong on g6 and controlling the f4-square.]

17...dxe4 18.dxe4 Ng6 19.Kf1?! This is probably already an inaccuracy.
[19.Rg2!! This brilliant, albeit clumsy looking move is simply prophylaxis against ... ♘f4, to be able to prepare the move f3, unpinning the f-pawn, currently protecting the rook on g1 from ... ♗c5 Nf4 *(19...b4 20.c4±)* 20.Bxf4 exf4 21.f3±]

[19...b4!? was also possible.]

20.Bxf4 exf4 21.Re1 It was also worth considering giving up material here, but Black also seems to have sufficient play then.

22.b4 Bb6 23.f3! Otherwise Black has a very strong initiative. Possibly Black underestimated this reply. **23...Bxg1 24.Kxg1 Bd7 25.Rd1 Qb6+ 26.Qf2 Bxf5 27.gxf5 Qxf2+ 28.Kxf2 a5** Now the game will end peacefully from here. **29.a3 axb4 30.axb4 Ra8 31.Rd7 c6 32.Rc7 Ra2+ 33.Kg1 Ra1+ 34.Kg2 Ra2+ 35.Kg1 Ra1+ 36.Kg2 Ra2+ 37.Kh3 h5 38.Rxc6 f6 39.c4** After bxc4 ♖xc4 ♖b2, White can't make any further progress with his king stuck on h3 and never being able to get into the game. Therefore draw agreed. A short but very interesting and instructive battle on the top board at the Moscow Grand Prix.

1.e4 c5 2.Nf3 d6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 g6 It is always of a high interest to see the Dragon Variation played by its biggest specialist - GM Mihail Golubev. However, in this game

Peter Svidler was very well prepared, and he showed a clear way to advantage in the line which was considered more or less unclear. For instance in Informator 82 the position after 21.Rd1 from the present game was evaluated as "unclear", while in fact it is "more unclear" for Black than for White, who has a big advantage. **6.Be3 Bg7 7.f3 Nc6 8.Qd2 0-0 9.Bc4 Bd7 10.0-0-0 Ne5 11.Be2** An interesting move order. **11...Rc8 12.Kb1 Nc4** Now White succeeded to enter the lines, which are considered by the modern theory to be favourable for White, namely 11.Bb3 Rc8 12.Kb1 Nc4 (12. ... 18...Bxd1?! After this move Black won't have time to take on c3. In one of my previous comments I also thought this move would be possible (though the correct 18. ... Bxc3 was another suggestion of mine), but as Svidler demonstrates, there are tactical tricks in the position and Black cannot allow to make such inaccuracies.

[18...Bxc3 Apparently this is the only move to keep the tension. 19.bxc3 Bxd1 20.Rxd1! *(20.dxe7 Bxc2+!* An important resourse, which doesn't necessarily aims to take material, but first of all it makes the position of White's king more exposed (second rank and the diagonal b1-h7). *21.Qxc2 Re8* Now White seems unable to keep the pawn on e7. A possible line would be: *22.Rd1 Rxe7 23.Rd8+ Kg7 24.Qd2 Rh4 25.Bg5 Re2 26.Bxh4 Rxd2 27.Rxd2* and thanks to the unsecure position of white king Black is not worse.*)* 20...Qxd6 *(20...exd6 21.Bd4* looks very dangerous for Black. *)* 21.Qxd6 exd6 22.Bxa7 and White is better here, though the endgame is quite complicated.]

19.dxe7 Bxc2+ 20.Qxc2 Re8 21.Rd1! Svidler's evaluation proved to be correct - White is much better, since he will keep the pawn on e7. **21...Qe6**

[No time for 21...Bxc3 due to 22.Rd8! Thanks to this "zwischenzug" White keeps the pawn on e7 and consequently a big advantage. *(22.bxc3 Rxe7* transposes to the above given variations, which start with 18. ... Bxc3.*)* 22...Rc8 23.Rxc8 Rxc8 24.bxc3 Qe6 25.Bc5±]

22.Bc5± The next part is a demonstration of the strength of White's position. **22...Bf6 23.Qd3 b6 24.Ba3 Bxc3**

situation. **10...c5** The most challenging - since White's king is still in the centre, this standard break is quite effective.

[10...g6 11.Ng3 Nd7 12.Nxf5 gxf5 13.c3 Saric,I (2666)-Motylev,A (2687) Poikovsky 2014, was unpleasant for Black.]

11.dxc5 Qa5+N No doubt, this innovation was properly explored by GM Svidler before the game.

[11...Na6 is what Michael faced earlier: 12.Qb5+ *(12.Bxe7!? Qxe7 13.Qb5+ Qd7 14.a4 Qxb5 15.axb5 Nxc5 16.Ned4* Rodi,L (2340)-Roiz,M (2605) Baku AZE 2016, led White to a slightly better ending.*)* 12...Qd7 13.Qxd7+ Kxd7 14.Bxe7 Kxe7 15.b4 b6 16.cxb6 Nxb4 17.Ned4 Nxd4 18.Nxd4 axb6 19.Rb1 Rxa2 20.Kd2 Na6= 1/2 (31) Adams,M (2744)-Navara,D (2730) Wijk aan Zee NED 2016]

12.c3 Qxc5 13.Bxe7

[13.0-0 Nc6 14.Bxe7 Qxe7 15.g3 0-0 16.Nf4 g6 17.Rfe1 Rac8 18.Ng5 Kg7= was safe for Black.]

13...Kxe7 This original decision seems risky - there are still many pieces on the board, so the ♔e7 is not that safe.

[More to the point was 13...Qxe7 14.Ned4 Nxd4 15.Nxd4 Nc6 16.Nf3 Qc7 17.Qe2 0-0=]

14.Ned4 In his turn, GM Adams fails to extend his initiative properly - the exchanges favour Black in this situation.

[A much more energetic try would be 14.0-0! Nc6 15.Qd2 g6 16.Qg5+ Kf8 17.Qf6 Kg8 18.Rfd1⩲ , and Black is suffering from a lack of harmony.]

14...Nxd4 15.Nxd4

[15.cxd4 Qb4+ 16.Qd2 Qxd2+ 17.Kxd2 Nc6=]

15...Nc6 Now Black's problems are solved. **16.0-0** This move isn't bad at all, but it is a committal decision - White is giving up a central pawn.

[Safer was 16.Qe3 Nxd4 17.cxd4 Qb4+ 18.Qd2=]

16...Nxe5 17.Qe3 Nd7 18.Rfe1?! The first step in the wrong direction - White is wasting an important tempo, letting Black consolidate.

[The correct way was 18.Rad1! Kf8 19.c4! ,maintaining the balance. The play might continue: e5 *(19...Qxc4? 20.Rc1 Qa6 21.Rc7→)* 20.Nf5 d4 *(20...Qxe3 21.fxe3 Nf6 22.cxd5 Rd8=)* 21.Qg5 g6 22.b4! 18...Kf8 19.Rad1

[19.Rac1 Rh6 20.Red1 Rg6 21.Qf3 Nf6 22.c4 Rg4∓]

19...Rh6! Peter finds a beautiful way of activating the rook. **20.Rd3?** It is only after this mistake that White's position becomes really bad.

[Had he played 20.c4! dxc4 *(20...Qxc4 21.Rc1 Qb4 22.Rc7 Rd8 23.Nf3∓)* 21.Qg3 Nf6 22.Rxe6 Rg6 23.Qd6+ Qxd6 24.Rxd6∓ , the activity of his pieces would offer White excellent drawing chances.]

20...Kg8 21.Qd2 Rg6 Now Black is just a pawn up. **22.Nf3 Rg4 23.Nh2?**

[It was necessary to swap the knights: 23.Ne5 Nxe5 24.Rxe5 g6 25.g3∓ , hoping to trap the opponent's rook by means of 26.f4. In this case White would still have some practical drawing chances.]

23...Rxh4 24.Qg5

1.Nf3 c5 2.g3 Nc6 3.Bg2 g6 4.c4 GM Peter Svidler has rich experience in various systems of the English Opening. This time he enters into a closed type of position. **4...Bg7 5.Nc3 d6 6.0-0 e5**

[6...e6 is another common continuation.]

7.a3 Nge7 8.d3 0-0 9.Rb1 a5 10.Bg5

[The most popular line starts with 10.Ne1 Be6 11.Nc2 d5 12.cxd5 Nxd5 13.Ne3 Nde7 14.Nc4 and leads to an interesting position à la reversed Marocy, where White's active piece play compensates for a lack of space.]

10...f6 11.Bd2 Be6 12.Ne1 The knight is heading to d5, so Black shouldn't hesitate.

[Another way of preparing the b2-b4 advance isn't effective: 12.Na4 Rb8 13.b4?! axb4 14.axb4 cxb4 15.Bxb4 b5!∓ Plomp,G-Meulders,R (2285) Belgium 1995]

12...d5 13.cxd5

[13.Na4 would lead only to simplifications: b6 14.b4 axb4 15.axb4 cxb4 16.Bxb4 Nxb4 17.Rxb4 Rb8=]

13...Nxd5 14.Qb3?! This ambitious move was connected with a blunder.

[After 14.Nc2 f5 15.Ne3 Nde7! Black should be able to neutralise White's play on the queenside. *(*A less precise try is *15...Nb6 16.b3 Rb8 17.Nc4 Nd7 18.Nb5 Ra8 19.e3±* Kramnik,V (2766)-Leko,P (2749) Monte Carlo 2007*)* For instance, 16.Na4 b6 17.b4 axb4 18.axb4 f4 19.Nc4 Rb8∓ Bedia,M (2164)-Zakhartsov,V (2534) Krasnodar 2004. However, it still was the best way of handling the position.]

14...Nc7 15.Qb6N This is the only way to justify White's previous move. However, the queen is in big danger now.

[In the event of 15.Qd1

A) The previously played 15...Nd4 is weaker: 16.b4 axb4 17.axb4

cxb4?! *(17...c4! 18.Bxb7 Rb8 19.Bg2 f5⩱)* 18.Rxb4 Na6 19.Rxb7 Nc5 20.Rb1± Valdes,L (2365)-Mendoza,R (2382) Guayaquil 2003;

B) 15...Qe7!∓ White would be doomed to a passive defence.]

[Also after 15.Qxb7 Nd4 16.Nf3 Rb8 17.Qe4 Qd7 18.Qe3 Rfc8↑ Despite the extra pawn, White's position seems unpleasant.]

15...Nd4 16.Nf3?! Peter is inviting new troubles.

[The lesser evil would be 16.f4

A) 16...exf4 17.Bxb7! *(The more natural 17.Bxf4?! B) 16...f5! 17.fxe5 Bxe5 18.Qxc5 Bg7↑ The vulnerable placement of the ♕c5 yields Black a powerful initiative, but at least White is a pawn up.]

16...Ra6! 17.Qxb7 Nxe2+ 18.Kh1

[Of course, not 18.Nxe2 Bd5 and the queen is trapped 19.Qxa6 Nxa6-+]

18...Nxc3 19.bxc3 Now, when the ♘e2 is gone, White's monarch is going to be be exposed till end of the game.

19...Bd5

[19...c4!? 20.d4 Bd5 21.Qb2 Qa8 22.Ne1 exd4 23.cxd4 f5∓]

20.Qb2 Qa8 21.Ne1 Rd6 Starting to put pressure on White's weaknesses.

22.d4 Peter isn't prepared to sit and wait, but this move leads to the loss of a pawn.

[22.Be3 Ne6 23.Bxd5 Qxd5+ 24.Kg1 f5 25.c4 Qa8∓]

22...Rfd8

[22...Bxg2+ 23.Nxg2 cxd4 24.cxd4 Rxd4∓ would lead to the same character of play.]

23.Kg1 cxd4 24.cxd4 Bxg2 25.Nxg2 Rxd4 So, now Black is a pawn up, but White's pieces get some activity. **26.Bc3**

[26.Be3 Rd3 27.Bb6 R8d7∓]

26...R4d7

[26...Rd3!?]

27.Ne3 Nd5 28.Nxd5 Rxd5 29.a4 Now the ♙a5 is fixed, so Black's pieces are tied to protecting it. On the other hand, White's king is still in danger. **29...h5!** Exploiting the main drawback of his opponent's position. **30.h4**

[30.Qb3!? deserved to be considered: Kh7 31.Rfd1 Rc5 32.Rxd8 Qxd8 33.Be1∓]

30...Qc6 31.Qb3

[It makes sense to swap the queenside pawns: 31.Rbc1!? Qxa4 32.Ra1 Qg4 33.Rxa5 Rd3 34.Ra7∓]

31...Kh7 32.Rfc1 Now, when the last piece has moved from the kingside, the advance of Black's pawns is becoming dangerous. **32...Qd7**

[32...Rd3! was stronger: 33.Qb5 Qf3 34.Be1 e4-+ and Black's pieces are dominating over the board.]

33.Be1 e4 34.Qb7 A temporary pawn sacrifice. **34...Qxa4 35.Ra1 Qe8 36.Rc7 R5d7 37.Rxd7?** Alas, Peter chooses the wrong way of regaining the pawn.

[The correct 37.Rxa5 Rxc7 38.Qxc7 Rd1 39.Kf1∓ would offer him definite

drawing chances.]

37...Rxd7 38.Qb3

[The most stubborn was 38.Qb5, but after e3! 39.Rxa5 exf2+ 40.Kxf2 f5 41.Kf1 Qf7 Black would slowly develop a decisive attack.]

38...Rd3 39.Qc4 Qd7?! A loss of tempo. This inaccuracy makes Black's task tougher.

[Anish had to play 39...f5! 40.Rxa5 Rd1 41.Qb4 e3 42.Ra7 Kh8 43.Kh2 exf2 44.Bxf2 Qc6 45.Bg1 Qc2+ 46.Kh3 Qd3-+]

40.Rxa5 f5 41.Kg2 Rd1 42.Qe2 Rb1 43.Rc5?

[The only way to put-up resistance was 43.Ra3 Qe7 44.Re3 Qb7 45.Qc4 Rd1 46.Qb4∓ , and it's not easy to make further progress.]

43...Qb7?

[43...e3! was winning on the spot: 44.fxe3 Qe7 45.Rb5 Qe4+ 46.Kh2 Rc1-+]

44.Kh2 f4 45.gxf4 Qe7 46.Rc4 Qxh4+ 47.Kg2 Qxf4 48.Qxe4 Qg5+ 49.Kf3? It is only after this mistake that the result of the game becomes predictable.

[Had Peter played 49.Kf1! Ra1 *(49...Qb5 50.Qd3 Be5 51.Kg2∓)* 50.Qd3 Qb5 51.Rd4∓ the limited material balance would still offer drawing chances.]

49...Rb5! 50.Qd3 Qg1-+ Now the monarch is helpless. **51.Re4 Rb2 52.Qc4**

13.Bd2?! Quite an awkward positioning for this bishop. Usually, it is Black to play ...♗b4 and return to e7 only to force such a move. The bishop on d2 closes the d-file, does not protect e5, and ultimately fails to control a3 - thus allowing Black to potentially take control of the c-file.

13...Rb8 14.b3 b5 An ambitious move, but risky too, moreover this is a pawn sacrifice.

[In the event of 14...Be6 15.Rd2± White looks more comfortable, because he can put pressure on d6.]

Be7 9.h4 An interesting attempt to immediately get things sharp on the kingside. Of course, the downside is that White loses a few tempi in the process and Black's king reaches safety in the meantime.

[Peter went for the main line 9.Be3 Nc6 10.f4 Nd7 11.0-0 in the rapid section of the match, and after 0-0 12.Nce2 Nxd4 13.Nxd4 e5 14.Nf5 exf4 15.Bxf4 Ne5 16.Qd2 Bxf5 17.exf5 Rc8 18.b3 b5 an interesting battle ensued.]

■ **Svidler,Peter** **2749**
Geneva FIDE GP (7) 13.07.2017
[Lenderman,Aleksandr]

Today the choice was clear to me, since we had a decisive game on one of the top boards, and also it was a nice, clean game by Radjabov, who is in excellent form in this tournament. **1.Nf3 Nf6 2.c4 c5**
[2...g6 3.Nc3 d5 4.cxd5 Nxd5 is another common line for Grünfeld players, but these days many players don't want to venture here, since White has a lot of additional dangerous options here.]
3.Nc3 d5 As far as I know, the most common way for Grünfeld players to play against this White's move order.
[3...g6 4.d4 cxd4 5.Nxd4 d5 is also a common way for Grünfeld players to play, but still, I think White has some pressure here if he knows the line well. *(5...Bg7 6.e4* leads to a Maroczy Bind Structure, which most Grünfeld players wouldn't want to play, since this is basically suffering for most of the game, and there aren't as many dynamic options for Black here. *)*]
4.cxd5 Nxd5 5.e3
[5.e4 is also a very common move here, after which Black usually plays ... ♘b4 and leads to very sharp positions. Nb4]
5...Nxc3 Definitely not the only move here.

[5...e6 As far as I know this is the most common alternative, which will most likely lead to an IQP (isolated pawn position), where White has the isolated d4-pawn but will have attacking chances. 6.d4]

[5...Nc6 isn't played as often because of the unpleasant... 6.Bb5 After which Black will probably still have to eventually play ...e6, but now he has allowed a slightly annoying pin, and therefore some concessions.]

[5...g6 is also not as accurate, right away, since here after a strong queen move, disturbing Black's harmony, he has to make some annoying concessions, for example... 6.Qa4+! This is already unpleasant for Black. Bd7 *(6...Nc6 7.Bb5±)* 7.Qb3±]

6.dxc3 And this is the first somewhat surprising move. Almost exclusively White plays bxc3. However, Radjabov, one of the leaders at +2, playing Svidler, who has 3.5/6, half a point behind, decided to put the ball in Black's court to try to create some kind of a battle in a dry position. That,along with the fact that as far as I can tell, Svidler doesn't like positions that are too dry. One game that comes to mind is Karjakin-Svidler from the 2015 World Cup Finals, where Svidler just needed a draw to win the finals, as he had been leading 2-1, but wasn't able to defend a slightly unpleasant but tenable position. This no doubt had an impact on Radjabov's decision to play this kind of a position this round. Needless to say, it paid off big time for him in this game. **6...Qxd1+**

[6...Qc7 Perhaps this deserves attention. This is already a rare position though.]

7.Kxd1 Bf5 This move is designed against a quick e4. It's an interesting option but definitely not the only option.

[7...Nc6 is an alternative which Nepo tried against Vidit in the last Olympiad. He'd also tried ...b6 the game before against Wang Yue. 8.e4 b6 9.Kc2 Bb7 10.Bf4 f6 11.Rd1 e5 12.Bc1 *(12.Bg3!?* Maybe this move here or somewhere earlier was a possible improvement for Radjabov.*)* 12...Na5 13.Bb5+ Kf7 14.Rhe1 a6 15.Bc4+ Nxc4 16.Rd7+ Be7 17.Rxb7 Rhb8 18.Rxb8 Rxb8 19.b3 Nd6 20.Nd2 b5= 1/2 (37) Vidit,S (2669)-Nepomniachtchi,I (2740) Baku AZE 2016. Black equalised comfortably and went on to draw without particular problems.]

[7...b6 8.e4 Bb7 9.Bb5+ Bc6 10.a4 a6 11.Bxc6+ Nxc6 12.Kc2 e6 13.Rd1 Be7 14.Bf4 Ra7 15.Nd2± 1/2 (47) Wang Yue (2728)-Nepomniachtchi, I (2719) Moscow RUS 2016. Here White has some pull, in a game which ended up being a draw in 47 moves.]

8.Nd2 Nc6 9.e4 So, White got in e4 anyway, but Black's idea was to force White's knight to d2 first, so that White has a harder time developing his bishop on c1. **9...Be6** This is according to my database a novelty, and possibly not the best one.

[9...Bd7 was played by the late Walter Browne all the way back in 1979. 10.Kc2 0-0-0 11.Nb3 e6 12.Be3 b6 13.Ba6+ Kc7 14.a4 Ne5 15.f3 Bd6 16.Be2 Bc6 17.Nd2 f5 1/2 (42) Andersson,U (2560) -Browne,W (2540) Banja Luka 1979; with a complex game, which ended up in a draw in the end. But certainly both sides could probably make subtle

improvements before.]

10.Kc2 g6

[10...0-0-0 This move deserves attention as well, since it stops ♗c4 because of ... ♖xd2!. However, White has annoying options here as well. 11.Nb3 *(11.Bc4?? Rxd2+-+; 11.Nf3!?* is also interesting, trying to induce the move f6 at some point. *f6 12.Be3 b6 13.Ba6+ Kb8 14.Bf4+ Ka8)* 11...b6 12.Ba6+ Kb8 13.Bf4+ Ka8 14.Rhd1 Rxd1 15.Rxd1 g6 16.Nd2 Bg7 17.Bc4 Bxc4 18.Nxc4 Rd8 19.Rd5± White has a slight pull here, but it certainly looks like Black should be able to hold.]

11.Bc4 Bd7 Now it's starting to look like Black's strategy didn't work. He's losing too many tempi and White is putting his pieces on decent squares.

[11...Bxc4 12.Nxc4± is also slightly unpleasant though. White has a plan with ♗e3 and a4 after ...b6. Black's bishop is a slight problem, in where it's very useful.]

12.Nb3 b6 13.a4 An important move, not only thinking about playing a5, but also preparing to play ♗b5 after ... ♘e5.

13...Ne5 14.Bb5 a6?! But this move already seems like a real inaccuracy. I don't think it was necessary to create additional weaknesses.

[14...Bg7 15.Bf4 0-0-0 still seems tenable for Black.]

15.Bxd7+ Nxd7 16.Be3 e6 17.Rhd1 0-0-0 18.Nd2± Now White already has a serious advantage. White's knight is getting back to c4, its dream square, while Black is tied down to the weakness on b6. In general, the main reason White wanted to swap off the light-squared bishops was because he wanted to have his knight unopposed on c4, where it can't be bothered by Black's bishop, and also sometimes the white knight and bishop are redundant on the light squares. **18...Be7 19.Nc4 Kb7 20.a5! Rhf8** The problem for Black is that...

[20...b5? only makes things worse because of... 21.Nd6+ Bxd6 22.Rxd6+- and Black is just collapsing here with his weaknesses.]

21.axb6 Nxb6 22.Na5+ Kc7 23.Bf4+ Bd6 24.Bh6! A very important decision here. White didn't want to trade off the dark squared bishops since then he would not have enough fire power to really apply maximum pressure on Black's weaknesses.

[24.Rxd6 Rxd6 25.Nb3 *(25.Rd1 Nc8 26.Nc4 Rfd8 27.b3 f6 28.Nxd6 Nxd6* and since the pawn endgame is going to be drawn, Black will be able to untangle himself eventually with ... ♔c6, and even though he's worse, he can still fight here.*)* 25...c4 26.Nc5 Ra8 27.Nxa6+ Kc6 28.Bxd6 Kxd6 29.Rd1+ Kc6 30.Nb4+ Kc5 would have won a pawn for White, but Radjabov correctly assessed that in this position Black would have better chances o holding than in the game, since he was able to get his pieces very active and trade off or eliminate his weaknesses just at the cost of a pawn. This is still promising for White but it shows incredible patience not to go for this line, which I'm sure Radjabov saw.]

24...Rfe8 25.Nb3 Black still won't be able to avoid material loss in the long run, but here he also keeps his active bishop, while Black's bishop on d6 is quite restricted and can't do much. **25...Ra8 26.Be3 Nd7 27.Ra5 Kc6 28.Rda1**

Kb6 29.R5a4 Rec8 30.Na5 Be7?! Loses in one move, but the position was already probably lost.

[30...Kc7 31.Nc4 Be7 would have prolonged the game, but White should still be winning. 32.Rxa6 *(32.Bf4+* Though the computer even doesn't want to take the pawn. *Kb7 33.Na5+ Kb6 34.Rd1 Ra7 35.Nc4+ Kc6 36.Ra3* and due to the deadly threat of ♘a5+ with a mating attack, Black is already forced to play the pathetic... *e5 37.Bxe5 Nxe5 38.Nxe5+ Kc7 39.Rd7+ Kb8 40.Rb3+ Ka8 41.Rd1* But this is equivilant to resignation.*)* 32...Rxa6 33.Rxa6 should be enough for a winning advantage.]

31.Rb4+ Black resigned since is losing after

[31.Rb4+ Kc7 32.Rb7+ Kd8 33.Rd1 Rc7 34.Nc6+ and Black will lose at least a piece. A very nice game by Radjabov and this puts him in a commanding position to be able to win this tournament.]

[Roiz,Michael]

1.c4 e6 2.Nc3 d5 3.d4 Nf6 4.cxd5 Nxd5 5.e4 Nxc3 6.bxc3 c5 7.Rb1 Peter is emloying a considerably rare continuation, that enables White to avoid the major simplifications.
[The main line 7.Nf3 cxd4 8.cxd4 Bb4+ 9.Bd2 Bxd2+ 10.Qxd2 0-0 has proved to be very solid for Black.]
7...Be7 8.Nf3
[8.Bb5+ was also recently tested on

the highest level: Bd7 9.Bxd7+ *(9.Nf3 Bxb5 10.Rxb5 b6 11.0-0 0-0=)* 9...Qxd7 10.d5 exd5 11.exd5 0-0 12.Nf3 Bf6 13.0-0 b5⇄ Aronian,L - Vallejo Pons,F Sharjah UAE 2017]

8...0-0 9.Bc4 This is the most natural way of development. White's bishop is supporting the thematic d4-d5 advance now.

[9.Bd3 cxd4 10.cxd4 Nc6 offers Black comfortable play due to the pressure on the d4-pawn.]

9...Nc6

[The more modest 9...Nd7 10.0-0 Qc7 11.Qe2 b6 12.d5 exd5 13.Bxd5 Bb7 14.Bf4 Qxf4 15.Bxb7 Rab8 16.Bc6± (Vitiugov,N - Miton,K Czech Republic CZE 2013) didn't offer Black a full equality.]

10.0-0 b6N A natural novelty. There is no reason for delaying the development of the passive c8-bishop.

[The preceding encounter was played almost half a century ago: 10...Qc7 11.Qe2 b6 12.Rd1 Na5 13.Bd3 Bb7 14.d5 c4 15.Bc2 e5 16.Be3± Polugaevsky,L-Petrosian,T Soviet Union 1970]

11.d5! Only this ambitious continuation might pose Black any problems.

[11.Bf4 Bb7 12.Re1 cxd4 13.cxd4 Rc8=]

11...Na5

[11...exd5 12.Bxd5 Qc7 13.Re1± looks rather passive for Black.]

12.Bd3 c4 This move makes the d5-pawn vulnerable. On the other hand, the a5-knight is definitely misplaced now.

13.Bc2 exd5 14.exd5 Bb7 Black's main counterplay is based on attacking the ♙d5, but the ♔g8 is getting more exposed now.

[Possibly, a safer try was 14...Bg4!? 15.Qe2 *(15.h3 Bh5 16.Re1 Bd6⇄; 15.Bf4 Nb7 16.h3 Bh5 17.Re1 Bd6⇄)* 15...Bh5! 16.Re1 Bd6⇄ securing the king and intending to attack the d5-pawn in the long run.]

15.Re1 Bf6? This move is inviting serious troubles - Black shouldn't let White advance the passer.

[A much better move was 15...Qd6! 16.Ne5 *(16.Rb5 a6 17.Rb1 Rae8 18.Be3 Bd8⇄)* 16...Qxd5 17.Qg4 Rad8 18.Qh3 f5 19.Bf4 Bc8! , and it looks like White has sufficient play for a pawn, but hardly more. For instance, 20.Rbd1 *(20.Ng6 hxg6 21.Rxe7 Rfe8 22.Rxg7+ Kxg7 23.Qh6+ Kg8 24.Qxg6+ Kh8* with a perpetual*)* 20...Qc5 21.g4 Rxd1 22.Rxd1 Bg5! 23.Bg3 h6 24.gxf5 Nc6 25.Nd7 Bxd7 26.Rxd7 Ne5 and Black is OK.]

16.d6! Of course, GM Svidler doesn't miss this chance.

[16.Ba3?! is much weaker: Re8 17.Rxe8+ Qxe8 18.Qd2 Qd7 19.Rd1 Rd8 20.d6 Bxf3 21.gxf3 g6⇄]

16...Re8

[In the event of 16...Qd7 17.Ne5 Bxe5 18.Rxe5 Rfe8 19.Bf4 Rxe5 20.Bxe5 Re8 21.Bg3± White's powerful bishops would support the passer, so Black is in big troubles.]

17.Rxe8+ Qxe8 18.Bf4 Rd8

[18...Qd7 19.Nd4 g6 20.Ba4 Nc6 21.Qd2±]

19.Bf5! Now the passer has perfect support from both White's bishops.

19...g6? The decisive mistake.

[It was necessary to remove the queen from the back-rank: 19...Qc6 20.d7 g6 21.Bh3 Bxc3 22.Rc1

, even though White's initiative lasts there too: Bf6 23.Qe2 Qe4 24.Qxe4 Bxe4 25.Bc7 Rf8 26.Ne5↑]

20.d7 Qf8

[A more stubborn option was 20...Qe7 21.Bh3 Bc6 22.Bc7 Rxd7 23.Bxd7 Qxd7 24.Qxd7 Bxd7 25.Be5+- , but White should be able to convert his material advantage into a full point.]

21.Bh3 Be4 22.Rc1 White is not in a rush. **22...Qc5**

[22...Nb7 offered no hope either: 23.Bc7 Nc5 24.Bxd8 Qxd8 25.Qe2+-]

23.Qe2 Bf5 Alas, this move doesn't help Black to release the tension. **24.Rd1 Bxh3 25.gxh3 Kg7**

[Or 25...Nb7 26.Qe4 Qf5 27.Qxf5 gxf5 28.Bc7 Rf8 29.Nd4+-]

26.Rd6! The most effective. **26...Bxc3**

[26...Nb7 27.Rxf6 Kxf6 28.Be5+ Ke7 29.Bd4++-]

27.Ng5 All Black's pieces are too far away from the king, so White's attack is unstoppable. **27...Qf5 28.Qe7** The rest is just an agony. **28...h6 29.Ne6+ Kh7 30.Nxd8 Qxf4 31.Nxf7 1-0**

20.a4! Dies ist der Zug, den Peter unterschätzt hatte. Der schwarze Damenflügel bricht zusammen.

14.b4N A logical novelty by Karjakin. White's idea is to play on the queenside with ♗b2, c4.

14...Bb7 15.Bb2 Qd7 16.c4 This is the idea of White's setup. Normally it is very rare that White has 5 pawns next to each other on the 4th rank. **16...exd4?!** A dubious move, because Black will have problems on b5.

17.cxb5! The right reply! **17...d3?!** Another inaccuracy. At first sight 17...d3 is a logical intermediate move, because ...♘f4 will come with tempo. On the other hand the light-squared bishop will be strong on the a6-f1 diagonal.
[However 17...axb5 18.Nxd4 bxa4 19.Bxa4 c6 20.Qc2± is also comfortable for White.]
18.Bxd3 Nf4 19.Bf1! This is the right square for the bishop. White sacrifices the e4-pawn, because on the queenside he will be stronger. **19...Nxe4**
[19...axb5 20.Bxb5± is also better for White.]
20.Nxe4 Bxe4 21.bxa6 Qf5 Threatening ... ♘xh3. **22.Ra3!** A great move, White activates his ♖ from the 3rd rank and protects the f3-knight. **22...c5 23.Nh4** A strong intermediate move! [23...Qg5? loses, as 24.Rg3 Qxh4 25.Rxg7+ Kf8 26.Qxd6++- and wins.]
24.b5+- White's queenside pawns are very dangerous. a5, b5 is his main threat. **24...c4 25.Bd4** The best practical move. White frustrates all counterchances; now he neutralises the a7-bishop.
[25.a5 Bc5]

17.axb5 axb5 18.c4! There is a deep strategic idea behind this move - the stability in the centre favours White, who has a clear attacking plan on the k-side. At the same time, the d4-spot still doesn't fully belong to Black's knight.

Home-made chess it is today! It is a relief to see one of the world elite players trying out an 'interesting' 3rd move in this position - there are many which have appealed to me and other theory-lite players in the past, including ♗g5, c3, b4...

[4.b4!? is interesting if we bear the above note in mind. For instance, now Bg7 5.Bb2 0-0 6.e3 Bf5 7.c4 a5 8.b5 leaves Black a bit short of plans, so Black might have to play more directly, for instance with 4...a5.]

4...Nc6 15:09 Among other things, this move prevents b4, but it is hard to find plans for Black in what follows. **5.b3** 11:01 **Bg7** 1:58 **6.Bb2** 49 **0-0** 1:28 **7.Be2** 2:45 **a5** 7:40 **8.a3** 4:31

[8.c4 attempts to call Black's bluff: a4 is not that threatening since after 9.bxa4 the pawn will prove rather hard to regain.]

There could follow: c6 12.Rac1 Ba6 13.Rfd1 Rc8 14.Qb1± and White has a good version of the Catalan, because ...c5 is almost impossible to arrange.]

11...exd5 1:05 **12.b4** 3:02 **c6** 8:55 **13.Rc1** 3:21 A slightly strange move, conceding the a-file and hence equality.

[13.b5 was the most principled. Doubtless, Black has in mind the equally principled cxb5 14.Bxb5 Bd7 but here White can pretend to have an edge, e.g. 15.Bxd7 Qxd7 16.a4↻ when if nothing else, the queenside pawn structure bodes well for an endgame.]

[17.Nfd2 Nxc3 18.Rxc3 Qd6= still leads to an equal position- White has two knights but only one useful outpost!]

17...Ra6 4:15 From a human point of view, it is sensible to cut out ♘a5 options with the attendant rook-traps, and also protect the c6-pawn.

[17...Bg4!? 18.h3 Bxf3 19.Bxf3 Nd6= is equal for precisely the same reason as the last note.]

18.Nc5 3:48 **Rb6?!** 3:00 Solid to a fault.

[18...Nxc5 19.Rxc5 Qd6 might have been slightly more unpleasant for White to play - c6 is not easy to hit, and Black's doubling on the a-file comes quickly.]

1.Nf3 Nf6 2.g3 d5 3.Bg2 g6 4.0-0 Bg7 5.d4 0-0 6.c4 c6 The eternal problem for White: how to prove anything concrete in the symmetrical Gruenfeld? **7.Ne5** By far not the main line, but not really new either. Besides, it has been tried by Kramnik a couple of times before this game. **7...Be6** Deviating from his opponent's previous games with this line:
[7...Ne4 8.Nc3 Nxc3 9.bxc3 dxc4 10.Nxc4 Be6 11.Qd3 White's centre looks impressive so far but as so many times in this opening Black's piece pressure should be enough to keep the balance even. Rad8 (Now was a good time for throwing the pawns into the fight with: *14...c5=*) 15.Be3 Qc7?! Once again refraining from the thematic break. In Kramnik,V (2812)-So,W (2770) Paris (rapid) 2016 (½-½, 56) White could have retained an advantage with 16.Rac1± getting out of the unpleasant pin and thus stabilising the centre.]

8.cxd5 Bxd5 Switching to the genuine Grünfeld spirit, with piece pressure against White's centre.

[8...cxd5 9.Nc3 trasposes to a somewhat uusual version of the Exchange variation. The bishop typically does not land on e6. Nc6 *(9...Nfd7?!* ½-½ Arkell,K (2450)-Fernandez,D (2450) Crawley e2e4 Gatwick op 10 2016 (9) *10.Nxd5 Nxe5 11.dxe5 Bxe5 12.Bh6 Re8 13.Qb3↑; 9...Nbd7 10.Nd3 Nb6 11.Nc5 Qc8 12.Nxe6 Qxe6 13.Qd3±* Pedersen,N (2417)-Kristensen,K (2244) Ballerup 2009 (1-0, 40) White's bishop pair offers him some advantage, probably something Kramnik would have been delighted to make use of. Besides, the knight does not stand too well on b6.*)* 10.Nxc6 bxc6 In fact this position has been reached in numerous games, but most of them via a different move order (7. cxd5). But still it is not Black's main line, meaning that for White reaching here would be a small success.]

9.Nc3 Aiming for rapid development.

[The main alternative is 9.Bh3 trying to prove that the central bishop is exposed. It is interesting mentioning that Kasparov had played this position with both colours! Nfd7 *(*With Black, Kasparov tried *9...c5 10.dxc5 Ne4 11.Nd3 Na6 12.Be3 Bc6* Speelman,J (2645)-Kasparov,G (2760) Reykjavik 1988 (½-½, 17) *13.Na3±* This game might have inspired Kasparov to try the line with White many years later, but the opening wasn't a big success for him that time either.*)* 10.Nxd7 Nxd7 11.Nc3 Bc4 12.b3 Ba6 13.Bb2 e5 14.d5 cxd5 15.Qxd5 Nf6 16.Qxd8 Rfxd8= Kasparov,G (2830)-Belzberg, S London 2003 (1-0, 28)]

9...Bxg2 10.Kxg2 Nbd7 This not only prepares ...c6-c5 but also puts pressure on the central knight. On the other hand, if Black does not find a favourable moment for playing ... ♘xe5 his knight will be hanging slightly.

[The alternative is 10...Na6 11.Nf3 *(* I do not understand this willing retreat from the centre especially that the knight is not exposed to an exchange. The consolidating *11.f4* deserves attention: *e6 12.e4 c5 13.Be3 cxd4 14.Bxd4 Ng4* Otherwise White would simply retain active play. *15.Nxg4 Bxd4 16.e5* with some chances to endanger the enemy king.*)* 11...c5 12.d5 b5 Wen,Y (2611)-Xu,M (2305) Wuxi 2016 (1-0, 33) with excellent black counterplay.]

11.Qb3 Qb6 12.Rd1 Qxb3N This looks like a small concession as it clears the a-file for the white rook and allows a later b3-b4, stabilising the queenside. But I have failed to prove this move objectively wrong.

[The main alternative I analysed is 12...Rad8 13.Nd3 Nd5 14.e4 *(14.Nxd5 cxd5 15.Qxd5 Ne5=)* 14...Nc7 15.Be3 Qxb3 Necessary already in order to prepare the counterplay in the centre. 16.axb3 a6 17.b4 f5⇄]

13.axb3 Rfc8

[I would find it more appropriate setting up pressure along the d-file with 13...Rfd8 when White's slight delay in development may count. 14.Nc4 *(*If *14.f4 Nd5* the immediate threat is ... ♘xc3 followed by ... ♘xe5 winning a pawn while otherwise Blck may consider ...f7-f5.*)* 14...Nf8 followed by ... ♘e6. 14.f4

[I would consider preveting ...c6-c5 with 14.b4 for instance Nf8 15.e4 Rd8 16.Be3 Ne6 17.f4± But Kramnik probably wanted to gain a tempo for his kingside initiative over this line, considering that ...c6-c5 would play into his hands.]

[The more solid 3...Ba5 was seen in Giri-Kramnik earlier in this tournament.]
4.Nb5!? 7:54 This extravagant move has been known for some time. I'm sure Carlsen counted on it in his preparation.
4...Nc6 7:15 **5.Nd6+** 58 **Kf8** 2:27
[5...Ke7!? 6.Qg3 Kf8 is an interesting nuance. The white queen may find itself not supported by other pieces, and therefore, out of place on the kingside.]
6.Nf3?! 1:10 It is funny to even question this natural developing move, but the thing is, that knight is going to be driven back!
[Instead, let's take a look at one possible alternative: 6.g3 Qe7 7.Nxc8 Rxc8 8.Bg2 Nf6 9.Nf3 e5 10.0-0 e4?! *(A more reasonable move is 10...g6 11.d3 Kg7±)* 11.Ne1 Nd4 12.Qd1 It may seem from a casual glance that Black has made some progress, but his position has a rotten foundation. The absence of a light-squared bishop, a stray bishop on b4, uncastled king and disconnected rooks do not inspire confidence in his success in the long run. One thing left to do is to play h5 and hope for the best.]
6...Qe7 1:30 **7.Nxc8** 1:26 **Rxc8** 2 **8.e3** 12:28 **e5!?** 2:03 Carlsen is absolutely

right: Black must act fast and disrupt White's smooth development.
[In that respect 8...g5!? also comes into consideration.]
9.Qc2 1:00 **e4** 9:34 **10.Ng1** 22 **Nf6** 2:12 **11.Ne2** 3:05 **Ba5** 2:12 **12.a3** 5:21 **h5!** 13:39 A remarkable move. It serves as a deterrent against White's idea of fianchettoing his light-squared bishop, and prepares a possibility of development for the h8-rook.

13.b3 9:03

13...Rd8 3:20 Magnus prepares to open the d-file to pressurise d2.

Either way, Black is getting some play, and possibly, more!]
14.Bb2 10:30 **d5** 12:59 **15.cxd5** 22 **Rxd5** 2:49 **16.0-0-0!** 5:09 Excellent play by Svidler. With the black rook off the c-file he is safe against all ... ♘b4 tricks.
16...Ng4! 1:25 Once again Carlsen shows his deep understanding of dynamic factors.
[A slow approach, such as 16...h4 17.Nf4 Rd8 would allow White to switch to positional tracks with 18.Bb5!? Bc7 19.Bxc6 bxc6 20.d3±]
17.Ng3!? 23:27 Peter Svidler is no stranger to tactical battles. He knows the value of being the one in the driver's seat.
[He rejected 17.Nf4 Rf5 18.Nh3 most likely on account of c4! *(Not 18...Nxf2 19.Nxf2 Rxf2 20.Bc4 f6 21.Bd5±)* 19.b4 *(19.Bxc4 b5* look out for that rook coming to c5!*)* 19...Bxb4 20.axb4 Nxb4 21.Qa4 b5 with a big intiative for Black.]

[10...Be6 11.Bxe6 fxe6 12.Nbd2 frequently transposes to the text.]
11.Nbd2 Be6 12.Bxe6 fxe6 This change of pawn structure is always double-edged: opening the f-file favours Black, but the doubled e-pawns might cause him some problems in the long run. **13.c3** White hardly can claim any superiority without advancing the d-pawn.
[The other way of preparing the thematic d3-d4 break: 13.Nb3 led to a complex strategic struggle in the following top-level game: Qc8 14.Qe2 Nd8 15.d4 exd4 16.Nbxd4 c5 17.Nb3 e5 18.Nbd2 Ne6 19.Nc4 Nd4 20.Nxd4 cxd4 21.Nb6 Qc6⇄ Caruana,F -Carlsen,M Saint Louis USA 2017]
13...Nd7
[After 13...Qe8 14.Nc4 Qg6 15.h3 Nd7 16.Be3 d5 17.Ncd2 bxc3 18.bxc3 Nc5 19.Bxc5 Bxc5 20.Qa4± Carlsen,M - Aronian,L Saint Louis USA 2017, Black was under strong pressure.]
14.Nb3N This natural move is a novelty.
[The previosuly played 14.Nc4 is inviting the freeing d6-d5 advance: d5 15.exd5 exd5 16.Ne3 Nc5⇄ Saltaev,M - Smagin,S Moscow 1995]
14...d5 This committal move seems the only way of activating the pieces.
[In the event of 14...Qe8 15.Be3 Qg6 16.Nbd2 Rb5 17.Qe2 bxc3 18.bxc3 Rfb8 19.Rec1± the control over the b-file wouldn't yield Black real counterplay.]
15.Be3 bxc3 16.bxc3 dxe4?! This exchange makes Black's setup more shaky: the c4-spot and the a6-pawn are very weak.
[After 16...Bd6! 17.Rb1 h6 18.Qc2 Qe7 19.h3 White's position looks somewhat better, but it's very hard to make any real progress.]
17.dxe4 Rb5?! This inaccurate move is inviting fresh troubles.

[A better one was 17...Nf6 18.Qc2 Ng4 19.h3 Nxe3 20.Rxe3 Rb5±]

18.Qe2 The queen is heading to c4.

[Possibly, an even stronger try was 18.Qd3!? Qc8 19.Red1 Ndb8 20.Qc4±]

18...Qb8

[The knight is untouchable: 18...Rxb3? 19.Qc4 Nxa5 20.Rxa5 Ra3 21.Rxa3 Bxa3 22.Ng5+-]

19.Qc4 Nd8 This move looks awkward, but this is the only way to avoid major loss of material. **20.Rad1?!** This move is actually a loss of tempo. Perhaps, Peter had underestimated Black's reply.

[A much better move was 20.Nbd2 Qb7 21.Reb1±]

20...Bd6!

[20...Nf6 is worse: 21.Nc5 Bxc5 22.Bxc5 Re8 23.Nxe5 Rxa5 24.Ra1±]

21.Rb1 Qb7?! Returning the favour.

[Alexander should have played 21...Qa8! 22.Red1 h6±]

22.Nbd2! The exchange of the powerful ♖b5 makes White's advantage bigger.

22...Qc6 23.Rxb5 axb5 24.Qb3± Now Black is mainly suffering from the powerful a-passer.

[24.Qa2!?]

24...Qa6 25.Ra1 Nc5 26.Qb1 Nf7

[26...Ndb7 27.h4 h6 28.h5±]

27.c4! Peter is aiming at opening files for his major pieces. **27...c6 28.cxb5 cxb5 29.Nb3** The knight isn't located so well now.

[A more precise move was 29.Qa2! Re8 30.h4 h6 31.g4± extending the initiative on both sides of the board.]

29...Nd7

[It made sense to lock the a-file: 29...Na4!? 30.Qf1 Qb7±]

30.Qd3 Rc8 31.h3 h6 32.Nfd2

[A more promising route for the knight seems to be 32.Ne1! Rc4 33.Nd2 Rc7 34.Nc2±]

32...Nb8 33.Nf3 b4 Alexander is reasonably deviating from repeating the moves.

[Another possibility was 33...Rc4!? 34.Ne1 Ra4±]

34.Qd1 Qb7 35.Nfd2 Rc3 Obviously, GM Onischuk's position has been improved - Black has managed to activate almost all of his pieces. **36.Nc1 Na6 37.Ne2?!** Once again, GM Svidler chooses a wrong location forr the knight.

[The correct way was 37.Na2! Rc6 *(37...Ra3? 38.Nc4+-)* 38.Rc1±]

37...Rc8?!

[A much better move was 37...Rc6! taking care of the weak e6-pawn: 38.Nb3 *(38.Qb3 Bc5=)* 38...Be7 39.Rc1 Nd6 and Black should be able to achieve a draw.]

38.Qb3 Qe7?! The continuation of a wrong strategy.

[Black's defensive task would be much easier had Alexander played 38...Bc5! 39.Qxe6 Bxe3 40.fxe3 Qc6 41.Qg4 Qc5±]

39.Rc1 Now Black is doomed to a passive defence again. **39...Rxc1+ 40.Nxc1** After the exchange of rooks the a5-pawn becomes more dangerous.

40...Bc5 41.Nd3

[It was better to avoid the doubled pawn by means of 41.Nf1! Bxe3 42.Nxe3±]

41...Bxe3 42.fxe3 Qd8 43.Nc4 Ng5? The decisive mistake.

[Once again, Alexander has missed a golden opportunity for activating all his pieces at the cost of a pawn: 43...Qe8! 44.Ndxe5 Nxe5 45.Nxe5 Kh7 46.Qc4 Qa4! 47.Qxe6

(47.Qxa6 Qa1+ 48.Kf2 Qxe5=) 47...Qxa5 48.Qg6+ Kg8 49.Qf7+ Kh7 50.Nd7 Qd8 51.e5 Kh8± Black would obtain excellent drawing chances.]

44.Nb6

[44.Nxb4! was even simpler: Qb8 45.Nb6 Nc5 46.Qc2 Ngxe4 47.Nc6 Qd6 48.a6! Qxc6 49.a7+-]

44...Nc7

[44...Kh7!? was worth considering, forcing White to find a couple of precise moves: 45.Qc2! *(45.Qc4? Nb8 46.h4 Nf7 47.Nxb4 Qd2=)* 45...h5 46.Nf2 b3 47.Qxb3 Qd2 48.Qd1 Qxd1+ 49.Nxd1 Nxe4 50.Nc4+- this endgame is winning for White, but the technical part is still not trivial.]

45.Qc4 b3 Alas, Alexander fails to put up much resistance.

[A much more stubborn line was 45...Kh7! 46.Na4! *(46.Kh2 Ne8! 47.Nxe5 Qd6 48.Qd4 Qxd4 49.exd4 Nxe4± and it isn't yet over.)* 46...Na8! and Black manages to liquidate the a5-pawn. 46.Qxb3 Nxe4 47.Qc2 Qg5

[47...Nd5 48.Qc8 Qxc8 49.Nxc8 Nxe3 50.a6+-]

48.Nc4!+- Now White is firmly in control.

48...Nd5 A desperate attempt to create some threats on the kingside.

[48...Ng3 49.Ndxe5 Qf6 50.Qf2+-]

11...a6! The most useful reply. Black intends to solve the problem of his b-pawn by means of ...b7-b5. Less accurate are

[11...Rc8 12.Bd3 and]

[11...Na5 12.Bd3]

12.dxc5 As Black can't play ...b7-b6 anymore, it is logical that White captures this pawn and tries to keep it as long as possible. Other options:

17.h4 This is it. By pushing his h-pawn to h6 White creates discomfort to black King. After h4-h5, Black must play g5, otherwise the opening of the h-file in absence of the g7-Bishop is disastrous

for Black. Then White continues to play in the center, speculating on opening the position. Strange enough, but Black couldn't show a clear counterplan yet. It seems that White is just quicker. Zhang Zhong plays the Black side of things in an instructive way. His active approach against the ♕e2 setup is a useful model. **1.e4 e5 2.Nf3 Nc6 3.Bb5 Nf6 4.Qe2** This avoids the increasingly popular Berlin Defence. WchT 11th Khanty Mansiysk (8.1)

[Lenderman,Aleksandr]

Despite the fact that there were a lot of decisive games this round, I decided to actually pick this interesting draw in the match between India and Russia. This was a Board One matchup between India's Vidit Gujrathi and Russia's Peter Svidler. This was a very tough fighting match, which really India probably feels like they could've also won with some good breaks. This keeps Russia in the fight for the gold medals and guarantees them at least a Bronze Medal no matter what happens in the last round. China won a relatively one-sided match against Norway, which is why I decided to choose a game from the India-Russia match. This game I found the most intriguing since White played very nicely,

putting a lot of pressure on his very strong and experienced opponent, but then Svidler escaped after he found some strong practical chances and Vidit failed to find a quite beautiful study-like win. **1.d4 Nf6 2.c4 g6 3.g3 c6** The most solid reply. Black can also choose the more dynamic options, either with an early c5, transposing into Benoni or Benko Gambit, d5, which transposes into Grünfeld type positions, or just castle and d6, trying to get a g3 kings indian.

[3...c5]

[3...Bg7 4.Bg2 c5 *(4...d5; 4...0-0)*]

4.Bg2 d5 5.Nf3 Bg7 6.b3 0-0 7.0-0 Ne4 8.Bb2 Bf5 9.e3 Nd7 10.Qe2 a5 11.cxd5!? According to my database a novelty. Before that, 11. ♘c3 appeared two times in Svidler's games, from both sides interestingly enough.

[11.Nc3 Nxc3 12.Bxc3 Nf6 was played by Svidler all the way back in 2006. *(12...Be4* was played by Radjabov against Svidler. *13.Rfc1 e6 14.Bf1 dxc4 15.bxc4 c5 16.Nd2 Bc6 17.Rab1 b6 18.Bg2 Bxg2 19.Kxg2 cxd4 20.exd4 Rc8 21.Rb5±* 1/2 (40) Svidler,P (2731)-Radjabov,T (2748) Plovdiv 2010, Black still had some difficulties to solve but eventually he managed hold the draw. *)* 13.Rfc1 Be4 14.Be1 e6 15.Bf1 c5= 1-0 (41) Nikolic,P (2645)-Svidler,P (2630) Ter Apel 1996, Black lost the game later on, but not because of the opening. He equalised pretty comfortably here.]

11...cxd5 12.Nc3 Nxc3

[12...Ndf6 13.Na4!? and now the black knights are redundant and he hasn't fully equalised yet.]

13.Bxc3 Qb6

[13...Nf6 14.Rfc1 is still a little bit uncomfortable for Black.]

14.Rfc1 Rfc8 15.Ne1 e5?! An aggressive approach trying to equalise right away, but perhaps it was objectively better to play ... ♘f6 with clear equality.

[15...Nf6=]

16.dxe5 Rxc3 17.Rxc3 Bxe5 18.Rac1 Bxc3 19.Rxc3 d4 20.exd4 Qxd4 21.Bxb7 Qxc3 22.Bxa8 Ne5?! Black has sacrificed a pawn, and now in order to get compensation he has to play very accurately. That's why it was maybe more practical to play 15... ♘f6. Now he has only one path to equality, once again with 22...♘f6.

[22...Nf6! 23.Kg2 Bb1!⩱ and here White can't make progress very easily while Black's pieces here are very active. One variation can go like this: 24.Nf3 Qc8!! This is why it is not good for Black to trade the knights. Now the bishop on a8 is short on squares. 25.Qb2 Bf5! 26.Qxf6 Qxa8 27.Qc3 Be6= Black has very good compensation thanks to a vey strong light-squared bishop and White not having an easy way to break through.]

23.Kg2 h5

[23...Bb1 24.Nf3 Nxf3 25.Bxf3 Qa1?! 26.Qe1 Qxa2 27.Qe8+ Kg7 28.Bd5+- This shows how important the knight on f6 would be.]

24.Nf3?! Now it's Vidit's turn to make an inaccuracy. I'm pretty sure he missed Black's next move.

[24.Be4± is simply up a pawn without much compensation as far as I can see.]

24...Qc8! 25.Kg1 Bh3!

[25...Qxa8 26.Nxe5 a4 also might be

ok for Black.]

26.Qxe5 Qxa8 27.Ne1 Qa6 28.Qe8+ Kg7 29.Ng2 g5? This move is too weakening and definitely unnecessary, and almost lost the game for Svidler as his king became much more exposed, even though it's not so obvious right now.

[29...Qd3 30.Qe1 Qd4 31.Nf4 Bg4⩱ is still full compensation according to the computer.]

30.Qe5+ f6 31.Qe7+ Kg6 32.Qe4+ Kg7 33.Ne3 Now White consolidates since ... ♕e2 fails to ♘f5+. **33...Qc8 34.Qc2 Qb7 35.Qd1**

[35.Qc4 might be a bit more accurate according to the computer, but here in time pressure it's very hard to criticise the players for making subtle inaccuracies.]

35...Qe4?! This just doesn't work out.

[35...Qb4!! would be very strong here but it's very hard to find this move in time pressure.]

[35...Kg6 Even this would be more solid than ...♕e4.]

36.Qxh5 Qb1+ 37.Qd1 Qxa2 38.g4 Maybe Svidler missed this. Now this should be winning for White. **38...Qb2 39.Nf5+?** This is a mistake.

[39.f3 Qe5 40.Qd3+- is a win in the long run.]

[39.f4!? is also interesting but almost impossible to play in time pressure.]

39...Kg6 40.Nd6 Kh6

[40...Kg7 is a little bit more accurate.]

41.Nf5+

[41.Nc4 Qc3 42.Ne3 maybe gave more winning chances. But this again, is extremely hard.]

41...Kg6 42.Ng3 Kg7 43.Nf1 Qe5 44.Ne3 Qc5?

[44...Qb2 would allow White to transpose into the previous winning position on move 39. 45.f3]

[44...Qc3! would be very strong though, not allowing White to play f3 and activate his king, and also not allow White to activate his queen. This is close to equal. White's only winning try here is... 45.Nf5+ Kg6 46.f3 Qc5+ 47.Nd4 f5! But now Black is in time to get sufficient counterplay and should equalise. 48.Qd3 Kh6! 49.gxf5 Bxf5 50.Qe3 Bh3 51.f4 Bg4 52.fxg5+ Qxg5=]

45.Qd2+- Suddenly White is winning again since he can play f3 next move and consolidate and then the bishop on h3 gets in trouble. **45...Qa3?!**

[45...Qe5 46.f3 Kg6 47.Qd3+ Kf7 48.Qh7+ Ke6 49.Qa7 Qb5 is lost for Black in the long run but would be a little bit more tenacious.]

46.Qc3 a4 47.Nf5+ Kf8!? A very good practical chance, challenging White to find the tricky study-like win.

[47...Kg6 48.Qxh3 Threatening mate on h5. Qc1+ 49.Kg2 Qc6+ 50.Qf3 Qxf3+ 51.Kxf3 axb3 52.Ne7+ Kf7 53.Nd5 b2 54.Nc3+- is a forced line which is very easy to calculate for grandmasters at this level.]

48.Qc8+

[48.Qxf6+ Ke8 49.Qh8+ Kd7 50.Qd4+ Kc7 51.Qc3+ Kd7 52.Qd3+ Kc7 53.Qxh3 axb3 54.Qc3+ is also winning for White.]

48...Kf7 49.Qd7+ Kf8 50.Qd8+ Kf7 51.Qd7+?! This is still not a decisive mistake since he can return to the winning position but it's already a step in the wrong direction.

[51.Nd6+! was a study win that Vidit missed.

A) 51...Kg6 52.Qg8+ Kh6

53.Nf5#+-;
B) 51...Kg7 52.Qe7+ Kg8 53.Qf7+ Kh8 54.Qxf6+ This is easy to see that it's a mop-up. Kh7 55.Qf7+ Kh8 56.Qh5+ Kg7 57.Qxg5+
B1) 57...Kh7 58.Qh5+ Kg8 *(58...Kg7 59.Nf5+ Kf6 60.Qh8+ Kf7 61.Qxh3 axb3 62.Qc3 Qa2 63.Qc7++-)* 59.Qg6+ Kh8 60.Nf7#;
B2) 57...Kh8 58.Qh6+;
C) 51...Ke6 52.Qg8+! This is the move that probably Vidit missed, though I might be wrong. Amazingly enough Black loses his queen in every line now. At least tomorrow's match will be very intriguing as Russia will try to win against the 2016 Olympiad Gold Medal Winners, United States, and China will try to overcome a very strong Polish Team which is also playing great in the World Team Championship and is currently in 3rd place. In fact theoretically, Poland might even have a chance to win the World Team Championship if they beat China and Russia doesn't win against the United States.

1.e4 e6 Matthias Bluebaum is a talented young German player, climbing to 2640 at only 19 years old. He is fond of the French Defence, and has played nothing else against 1.e4 his whole career (199 games as Black in the database)! **2.d4 d5 3.Nc3 Nf6 4.e5 Nfd7 5.f4 c5 6.Nf3 Nc6 7.Be3** Svidler doesn't shy away from the main lines, here he faces one of the critical modern lines of recent years - the Classical French, where Black has been repeatedly finding new ideas to make White's life harder. **7...a6** Some alternatives to this move are:
[7...Be7 8.Qd2 and now either O-O, a6 or b6 are possible.]
[7...Qb6!? diving into concrete lines.]
[7...cxd4 8.Nxd4 Bc5 aiming for quick development, where White normally goes for long castling and tries to launch a kingside attack.]

11.Nd1?! It is always hard to evaluate such endgames from the French Defence, here it looks like Black had the opportunity to start hammering White's centre after the exchange of queens: **11...Qxd2+ 12.Kxd2 cxd4?!** It feels like White can start grinding out a small advantage now that the centre has become more stable.
[12...g5!? a typical way to create pressure against White's centre 13.c3 *(13.Nxg5 cxd4 14.Bf2 Rg8↑; 13.dxc5 gxf4 14.Bxf4 Bxc5* looks fine for Black as well*)* 13...g4 14.Ne1 cxd4! 15.cxd4 Nb6↑ White doesn't have b3 since the a3-

[16...f5!? followed by ...♘c5. With this move, Black loses the chance to play ...f6, but on the other hand White's expansion on the kingside loses force (g4 and f5), and Black secures an outpost on e4 17.Ke3 *(17.exf6 gxf6* followed by ...e5 is supposed to be good for Black *)* 17...Nc5∞]

[16...f6!? also came into consideration.]

17.b3 Bd7

[17...Bxa3 wouldn't lose the bishop, but with precise play, White achieves an advantage: 18.b4 threatening ♖b3 *(18.Bxb6 Rxb6 19.b4 a5 20.bxa5 Ra6 21.Rxb5 Rxa5! 22.Rxa5 Bb4+ 23.Ke2 Bxa5=)* 18...Nc4+! 19.Bxc4 *(19.Ke2 a5* most likely transposes to 19.♗xc4 *)* 19...bxc4 20.c3 a5 21.bxa5 Ra8! 22.Rb5 *(22.Bb6 f6!⇄)* 22...Ba6 23.Rb6 Be7 24.Ra1± and White maintains a good positional blockade, providing at least a small advantage and good prospects (after improving the knight's position to d4 most likely)]

18.Ra1± As the game goes, it becomes clearer that Black had to play actively either on the 12th move or on the 16th move. Now White slowly builds up pressure with a stabilised position.

18...Bc6 19.Be2 a5 20.h4 Nd7 21.Nd3! Avoiding ... ♘c5. **21...b4** This may be helpful for White, who can now penetrate through the a-file. On the other hand, it is hard to give a much better advice for Black. Simply waiting looks bad as well.

[21...Rfc8 if Black plays a move like this, then White may simply start pushing his kingside pawns with g4, or even play as in the game with ♗g4!? 22.g4± *(22.Bg4!?±* threatening f5, trying to force ...g6 *)*]

22.axb4 axb4 23.Ra7 Bb5 24.Bg4!? Threatening f5.

[24.g4!? was again possible, followed by f5.]

24...g6 25.h5 Rfd8 26.hxg6 hxg6 27.Nf2 Justifying this whole ♗g4 idea followed by h5 and hxg6 - Svidler wants to create direct threats against the black king with ♘g4 at some point. **27...Bc5 28.Bxc5 Nxc5 29.Bf3!** Threatening ♘g4! **29...Ra8 30.Rc7 Rac8 31.Rxc8 Rxc8 32.Ra1**

[32.Ng4!? Nd7 *(32...Kg7!? 33.Nf6 Rd8* trying to hold the position together *)* 33.Nf6+ Nxf6 34.exf6 Ra8 35.c4! bxc3+ 36.Kxc3± and the endgame looks very promising for White, with the passed pawn and a clear path for his king (d4-e5-d6 or d4-c5).]

32...Ba6 33.Ra5 Rc6 34.Ke3 Kf8 35.Ng4 Ke7 36.Kd4 Nd7 37.Ne3 White has reorganised his pieces in a good way; now it is time to think about concrete action. ♗xd5 is a threat suddenly, because after exd5 ♘xd5+ and ♘xb4, White wins many pawns.

37...Nb8

1.e4 e5 2.Nf3 Nc6 3.Bb5 a6 4.Ba4 Nf6 5.0-0 Be7 6.Re1 b5 7.Bb3 0-0 8.a3 Bc5!? This move certainly looks like a loss of tempo. However, since this tempo was used by White to play the modest move a3, Black's position should be entirely viable. **9.c3 d6 10.d4 Bb6 11.Be3 h6 12.h3** After this prophylactic move, Black will have to develop his bishop to b7 sooner or later. This will transpose to the Arhangelsk variation, where the presence of the pawn on a3 instead of a2 makes little or no difference. **12...Re8**
[In the Arhangelsk, after 12...Bb7 13.Nbd2 one of the main line goes

exd4 14.cxd4 and now 14...♘b4, which is impossible in the given circumstances of our present game. This is the only moment when the move a3 seems to be useful, but Black has other viable continuations at his disposal.]

13.Nbd2 Bb7 14.dxe5N Technically speaking, a novelty in the position with the pawn on a3 and a very rare move in the Arhangelsk.

[Svidler must have got his inspiration from the following game, where he had White: 14.Bc2 This move is possible because the typical counterplay based on exd4 followed by ... ♘b4 is impossible. 1.d4 Nf6 2.Bg5 e6 3.Nd2 It's hard to say that this move can possibly promise White any kind of advantage. However it is playable and White isn't worse yet. **3...h6 4.Bh4 c5 5.e3 Be7 6.c3 b6 7.Ngf3 Ba6?** A very hard move to understand. Black could always play this after castling short, which is where he has to castle anyways, after which it is almost a guarantee that White will develop his light-squared bishop. If this is the case, then why not wait for the development and win a tempo by playing ...♗a6 on the next move? **8.Bxf6 Bxf6 9.Bxa6 Nxa6 10.Ne4 cxd4 11.Nxf6+?!** Also difficult to understand. The knight had more potential than the bishop in this position, so why trade it off in such a hurry? The combination of rapid time controls and extreme fatigue from the long tournament results in many mistakes. **11...Qxf6 12.cxd4 Qe7 13.0-0 0-0 14.Qa4 Nc7 15.Rac1 Nd5 16.Ne5 d6 17.Nd3 Rfc8 18.h3 Qb7** Black has been given enough time to consolidate. 21.Rfe1 Kf7 22.Nf4 Nb4?! It is possible that this move is not that bad, but with the clock ticking and with so much on the line there is absolutely no reason to go munching a pawn on a2 and stranding Black's own knight. **23.Qe2 Nxa2 24.Rxc8 Rxc8 25.e4** Unsurprisingly this central break puts a lot of pressure on the black position. Black is still holding but now has to be very careful. **25...Nb4 26.exf5 exf5 27.Qf3 a5?!**
[27...d5! trying to give back material as soon as possible for simplifications would have allowed Black to still be close to equal.]
28.Re6 Now the pressure intensifies.

28...Kg8 29.Qg3! Nd5? Losing with no resistance. However already Black's position was very perilous. **30.Qb3!** The knight cannot move, and is thus lost. A simple but fatal tactic.

FIDE World Cup (5.1) 15.09.2017
[Sagar,Shah]

Peter Svidler and MVL have a very similar opening repertoire, both of course, being huge opening experts. So when they sat at the board it was realyl a battle of choosing the line in which the opponent would feel the most uncomfortable. **1.c4** 0 **c5** 1:20 **2.Nf3** 2:41 Peter played this move after quite some thought. **2...Nf6** 6 **3.Nc3** 3:14 **d5** 9 **4.cxd5** 17 **Nxd5** 4 **5.e4** 5:18 As Svidler said, White has many options at this point. He went for the one that would be the most uncomfortable for Maxime. **5...Nb4** 6 **6.Bc4** 4 **Nd3+** 6 **7.Ke2** 4 **Nf4+** 6 **8.Kf1** 6 **Ne6** 1:10 This knight diamond movement is quite well known now. Black makes all of these knight moves in the hope that he would be able to capitalise on the weakness of the d4 square. **9.h4!?** 4:41 Why would someone make a move like this? What is the point? The main idea of this move is to stop Black from playing ...g6.
[9.b4 is one of the main moves.]
[9.d3 can be met with a move like ... ♘c6 followed by ...g6 putting all the resources on the d4-square. g6=]

10.d3 3:29 **Nbc6** 1:20 **11.Nb5** 14 **Be6** 6:38 After the game Maxime said that this entire plan with ... ♗e6 and taking on b5 was played pretty quickly by him and

[14...Bg4 This was Maxime's main idea. So that he can now play ...e6, ...♗e7, ...0-0 and finish his development. But he had missed something in the line starting with 15.b4! e6 *(15...cxb4 16.Rc1* seems to give White good compensation, but I would say Black's position looks fine.*)* 16.b5! [26.Rhc1 This is a natural move, but now the h4-pawn is hanging. Bxh4 27.Nxc5 Nxc5 28.Bxc5± White is surely better as he has won the c5-pawn for the one on h4. However, Svidler wanted more. He wanted to keep his h-pawn and then win the c5-pawn as well.]

26...bxa3 19 **27.bxa3** 8 **a4** 28 **28.Nd2** 3:40 **Nd6** 2:21 **29.Rxc5** 3:13 **Rcb8** 3 Maxime is creating some threats of penetrating down the b-file. **30.Rb1!** 26 **Rxb1** 12 **31.Nxb1** 8 **Bxh4** 6 **32.Rc6?!** 57 Peter Svidler did not like this move. He thought that it gave Black good chances to equalise.

[32.Rc7!? Peter thought this was the better move after the game.]

[32.Nc3! is the best. It doesn't create any threats yet, but White is just dominating. Be7 33.Rc7± Bf8 34.Bc5± White has complete control.]

32...Be7 1:00 **33.Bc5** 5:24 **Nb5!** 15 This is the move that Svidler had missed. **34.Ke3** 8 **Kf8** 5:38 **35.Bxe7+** 3:49 **Kxe7** 5 **36.Rb6** 11 **Nd6** 1:55 **37.Nc3?!** 41 This is one of those moves that you make naturally. Your knight is on the first rank and you want to develop it. However, Svidler said after the game that stopping Black's ...h5 was important and he should have gone g4.

[37.g4!±]

37...h5! 4 After this Black has relatively lesser problems. **38.f4** 6:36

Grenke Chess Classic 6th (8) 28.04.2019
[Nielsen,Peter Heine]

1.e4 c5 2.Nf3 Nc6 Magnus favourite opening of late, obviously played in the World Championship but actually starting already from the 2018 Sinquefield Cup. There MVL played 3. Nc3, but since then the focus has been on first 3.Bb5 and then the popular 7. Nd5 in the Sveshnikov where Caruana earlier in the tournament continued his theoretical discusion vs. Magnus. **3.Nc3** Svidler copies MVL, staying away from the most principal battles. **3...e5 4.Bc4 Be7!?** Absolutely the standard move, but in St. Louis Magnus choose the more surprising 4...g6, but here reverts to the standard. **5.d3 d6 6.Nd2!?** Kasparov's favourite move, aiming for the control of d5. Later attention switched to 6.0-0 Nf6 7.Ng5 leading to a much sharper battle, but the positional approach both has logic and venom. **6...Nf6** The modest 6... Bg5 was the choice in the early encounters, but modern theory has started to focus on this natural development move. **7.Nf1 Nd7!?** This, however, is much less played, but does follow in the footsteps of both Kramnik and Gelfand and was also employed twice by Lenic in his 2917 World Cup match vs. Magnus' French second Laurent Fressinet. The idea is to exchange White's strong knight on d5, and while obviously this also could be done from f6, and thus by logic Black just throws away 2 tempi, the point is doing it on Black's terms, trying to force White to take on b6. **8.Nd5**
[8.Ne3 was Fressinet and Kasparov's choice, and while White does keep a nominal edge, neither managed to break down the solidity of Black's position.]
8...Nb6 9.Nxb6!? axb6 10.c3 This is the point of White's play, creating a somewhat akward double pawn, and now not allowing 10.Ne3 b5! removing the weakness due to 11.Bxb5 Qa5+! losing a piece.
[10.Ne3 b5! 11.Bxb5 Qa5+!]
10...0-0 11.Ne3 Bg5 12.0-0 Here Kramnik took on e3 followed by ...

Qe7 and Be6 equalising, and the engines verify similar thoughts, suggesting 12...Be6. But how do you actually play for a win? **12...Kh8!?** At least posing the question if ...f5 next is a "threat" as well as generally safeguarding the king. **13.a3?!**

[13.Nd5 now ould have been safer as after Bxc1 14.Qxc1 f5 15.exf5 Bxf5 16.Qe3 White does keep a pleasant position with b4 or f4 next.]

Svidler however indicates that ...f5 does not worry him, and Magnus follows with maybe you should be? **13...f5! 14.Nxf5 Bxc1 15.Rxc1 Bxf5 16.exf5 d5!** White got bishop vs knight, but black has the f-file and more pawns in the centre. **17.Ba2** Svidler plays ambitiously eyeing the d5-pawn as a potential weakness.

[but safer would be the liquidating 17.Bb5!? Rxf5 18.Bxc6 simplifying with a likely draw.]

Not the battle focuses around if White's bishop on a2 will be in or out of play: **17...Rxf5 18.Qg4 Rf6 19.f4?!** The wish to exchange as well as annulate the pressure in the f-line is understandable, but the ensuing tactics turns out (very) well for Black. Common sense chess with 19.Rce1 Qd6 20.Qd1 brings some harmony into White's positions, and while his aggressive prospects are not huge, he does have a solid position. After the game move, however, not so much.

[19.Rce1 Qd6 20.Qd1]

19...exf4 20.Qg5 A neccesary intermediate move

[as 20.Rxf4? loses material immediately to Ne5 21.Qg3 Rxf4 22.Qxf4 Nxd3]

20...Qf8! While the early phase of this game of Magnus has seen standard moves combined with a bit of provocation, the rest is another serious matter, developing a strong attack and finishing it off in style. Keeping the f4 pawn is crucial in his attacking concept, and readmitting the bishop on a2 into the game of much lesser importance, as the game will show its just shooting into thin air. **21.Qxd5** 21.Bxd5 rerouting the bishop to e4 would have been ideal strategically, but unfortunately drops a pieces due to 21...Rf5!

[21.Bxd5 Rf5!]

21...Rd8! 22.Qf3?! Logical and consequent, but giving Black everything he wants.

[22.Qg5 h6 23.Qh5 Rxd3 24.Rce1 is indeed a pawn down, but with decent compensation with good chances of a draw.]

22...Ne5 23.Qe4!? Svidler maybe pinned his hopes on this move, kicking the knight and thus not allowing ...f3 which would be lethal after the direct 23. Qxb7.

[23.Qxb7 f3!]

23...Ng4! Magnus is in the zone, both mentally but also with the knight invading next on e3 where it becomes the fix-point of the black attack.

[23...Nxd3 would leave Black a pawn up but the attack would then evaporate.]

24.Rce1 Ne3 25.Rf2 Re8! 26.Qxb7 g5! First a pawn sac and then followed up by this key move. The knight on e3 and the pawn on f4 completely block White's rooks, and the bishop on a2 basically is on an empty diagonal as Black's attack will happen on the dark squares. White's position might look sufficiently solid, but the march of the g-

pawn drastically changes that. White'ss position is actually so bad that there is nothing he can do, and Svidler decides to literally do that, going back and forth: **27.Rfe2?!** I guess should be criticised on principle, but I cannot offer any reasonable alternative. **27...g4 28.Rf2 Qh6!** Simply threatening ...g3 and then mate on h2. **29.Qc7** X-raying the g3 square. **29...Ref8!** Renewing the threat of... g3, with hxg3 Ng4+! now being the followup, and there is no longer a rook hanging on e8 against which White can do absolutely nothing. **30.h3!?** One might think that Svidler decided to be a good sport and allow a very spectacular finish, but actually his position is just dead lost.

[The computer wants tragic moves like 30.Qe5 g3 31.hxg3 Ng4 32.Qxf6+]
[or 30.g3 fxg3 31.Qxg3 allowing Rxf2 just to illustrate how desperate the situation actually is.]

30...gxh3 31.g3 fxg3 32.Rxf6!? The idea is that after 32...Qxf6 33 Qxg3 white does fight on, but also that after: **32...h2+! 33.Kh1 g2#** We have a mate that just speak for itself in its beauty:

1.Nf3!? Anish wants to stay away from Svidler's excellent home preparation and just have a normal game of chess. **1...d5 2.g3 g6 3.Bg2 Bg7 4.d4 Nf6 5.c4 c6** By a transposition we have reached the popular solid variation of the Fianchetto Grünfeld. As Peter said in the press conference: "It is funny that people are trying to find weird move orders to force me into playing the Grünfeld, which is clearly my strongest opening!" **6.Qb3 0-0 7.0-0 a5!?** Svidler's main move is 7... ♕b6 but he had played this once before against Pavel Tregubov in 2004. **8.cxd5 a4 9.Qd1 cxd5 10.Nc3** The players could have reached the same position with the pawn on a7 as well. What does having the pawn on a4 mean? In some cases it can be a weakness, but it is also a strength that confers a lot of space to Black on the queenside. **10...Ne4 11.Nd2N**

11...Nxc3 12.bxc3 Qa5 13.Qc2 Bf5?! "I just blanked out!" Svidler was quite critical about this move and rightly so. He could have kept better control on the position by playing his bishop to e6 instead of f5.

14.e4 dxe4 15.Nxe4 Nd7 16.Rb1 Qc7 17.Qe2 White definitely has a small edge now, mainly because his pieces are much better co-ordinated. The rook on b1, the bishop on g2 and the dark squared bishop coming to f4, it all looks pretty good for Anish. **17...Rfe8 18.Be3**
[18.Bf4 e5 is fine for Black.]
18...Rab8 19.Rb4! Giri wanted to stop Black from playing e5 at all costs but was not able to do so. But this rook lift is excellent. It puts pressure on the a4-pawn and also prepares doubling on the b-file. **19...e5 20.Rc4**

[Caruana,Fabiano]

This was the first of our two game tiebreak match. Our classical games had both ended uneventfully in draws. **1.d4 d5 2.c4 c6 3.Nf3 Nf6 4.e3 Bg4 5.Qb3 Qc7 6.Ne5 e6** I wasn't very familiar with 5. ♕b3, so I chose a rare line, hoping to avoid my opponent's preparation. Black gives up the bishop pair and accepts a slightly worse position, but I was happy to just get a normal position to play. **7.Nxg4 Nxg4 8.Be2 Nf6 9.Nc3 Nbd7 10.Bd2 Bd6 11.Rc1**
[White could have also considered 11.cxd5 exd5 12.Rc1 a6 13.g4! h6 14.h4 , when Black stands worse. White's plans of kingside or central expansion are relatively clear-cut, while Black doesn't seem to have any meaningful counterplay.]
11...dxc4 I was happy to get this fluid center. **12.Qxc4 a6 13.h3 0-0 14.0-0 e5** I could have waited for this until White plays e4, but I was a bit impatient. However, the position remains roughly the same in any case. **15.dxe5 Nxe5 16.Qb3** It seems like White must have an advantage here due to his bishop pair, but Black is very solid and it isn't easy for White to find a concrete plan. **16...Rad8 17.Rfd1 Qe7** It seemed like a good idea to escape the gaze of the rook on c1. But the main idea of this move is to create threats to White's king with ... ♘g6 and ... ♕e5. **18.Be1 Ng6 19.Rd3** Peter continues to play logically. He is hoping to trade all the rooks and count on his bishop pair in a simplified position. **19...b5** After White's last move I wanted to cause him discomfort with the idea of ...c5 and ...c4. **20.Rcd1 h5!?** An interesting move. I wanted to fix White's pawns with ...h4, opening ideas of ...♕e5.
[20...c5 21.Nd5 Nxd5 22.Rxd5 brings Black nothing but regret. The exchange of knights frees White's position considerably.]
21.Qc2 h4 22.f4? A serious mistake.
[White should have continued patiently with 22.a3 , slowly planning b4 and eventually f4. It isn't clear what Black will do. Rfe8 23.b4± , and the onus is on Black to demonstrate counterplay.]
22...Bc5 23.Bf2 Rxd3 I could see that Peter had missed something and was upset with his position. **24.Qxd3**
[I believe he had overlooked 24.Rxd3 Nxf4 *(*Actually, *24...Re8!* , preparing ... ♘xf4 on the next move, is even stronger. *25.a3 Qa7!* is the important point. *)* 25.exf4 Bxf2+ 26.Kxf2 Qc5+ 27.Kf1 b4 , when Black is at least equal.]
24...Re8 25.Bf3 Bxe3 26.Qxe3 Qxe3 27.Bxe3 Rxe3 28.Rd8+ Kh7 29.Ne2 I had expected Peter would go for this position. White is down a pawn, but due to his strong bishop on f3 he has good chances to make a draw. **29...c5?**

Returning the favor.

[29...Nd5! 30.Kf2 Rd3 would have given White difficult problems to solve. The game and perhaps the entire tournament might have turned out differently had I played this.]

30.Ra8 I had missed this for some bizarre reason, thinking only about 30. ♖d6. **30...Rd3?!** The result of general panic.

[30...Ne4! was a strong move, which would have at least forced White to calculate a bit. 31.Kf1 *(31.Rxa6 Nxf4* is the idea, which seems to lead to a draw in the end, but of course White has to prove it.*)* 31...Nd2+ *(31...Ne7 32.Rxa6 Nf5* is another possibility, which is objectively close to equal but White has to demonstrate accuracy.*)* 32.Kf2 Rd3 33.Bb7 Nc4 34.b3 Nd6 35.Bf3 , when neither side is in any real danger.]

31.Rxa6 Now with his strong bishop against my ineffectual knights, White is calling the shots, although with accurate play Black can still restore the balance. **31...Rd1+?** A really awful move pushes Black over the edge.

[31...Rd2 32.b3 Ne4! keeps Black in safety.]

32.Kf2 Rd2 33.b3 Now things are seriously wrong for Black. **33...Rb2 34.Ke1 Ne7?** A move beyond comprehension, self-trapping my rook.

[34...c4 35.bxc4 bxc4 is of course the only way, although Black may already be in too deep. 36.Kd1 , and I don't think Black can save the game.]

35.Kd1+- The game is over, the rest was simple. **35...Rb1+ 36.Nc1 Rb2 37.Nd3 Rb1+ 38.Kc2 Rg1 39.a4 bxa4 40.Rxa4 Nfd5 41.Kd2 Rb1 42.Nxc5 Rb2+ 43.Kc1 Rf2 44.Nd3 Rf1+ 45.Kd2 Rb1 46.Ra5 Nb6 47.Rb5 Nbc8 48.Kc2 Ra1 49.Kb2 Ra6 50.Rb7 Re6 51.b4 Nd6 52.Rc7 Nb5 53.Rc5 Nd4 54.Re5 Rd6 55.Be4+ f5 56.Rxe7 fxe4 57.Rxe4 Nf5 58.Kc3 Rg6 59.Re5 Nd6 60.Ne1 Rg3+ 61.Kd4 Rb3 62.Nd3 Rb1 63.Rd5 Ne8 64.Rh5+ Kg6 65.Rxh4 Nd6 66.Rh8 Kf6 67.Rb8 Rd1 68.g4 Ke7 69.f5 Kd7 70.Rg8 Ne8 71.Ke3 Ke7 72.Ne5 Rb1 73.h4 Rb3+ 74.Kf4 Rxb4+ 75.Kg5 Re4 76.Ng6+ Kd7 77.Rf8 Nd6 78.Ra8 Ne8 79.h5 Rb4 80.Ra7+ Kd6 81.Re7 Nf6 82.Re6+ Kd7 83.Ne5+ Kc8 84.Rxf6 gxf6+ 85.Kxf6** In the second game, I came close to creating problems for Peter, but I missed a crucial tactic and my hopes of equalizing the score evaporated. Moscow Tal Memorial 6th (5) 20.11.2011
[Ramirez Alvarez,Alejandro]

Slow 100min+30sec **1.e4 c5 2.Nf3 e6 3.d4 cxd4 4.Nxd4 a6 5.Bd3 Nf6 6.0-0 e5** The Tal Memorial had a lot of unsual moves very early in the opening, which lead to many interesting games. This move, again, is not new, but quite rare. It caught my own attention when

Jobava used it to bear Gharmian earlier this year in very convincing fashion. **7.Bg5!?** The highest scoring move. White doesn't want to give Black any time to develop and doesn't wish to retreat!

[7.Nf3 d6 doesn't seem dangerous.]

[7.Nb3 d6 8.Nc3 Be7 is a typical Najdorf position but White has an extra tempo. On the other hand his ♗ on d3 is very awkward. The strange move 9.Be2 transposes back into a mainline ♗e2 Najdorf.]

7...h6 The Women's World Champion's choice earlier this year, but 7...d6 is more popular:

[7...d6 8.Nf5 Be6 9.Nc3 Nbd7 was a strange position which favoured Black in the endgame in Zhigalko-Bocharov this year.]

8.Bxf6 Qxf6 9.Nf5 g6 The game's novelty. It makes sense to push the ♘ back, but at the same time the ♘ will be going to e3, where it will cement control over the very weakened d5. This system is very strange in that Black has nearly no development, but his position isn't all that bad.

[9...d5 10.Nc3! d4 11.Nd5 Qd8 12.Bc4 in this position although Black has nearly no development, the position is solid and the ♘s are a little over-extended. This was the game Kosintseva,T-Hou Yifan, Hanzhou WGM 2011 in which Nc6 13.f4 Na5?! 14.Qd3± ended up favouring White. Many improvements can be found for both players however, and the 13...♘a5 move was decidedly weak.]

10.Ne3 Bc5 Keeping the ♗ inside the pawn chain would fail to justify the other weaknesses in Black's position. I like this placement. **11.Nc3 d6 12.Ncd5 Qd8 13.c3** This move looks to be a little slow, but let's take stock. White has really done as much as he can without committing to f4, which is not a move that looks pleasant considering how powerful the ♗ on c5 would become. So, barring f4, what is White to do? He already controls d5 - now what? These questions are not so easily answered. **13...Be6 14.Bc2** If White has to resort to this kind of manoeuvres it is hard to say Black is that much worse. **14...0-0 15.Ng4**

[15.Bb3 Nd7 16.Qf3 Rc8 17.Rad1 Kg7 18.Rd2 Qg5∓ and it's quite easy to see Black eventually taking over the intiative in this position.]

15...Nd7!? A cool decision! Black sacrifices a pawn to finish development and start his own initiative on the kingside.

[15...Kg7 was enough to give him a good game though. I'm not entirely sure what the follow up on ♘g4 is.]

16.Nxh6+ Kg7 17.Nf5+! But Karjakin is no tame sheep to grab a pawn and hope to be able to defend. He starts a counterattack to try to get a perpetual before succumbing to passivity.

[17.Ng4?! Qg5 18.Nge3 Rh8∓ is incredibly dangerous.]

17...gxf5 18.exf5 Bxd5 19.Qg4+ Kh6 20.Qh3+ Kg5 Of course, being ahead two pieces and with no mate in sight, Svidler doesn't wish to concede the draw so easily. However Karjakin has calculated far enough. **21.Qg3+ Kh5 22.Qg7!** With the deadly threat of ♗d1+ followed by mate. Black actually only has one defensive resource! **22...Bf3 23.Qh7+ Kg5 24.Qg7+ Kh5 25.Qh7+ Kg5 26.Qg7+ Kh5** Unfortunately there are no more winning attempts, and the

perpetual seals the draw. Despite being so short it was definitely a crazy game.

[Tiviakov,Sergei]

[This game took place in the central match of the 6th round. It was quite important for the 1st sensaion of the Olympiad in Turin. Our Dutch tem defeated Russia. And my solid play in this game helped that, it is always not an easy task to hold with Black against the player of a class of Svidler.] **1.e4 d5** [Peter always plays 1.e4 and I recently started playing the Scandinavian Defence, choosing it instead of the Dragon and Maroczy. The Scandinavian Defence is much more soild and safe than the Dragon. At least I don't have a risk to lose by force here. Despite the dubious reputation it is not easy for White to get even a small advantage. I played lot of games with the Scandinavian on the highest possible level and with success. For example, drew Anand, Svidler, Grischuk, Korneev, Cheparinov, won against Kamsky, not mentioning much weaker players.] **2.exd5 Qxd5 3.Nc3 Qd6 4.d4 Nf6 5.Nf3 a6**

[5...c6 is another move I play regularly. I played it against Anand, Grischuk. There is nothing wrong with it, but having played already 1 game at the Olympiad before (against Enmaul Hossain), I decided to go for 5...c6.]

6.g3 [Peter chooses the most principal continuation. Other moves pose less threats for Black.] **6...Bg4 7.Bg2 c6**

[7...Nc6 is the main continuation here with lot of theory and sharp lines, but it was not the point of the present game to play sharp. I decided to choose the safer and much more rearer 7...c6]

8.Bf4!N This move is new, but it is clearly stronger than 8.0-0. If White castles king's side, he has no chances for an opening advantage whatsoever. The following games demonstrate some plans and the ideas...

Despite all that it is not easy for White to get something special from that. Meanwhile Black play is easy, he is going to finish the development by Nbd7, Nd5 and then start advancing the pawns on the queen's side - b7-b5 etc with enough counter-play. In his turn White has to advance the king's side pawn trying to create the attack on the Black king.] **12.g4 Nbd7 13.Kb1 Nd5 14.Nxd5?!** [After the game Peter was unhappy with this move. He felt he should have played

[14.Bc1!? but after b5⇄ , followed by the advance of the other queen's side pawns, Black creates enough counter-play. Position remains very complex, with chances for both sides.]

14...cxd5 15.c4 Nb6 [Later Peter told me he missed that move. But is it the only Black move in the position, he consolidates his center, transferring the knight to c6, where he will attack the pawn d4.] **16.c5 Nc4 17.Bf1 Na5** [If Black plays Nc6, puts the bishop on the diagonal a1-h8 and aftewards opens the b line, White can come in trouble. He has to prevent the development of the black bishop on the diagonal a1-h8.] **18.Qg3** [Unfortunately for Black, White can prevent the realisation of the previously mentioned plan. He is threatening to play g4-g5 and then start advancing the h pawn. Besides he is also threatening to win the knight by Bf4-c7.] **18...Bh4** [It took a lot of time to make this move. At first I was going to play 18...Nc6 or 18...Rc8 or even 18... Qd7 (with an idea Rc8, Bd8-c7). But then decided to disturb White plan and prevent the advance of the white pawns on the king's side.] **19.Qe3 h6 20.Be5** [White is playing safe, deciding to exchange the bishops.]

[20.Bh2!? , followed by f4-f5, was too risky. And according to Peter White has more chances to lose than to win.]

20...Bf6 21.Bxf6 Qxf6 22.f4 Nc6 23.g5 Qe7 24.h4 g6 [Black is not in a hurry to determine the position of the king and tries to refrain from castling as long as possible. One of the great advantages of the Scandinavian is that there is not much theory here, there is much space for creativity.] **25.Rh3**

[After 25.gxh6 0-0-0 Black will soon win the h6 pawn back, leaving White with too many weaknesses in his camp.]

25...0-0-0

[25...h5!? followed by 0-0, was possible]

26.Be2 hxg5 27.fxg5

[After 27.hxg5 Qc7 , followed by Ne7-f5, it is only White who can come in trouble]

12...Bxe2 13.Rxe2 Black has got rid of his passive light-squared bishop, but White is still better thanks to his pair of bishops and space advantage. **13...Be7N** Novelty, which does not seem to impact the evaluation of this variation.

1.e4 e5 2.Nf3 Nc6 3.Bb5 a6 4.Bxc6 An early deviation from the Marshall Attack. Una desviación temprana del Ataque Marshall. **4...dxc6 5.0-0 f6 6.d4 exd4 7.Nxd4 c5 8.Ne2 Qxd1 9.Rxd1 Bd7 10.Nbc3 0-0-0 11.Be3** We are following well-known paths. White is better developed, but Black's kingside structure and his pair of bishops do not allow the rapid activation of White's forces. **11...Re8** A typical method in the Exchange Spanish. Black abandons the d-file, which is not so important yet, because White cannot infiltrate through it, for the sake of avoiding simplifications and putting pressure on the e4-pawn. **12.Rd2 Bc6 13.Rad1 b6 14.f3 Bd6** This might have come as a suprise for Aronian, since it was played on very rare occasions.

[The main stream of theory continues 14...Ne7 15.Nf4 Ng6 16.Nxg6 hxg6 17.Bf4 Be7 18.Nd5 Bd8 White has an active position, but it is not easy to find a concrete way for making progress. 19.Ne3! The evaluation has not changed much since the 18th move.]

15.Bf4 A logical reaction. White is happy to deprive his opponent of the pair of bishops. **15...Bxf4 16.Nxf4 Nh6!** On the other hand, Black has got this additional way of developing his knight, without fearing ♗xh6 anymore. **17.Kf2N** Both sides have developed in a harmonious way. White's advantage is more of an optical nature. His domination along the d-file is rather sterile, while the kingside majority is not easy to promote, being submitted to strong pressure by the enemy bishop. On the other wing, Black's structure is rock solid and provides him with outposts for his pieces (c6, d4). Ambos bandos han completado su desarrollo. La ventaja delas blancas es más bien de naturaleza, digamos, óptica. La dominación sobre la columna de d es bastante esterila, mientras que la mayoría de peones del flanco de rey no es fácil de avanzar, al ser sometida a fuerte presión por el alfil enemigo. En el otro flanco, la estructura negra es muy sólida y ofrece a sus figuras casillas estables como c6 y d4.

[Previously, 17.Nh5 was played in a couple of games. The knight stands actively here, but it will eventually be driven away with a later ...g6. White has an advantage of space, but his e4-pawn needs permanent care. Besides, making further progress looks virtually impossible and in the long run Black has chances to take over the initiative.]

17...f5 18.exf5 Nxf5 19.Re1 Rxe1 20.Kxe1 g5 The position can be evaluated as roughtly equal, but remains quite interesting. From the spectator's point of view, the abrupt end is slightly frustrating. La posición ofrece posibilidades aproximadamente iguales, pero en realidad queda muy interesante. Desde el punto de vista del espectador, el final abrupto es bastante frustrante.

Die Stellung war vor etwa 10 Jahr populär, nach meinem Match mit Kasparov im Jahr 2000. **14.Kc2** A new idea, which I had been studying already more than 10 years ago, but for some reason decided to play it only much later. There were a lot of games played with 14. ♔e1, but it seems that, according to modern theory, Black finally managed to find a way to equalise. Eine neue Idee, die ich bereits vor mehr als 10 Jahren studiert hatte, aber aus irgendeinem Grund beschloss, sie erst viel später zu spielen. 14...Ne5 After a period of deep thought Peter chooses a safe, but slightly passive option. Nach einigem tiefen Nachdenken wählt Peter eine sichere, aber leicht passive Option.

[14...Na5 is much more principled, but I guess my opponent wanted to avoid sharp lines, knowing that I had studied them with the computer engines. Here is the only game played with 14. ♔c2 before (no doubt, there will be quite a few after), but White's play was rather weak there. I believe I would have done better. ist viel prinzipieller, aber ich schätze, mein Gegner wollte scharfe Abspiele vermeiden in dem Wissen, dass ich sie mit den Computerengines analysiert hatte. Hier ist die einzige zuvor mit 14. ♔c2 gespielte Partie (zweifellos wird es danach eine ganze Reihe geben), allerdings war das Spiel von Weiß dort recht schwach. 15.Nxe5 Bxe5 16.Bc4 White has a small but lasting advantage now, but Black's position is very solid, with good drawing chances. Actually the position is quite similar to my game with Leko, shown above. Weiß hat jetzt einen kleinen, aber dauerhaften Vorteil, allerdings ist die Stellung von Schwarz sehr solide, mit guten Remischancen. Eigentlich ist die Stellung ganz ähnlich meiner Partie mit Leko, oben gezeigt.

16...Bd7 17.f4 Bd6 18.Kb3 Now e4-e5 is already on the agenda. Nun steht bereits e4-e5 auf der Tagesordnung.

[20...h5 this is a radical solution, with its pluses and minuses, hard to say, what counts more. On one hand, there are no breaks for the moment on the kingside, but on the other, the g6-pawn might become vulnerable. For instance, endings with light-squared bishops will, if it gets there, most probably be won for White. dies ist eine Radikallösung, mit ihren Plus- und Minuspunkten; schwer zu sagen, was mehr zählt. Eienrseits gibt es im Moment keine Hebel am Königsflügel, aber andererseits könnte auch der g6-Bauer anfällig werden. Zum Beispiel werden Endspiele mit weißfeldrigen Läufern, wenn es dazu kommt, höchstwahrscheinlich für Weiß gewonnen sein. 21.g3]

21.Bb5 Bxb5 22.axb5 a6 23.b6! White must keep this pawn in order to keep winning chances. This b-pawn is threatening to become a queen in quite a few lines in the future. Houdini equally likes 23. ♔a4, but I am glad to use this rare occasion to point out that he is wrong this time. Weiß muss diesen Bauern behalten, um Gewinnchancen zu wahren. Dieser b-Bauer droht in einer ganzen Reihe von zukünftigen Abspielen zur Dame zu gehen. Houdini gefällt 23. ♔a4 ebenso, aber ich freue mich, diese seltene Gelegenheit zu nutzen, um darauf hinzuweisen, dass er diesmal irrt.

27.g4 h6 28.Rh5 White has achieved a lot obviously, but with the help of the computer Black seems to be still able to defend. Things are much more difficult when you are sitting at the board, fortunately. Weiß hat offenkundig eine Menge erreicht, aber mit Hilfe des Computers scheint sich Schwarz noch immer verteidigen zu können. Zum Glück ist die Sache viel schwieriger, wenn man am Brett sitzt. **28...Kf7** A serious, although not obvious at all, mistake. Houdini still gives just a small plus for White here, but in fact White seems to be winning with precise play from now on, and I managed to demonstrate it this time. Ein ernster, wenngleich keineswegs offensichtlicher Fehler. Houdini gibt hier immer noch nur ein kleines Plus für Weiß, tatsächlich aber scheint Weiß bei genauem Spiel von hier an zu gewinnen, und diesmal gelang es mir, es zu zeigen.

FIDE World Cup (4.3) 24.07.2021
[Vitiugov,Nikita]

They say that "great" grandmasters play "great" chess, which is something different to what thousands of amateurs all over the world are used to. "Great" games are decided by nuances, brilliant calculation and deep prophylactics. However, sometimes life isn't that complicated. This game cost me my participation in the World Cup, the tournament which takes place only once in 2 years, a very rare occasion for many strong players to fight for something bigger. **1.e4 c5 2.Nf3 d6 3.Bb5+** In the tie-break Peter goes for his main weapon against Naidorf

3...Nd7 4.d4 cxd4 5.Nxd4 Not that usual, but why not? **5...Ngf6 6.0-0** I started to think here. Sounds a bit shocking, it was just the sixth move, but the position is kind of fresh. **6...a6 7.Ba4 e6 8.c4 Be7** I felt that we transposed into some other line with Ba4, but Peter had other ideas about it. **9.Nc3**

9...0-0 10.Qe2 To be honest, I was shocked by the speed of his play. All these moves didn't seem obvious or superstrong to me, but he was playing without thinking at all. **10...Qc7 11.f4**

11...Nb6 12.Bb3 e5 Very tempting, but risky of course.

[12...Bd7!?]

13.Nf5 Bxf5 14.exf5 Rfe8 15.g4 d5 I had about ten minutes here. Poor time management, poor prep. But imagine my level of shock when, after the game, I realized what had really happened!

16.cxd5 Nfxd5!

[I was also thinking about 16...Bb4 17.g5 Bxc3 18.bxc3 Nfxd5 19.g6 but this isn't the kind of position you want to play with 10 minutes on your clock. It is also worse than my choice.]

17.Bxd5 Nxd5 18.Nxd5 Qc5+ 19.Ne3 exf4 20.Rxf4 Bg5 21.Rf3 Rad8 I would have been proud of this decision - strong positional piece sac, but engines cry about it in a very loud voice. What is more important - I've spend a lot of my time by this moment, and also hadn't a second of break since the beginning of the game. I am not sure what Peter meant here, because if you prepare this line, you can't blunder this option - it is just the first line. But he started to play on his own here. **22.Kf1?**

[The best was 22.f6 g6 23.h4 Bxh4 24.Bd2]

22...Qd4?

[22...Qc6! That was pointed out by my opponent after the game. White should be happy that here he has 23.h4 *(The key, which I missed is simple as everything brilliant. 23.Bd2 Rxd2!)* 23...Bxh4 24.Rh3 Bg5 25.Bd2 Rxd2 26.Qxd2 Bxe3 27.Rxe3 Qh1+ 28.Kf2 Qh2+ 29.Kf3 Qh3+ 30.Kf4 Qh6+=]

23.a4 Qe4 24.Ra3 Rc8? I got in a making some move mood, which doesn't suit the position at all. It is very challenging to find this balance in rapid - not to be primitive, but on the other hand to play fast.

[24...b5! was the last option to continue the game. It feels that black is in the game, but what sense of it when you have a minute on your clock?]

25.Rc3 Rxc3 26.bxc3 Qxa4 27.Kg2 Qe4 28.Qf2 a5 29.h4 Bf6 30.Qc2 Qc6 31.g5 Bxc3 32.Nd1 The game has been decided. **32...Bb4 33.Qxc6 bxc6 34.Rd3 Kf8 35.Kf3 Re1 36.Bb2 Rf1+ 37.Kg4 Rg1+ 38.Kh5 Kg8 39.Rd8+ Bf8 40.Bxg7 Kxg7 41.f6+ Kg8 42.Ne3 h6 43.Nf5 hxg5 44.Ne7+**

Kh7 45.Rxf8 I wasn't able to equalize in the second game because of another mistake in my preparation. This lesson was very painful, but these days one must be professional 24/7 if one wants to play on the highest level. A very trivial thought, but the price I've paid for that makes it unforgettable.

1.e4 e5 2.Nf3 Nf6 3.Nxe5 d6 4.Nf3 Nxe4 5.d4 d5 6.Bd3 Bd6 7.0-0 0-0 8.c4 c6 9.Re1 Bf5 10.Qb3 Both players had some experience with this position. Black has achieved some activity in the centre, but faces some problems completing the development of his queenside. As it so often happens, developing the bishop earlier than the knight leaves the b7-square vulnerable.

10...Qd7

[A relatively rare move, which from the point of view of the general rules of development might seem a bit paradoxical. Black moves his queen before developing the knight, blocking the d7-square at the same time. In doing so, he relies on the fact that White does not dispose over simple means of developing his initiative, partly because of the active placement of the black minor pieces in the centre. The more common continuation is 10...Na6 , indirectly defending the b7-pawn (11. ♕xb7 would be met by 11... ♘b4). However, in the long run the knight might remain passive on the edge of the board. Ivanchuk had his first contact with this position 14 years ago: 11.cxd5 *(* In a more recent game, Svidler preferred *11.Nc3 dxc4 12.Bxc4 Nxc3 13.bxc3 b5 14.Bf1 Nc7 15.Bg5 Qc8 16.Bh4 a5 17.Bg3 a4 18.Qb2 Bxg3 19.hxg3 Nd5 20.c4 bxc4 21.Bxc4* with easier play for White, who went on winning a long ending, Svidler-Morozevich, San Luis 2005. *)* 11...cxd5 12.Nc3 Bb4 13.Nxe4 dxe4 14.Bxe4 Bxe1 15.Bxf5 with interesting play in Anand-Ivanchuk, Amber-blind 1993. White has excellent compensation for the exchange, in view of his active pair of bishops and better coordination of forces. Apparently, Ivanchuk liked White's play in this game, since he later tried it himself. However, Black deviated with 12...Be6, when White retained a small plus with 13.Nb5, Ivanchuk-Shirov, Monte Carlo 2000.]

11.Nc3 Nxc3 12.Bxf5 Qxf5 13.Qxb7!?

[This is the first game in which White decides to capture this pawn, although the move has been suggested in

some comments already. Earlier this year, Svidler failed to obtain any significant advantage after 13.bxc3 b6 14.cxd5 cxd5 15.Ba3 Bxa3 16.Qxa3 Nc6 17.h3 Qd7 18.Ne5 Nxe5 19.Rxe5 Rae8 20.Rae1 Re6 21.Rxe6 and a draw was agreed in Svidler-Kramnik, Wijk aan Zee 2007.]

13...Qd7 14.Qxd7 Nxd7 15.c5

[The series of intermediate moves continues. After the neutral 15.bxc3 dxc4 16.Nd2 Nb6 Black enjoys stability on light squares.]

15...Bxh2+!?

[An instructive moment. Black's central pawns are not weak, but could become so if any of the c5- or d4-squares would become available to the white minor pieces. The move played by Ivanchuk is the only one to avoid such a situation. For instance, if 15...Bxc5 16.dxc5 Ne4 then 17.Nd4 Ndxc5 18.f3 Nf6 19.Nxc6 with better chances for White.]

[Or, similarly, 15...Ne4 16.cxd6 Nxd6 17.Bf4 Ne4 18.Rac1 and Black will probably have to play ...c5 anyway.]

16.Nxh2 Ne4 17.Bf4 Rfe8 18.f3 Nef6 19.Nf1 Nf8 The position remains complicated. The pawn structure is rather assymetrical, while the force of the white bishop cannot be evaluated unilaterally. In principle, it puts some pressure on Black, but its activity is restricted by the own central pawns, which could transform it in a "bad" bishop in case of mass simplifications. Another important aspects is the hidden weakness of the c6- and d4-pawns. Neither of them is in imemdiate danger, but they need permanent care. **20.Rxe8 Rxe8 21.Rd1 Re7 22.Nd2 Ne6 23.Be5 a5 24.Nb3 Ra7 25.a4** Blocking the a5-pawn on a dark square, but ruining the flexibility of the own structure at the same time.

[The pawn structure arising after 25.Bxf6 gxf6 26.a4 f5 is not necessarily favourable for White, because of the excellent placement of the black knight and the relative weakness of the g3-square.]

25...Nh5 Untill now, Black has been defending. Once the queenside situation has been stabilized, he starts active operations on the other wing, where he has a mobile pawn majority. **26.Re1 h6 27.Kf2 Nhf4 28.Re3 h5 29.g3** White prevents the blocking move ...h4, but weakens the f3-square. **29...Nh3+ 30.Ke1 g5 31.Nc1 g4 32.fxg4 hxg4 33.Rb3 Nhg5** Black's initiative has reached alarming heights. He only needs to approach with his king in order to create decisive threats. **34.Bb8!?**

[This was probably not intended as an active move (the bishop is not doing anything special on b8) but as a form of preserving it from the exchange operation ... ♘f3+xe5 followed by ... ♘xc5. White needs the c5-pawn in order to generate counterplay after the probable elimination of Black's c6-pawn. 34.Rb8+ Kh7 35.Nb3 would have solved thisproblem, but helped Black centralise his king at the same time. For instance Kg6 36.Rb6 Kf5 37.Rxc6 f6 38.Bd6 Rh7 and the situation of White's king looks dangerous. It might all end with a perpetual, but this is hard to foresee during the game.]

34...Rd7

[34...Re7 is worth considering.]

35.Ne2 Nf3+ 36.Kd1 Nfxd4 37.Nxd4 Nxd4 38.Rb6 Re7 For the time being,

Black has managed to keep his c6-pawn on board, but the knight is stuck on d4, blocking the own d-pawn. **39.b4 axb4 40.a5 Re3 41.Rxb4 Nb5 42.Kd2 Re8 43.Rxg4+ Kh7 44.Bd6 d4 45.Bf4 Ra8 46.Rh4+ Kg7 47.Be5+ f6 48.Rg4+ Kf7 49.Rf4 Ke6 50.Bxd4 Nxd4 51.Rxd4 Rxa5 52.Rd6+ Ke5 53.Rxc6** Finally. **53...Ra3** Admittedly, even in Sofia they would call it a day.

White has snagged an exchange, but it wasn't for free. It not only cost a pawn, but White's most dangerous one (the d-pawn). In addition, the outside connected passers could become dangerous one day. If you want my theoretical opinion, I don't think Black should have serious problems here. **23.Rfe1** This is the first new move. While this move may look fairly simple, it allows Black to reposition his bishop to a more useful square.

[23.Rfd1 Shulman's move stopped the immediate ... ♗d4 but Svidler got his bishop to c5 in another way an easily made a draw. Bf8 24.Rd4 Qe6 25.Qb3 Qxb3 26.Rxb3 Bc5 27.Ra4 a5 28.Kf1 Bb4 29.Rbxb4 axb4 30.Rxb4 Re6 31.Ke2 Kf8 32.Ke3 Rc6 33.f4 1/2-1/2 (33) Shulman,Y (2617)-Svidler,P (2739) Ningbo 2011]

41.Rxe5+ Kxe5 42.Kg4 Be3 The only danger to Black is if White manages to create a kingside passer and get it far advanced. White's desire to clear the d4-square for his pieces is understandable, but theprize to pay is relatively high: Black wins time for his development. **10...Bxc5** In most of the games where this line was played, Black captured with the knight. With his move, Morozevich shows that he treasures the dynamic factors (rapid development) higher than static ones (the exchange of the dark-squared bishops). **11.Bxc5 Nxc5 12.Bd3 b4** In such situations, it is far from clear whether the move a3 slows down Black's attack or just facilitates it.
13.Ne2
[After this volunatry retreat, the second aspect mentioned in the previous comment seems to become valid. Svidler probably disliked the fact that after 13.axb4 Nxb4 Black threatens not only ... ♘bxd3+ followed by the fork on b3, but also ... d4. However, both threats could be parried with 14.Be2 . True, this would leave the e4-square poorly defended, but we should also take into account that Black's knight's jump to b4 has left the d4-square to White's mercy.]
13...Qb6 14.Qe3?!
[Slightly carelessly. With a black bishop on b7, White's main concern should be to maintain the d4-square safely blocked. Therefore, 14.Nfd4

Should have been preferred.]
14...d4! The tendency of such pawns to sacrifice themselves for the sake of the other pieces is known from Nimzovich' time. **15.Nfxd4 Nxd4 16.Qxd4 bxa3 17.Rxa3 Rd8** The g2-pawn is not entirely eadible yet, because of ♖g1 followed by ♖xg7. However, the activity of the black bishop along the h1-a8 diagonal is quite annoying for White. **18.Qe3 Qxb2 19.Qxc5?!**
[White sacrifices the echange, but gets no adequate compensation for it. True, after 19.0-0 Black has a great position, but White is very much in the game still. It is hard to say whether Svidler overestimated his attacking chances after the game move or simply disliked his position in general.]

However, the game move has also been played and could simply transpose to 6. ♕b3 if Black captures on c4. **6...0-0 7.0-0 Bf5**
[Black takes advantage of the lack of pressure against the b7-pawn to take the important e4-square under control. 1.e4 d6 2.d4 Nf6 3.Nc3 g6 4.g3 This is not considered the most promising continuation, but it may be the correct one against a player such as Mamedyarov who is always looking for the initiative. Es wäre interessant gewesen, was der Schwarze gegen die Normalfortsetzung 9.0-0 in petto gehabt hätte. **9...b5?!** Such aggressive moves are in the style of the player with the black pieces, but in playing them he shows his cards too soon. White was still perhaps fancying queenside castling, but now of course he puts his king in safety on the other side of the board. Solch aggressive Züge passen gut zu dem Führer der schwarzen Steine, doch er deckt damit zu früh seine Karten auf. Weiß hatte vielleicht auch noch mit der langen Rochade geliebäugelt, doch nun

bringt er natürlich seinen König auf der anderen Seite in Sicherheit. **10.a3 a6 11.0-0 Bb7?!** I don't like this move. What can the bishop do there? Therefore, White concentrates his efforts against the d6-pawn, which has been slightly weakened after ... ♗g7. **10...0-0 11.Bf4 Nc6 12.Rac1 Nd7 13.Qe3 Nce5 14.Nxe5 Nxe5 15.Be2 b6 16.Rfd1 Re8 17.Qd2 Nxc4 18.Bxc4 Qxc4 19.Qxd6** From structural point of view, the exchange of these pawns is supposed to favour Black. However, Black's dark squares have been weakened even more now, especially after the dissapearance of the black knight. Besides, the light-squared bishop will be severly restricted by the white central chain of pawns. These latter aspects allow White count on a minimal, but stable advantage. **19...Bb7 20.Be5!** Exchanging the last remaining defender of the dark squares. **20...Bxe5 21.Qxe5 Rad8 22.f3 b5 23.Kf2!!** The initiation of a very original plan. The transfer of the king to e3 is motivated by two aspects. Firts of all, in case of an attacking action of the other pieces, His Majesty could easily remain exposed on the back rank, as a consequence of the relative weakness of the g1-a7 diagonal. Secondly, the presence of this "extra-piece" in the centre will allow White consolidate his domination. Such a plan is possible only because Black's bishop is so desperately passive. Although all this looks quite logical, the artistic impression (or, if you wish, extravagancy) is similar to that caused by a football goal-keeper advancing to attacking positions. **23...Qc6 24.Ne2**

[Possibly not best. 39.e5 would have allowed White make further progress with his strategy on dark squares.]

39...e5 Black has managed to cover the king side dark squares in acceptable way. However, the d5-square has been weakened now, which determines White switch to another plan. **40.Nd5 Bxd5 41.exd5** Like recommended by Nimzowitsch, the strong outpost has been converted into a strong passed pawn. However, the king starts feeling a bit insecure now. **41...f5**

The game transferred to the Benko Gambit but with one big difference. You don't usually meet the knight on a5 there. Another major difference is that Black doesn't have a strong lead in development, as he usually has. 1.d4 Fritz's only 1.d4 game in Frankfurt. In our preparations Grunfeld-Indian seemed more promising than the Najdorf, in which Fritz didn't look at all good against Lutz two rounds earlier. Fritz einzige 1.d4-Partie in Frankfurt. Bei der Vorbereitung erschien uns Grünfeld-Indisch aussichtsreicher als Najdorf, womit Fritz 2 Runden zuvor gegen Lutz schlecht aussah. **1...Nf6 2.c4 g6 3.Nc3 d5 4.Nf3 Bg7 5.Bf4 0-0 6.Rc1 dxc4 7.e3** A lovely position for Fritz, all pieces are involved and the program can develop its pieces normally. 14.d5 Nd4 15.0-0 Qd7 16.Be3 Up to here Fritz was still in its openings book. The program plays very well in the resulting position, it can attack the the pawns on a7, c7 and e7, and it has the better king position. This is enough to defeat one of the strongest players in the world. Bis hier war Fritz noch in seinem Eröffnungsbuch. Die entstandene Stellung spielt er sehr stark, er kann die schwarzen Bauern a7,c7 und e7 attackieren und er hat die bessere Königsstellung. Das reicht ihm, um einen der stärksten Spieler der Welt zu besiegen. **16...Nxb3 17.Qxb3 Rad8 18.Rfe1! [Svidler]

When I was preparing for the tournament at home, the only things I looked at were two possible black games- vs. Kasparov and Kramnik. None happened, which is one of the reasons of my success. When thinking about the white game vs Kasparov at home, I simply told myself that Najdorf 6. ♗e3 ♘g4 cannot be all that bad for White. But two rounds before me Alexei Shirov ran into 6...e5 and didn't really pass the opening stage, so I shelved the idea and decided to go for something not so optimistic. **1.e4** Winants Ftacnik **1...c5 2.Nf3 d6 3.c3 Nf6 4.Be2** Winants: Peter Svidler qui souhaitait probablement éviter un débat théorique, sur le thème des grandes variantes de la défense sicilienne, choisit ici un système peu connu, mais néanmoins très dangereux. L'intérêt du dispositif, réside dans son élasticité. D'abord, il faut envisager la formation d'une phalange de pions au centre de l'échiquier, ensuite, songer au développement pianissimo du début italien (d3 suivi éventuellement de 0-0, ♖e1, ♘bd2) et finalement, tenir compte de l'attaque Rossolimo en différé avec l'échec sur b5. **4...Nbd7** La réponse habituelle. D'autres possibilités seraient:

[I. 4...Nxe4?? Winants Une bourde 5.Qa4+ Gagnant le Cavalier]

[II. 4...Nc6 Winants naturel mais maladroit! 5.d4! Un gambit prometteur imaginé par Michael Basman. cxd4 6.cxd4 Nxe4 7.d5 Qa5+ 8.Nc3 Nxc3 9.bxc3 Ne5 10.Nxe5 Qxc3+ 11.Bd2 Qxe5 12.0-0 avec d'excellentes compensations pour les pions sacrifiés, Basman,M-Stean,M Hastings 1973]

[III. 4...g6 Winants également très courant 5.0-0 Bg7 6.Bb5+! Une idée du grand-maître Philippin Eugenio Torre, que l'on retrouve dans les parties de Michael Adams. *(*moins bien serait *6.Re1 0-0 7.Bf1 Nc6 8.h3 e5* Gentilleau-Shirov Oviedo 1992*)* 6...Bd7 *(*Si *6...Nbd7 7.Re1 a6 8.Bf1* suivi de d4, Adams, M-Van Wely,L Wijk aan zee 1996*;* ou *6...Nc6 7.d4* Adams,M-Ivanchuk,V Wijk aan zee 1996 et aussi Adams,M-Lalic,B Erevan (ol) 1996*)* 7.Bxd7+ Qxd7 8.Re1 0-0 9.d4 Na6 10.d5 c4 11.Nbd2 Nc5 12.Nxc4 Ncxe4 13.a4± Adams,M-Anand,V Dortmund (9) 1996]

5.d3 As Kasparov's second Yuri Dokhoian said in the press-centre around this moment, 'If we start analysing c3&d3 Sicilians we won't get anything serious done'. My point exactly. **5...b6 6.0-0 Bb7 7.Nbd2 g6** Il est possible que Kasparov se soit laissé influencer par l'aspect tranquille du développement adverse et qu'il n'ait pas pris l'ouverture des Blancs suffisamment au sérieux, pour l'étudier avec toute l'attention requise. Cela expliquerait sans doute la mobilisation optimiste des Fous en fianchetto, mais aussi et surtout, "l'oubli" du Roi au centre de l'échiquier. Peu importe la raison pourtant, car elle plaide pour cette remarquable intuition de Svidler, qui est parvenu à déceler un point faible dans l'incroyable arsenal théorique du champion du monde, jusqu'à le faire vaciller, dès la première tentative. Bien

d'autres champions s'y étaient essayés avant lui, mais s'y étaient plus d'une fois cassés les dents.

[Plus prudent était donc 7...e6 Winants 8.Re1 Be7 9.Bf1 Ne5 , comme dans la partie Spragett,K-Petursson,M disputée aux olympiades d'Erevan.]

8.d4!? Voilà! Les Blancs passent à la vitesse supérieure. La menace est double: soit, le coup stratégique d5, gagnant du terrain et enfermant le Fb7 pour de bon, soit le coup de bélier, e5-e6, dispersant les pions ennemis et ouvrant la voie au ♘f3 (♘g5-e6). Autrement dit, les Noirs éprouvent déjà certaines difficultés et ceci nous laisse supposer que Kasparov rejouera à l'avenir les parties du championnat intercercles français, où Jean-Luc Seret et Jean-Marc Degraeve avaient déjà essayé ce gambit bien avant son adversaire!

As I've heard later, Kasparov said that it was obvious to him that I blundered both 14...h6 and 16...a6. That's not exactly true. I've seen 14...h6 and had no doubt he will go for it, and as for 16...a6, I was just waiting for him to make his mind, since it is a well-known fact that a lot of precious time is wasted during the game on the moves which aren't played. [17.Ba4!? Winants]

17...Kxf7 18.Ba4 Les Blancs ont rétabli l'équilibre matériel et ont même obtenu la paire de Fous. Ils pourraient, par conséquent, chercher à ouvrir le jeu, via f4, ou à dresser une batterie Dame-Fou sur la diagonale b1-h7 (Fc2, Dd3), pour infiltrer les lignes ennemies en g6. Pourtant leurs pions sont dispersés (d4, f3 et h2) et l'impression est donc que les Noirs devraient encore disposer de ressources diverses. L'une des difficultés consiste ici à définir le rôle du Cd7. On pourrait certainement le poster en f6, mais il n'y ferait pas grand-chose et gênerait même l'action du Fg7.

Meist zieht Schwarz hier 12... ♗b7, um so bald wie möglich c6-c5 durchsetzen zu können. Weiß spielt dann auf Königsangriff, wie die unten angefügten Beispielpartien zeigen. Svidler wählt einen anderen Plan. Er bereitet mit dem Textzug ♕d8-b6 vor, indem er sowohl ♗d2-g5 wie ♘f3-g5-e4 ausschaltet; dann tauscht er die weißfeldrigen Läufer mit ♗c8-a6. Weiß hat nun keinerlei Aussichten auf Königsangriff. Einen Nachteil hat jedoch die Verfolgung dieses Planes: Schwarz kommt nicht mehr zu c6-c5. Die Bauern auf a5 und c6 bleiben schutzbedürftig, und Schwarz hat keinerlei aktives Spiel.

Svidler tries to improve on a previous game between these two players from 1998, but the improvement didn't bring him any satisfaction. The 8.e5 and 10.h4 attack in the 5.Qb3 Grunfeld is White's most ambitious attempt to destroy the 7...a6 system, but it's success rate has been mixed. [16...Bg4 17.Be2 , the old main line, the bishop on g4 is too vulnerable to a later Ng5, e.g. Nb4 18.Ng5 Nd3+ 19.Kf1 Bxe2+ 20.Qxe2 Rf5 *(or 20...Rf6 21.Nce4)* 21.Ne6 and the removal of the g7 bishop will leave White with excellent attacking chances.]

17.Ng5 Rf6 18.g4 Be6 19.Nce4 Bd5! The point behind Black's play. **20.Qd2!** White cannot grab the exchange, because after

[20.Nxf6+ exf6 21.Nf3 Na4! it is already difficult to find a reasonable move for White. *(* Curiously, Anand's notes only mention *21...Qd7!?* which is not as forcing. 20...Rd6? Svidler had originally intended 20... Qd7! but became tempted by ideas of crashing through with ...Rxd4 and missed the strength of White's coming attack. "It's stupid." said Svidler, "since I knew that I needed to have ...Rxf3 as an option after White plays f3."

[After 20...Qd7 21.Rd1 *(21.f3? Rxf3!* is the reason the rook needed to stay on f6.*)* 21...Rd8 *(21...Qxg4? 22.Bh3* After 20...Qd7 21.Rd1 Rd8 (21.... 21.f3 Bxe4 22.fxe4 Nd7 Anand was more worried about

[25...Nxe6 26.Bxc4 Qa5+ 27.Ke2 bxc4 28.Qh7+ Kf7 29.Raf1+ Ke8 30.Qg8+ White crashes through.]

26.Bd2 Nxe5 The best try, since

[26...Bxe5 fails to 27.Qh6! *(* but not *27.dxe5? Rxd2!)*]

27.Be2 c3 28.Bxc3? A piece of carelessness which Svidler fails to take advantage of. "It was rather silly of me to forget about 29...Nf7" admitted Anand who mistakenly thought that both 28. Bxc3? and 28. bxc3! would win easily.

28...b4 29.Nxg7 bxc3? Believing his cause to be hopeless, Black misses his last chance to fight on with

[29...Nf7! although after 30.Bd2 Kxg7 31.0-0 Svidler admitted "It's just a very bad position for Black. In any case, I felt that I should give you (Anand) the opportunity to finish one game in your life with 0-0 mate!]

FIDE World Cup, Tromso (rapid) (5.3)
[Richard Palliser]

1.d4 Nf6 2.Bg5
[One of several possible Torre routes to our game position would be 2.Nf3 e6 3.Bg5 h6 4.Bh4 c5 5.e3 b6 6.Nbd2 Be7 7.c3 .]
2...e6 3.Nd2 h6
[We should compare the game position with 3...c5 4.e3 Be7 5.c3 b6 6.Ngf3 Ba6 . It's hard to believe that the slight difference on the kingside can make too much difference and this position has also been extremely rare. One of the few examples continued 7.Bxa6 Nxa6 8.0-0 *(8.Bxf6 Bxf6 9.Ne4* would likely have been Andreikin's choice *)* 8...0-0 9.Qe2 Nc7 10.Rad1 cxd4 11.Nxd4!? (a slightly strange decision) Qc8 12.a3 Qb7 13.e4 d6 with a comfortable enough Sicilian-type set-up for Black in Pohjala-Nieminen, Tampere 2008.]
4.Bh4 c5 5.e3 Be7 6.c3 b6 7.Ngf3
We saw last month how Andreikin knocked Karjakin out of the previous round of the World Cup with the Torre. There the young superstar didn't appear at all ready for the opening and here too Svidler came up with a rather unusual line. **7...Ba6!?**
[It can't be too terrible an idea to exchange off a potential attacking piece in the shape of White's light-squared bishop, but virtually all Grandmasters have preferred 7...Bb7 , heading for the standard Hedgehog-type set-up.]
8.Bxf6
[Already a novelty, so rare has this line been. White had previously preferred 8.Bxa6 Nxa6 9.Qe2 and after Nc7 10.Ne5! Nfd5 *(* it's actually not so easy for Black to equalise, since *10...Ncd5* leaves the knight rather vulnerable to kicks and *11.0-0 Qc7 12.Bg3! d6 13.e4* works out in White's favour*)* 11.Bg3 d6 12.Nc6 Qd7 13.Nxe7 Nxe7 14.0-0 0-0 had netted the bishop-pair in Forchert-Ullrich, Detmold 1988. Now 15.dxc5! dxc5 *(15...bxc5 16.Ne4 Nf5 17.Rad1* is a little awkward for Black*)* 16.e4 would have given him a definite edge.]
8...Bxf6 9.Bxa6 Nxa6 10.Ne4
White is nicely centralised, but Svidler cannot have been too unhappy either since the early exchanges have brought him close to equality. **10...cxd4**
[A well-timed exchange, whereas 10...0-0?! 11.Qa4! Nb8 12.dxc5 wouldn't have given Black enough for his pawn.]
11.Nxf6+
[This retains a small pull. To see why Andreikin made the exchange we should examine the line 11.exd4 Be7 12.0-0 0-0 when White's extra knight is in no way superior to Black's bishop: for example, 13.a4 Nc7 14.Ne5 Qe8! , preparing to kick back the more advanced of the white knights.]
11...Qxf6 12.cxd4 Qe7 13.0-0 0-0 14.Qa4! An important move. The position might be symmetrical, but

Andreikin is able to claim a small initiative thanks to his more active queen and knight. **14...Nc7 15.Rac1 Nd5 16.Ne5!**

[The only real way to maintain the initiative. Instead, 16.Rc2 d6 17.Rfc1 might look obvious, but after Qe8 it's not so easy for White to get in: for instance, 18.Qxe8 *(18.Qc4 f5!* is a handy defensive resource*)* 18...Rfxe8 19.e4?! Nb4 , hitting a2.]

16...d6 17.Nd3

[Andreikin is happy to keep his knight flexible and retain the option of e3-e4. It might seem tempting to go 17.Nc6 Qd7 18.Rc2 , and if Rfc8 19.Rfc1 Rc7 then 20.b4 , but after Rac8 21.b5 f5 it won't be so easy for White to make further progress.]

17...Rfc8 18.h3!?

[White isn't in a hurry and presumably didn't feel that his chances would be all that great in the event of 18.e4 Nf6 19.f3 Qd7 20.Qxd7 Nxd7 21.Kf2 , although one could imagine Karpov playing this way followed by expanding on the kingside en route to grinding out the full point.]

18...Qb7 19.Qa3 Forcing the black queen back before improving his own.

19...Qd7 20.Qa6 f5 21.Rfe1 Andreikin reacts to Black's logical last by hinting at a timely e3-e4 as well a certain knight manoeuvre. **21...Kf7**

[It can hardly be bad to improve the king, although he might also have semi-passed with 21...Rab8 , basically asking White: 'what next?'. Indeed, I'm not too sure what White should try here, with 22.Nf4?! Nb4 23.Qe2 Nxa2 24.Rxc8+ Rxc8 25.e4 Nb4 looking like an improved version of the game for Black.]

22.Nf4! White hopes to obtain some pressure down the e-file in the event of an exchange on f4, but this does entail a pawn sacrifice. **22...Nb4!?**

[Svidler is up to the challenge as the game begins to heat up. Instead, 22...Nxf4?! 23.exf4 Rab8 24.d5! exd5 25.Qd3 regains the pawn with advantage,]

[but one wonders if Svidler later regretted not keeping things solid with 22...Nf6 .]

23.Qe2 Nxa2 24.Rxc8 Rxc8 25.e4 White's initiative offers him decent compensation for the pawn, since Black's kingside is weak and his knight currently offside. Most importantly, though, it's always easier to attack than defend as the players begin to run low on time towards the end of a rapid game.

25...Nb4 26.exf5 exf5 27.Qf3

[Beginning to probe. The alternative 27.Qh5+ Kg8 28.Ng6 would have prepared to invade on the seventh, but after Re8! *(28...Nd5? 29.Qf3!* is a vicious switch-back*)* 29.Rxe8+ Qxe8 30.Qxf5 Nc6 31.Qd5+ Kh7 32.Nf4 Qe1+! 33.Kh2 Qxf2 Black would, with a little care, have been able to reach a drawing haven.]

27...a5

[Svidler avoids blundering his knight to Qb3+. The main alternative was 27...d5!? , but after 28.Re5 Kg8 29.Qb3! a5 30.Nxd5 Nxd5 31.Rxd5 a4 32.Qf3 he would have come under a bit of pressure in any case. Still, at least unless Svidler was going to spot the right defence on his next move, he should have preferred this and then perhaps Rc1+ 33.Kh2 Qc7+ 34.g3 f4 35.gxf4 Rc2 .]

28.Re6 Kg8?

[Trying to escape the danger, but this fails to. Once again 28...d5! came very much into the equation, but this would have required Black to spot the calm move 29.Qg3 *(29.Rxb6 Rc6 30.Qh5+ Kg8 31.Rb8+ Rc8 should defend)* 29...Rc1+ 30.Kh2 Rc6 31.Qg6+ Kf8! , since White has nothing special after 32.Rxc6 *(or 32.Qxf5+ Kg8)* 32...Nxc6 33.Ne6+ Ke7 , and if 34.Nxg7 Nxd4 .]

29.Qg3 Suddenly h6 is attacked and Black finds himself under heavy pressure. **29...Nd5?**

[29...Nc6 30.Nh5 Kh8 31.Rxd6 Qf7 32.Nf4 would have seen White regaining his pawn while retaining the pressure, but likely Black had to try this. With the text Svidler had clearly overlooked a little trick.]

[Note too that the equally fiendish 29...Qc7 30.Rxh6 Qc1+ 31.Kh2 Nd3! fails to get Black fully out of jail after 32.Rh4 Nxf4 33.Rxf4 , but again, of course, this was a much better try.]

30.Qb3!

['Loose pieces drop off' as they say. Here because 30.Qb3 Nxf4 31.Re7+ wins the black queen.]

[Hansen, Carsten]

1.c4 e5 2.Nc3 Nf6 3.Nf3 Nc6 4.g3 Bc5 5.Nxe5 An interesting choice. The normal move is 5 Bg2, but the text move aims to exploit Black's move order.

5...Bxf2+ Black hands the bishop pair to White in return for weakening the position of White's king. This weakness has yet to prove fatal, but it sets some limits to how White can proceed in his attempts to exploit the advantage of the pair of bishops. Usually White, in order to stabilize the position seeks a rather static pawn structure and will then try to build up a threatening position from this foundation.

[The much less played alternative is 5...Nxe5 which I dismissed in my book on the English Opening: 1...e5, but Ribli gives it a '!?' in ChessBase Magazine 97. 6.d4

A) or 6...Qe7 7.dxe5 Ng4 *(7...Qxe5 8.Bg2± Ribli)* 8.e3 Nxe5 9.f4 *(9.Bg2!? Nxc4? 10.Nd5± Ribli)* 9...Nc6 10.Bg2± Bb4 11.Qd3± Gulko, B-Pedro, F/Buenos Aires 2003;

B) 6...Bd6!? 7.dxe5 Bxe5 8.Bg2± I called this position clearly better for White in my book, whereas Ribli assesses it as equal the truth is probably somewhere in the middle, I will definitely prefer White's side. Black's bishop is bit clumsily placed in the center, and White has a strong bishop on g2 and has the ability to generate pressure along the semi-open d-file.]

6.Kxf2 Nxe5 7.e4 In accordance with the plan outlined in the comment after Black's fifth move. White would like to play d2-d4, but due to the exposed king, a more careful approach is prudent.

[7.b3?! is ambitious, but too slow and not very good, Black soon has a significant advantage: d5! 8.d4 *(8.cxd5 Nxd5* is also very good for Black *)* 8...Nc6 9.h3 0-0 10.Bg2

dxc4 11.d5 Ne5 , and Black has the better chances, although White managed to hold the draw in Topalov, V-Karpov, A/Monte Carlo1997]

7...c5 This is more or less necessary as White otherwise at some point will throw d2-d4 in the mix with a great centre and dominant bishop pair.

21.h4 Preventing ...Ng5 **21...Rbe7 22.Rd2 Qa5 23.Qc2**

[I think that White may have either overlooked or underestimated Black's

26.e5?!

[After this move everything very quickly gets terminated down to a drawn endgame. Usually I would not spend a whole game on such a rare move, but Aronian attained the initiative with his plan in the game, and we already saw how hard it was for White to obtain a tangible advantage in the main lines (hence my suggestion of 9.Nxd4 in a previous update). **10...0-0**

[10...Nd5?! 11.Bxd5 exd5 12.Qb3 Nb4 13.Bg5!± will be good for White, as Black's light-squared bishop often ends up stuck in this structure.]

11.Qe2

[11.d5 exd5 12.Nxd5 Be6 will just be equal, however]

[11.Ne5 is usually how 10.Be3 is followed up. Bd7 12.Nxd7 *(12.Qf3 Rc8 13.Bb3* 0-1 (44) Postny, E (2658)-Rublevsky, S (2702) Berlin 2015 *Be8=*

11...Nb4

[11...b6 12.Rad1 Na5 *(12...Nb4 13.Ne5 Bb7 14.f4!↑* and f5 looks better for White.*)* 13.Ba2 Bb7 is another approach, trying to cover d5, but I would rather be White after 14.Bg5! Rc8 15.Rfe1 Re8 16.Ne5± and the f7 square is something of a problem.]

12.Ne5 Bd7 13.Rad1 Now we can understand the incentive behind White's move order - his other rook will stay on f1 to support f4-f5 if Black brings his light-squared bishop to c6! **13...Nbd5**

[Aronian had some prior experience in this variation: 13...Bc6 14.f4 Bd5 *(14...Rc8 15.f5 Bd5 16.fxe6 Bxc4 17.Nxc4 fxe6 18.Bg5±* is also in White's favour, as e6 is somewhat weaker than d4.*)* 15.Nxd5 exd5 16.Bb3 Rc8 17.Bd2 Re8 18.Bc3± and White had a stable bishop pair advantage in 1/2-1/2 (74) Aronian, L (2786) -Ponomariov, R (2739) Moscow 2009]

14.Bc1! Bc6?! Black tries to play solidly while avoiding White's preparation, but White still gets a strong attack, in this case without sacrificing any material.

[14...Nxc3 15.bxc3 Bxa4 16.Rd3 is the critical continuation, but here I would be very troubled by White's kingside attack, e.g. b5 17.Ba2 *(17.Nxf7 Rxf7 18.Bxe6 Qe8∓* is a lot less convincing.*)* 17...b4 18.Rg3 Kh8 My feeling is that White must somehow be better here, but with correct play Black looks to be surviving the attack. 19.Rh3 *(19.c4 Qxd4 20.Bb2 Qd6 21.Bb1 Rad8 22.Bd3 Qc5 23.Rh3 h6 24.Qd2 Kg8 25.Rg3 Kh8 26.Qf4 Be8 27.Rh3 Kg8 28.Rxh6 gxh6 29.Qxh6 Rxd3 30.Qg5+ Kh7 31.Qh4+=; 19.Bg5!? bxc3 20.Rxc3 a6 21.Rfc1 Bb5 22.Qf3⩱; 19.Bb2 a5)* 19...bxc3 20.Qd3 *(20.Bg5 Kg8!)* 20...Qe8 21.Bg5 Bb5 22.Qc2 Ba4 23.Qd3 Bb5=]

51st Biel GM 2018 (3.1) 24.07.2018
[Roiz,M]

1.e4 c5 2.Nf3 d6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 a6 6.Bg5 I guess this move could hardly have been predicted by GM Svidler, since Magnus mostly prefers to deviate from main theoretical paths. **6...Nbd7 7.Qe2 h6 8.Bh4 g6 9.f4 Qc7** This is a very rare move, but actually Peter would deviate from the main line on the next move. **10.0-0-0 Bg7?!** This move wasn't tested at a high level before. As the route of this game proves, such a flexible situation in the centre yields White additional attacking resources.

[10...e5 11.fxe5 dxe5 would have take us back to known paths 12.Nb3 b5 At this moment White can choose between 13.Nd5 *(13.Qf3* Shankland, S (2661)-Kraemer,M (2567) Biel 2016 [Roiz,M]*;* and *13.Rxd7* Kasimdzhanov, R (2698)-Zhu,Y (2328) Chengdu 2017 [Roiz,M] *)* 13...Nxd5 14.exd5 Solak,D (2622)-Donchenko,A (2567) Biel 2015 [Roiz,M] Despite defeats in all the games, Black's positions seems perfectly playable in all cases.]

11.g4 This innovation seems to pose Black serious problems.

[However, I wonder what Peter intended to play after 11.Nf3 , since the following continuation doesn't seem to offer Black acceptable play: Perhaps the best practical chance would be

A) 11...e5 can be traditionally met by 12.Qc4! Qxc4 13.Bxc4 , and Black is under strong pressure.;

B) 11...Nb6?! 12.e5 dxe5 13.fxe5 Nh5? *(*Better was *13...Nh7* , but even then Black's position is quite unpleasant.*)* 14.Bf2 Be6 15.Qe4 Black was absolutely lost in Levrand,R - Bauer,C Zurich SUI 2017;

C) 11...g5 12.fxg5 hxg5 13.Bxg5 b5 14.Kb1 Bb7 15.h4 Black is obtaining definite compensation for the pawn, but White's chances are preferable.]

11...e5 12.fxe5 Nxe5

[Hardly better was 12...dxe5 13.Nb3 Nb6 *(*After *13...b5 14.Bg2 Bb7 15.Nd5 Nxd5 16.exd5* The powerful d-passer offers White powerful initiative.*)* 14.h3 Be6 15.Qf3 Nfd7 16.Nd5 White is clearly better.]

13.h3?! This natural move is wrong - White is wasting an important tempo and letting Black consolidate.

[Much stronger was 13.Nf5! Bxf5 *(*Even worse is *13...gxf5? 14.gxf5 Rf8 15.Rg1 Bh8 16.Qe3 b6 17.Qxh6* with a decisive attack.*)* 14.exf5 g5 15.Be1 *(15.Bg3 0-0 16.h4 Rfe8 17.hxg5 hxg5 18.Qd2 Rac8⇄)* 15...0-0-0 *(15...0-0 16.h4 Rfe8 17.hxg5 hxg5 18.Bd2→)* 16.Bg2 Qc4 17.Qf2↑]

13...Be6?! Peter returns the favor. The vulnerability of the bishop will cause Black fresh problems.

[Had Black played 13...b5! 14.Qf2 *(14.Bg2 0-0 15.Bxf6 Bxf6 16.Nd5 Qd8 17.Nxf6+ Qxf6 18.Qd2 Qg7⇄)*

14...g5 15.Bg3 0-0 16.Kb1 Re8 17.Nd5 Nxd5 18.exd5 Bd7⇄ the play would be double-edged.]

14.Qf2 Magnus is reasonably maintaining the tension.

[After 14.Qd2 Nfd7 15.Nxe6 fxe6 16.Qxd6 Qxd6 17.Rxd6 g5 18.Bg3 Ke7 19.Rd1± Black wouldn't have full compensation for the pawn, but White's practical task isn't easy here.]

14...Nfd7 15.Bb5! This tactical resource enables White to exchange his relatively useless light-squared bishop. **15...0-0**

[Of course, not 15...axb5? 16.Ncxb5 Qb6 17.Nxe6 Qxf2 18.Nxd6#]

16.Bxd7 Qxd7

[16...Nxd7 would lead to the loss of a pawn, though after 17.Be7 Rfc8 18.Nxe6 fxe6 19.Bxd6 Qc6± Black obtains definite counterplay along the c-file.]

17.Nf5?! Carlsen is focused on his attack, but this piece sacrifice leads to unfavorable complications.

[Had White played 17.Bf6 Bxf6 18.Qxf6 Qd8 19.Qf4 Kh7 20.Rhf1↑ Black would be doomed to passive defence.]

17...gxf5 18.gxf5 The g-file is open, but White's heavy pieces are not located there yet. **18...Kh7** Of course, Black doesn't mind giving his extra piece back at any moment. **19.Rhg1 Bh8**

[Possible was also 19...Rac8 20.Rxg7+ Kxg7 21.fxe6 Qxe6 22.Nd5 f5 23.Rg1+ Kh7 24.Qg2 Qg6 25.Qf1 Qe6= , but Peter's decision is very natural - Black definitely has to avoid the exchange of his bishop.]

20.Bg3 The bishop is heading for f4 in order to attack the Ph6. Well, this plan is effective, but a bit slow.

[The more aggressive 20.Bg5!? would have posed Peter some practical problems: hxg5 21.Rxg5 Ng6 22.Rdg1 Now Black's king is in big danger, but the cold-blooded Rac8! seems to save the day: 23.fxg6+ fxg6 24.Qh4+ Kg8 25.Rxg6+ Kf7 26.Qh6 Ke7 27.Rxe6+ Qxe6 28.Nd5+ Kd7 29.Nb6+ Ke7= with a perpetual.]

20...Rac8 21.Bf4 Qe7 Covering h4.

[Peter rejects the greedy 21...Bxf5 22.exf5 Qxf5 23.Qh4 Qe6 24.Ne4 , though even then after Rg8 25.Rxg8 Rxg8 26.Ng5+ Rxg5 27.Bxg5 Nf3 28.Qxh6+ Qxh6 29.Bxh6 Kxh6 30.Rxd6+ Kg5 Black is OK.]

22.fxe6

[Somewhat more precise was 22.Kb1 Qf6 23.fxe6 fxe6 24.Rdf1 Ng6 25.Qg3 Nxf4 26.Rxf4=]

22...fxe6 23.Qg3 Rg8 Now Black's pieces are located more harmoniously, so Magnus has to be careful. **24.Qf2 Rgf8** Peter was short of time, so he decided to repeat moves.

[He could have continued: 24...Qf6! 25.Rgf1 Rcf8 26.a4 Rf7∓ There is nothing special, but the pressure along the f-file is rather annoying.]

[Somewhat surprisingly, we haven't covered this move before on ChessPublishing. com. The main move is 7.dxc3 about which you can find a couple of references to other Svidler games in the PDF e-books.]

[The other alternative is 7.Qd4 f6 8.Qxc3 which leads to a complicated game and chances to both sides.]

7...Bg7

[Black has two other options to consider at this juncture: A) 7...c5

A) White doesn't achieve anything with 8.g3 , e.g. Nc6 *(* Black has several other moves to consider as well: *8...Bg7 9.Bg2 Bc6 10.0-0 Nd7 11.d4 h6 12.dxc5?! limitations imposed by the e5-pawn on the bishop on g7.]

10.Qxd8+ Kxd8 11.Ng5!?

11...Ke8 12.f3 White's position seems easier to play. While largely undeveloped at this juncture, White should be able to establish a solid centre and thereby gain a pleasant space advantage. Black, on the other hand, doesn't have access to the typical Grunfeld counterplay and is therefore at a disadvantage from the outset, though this disadvantage is fairly small. **12...h6 13.Nh3 b6 14.d4 Ba4 15.Nf4**

[15.Bd2!?]

15...c5 16.Bd2 Ke7 17.d5

[17.Bd3 Rd8 18.d5 is also worth a thought.]

17...g5 18.Nh5!? Be5 19.g3?!

[This is a very dynamic move, but unfortunately for White, not a very good one. Instead White should have opted for 19.Bc4!? Nd7 20.0-0 after which White has perhaps a slight pull. Now Black takes over the control of the game.]

19...exd5 20.exd5 Bc2! The target is the awkwardly-placed knight on h5.

21.Rc1 Bg6 22.f4

[White tries to shake things up a bit, well-knowing that the pawns are very loose and will fall. 22.g4 Bxh5 23.gxh5 Nd7 is obviously far from ideal for White]

22...Bxh5 23.fxe5 The pawns look impressive and if White now only had time to play c3-c4, he would be nearly winning. However, in the game the pawns are just easy targets for Black, and as you will see, both are quickly picked up. **23...Nd7 24.d6+**

[24.Bg2 Nxe5 25.0-0 Rae8 is inadequate for White]

24...Ke6 25.Bh3+ g4 26.Bg2 Rad8 27.0-0 Nxe5 28.c4 Rxd6 Black has won both of White's central pawns, but

White has some compensation in his bishop pair, open files and Black's lacking piece coordination. This allows White to stay in the game. **29.Bc3 f6 30.Bd5+ Kd7 31.Rxf6!?** This wins back one of the two pawns. Carlsen may already have had the conclusion of the game in mind at this juncture. **31...Rxf6 32.Bxe5 Rhf8 33.Rd1 Kc8 34.Bxf6 Rxf6 35.Rf1!?** My computer objects to this move, but Carlsen may have judged this endgame to be an easy draw, which may or may not be right, depending on how you evaluate Black's chances in the lines given as alternatives after Black's 36th move. **35...Rxf1+ 36.Kxf1 Kd7**

[Black can consider 36...a6!? 37.Ke2 b5 with reasonable winning chances. In the game continuation, White doesn't seem to have too many problems.]

[Another idea to place the bishop on a better square, ideally d7, and then advance the pawns on the queenside 36...Be8 37.Ke2 Kc7 38.Ke3 Bc6 39.Be6 *(39.Bxc6? Kxc6 40.Kf4 h5* is of course an easy win for Black*)* 39...Bd7 40.Bd5 a6 41.Kf4 b5 with excellent winning chances for Black]

37.Ke2 Kd6 38.Bb7 b5!?

[While this certainly is an interesting attempt at winning, Black may be able to do better with 38...Bf7 39.Ba6 Be6 40.Ke3 Ke5 41.a3 Bd7 42.Bb7 b5 43.cxb5 Bxb5 44.Bc8 h5 with some chances. However, as with all lines in this endgame, Black has to be wary of the possibility of White exchanging all the pawns on the kingside and then sacrifice the bishop on the c-pawn, leaving Black with a-pawn and the wrong-coloured bishop.]

39.cxb5 Bf7 40.a3 Bc4+ 41.Kd2 Bxb5 42.Kc3 Black has won the pawn back, but as long as White is able to maintain his king on c3 and the bishop on the a8-h1 diagonal (or at least prevent Black from using it for his king to penetrate the white kingside), White will be able to hold the endgame. The rest of the endgame sees Black trying to make it work, but Carlsen easily wards off all black attempts. **42...Bc6 43.Bc8 Bd7 44.Bb7 Be6 45.Be4 Ke5 46.Bc6 c4 47.Bb7 h5 48.Bc6 Bf7 49.Bg2 Bd5 50.Bf1 Ke4 51.Bg2+ Ke5 52.Bf1 a6 53.a4 a5 54.Bxc4 Bc6 55.Bf7 Bxa4**

[David Smerdon]

1.e4 c5 2.Nf3 d6 3.Bb5+ Nd7 4.0-0 a6 5.Bd3!? An interesting choice. **5...Ne5?!**

[5...Ngf6 6.c3 is more normal and was covered in Caruana-Topalov (2012). The resulting positions after White plays Bc2 and d4 can resemble the closed Spanish, which I can only assume Peter was trying to avoid against Carlsen given he chose 1...c5. Therefore, it's not a big surprise to see the Russian trying to upset the equilibrium early on, and indeed ... Ne5 is a common theme when White retreats Bd3 in similar positions. However, here it looks quite artificial, and I can't help but feel White must be better with an accurate follow-up.]

6.Nxe5 dxe5 7.a4 This has been White's choice in the two other games from this position, but perhaps the players didn't realise that it's not so easy for Black to play ...b5 after all.

[7.b3 would be my preference, although it's hard to argue with Carlsen's seal of approval for the rook pawn. b5? runs into *(7...Nf6 8.Bb2 Qc7* is of course possible, when White can revert back to a4 or try to be more dynamic with *9.Nc3* with the idea of *b5?! 10.Nd5! Nxd5 11.exd5* (threatening Qh5) *g6 12.Qe2 Bg7 13.Rae1 f6 14.f4 exf4 15.a4! bxa4 16.Qe4* with a powerful position.*)* 8.Bb2 when Black can either play the ugly ...f6 or sacrifice the e5 pawn, as Qc7? 9.Qh5± is clearly better for White.]

7...Nf6 8.b3

[8.Re1 b6 9.Na3 Bb7 10.Nc4 Nd7 11.b3 e6 12.Bb2 Qg5 13.Re3 g6 14.Rg3 Qf6 15.Qe2 Trent, L (2429) - Sutovsky, E (2684)/Caleta ENG 2013.]

8...Be6 9.Bb2 Bxb3!? An ingenious idea, and probably forced. If Black doesn't do something energetic, White will just have a lead in development and a better structure for free. **10.Qe2?!** A missed opportunity.

[The simple 10.Be2! Be6 11.Bxe5 was very dangerous and would have left Black with a big choice. Passive play with ... Nd7 must leave White a pleasant edge, so probably Peter would have been forced to go for it with Nxe4 when 12.Bf3! Qd5 *(12...Bd5 13.Re1 Ng5 14.Bxd5 Qxd5 15.Nc3* and Rb1 to follow gives White a serious initiative, while Black is a long way off finishing the opening. *)* 13.Nc3! Qxe5 *(13...Nxc3 14.Bxd5 Nxd1 15.Bxb7±)* 14.Bxe4 and Black is probably advised to give back the pawn on b7 immediately and struggle on in an inferior position, as otherwise White will pile up on b7 with Qf3, Rb1 etc.]

10...c4! 11.Bxc4 Bxc4 12.Qxc4 Rc8 13.Qb3?! Not Carlsen's best game.

[13.Qe2! would have preserved an edge. The point is that ...Nxe4 is prevented and ...Nc5 no longer comes with tempo. Rxc2? 14.Bxe5 Rc8 15.Nc3±]

13...Qc7?! Returning the favour.

[13...Nxe4 14.Qxb7 Nc5 15.Qf3 e4 16.Qe2 e6 is interesting. It looks as though Black has really neglected his kingside and should pay the price, but the position is surprisingly difficult to crack. Probably White's edge is very small.]

14.d3 e6 15.Nd2 Nd7 16.Nc4

[16.a5!? was a way to try and limit Black's queenside activity. Bc5 *(16...Qxc2?? 17.Rfc1)* 17.Nc4 0-0 18.Rab1 and Ba3 gives White an edge based on playing on the b7 pawn.]

16...b6 17.Kh1 Rb8 18.Qc3

[18.Rab1 was another possibility. Black should probably strike anyway with b5 *(18...Be7 19.f4 exf4 20.Bxg7 Rg8 21.Bd4* and the Black king isn't entirely comfortable.*)* 19.axb5 axb5 20.Na3 Qc6 21.Bc1 allows White to secure c4 for the knight, but even after b4 22.Nc4 Bc5 White can only be a tiny bit better.]

18...f6 19.g3 b5 20.axb5 axb5 21.Ne3 Now Peter quickly liquidated the queenside. **21...Qxc3 22.Bxc3 b4 23.Bd2 b3 24.cxb3 Rxb3 25.Ra8+**

[Attention in recent months has been focused on 10.Nb5 the most popular move.]
10...a6!? This is analysed in detail by Kaufman (Sabotage the Grünfeld, NIC 2014), but may not have been previously played.
[The next few moves of the game have a number of similarities with the standard line 10...Rd8 11.Nb5 Qd7 12.d5 a6 13.Nc3 Ne5 especially as Black often plays ...Qd6 (when both sides would then have lost two tempi) to help free his position.]
11.h4 Rd8 12.d5 Ne5?! I suspect that this natural move is imprecise.
[Kaufman instead examines two alternatives: 1) 12...Na5 13.Qc1 *(*note that here *13.Qf2* isn't very effective because of *Bxc3 14.bxc3 Na4* with strong counterplay*)* 13...Nac4 14.Bd4 e5 15.Bf2 Qb4 16.g4 Bd7 17.Ka1 c6 18.Bxc4 Nxc4 19.Nge2]
[and 2) 12...Qb4 13.a3 *(13.Qf2?? Bxc3)* 13...Qb3 14.Qc2 Qxc2+ 15.Kxc2 Ne5 16.h5 In both cases he prefers White, but I suspect that he is being too optimistic. In my opinion, Black is OK in both of these lines.]
13.Qf2! Here however this seems quite promising. **13...h5** Svidler decides to close the h-file, rather than face a strong attack.
[After 13...Nec4 14.Bc5 Qf6 Black's counterplay can be slowed down with 15.Bd4 e5 16.Bc5 when it would be prudent to respond with h5 in any case.]
14.Bc5 Qf6 15.Bd4 Qd6 16.g4! Cracking open the kingside. **16...hxg4 17.f4 Ned7 18.e5**
[18.h5! Bxd4 19.Rxd4 Nf8 20.Nge2 and White maintains his centre whilst building up his attack.]
18...Nxe5 Giving up a piece for pawns and some freedom of movement.
[Otherwise 18...Qb4 is the only alternative: 19.h5 c5 20.dxc6 Nc5 21.c7! Rd7 22.Bxc5 Rxd1+ 23.Nxd1 Qe4+ 24.Ka1 Qxh1 25.Bxb6 seems to favour White (two knights and a big passed pawn for a rook).]
19.fxe5 Bxe5 It's hard to judge such positions but, as a general rule, in middlegames I would prefer to have the piece. **20.Bg2 Bxd4 21.Rxd4 Bf5+ 22.Ka1 e5 23.Rd1 Nc4** Black has to activate before the h-file opens in his face. **24.h5 Qb6** Offering the trade of queens.
[Instead, after the following moves,

24...Qb4 25.hxg6 fxg6 26.Be4 Kg7 27.Bxf5 gxf5 28.Rb1 Black's kingside is too exposed.]

25.Qe2 White needs to keep queens on.

25...Ne3 26.Rd2 Kg7 27.Be4 Rh8?!

[Simplest is 27...Bxe4 28.Nxe4 Rxd5 29.Rxd5 *(*if *29.h6+ Kh8* then Black's king is safe*;* after *29.hxg6 Rxd2 30.Nxd2 Rd8! 31.Qh2* Black has a draw: *Nc2+ 32.Kb1 Na3+ 33.Ka1 Nc2+)* 29...Nxd5 30.Qxg4 f5 31.Qd1 Qc6= Black's king isn't in danger and he has three healthy pawns for the piece.]

28.Rd3! Nc4 29.b3 Nd6?!

[29...Rxh5 is the best chance, noting that the knight on g1 is hanging: 30.Rxh5 Bxe4 31.Nxe4! *(31.bxc4 gxh5 32.Nxe4 f5* comes to the same thing*;* but not *31.Qxe4? Qxg1+ 32.Rd1 Qe3!* which is even better for Black *)* 31...gxh5 32.bxc4 f5 33.c5 Qh6 34.Nd2 h4 when the pawns offer some practical chances, even if it's hard to believe that it should be enough.]

[It's a bit late for 29...Bxe4 30.Qxe4 Rxh5 31.bxc4 Rxh1 32.Qxh1 when Black doesn't have enough for two knights!]

30.Bxf5 Nxf5 31.Qxg4 Suddenly Black has run out of serious compensation. White is a piece up for not very much.

11.g4 b4!? GM Peter Svidler comes up with an interesting novelty.

[Deserving of serious attention is the immediate: 11...h6!? 12.Rg1 Bb7

13.Bf4 g5 14.Bg3 d6⇄]

[Recently Black has experienced some problems after 11...Bb7 12.g5 Nh5 *(*dubious is *12...b4?!* which was seen in Luther, T (2551) - Mastrovasilis, D (2462)/Fuerth 2002 in view of: *13.Na4! Qxc3 19.bxc3 Bxd7 20.cxb4± Black didn't have sufficient compensation for a pawn in Shomoev, A (2587)-Morozevich, A (2722)/Loo RUS 2014 (60)]

[Too passive is 11...d6 12.g5 Nfd7 13.f4 Nc4 14.Bxc4 Qxc4 15.Rhe1 Bb7 16.e5↑ 1-0 Fedorchuk, S (2599)-Lazarev, V (2517)/France 2007]

12.Na4 h6! This looks like a concession, since now White has a clear target on the k-side, so Black's monarch can hardly be safe there. At the same time, it was extremely important to stop g4-g5.

[Of course, too dangerous would be: 12...0-0?! 13.g5 Nh5 14.Nb3 Rb8 15.f4↑]

13.Rg1 d5?! This thematic freeing move looks logical, but it was brilliantly refuted by GM Caruana.

[The real test for Peter's idea would be: ⌓13...Bb7! 14.h4 *(14.Bf4 g5 15.Bg3 d5 16.exd5 Nxd5 17.Bd3 Bd6⇄)* 14...Bc6 15.g5 *(15.Nxc6? Qxc6 16.Nb6 Nxf3∓)* 15...hxg5 16.hxg5 Nxe4 17.fxe4 Bxa4⇄ in the arising position White has obvious compensation for a pawn, but Black's position looks quite solid.]

14.Bf4! This pin is really annoying now.

14...dxe4 Accepting the challenge. The next few moves are quite forced.

[White's initiative is very dangerous in both other cases: 14...Bd6 15.exd5 Nxd5 16.Nf5! 0-0 17.Nxd6 Nxf3 18.Qf2 Nxg1 19.Bg3! Qc6 20.b3 Nf3 21.Bg2 Ng5 22.h4 Nh7 23.Nf5→]

[14...Bb7 15.g5 hxg5 16.Rxg5 Bd6 17.Qe2→]

15.g5 hxg5 16.Rxg5 The rook successfully comes into play. **16...Nfd7 17.Rxg7** Peter's position looks scary. However, such sharp positions always require very precise play from the attacking player. **17...exf3** Black decides to grab a pawn. Peter's hopes were connected with the strong centralized Ne5.

[Unpinning the knight wouldn't solve the problems: 17...Qa5 18.b3 exf3 *(18...Nxf3 19.Nxf3 exf3 20.Qe3 Bf6 21.Qxf3 Ra7 22.Qg3→)* 19.Qe3 Bf6 *(19...Qd5 20.Bxe5 Qxe5 21.Qxf3 Qxg7 22.Qxa8 0-0 23.Bxa6 Bxa6 24.Qxa6±)* 20.Nxe6! fxe6 21.Rgxd7 Bxd7 22.Nc5 Rh7 23.Nb7 Qc7 24.Nd6+ Kf8 25.Bxe5 Bxe5 26.Qxe5→]

18.Nxe6! A typical 'Sicilian sacrifice'. White is freeing a route towards the opponent's king.

[This is much stronger than: 18.Qe3 Bf6 19.Rg3 Bb7 20.Nxf3 Rc8⇄ and Black gets some counterplay along the c-file.]

18...fxe6 19.Bd3 Now all the forces are taking part in the attack. **19...Bf6** A brave decision. Peter is trying to release the pressure by giving up his queen!

[No doubt, a cool-blooded move 19...Rb8!? is very tough for a human player. The further complications are most probably in White's favour, but it

would be a difficult task to find all the precise moves:

A) 20.Bg6+ Kd8 21.Be4 *(21.Bg5 Nxg6 22.Bxe7+ Nxe7 23.Qg5 Re8 24.Rxe7 Rxe7 25.Qg8+ Re8 26.Qg5+=; 21.Qe3 Rb5 22.c4 bxc3 23.Nxc3 Rxb2+ 24.Ka1 Qc5 25.Qxc5 Bxc5 26.Bxe5 Rg2 27.Bf6+ Kc7 28.Be5+ Kd8=)* 21...Rb5 22.Bxf3 Qa5 23.Bxe5 Rxe5 24.Qd4 Rf8 25.Nb6 Rxf3 26.Qxd7+ Bxd7 27.Rxd7+ Ke8 28.Rdxe7+ Kd8 29.Rd7+=;

20.Bg6+ Nxg6 21.Bxc7 Bxg7 22.Qd3! Unfortunately for Peter, his position still lacks harmony. **22...Nge5** Protecting the passed pawn looks most logical.

[22...Ne7 23.Qxf3 Ra7 24.Bd6±]

23.Bxe5 Bxe5 24.Qe4! A brilliant idea! White has to activate the Na4 as soon as possible, while the Pf3 is not dangerous at the moment.

[13.Bd3 looked very natural.]

13...Rac8 14.Rg1 Bc6 15.Bd3 b4 16.Ne2 d5 17.g5 This looks more natural, to take advantage of the rook on the g-file.

[17.e5 Nd7 18.f4

A) 18...f6!? 19.Qe3 *(19.Qh4 g6* and although Black's position looks precarious, I fail to see a knock-out blow *20.Qh6 Rf7∞)*;

B) 18...Bb5 19.Rd2 Nc5 with some counterplay, as taking the knight on c5 would expose the queen on f2 and rook on g1 to a nasty skewer.]

17...Nh5 18.exd5 Bxd5 19.Rg4 White wants to play Rh4, and remove the defensive blocker on h5 by the most brutal means available. **19...e5 20.Be3 Qc6 21.Rf1 g6 22.Nc1 f5!** White's "attack" has ground to a halt, so Black takes his chance to take over the initiative. **23.gxf6 Nxf6 24.Rgg1 Nh5**

[Black had many options here, although taking a pawn seems most logical. It was also possible to transfer the knight to the c5 square by means of 24...Ne4!? 25.Qg2 Nc5 with good prospects for Black.]

25.Qd2 Bxf3 26.Nb3 Black has won a pawn, but the black king is slightly more exposed than it's counterpart, which give's White some counterchances at least. **26...Rfd8 27.Qf2 Rf8 28.Bh6 Rf7 29.Qe3 e4 30.Nd4 Qd5 31.Nxf3 exd3**

[31...exf3 32.Be4 and White regains the pawn.]

32.Qxd3 Qxd3 33.cxd3 Bf8 This endgame favours Black due to the pawn islands White has on h2 and d3, but Caruana is a tough nut to crack these days, and he managed to eke out another vital half-point. **34.Bd2 Bd6 35.Ng5 Rxf1+ 36.Rxf1 Bxh2 37.Bxb4 Be5 38.Ne6 Ng7 39.Re1 Bg3 40.Re4 Re8 41.Nc5 h5** These kind of positions, with passed pawns on different sides of the board, are notoriously hard to assess. [59...h4! passed pawns must be pushed! 60.Bg1 h3 61.Ke6 the only chance is to approach the g-pawn, but even after this Black wins instructively by dominating the enemy bishop *(61.Ke4 h2 62.Bxh2 Bxh2* wins trivially, as Black can just set up a "lock" by playing ...g5 followed by Bf4 *)* 61...Kc4 62.Kf6 Bf2! 63.Bh2 Kxd4 64.Kg5 *(64.Kxg6 Ke4* and the king will go to g2, followed by transferring the bishop to the b8-

[Hansen, Carsten]

1.Nf3 Nf6 2.c4 g6 3.Nc3 d5 4.cxd5 Gelfand started dabbling with 4 Qa4+ which has been quite popular all year. The text move is the main line move, which has played only a minor role this year so far. **4...Nxd5 5.Qa4+**

[Other moves include 5.e4 (played in our other main game in this section)]

[5.Qb3]

[5.h4!? . Examples of these lines can be found in the PDF e-books and the PGN archive.]

5...Bd7 6.Qb3

[White's two main alternatives are 6.Qc2!? , which Tony Kosten gives as his preferred move in the PDF e-book, but unfortunately hasn't been covered in any of the updates on Chesspublishing.com thus far. I will return to this move soon, because White scores incredibly well with it and its treatment in the ECO is by and large very superficial]

[and 6.Qh4 which clearly is the theoretical main line and is played 8-10 times as frequently as our main game move and 6Qc2]

6...Nb6 7.d4

[As mentioned in the notes to Bu Xiangzhi-Vachier Lagrave in the February update, White has a decent alternative in 7.g3!?]

7...Bg7 8.Bf4

[8.Bg5 was seen in Ionov-Klimov, St Petersburg 2005, which can be found in the PGN archives.]

[8.e4 Bg4 is a regular Grünfeld]

8...Be6 9.Qa3 0-0

[An alternative is 9...Nc6 Bu Xiangzhi-Vachier Lagrave, Wijk aan Zee 2007, which was discussed in my February 2007 update and thus can be found in the archives. White obtained in my opinion the better chances in that game]

10.e4

[A new move in this position. 14...Qd6! 15.f4

[This looks a bit odd, why does White allow Black to mess up his pawn structure. The answer lies in the fact that 15.Qxd6 exd6 16.Nd3 Nd7 while innocent-looking is quite uncomfortable for White thanks to the pressure Black can apply down the e-file and along the a6-f1 and h8-a1 diagonals, and White essentially is without any targets to focus his counterplay on.]

15...Qxa3 16.bxa3 f6

[16...Rd8!? (intending ...Nd7) 17.h4?! Nd7 18.h5 Rac8 looks very nice for Black]

17.Nf3?!

[I don't agree with move, even if looks perfectly normal, overprotecting the d4-pawn which often becomes a target in the Grünfeld. Instead I tend to give preference to the somewhat provocative, yet also perfectly logical 17.Nd3 and now preventing Nc5 with

A) Or 17...e6 18.Nc5 Kf7 19.d5 cxd5 20.Nxa6 Nxa6 21.exd5 exd5 22.Rxd5 Rfd8!? and the chances are about even;

B) 17...Nd7 18.d5 Bc4 *(18...f5 19.e5)* 19.Nb2 f5 20.e5 Bxd5 21.Nxd5 cxd5 22.Rxd5 , and White should be okay;

C) 17...Bc4!? also looks good, anticipating White's Nc5, which now can be met with ...b6 18.f5 gxf5 19.exf5 Nd7 20.Nf4 Nb6 , and Black has at least a slight pull;

D) 17...b6!? may be given preference e.g. 18.f5!? Kf7 *(18...e6?! 19.fxe6 Re8 20.Nf4* is better for White*)* 19.g4 Nd7 20.Nf4 Bc4 21.Kf2 Rfd8 , and despite White space advantage, Black has the slightly better chances thanks his better pawn structure]

17...Nd7!?

[Black has another attractive option in 17...e6!? e.g. 18.h4 h5 19.Kf2 Nd7 20.Rhe1 Nb6 21.d5 f5!? 22.Bd4 fxe4 23.Bxg7 Kxg7 24.Nxe4 exd5 and Black has the better chances]

18.d5 Nb6

[18...Rfc8!? 19.dxc6 *(19.Kf2 Kf7 20.d6 Re8 21.dxe7 Rxe7)* 19...Rxc6 20.Nd5 Kf7 21.Nb4 Rc3 22.Kf2 Bb5 looks very comfortable for Black]

19.dxc6 bxc6 20.Nd4 Rfc8

[Black has several good continuations at this juncture. The game continuation is one, but another one is 20...Kf7!? 21.Kf2 Nc4 22.Bc1 Rfc8 , and Black must be better with his

well-placed knight on c4, bishop pair, and better pawn structure]

21.Ne6 Bh6! 22.Kf2 And here a draw was agreed upon.

[22.Kf2 rather prematurely I will say, because Black's position looks rather comfortable after Bc4 23.Nc5 Bf7 followed by a knight to c4, and Black has every reason to be satisfied]

[R.Scherbakov]

A grandiose battle in one of the most topical lines. Svidler accepted a pawn sacrifice and then came up with a rare option. Grischuk developed the initiative with a series of energetic moves, which involved a brilliant piece sacrifice. Peter defended very skilfully but still had to give up his queen, nevertheless maintaining sufficient counter resources. A following small inaccuracy gave Alexander a chance to give Black serious problems but he was attracted by another interesting option which only led to a repetition of moves. **1.Nf3 d5 2.d4 Nf6 3.c4 c6 4.Nc3 e6 5.Bg5 h6 6.Bh4 dxc4 7.e4 g5 8.Bg3 b5 9.Be2 Bb7 10.h4 g4 11.Ne5 h5 12.0-0 Nbd7 13.Qc2 Nxe5 14.Bxe5 Bg7 15.Bg3!? Qxd4** A principled reply.

[15...0-0!? is worth considering, among other options. Then after 16.e5 Black might think about Nd5 17.Ne4 Ne7 18.Nd6 Nf5! and it looks like White should refrain from capturing the bishop since after 19.Nxb7? *(19.Rad1* is preferable*)* 19...Qxd4 20.Kh2 *(*or *20.Rad1 Qb6 21.Bf4 Qxb7)* 20...Nxg3 21.fxg3 Bxe5 Black gets the better chances, as was pointed out by Maxim Notkin.]

16.Rfd1 White leaves the other rook on a1 in order to increase the effect of the a-pawn advance.

[In the game Wu Shaobin - Al Sayed/ Asia-ch Doha 2003 White unsuccessfully tried 16.Rad1 Qb6 17.e5?! *(* perhaps it was not such a bad idea to move the bishop back by *17.Be5!?)* 17...Nd5 18.Ne4 0-0-0! 19.Nd6+ Rxd6 20.exd6 f5∓ with clearly the better chances.]

16...Qc5!? A rare option, which certainly deserves more attention.

[16...Qb6 is the more popular retreat. We considered the game Khalifman - Kobalia/ RUS-chT Sochi 2005, which continued 17.a4 a6 18.Qd2 Bh6 *(* or *18...Rh6 19.Qf4 Rg6 20.Qe5 Bf8∞* Bocharov - Kobalia, Abu Dhabi 2005*)* 19.Qd6 Bf8 20.Qe5 Be7 21.Bf4 Rg8 Black has achieved acceptable play. However, White might still find a way to maintain the better chances.]

17.Bd6 A new continuation.

[In the game Wendt - Van Wely, Minneapolis 2005 White started immediate play by 17.e5 Nd5 18.Ne4 Qb6 19.Nd6+ but then after Kf8 he was missing his rook on the f-file.]

17...Qb6 18.a4

[A tempting 18.b3 could have been met by a very unexpected Nd5!? 19.exd5 cxd5 , as was pointed out by Mikhail Golubev. A possible line could be 20.Bg3 d4 21.Ne4 Bxe4 22.Qxe4 f5!! 23.Qxa8+ Kf7 24.Qxh8 Bxh8 and Black is at least not worse thanks to his formidable pawns.]

18...a6 19.e5 Nd7!
[19...Nd5 was doing nothing against White's plans, which involve 20.Ne4, getting control over important squares.]
20.a5 Qa7 21.Ne4 c5!
[Black should hurry up with this typical advance: 21...0-0-0? was met by 22.b3! cxb3 *(22...Nxe5 23.Bc5)* 23.Qc3! b2 24.Rab1! with total domination.]
22.Ng5 Nxe5 23.Bxe5 Bxe5 24.Bxc4!! A wonderful resource!
[Another sacrifice 24.Nxf7? promised nothing: Kxf7 25.Rd7+ Kf6 26.Qd2 Rag8]
24...bxc4 25.Qa4+ Kf8 26.Rd7 Bd5!

27.Rd1! There was no need to capture the queen instantly. **27...Bd4!**
[27...Qb8? failed to 28.Rxf7+ Kg8 29.Rxd5! Rh6 *(or 29...exd5? 30.Qc6* with a quick mate*)* 30.Qd7 exd5 31.Rh7! Qe8 32.Qxd5+ Re6 33.Rd7! with a decisive advantage.]
28.Rxa7 There was no improving moves at White's disposal. **28...Rxa7 29.b3! Kg7**
[According to Maxim Notkin's analysis it was stronger to accept the gift: 29...cxb3! and after 30.Rxd4! cxd4 31.Qxd4 Rb7! 32.Qxh8+ Ke7 33.Qb2 f6 34.Qa3+! 30.bxc4 Ba8 31.Qc2 At first sight Black should be okay but the vulnerable position of his king still promises the better chances for White. **31...g3 32.Rxd4?!**
[32.Qd3! was much stronger: gxf2+ *(or 32...Bxf2+ 33.Kh1 Re7 34.Nh3!)* 33.Kf1 followed by Qg3, after which Black's king would have faced problems. Yet, Black could still defend by Rd7! 34.Qg3 Kf8]
32...cxd4 33.Qe2 gxf2+ 34.Qxf2
[34.Kxf2 was worthy of consideration, keeping the e5-square under control. However, it couldn't seriously bother Black: Kf6! 35.Nf3 Bxf3! 36.Qxf3+ Kg7 37.Qg3+ Kh7 38.Qd3+ f5 39.Qxd4 Rg7 and a draw is the most likely result.]
34...Rd8?! Natural but dubious.
[34...e5! 35.Qg3 Kf6= could have solved all the problems.]
35.Qg3 Kf8
[Here 35...Kf6? was strongly met by 36.Qf4+ Kg6 37.Nxe6! fxe6 38.Qg5+]
36.Qe5! Ke8? Increasing the problems.
[36...d3? failed to 37.Qc5+ Re7 38.Nh7+ Ke8 39.Nf6+ Kf8 40.Ng8! Kxg8 41.Qxe7 and Black was unable to keep the rook behind his passer: Rd4 42.Qg5+ Kh7 43.Qxh5+ Kg8 44.Qc5! etc.]
[36...Rad7! was stronger: 37.Qh8+ *(or 37.Nh7+ Ke7 38.Qg5+ Kd6! 39.Nf6 d3!⇄)* 37...Ke7 38.Qg7 d3 39.c5 *(39.Qxf7+ Kd6; 39.Nxf7 d2!)* 39...Rf8 *(39...Re8!?)* 40.Nh7 Rfd8

and White cannot achieve anything. For example, 41.Qg5+ Ke8 42.Nf6+ Kf8 and if 43.Nxd7+ then Rxd7 and again White cannot win in such a position.]

37.Nxe6?! This tempting blow does not bring the desired results.

[37.Qh8+ Ke7 38.Qg7 looked winning but Black could still fight thanks to his strong passed pawn: Rad7 39.Qxf7+ Kd6 40.Qxe6+ Kc7 *(40...Kc5?! 41.Nf7 Rxf7 42.Qxf7↑)* 41.Qxa6 d3! and White's win was still unclear. 37...fxe6 38.Qh8+ Ke7 39.Qg7+ Ke8 40.Qh8+

[In case of 40.Qxa7 d3 Black's strong passed pawn means White cannot even dream about win.]

[7.a3!? is also possible, and I prepared this for one of my games recently, based on Piket, J-Leko, P in the PGN Archive.]

[7.0-0 isn't as bad as I thought (I once gave it a question mark), as a6 8.Bxc6+ Nxc6 9.d3 leads to similar play to the game.]

7...a6 Otherwise White will play a3 next go. **8.Bxc6+ Nxc6 9.Be3** White controls d4 and targets the c5-pawn. The downside is that he has conceded his light square bishop, will this prove a problem in the long term?

17...d5∓ This position is just as bad as it looks for White. He's facing a 2-0 perfect central majority, has zero activity and is tied to defending weaknesses on c2 and f5. **18.Rac1**

[In the preceding update I considered 18.Bc2?? in Karjakin, S (2762)-Svidler, P (2727)/Baku AZE 2015.]

[18.h3 is another interesting option, which I also considered.]

18...b4 19.h4 Ivanchuk's novelty. Before playing c4 he wants to provoke 19...h5. A double-edged decision as the g4-square may later be used by the black knight.

[Earlier White played 19.c4!? Nf6 20.Bd1 *(20.Qxc6!? Rd8 21.Qb6 Rd7 22.Bc2* deserved serious attention.*)* 20...Re8 21.Bd2 Qe5 with good compensation for the sacrificed pawn in Stellwagen, D (2639)-Gustafsson, J (2606)/Germany 2008.]

[and 19.Bxd5 cxd5 20.Qxd5 Rd8 21.Bg5 Qxa1 22.Bxd8 Bf8 23.Ba5 Qb1! 24.Kg2 Bxd3 25.Nd2 Qc2 was roughly equal in Vouldis, A (2524)-Gustafsson, J (2614)/Ermioni Argolidas 2005.]

19...h5 Black fixes the kingside and secures the g4-square for his knight.

[19...h6 20.h5 Bh7 21.c4 Nf6 22.d4 is what Vasily hoped for, although the position remains tense.]

20.c4 Nf6 21.Bd1

[I prefer the more active 21.d4!? Re8 22.c5 Bc7 23.Bc4 White's idea is to unpin the c1-bishop by means of 24. b3 and 25. Bb2. *(*After *23.Qd1 Re2 24.Qxe1 Rxe1 25.Bc4 a5 26.b3 Ne4 27.Bb2 Rxa1 28.Bxa1 Bd8!* Black seems to create enough counterplay thanks to the weakness of the a2-pawn.*)* 23...Bd8 24.b3 Qc3 25.Qxc3 bxc3 White retains an extra pawn and unpins his dark-squared bishop, but Black's passed pawn on the c-file yields him counterplay. This position requires practical tests.]

21...Re8!? A natural developing move.

[21...Bc5!? 22.Bd2 Qe5 23.Qxc6 Rd8 is a logical alternative, which also

gives Black enough counterplay.]

22.Bd2?! It felt necessary to get rid of the annoying queen on the back rank, but the text turns out to be inaccurate.

[22.d4!? , which prevents the ...Bc5 idea deserved attention. Play could continue Qe6! 23.Be3 Qxc4 24.Ba4 Be4 25.Nd2 Bxf3 26.Nxc4 Bc7 with a roughly equal endgame.]

22...Qe5 Now the b2-pawn is hanging.

23.Rc1

[In case of 23.Rb1 Black can go for a direct attack on the f2-pawn. Bc5 24.Bc2 Ng4 25.Be3 a5!∓ and White is under some pressure.]

23...Bc5!? Svidler is blocking the c-pawn, while the b2-pawn remains hanging.

[White's idea was to meet 23...Qxb2 with 24.c5 though after Be5 25.Bb3 Bd4 26.Rc2 Qb1 27.Bxb4 Rb8 28.Bc3 Rxb3 29.axb3 Qxc2 30.Bxd4 Nd5∓ Black is still better.]

24.a3? A serious mistake, which could become decisive.

[24.Qxc6 was necessary. Bxd3 25.Bf3 Ne4 *(25...Re6!? 26.Qc8+ Kh7∓* is also better for Black.*)* 26.Bf4 Qe7 27.Be3 Bxe3 28.Nxe3 Nxf2! 29.Re1 Ng4! 30.Bxg4 Qe5! 31.Ng2 Qd4+ 32.Kh2 Rxe1 33.Nxe1 Qf2+ 34.Qg2 Qxe1 35.Bxh5 and Black is just a tiny bit better.]

24...a5 Peter returns the favour, but retains a clear edge.

[After the straightforward 24...Ng4! White can't protect the f2-pawn. 25.axb4 *(25.Ne3 Qxb2-+; 25.Be3 Nxe3 26.fxe3 Bxd3-+)* 25...Bxf2+ 26.Kg2 Bd4! 27.Rc2 Qd6!-+ with full domination.]

25.axb4 axb4 26.Rc2

[After 26.Qxc6 Bxd3 27.Bf3 Re6 28.Qb5 Be4!-+ Black is clearly better.]

26...Ng4! 27.Ne3? After this move White's position collapses.

[27.Bf4 is the lesser evil, though Black's edge after Qe1 28.Re2 Rxe2 29.Qxe2 Qxf2+ 30.Qxf2 Nxf2 31.Be3 Bxe3 32.Nxe3 Nxd3∓ is big.]

27...Qd6!-+ 28.Nxg4 hxg4 29.Qxg4 Bh5!

[29...Qxd3!-+ is also good enough for a win.]

30.Qxh5 Qxg3+ 31.Kh1 Qxf2

[31...Qxf2 and White resigned due to 32.Qg4 Qf1+ 33.Kh2 Bd6+ A nice win for the 7-time Russian champion. The game proved once again that 14...Re8 is a serious alternative to 14...Qh4.]

[Another creative way to handle the black side of the Kan is 5...g6!? 6.0-0 Bg7 , but grandmaster praxis has shown that it's not so easy for Black to equalise after 7.Nb3! . The latest example was Caruana-Grandelius, European Team Championship, Porto Carras 2011, where Ne7 8.c4 Nbc6 *(8...0-0 9.Nc3* can transpose, but don't forget that Karjakin-Davies, Mainz (rapid) 2010, showed why the immediate *d5?* isn't playable: *10.cxd5 exd5 11.Bg5! dxe4 12.Bxe4 Qxd1*

6.0-0 e5!? Romanishin's bold idea.. .

[Romanishin's idea, first played by Kunte in his aforementioned game. Instead 7...exd4? clearly fails to 8.e5! Qa5 9.Bd2 ,]

[but there has been some recent interest in 7...d6!? , which I previously marked as '?!', but has since been resurrected: 8.Nf5 Be6! *(* improving over the course of Wells-Romanishin, Berlin 1999, where *8...Bxf5?! 9.Bxf6 gxf6 10.exf5 d5 11.c4 dxc4 12.Bxc4* was pretty nice for White*)* 9.Nc3 *(* calmness is Black's watchword in this line *9.Bxf6!? 10.Ne3 Bc5 One of the points of

Svidler's prudent new approach becomes clear: his dark-squared bishop is actively placed outside the pawn chain and he will just play around any knight which appears on d5. **11.Nc3**

[I can't believe that Black has too many problems, if indeed any, after 11.Nd5 Qd8 12.b4!? Ba7 13.c4 Bd4 14.Nbc3 , but some such radical plan of queenside expansion may be required if White wants to fight for an edge.]

11...d6 12.Ncd5 Qd8 13.c3 Be6 14.Bc2 Karjakin manoeuvres cagily, hoping that he will obtain a chance to target d6 or, more likely, attack on the kingside. **14...0-0 15.Ng4** Here we go. The only problem for White: he doesn't stand better. **15...Nd7!?**

[Provoking White's next. Many would be terrified of having their king forced out to h6, but Svidler trusts in his calculational abilities. A sensible alternative would have been 15...Kg7 when I'm not too sure what Karjakin intended with, for instance, 16.Kh1 Nd7 17.f4?! being too ambitious after Bxd5! 18.Qxd5 h5 19.Nf2 Nf6 when Black begins to take over the initiative.]

16.Nxh6+ Kg7 17.Nf5+!

[The best try, even if it does only lead to a draw. White would have been a pawn up after 17.Ng4 and your computer will no doubt want to play this way, but after Qh4 18.h3 Rh8 do you really like White's position? I certainly can't see a great way to oppose the idea of ...Rh7, ...Rdh8 and maybe a timely ...f5.]

17...gxf5 18.exf5 Bxd5 19.Qg4+ Kh6 20.Qh3+ Kg5!?

[Provocative. 20...Kg7 would have led to an immediate perpetual, as ...Qg5 is threatened and 21.f6+?? Nxf6 covers h7.]

21.Qg3+ Kh5 22.Qg7!

[Karjakin finds the right path, which was most certainly not 22.Qh3+? Qh4 23.g4+ Kg5 and the black king slips away.]

22...Bf3! The only move and one Svidler had to see before beginning his bold play with the king. **23.Qh7+ Kg5 24.Qg7+**

[Forcing the draw, as White again comes up short after 24.gxf3? Qf6 25.h4+ Kf4 .]

[R.Scherbakov]

Peter Svidler refrained from his pet Grunfeld and played a rare early ... d5xc4, getting a position similar to the QGA. However, this surprise only had a small effect on Garry Kasparov, who preferred his usual approach, achieved a small but stable advantage, and eventually converted it into a full point.

1.d4 d5 2.c4 c6 3.Nc3 dxc4 4.e4

[A choice between the text move and 4.e3 is usually a matter of taste.]

4...b5 5.a4 b4

[The interesting counter strike 5...e5!? does not completely solve the problems: 6.Nf3 exd4 7.Qxd4 Qxd4 8.Nxd4 b4 9.Nd1 Ba6 10.Bf4 Nf6 11.f3 Bc5 12.Nf5 0-0 13.Rc1± and White regained the pawn with

advantage, Kasparov - Huebner, Belfort 1988.]

6.Na2 Nf6

[Here 6...e5 has also been tried but the problems still remain. 7.Nf3 exd4 8.Bxc4 Ba6 9.Bxa6 Nxa6 10.Qxd4 Qxd4 11.Nxd4 with a certain advantage for White: c5 *(or 11...Ne7 12.Be3 c5 13.Nb3! Nc6 14.Rc1 Ne5 15.Ke2 c4 16.Nd2 b3 17.Nc3 Nd3 18.Rb1 Rc8 19.Nb5±* and White began collecting Black's pawn weaknesses, Dautov - Cuijpers, GER-chT 1994 *)* 12.Nb5 Nf6 13.f3 Be7 14.Be3 0-0 15.Ke2 Nd7 16.Rhd1± and Black's life is difficult, Yakovich - Stefanova, Sevilla 1999.]

7.e5

[7.f3 can be met by e5! 8.dxe5 Qxd1+ 9.Kxd1 Nfd7 with very unclear play, Hjartarson-Gulko, Reykjavik 1996.]

7...Nd5 8.Bxc4 The position reminds me very much of the QGA and it's quite logical - Black took on c4 rather early then White regained the pawn - exactly what usually happens in this opening.

8...e6

[8...Bf5 helps White to gain some time by 9.Ne2 *(9.Bg5!?* is also interesting: *h6 10.Bh4 Nf4 11.Bg3 Be6 12.Bxe6 Nxe6 13.Ne2 a5 14.0-0* with a certain edge, Avrukh - Soffer, Ramat Aviv 1998*)* 9...e6 10.Ng3 Bg6 11.0-0 Be7 12.f4 and after the forthcoming f4-f5 White's superiority was beyond doubt, Slipak - M.Ginzburg, Villa Gisell 1998.]

9.Nf3

[The alternative 9.Ne2 is less promising: Bb7 *(9...a5!?* deserves attention as well: *10.0-0 Ba6 11.b3 Nd7* with a subsequent ... c6-c5 *)* 10.0-0 c5 11.Bd2 Nd7 12.a5 Rc8 with good play for Black, Jussupow - Vera, Linares 1997.]

9...Be7 Black does not want to think about ...c6-c5 without K-side development. **10.Bd2** In his turn, White is in a hurry to get his knight back into play, increasing control over the c5-square. **10...a5**

[10...Ba6 is usually met by 11.Qe2 *(*in case of *11.Bxd5? Qxd5 12.Bxb4* White finds himself in trouble after *Qe4+ 13.Kd2 c5! 14.Bxc5 Bxc5 15.dxc5 Nc6 16.Kc1 Rd8→* with a strong attack*; 11.Bxa6 Nxa6 12.Nc1 c5* was good for Black in the game Korotylev - V.L.Ivanov, Moscow (rapid) 1999: *13.Qe2 Qb6 14.Nb3 0-0 15.0-0 Rfc8 16.dxc5 Nxc5 17.Nbd4 Qa6!∓* with somewhat better chances *)* 11...Bxc4 12.Qxc4 Nb6 *(*after *12...a5 13.Nc1 0-0 14.Nb3±* White has maintained his advantage in the game Arensibia - Miles, Yopal 1997 *)* 13.Qc2 a5 14.Nc1 Qd5

B) 15.Nd3! N8d7 *(15...Qe4+ 16.Be3)* 16.Be3 Rc8 17.0-0 0-0 18.Rfc1± and White has successfully stopped ...c6-c5, Hillarp Persson - P.Cramling, Linkoping 2001.]

11.Nc1 Nd7

[In case of 11...Ba6 12.Qc2 Bxc4 13.Qxc4 0-0 14.Nb3± White secured

a small advantage in the already mentioned game Arencibia - Miles, Yopal 1997.]

12.Nb3 h6 This pawn advance is a novelty. According to Garry Kasparov this move is useful if Black is going to develop his bishop to b7 as Ivan Sokolov did against him in Sarajevo 1999. But if Svidler had planned ...Bc8-a6 then he could save time on it.

[12...Bb7 is a common option:

A) 13.Qe2 is maybe a bit early: c5 14.0-0 0-0 15.Bd3 *(15.dxc5 Nxc5 16.Nxc5 Bxc5* was okay for Black, Slipak - Rojas, Villa Martelli 1998*)* 15...cxd4 16.Rfc1 Qb6 with acceptable play for Black, Yakovich - Sadler, Pula 1997;

B) 13.0-0

B1) after 13...0-0 14.Bd3!

B1a) 14...c5?! is not well prepared: 15.dxc5 Rc8 *(15...Nxc5? 16.Nxc5 Bxc5 17.Bxh7+ Kxh7 18.Qc2+ Kg8 19.Qxc5±)* 16.Rc1 Nxc5 17.Nxc5 Bxc5 and here the thematic blow 18.Bxh7+! gives White a huge advantage: Kxh7 19.Ng5+ Kg6 20.Rxc5! Rxc5 21.Qb1+! f5 22.exf6+ Kxf6 23.Ne4+ Kf7 24.Nxc5**±**;

B1b) 14...Ba6 15.Bxa6 Rxa6 16.Qe2 Ra7 *(16...Qa8 17.Bg5)* 17.Rfc1 Qb6 18.Bg5! h6 19.Bxe7 Nxe7 20.Nfd2**±** Black was suffering from his numerous weakness, Vera - Psakhis, Castellaneta 1998;

B2) 13...h6 14.Qc2 *(14.Qe2* is also good: *Kf8 15.Be3 g6 16.Nfd2* with advantage, Shariyazdanov - Cz.Horvath, Rabac 2004*)* 14...Rc8 15.Qe4 c5 16.Rac1 Kf8 17.Bb5 and White kept certain pressure in the game Kasparov - I. Sokolov, Sarajevo 1999]

[The purpose of the modest pawn advance ...h7-h6 can be illustrated by the following game: 12...N5b6 13.Bd3 c5 14.dxc5 Nxc5 15.Nxc5 Bxc5 16.Qe2 Bd7 (castling was fairly dangerous) 17.0-0 Nd5 18.Rfc1 Qb6 19.Ng5↑ with the initiative, Arlandi - Varga, Budapest 2000.]

13.0-0 Qb6 14.Qe2

[14.Qc2!? was also worthy of consideration, keeping the queens on the board: Ba6 15.Rfc1 Bxc4 16.Qxc4 Rc8 and so on. As Kasparov revealed after the game, he decided the endgame would be more promising for White. To be fair, I am not quite sure: in many cases in the endgame the defender gets one more piece into defence - the king. Of course, White can also bring his king to the center but then he cannot directly use it whereas Black would really try to use his king in protecting some weak squares in his camp.]

14...Ba6 15.Rfc1 0-0 16.Bxa6 Qxa6

[In case of 16...Rxa6 17.Ne1 followed by Ne1-d3 White takes control over the c5-square. Then he could have continued by Rc1-c4, Ra1-c1, keeping in mind not only the pressure on the Q-side but also such ideas as Nd3-c5 and after the capture, d4xc5 and Rc4-g4 with K-side action, based on a space advantage in the center. After exchanging queens Black can at least be sure about his king although White cannot spoil his advantage anyway - Black will always

be suffering because of his Q-side pawn weaknesses.]

17.Qxa6 Rxa6 18.Kf1 Rc8 19.Ke2 Kf8 20.Rc2 Ke8 21.Be3 A clever move. White had to take care about ...c6-c5 but the rook on a1 has to protect the a4-pawn. **21...N5b6** After this retreat Black can forget about ...c6-c5. However any attempt to advance the ... c-pawn would also increase Black's problems with the pawn on a5. **22.Ne1** According to the plan. **22...h5 23.Nd3 Nd5 24.g3 f6** Not so much trying to create some pressure on White's center as getting some space for the pieces. **25.Rac1 Kf7 26.exf6** This exchange gives White a good opportunity to gain a passed pawn on the h-file in the future. **26...gxf6 27.Nf4!** Removing the important defender. **27...Nxf4+ 28.Bxf4 Nf8 29.Nc5 Bxc5 30.Rxc5 f5**

[30...Kg6!? deserved attention, not weakening the dark-squares.]

31.Bg5 Nd7 32.R5c2 Kg6

[The attempt 32...e5!? 33.dxe5 Nxe5 was interesting but White could always secure the better chances with accurate play, for example: 34.h3 *(34.Rc5 Nd7!)* 34...Nd7 35.Rd1 and so on.]

[while the 4 rooks endgame was just bad for Black as his rooks had to remain passive: 32...Nf6? 33.Bxf6 Kxf6 34.Rc5+- with a technically winning position.]

[However, 32...c5!? was fairly interesting - as we'll see, Black will make this decision in two moves.]

33.h4 Kf7 34.f3 Clearly showing the intention to obtain a passed pawn on the h-file. **34...c5!?** Black does not want to defend passively so he is trying to get work for both the a6-rook and the knight.

[Here 34...e5 couldn't help much: 35.dxe5 Nxe5 36.Rc5 Re8 *(36...Ke6 37.Re1 Kd6 38.Be7+! Kxe7 39.Kf2+-)* 37.Kf1! followed by Rc1-d1 with direct operations against both Black's king and his pawn weaknesses.]

35.dxc5 Rac6 36.Rd1?!

[If White wanted to attack the knight then 36.Rd2 was certainly more precise: Nxc5 *(*here *36...Nb6?* failed to *37.cxb6! Rxc1 38.b7* followed by Rd2-d7*)* 37.Rdc2 Nb3 38.Rxc6 Nd4+ *(*after *38...Rxc6 39.Rxc6 Nd4+ 40.Kd3 Nxc6 41.Kc4 Ne5+ 42.Kb5 Nxf3 43.Bd8* and White's a-pawn should decide the game although the knight sometimes can work wonders*)* 39.Ke3 Nxc6 40.Rc5 Ke8 and Black keeps fighting although White's superiority is beyond doubt.]

[White probably did not want to play 36.Be3 , giving Black a chance to improve his position by e5 followed by ...Kf7-e6.]

36...Nb6!?

[Black could also think about 36...Nxc5 , transposing to the just considered line.]

37.Be3

[37.cxb6!? Rxc2+ 38.Ke3 Rb8 39.Rd7+ looked better for White but Black could find a lot of defensive resources with his two active rooks.]

37...Nxa4

[37...Nd5!? came into consideration, playing for a fortress. However, after 38.Bf2 White could probably find some plan to make progress.]

38.Ra1 b3 39.Rd2 Nxc5 40.Rxa5 Black got rid of the a5-pawn but now he faces serious problem with his b3-pawn.

40...Na6 41.Rb5 Rb8 42.Rd7+ Ke8 43.Rxb8+ Nxb8 44.Rb7 Rc2+ 45.Kf1
[Unfortunately, White couldn't advance his king as after 45.Kd3 Nd7 46.Rxb3 Rg2 he was losing the g3-pawn.]
45...Nd7
[45...Nc6!? was also worthy of consideration: 46.Rxb3 Na5 47.Rb8+ Kd7 followed by ... Na5-c4 with reasonable drawish chances thanks to the activity of all the pieces.]
46.Rxb3 White has finally won a pawn but his task is fairly difficult here as his king is cut off along 2nd rank. Besides, the knight would be very helpful here as, contrary to the bishop, it can use squares of both colour. **46...Ke7?!** This is dubious.
[46...Ne5 was strongly met by the concrete 47.Bd4 Nc4 48.Rc3!]
[but 46...e5!? deserved serious attention.]
47.Bg5+ Kd6 48.Rd3+ Kc6 49.Rd2!?
[49.Rc3+!? also came into consideration but it was very difficult to calculate till the very end and so Kasparov was certainly worried about possible surprises: Rxc3 50.bxc3 Kd5 51.Kf2! Kc4 52.g4! fxg4 53.fxg4 Kxc3!? *(in case of 53...hxg4 54.h5 Kxc3 55.Be7!+-* Black couldn't stop the pawn *)* 54.gxh5 Kd4 55.h6 *(55.Be7 Ke5 56.h6 Nf6)* 55...Nf8 56.Kf3 Ke5 57.Kg4+- and White was winning.]
49...Rc4 50.Ke2?!
[50.Be7! was more energetic.]
50...e5?! Perhaps White didn't play the best moves at some points but he couldn't spoil his advantage. On the other hand, any Black inaccuracy could easily lead to disaster.
[50...Nb6! was essential, moving the knight to d5 and getting very good control - White's task was still rather difficult.]
51.Be7! Securing the decisive penetration. **51...e4 52.Rd6+ Kc7 53.Rd5 Rc2+ 54.Ke3 Rxb2 55.Rxf5** White couldn't promote his b2-pawn anyway - it is much better to collect Black's K-side pawns. **55...exf3 56.Kxf3 Rb3+ 57.Kf4** Black resigned.

Tal Memorial Blitz (2) 29.08.2008
[Hansen, Carsten]

1.c4 e5 2.Nc3 d6 3.g3 f5 4.d4 This is White's most aggressive response to Black's set-up. I have preferred 4 Bg2 in my own games, following up with 5 e3, 6 Nge2, 7 0-0, 8 d3, and then either f2-f4 or Rb1 and a pawn advance on the queenside. **4...e4!?** Svidler goes for a fairly obscure line that is seen only very rarely in games involving strong players. Alternatives such as 4...Nc6 or 4...Be7 allow early queen exchanges after 5 dxe5 and are considered slightly better for White and therefore they can be thought of as right up Kramnik's alley. There are more details on this in the PDF e-book on the King's English. The text move was first played by Tal. **5.Nh3**

[This move was given as interesting in my book on 1 c4 e5, but without further details and the ECO doesn't mention it all, but compare with the lines after 1 c4 e5 2 Nc3 d6 3 Nf3 f5 4 d4 e4 5 Ng5, and now after both main moves 5...c6 and 5...Be7, White chooses set-ups involving Nh3 and g2-g3. Therefore you would think that White should have a safe edge, having spared a couple of tempi by developing the knight to h3 in one go. The alternative is 5.f3 , which is also what is mentioned in the ECO: Nf6

A) 6.Bg5!? exf3 7.exf3 Be7 8.Bd3 0-0 *(The sharp 8...c5!?* looks like a much better way for Black to proceed. *)* 9.Nge2 Nh5 10.Bxe7 Qxe7 11.Qd2 c6 12.0-0-0 , and White has the better chances, Frog, I-Yuferov, S/Moscow 1989;

B) 6.Bg2 exf3 7.Nxf3 g6 *(7...Be7 8.0-0 0-0 9.Qd3 Nc6 10.a3 a6 11.Bg5 Bd7 12.Rae1* with a comfortable edge for White, Lerner, K-Savchenko, S/St Petersburg 1992*)* 8.0-0 Bg7 9.d5 *(9.e4 fxe4 10.Ng5 0-0 11.Ngxe4 Nxe4 12.Rxf8+ Qxf8 13.Nxe4 Nc6 14.Be3 Bf5* , and Black already had nothing to worry about in Toran Albero, R-Tal, M/Oberhausen (EU-chT)1961 *)* 9...0-0 10.Ng5 Qe7 *(10...Re8 11.e4 Na6* is given as unclear in the ECO, but White may have a little initiative*)* 11.e4 Nxe4 12.Ngxe4 fxe4 13.Rxf8+ Bxf8 14.Nxe4 Bg7 , and Black has a comfortable game, McNab, C-Kilgour, corr 1993. I think it is safe to say that Black doesn't have much to worry about in the line after 5 f3, provided the suggestion of 8... c5!? holds up in the 6 Bg5 line.]

5...Nf6

[This strikes me as a little odd. Usually in the 3 Nf3 f5 4 d4 e4 5 Ng5 line,

Black only commits to this move later. Black has a couple of alternatives here: A) 5...g6 6.Bg5 Nf6 7.Nf4 Bg7 8.h4 c6 9.h5 Kf7 10.Qd2 Na6 11.0-0-0 Nc7 12.f3 exf3 was Vanderwaeren, S-Lanzani, M/Haifa (EU-chT) 1989, and now the simple 13.exf3 would have left White with a position that is nothing short of outstanding.]

[B) 5...Nc6 6.Bg2 Be7 7.f3 exf3 8.exf3 Nf6 9.d5 Ne5 10.f4 Nf7 11.Ng1 *(11.Nf2 0-0 12.Be3* looks very comfortable for White. But in the game White is targeting the soft e6-square.*)* 11...0-0 12.Nge2 Qe8 13.0-0± Kourkounakis, I-Myhrvold, R/Gausdal 1992]

7.0-0 0-0 In the main line with 3 Nf3 f5 4 d4 e4, White normally only reaches this position with Black having played ...c6 already and is now to move again (3 Nf3 f5 4 d4 e4 5 Ng5 c6 6 g3 Be7 7 Nh3 Nf6 8 Bg2 0-0 9 0-0). So with two extra tempi White should be on top here, yet in our main game he goes down in a hurry. **8.d5**

[In an earlier game, White played the equally good 8.Nf4!? c6 9.h4 *(9.f3!?)* 9...Kh8 10.Qb3 Na6 11.f3 exf3 12.exf3 Nc7 13.Re1± Mascarinas, R-Romero Holmes, A/Novi Sad 1990]

9.Nf4 Na6 10.f3 exf3 11.exf3± Nc7 12.Re1 Re8 13.Qd3 Nd7!? 14.Qxf5?!

[White's last chance of retaining the advantage is 14.Ne6!? Nxe6 15.dxe6 Nf8 16.Qd5± , and White is in control]

14...Ne5 15.Ne6 Nxe6 16.dxe6 Bf6 17.f4?!

[After this weak move, Black takes over the initiative. Instead White should have given preference to 17.Nd5 , e.g. Bxe6 18.Nxf6+ gxf6 19.Qc2 Bf7∞ , and although Black will pick up the c4-pawn, White will have adequate compensation]

17...Bxe6 18.Qc2 Ng4 19.Bf3?!

[White is playing too passively. A radical and better choice is 19.Rxe6 Bd4+ 20.Kh1 Nf2+ 21.Kg1 Rxe6 22.Bd5 Qf6 23.Kg2 Kh8∓ , and Black has the better chances, though White can still play.]

12.Ba3 It seems funny to play b3 and then b4, Bb2 and then Ba3, losing two tempi, but White's play is concrete: in a fairly closed position, his bishop is now doing little on b2.

[21...Bf5 22.Qd2 Nb6 avoids immediate disaster, 23.Rc1 a5 24.Qe3 but White is still very much on top.]

FIDE Candidates 2016 (3.1) 13.03.2016

[Max Illingworth]

1.d4 d5 2.c4 c6 3.Nf3 Nf6 4.Nc3 dxc4 5.a4 e6 Svidler relied on this Soultanbeieff Variation for the Candidates, scoring 2/3 with this system (although to be fair, Aronian over-pressed from what was a better position). **6.e3 c5 7.Bxc4 Nc6 8.0-0 cxd4 9.exd4**

[9.Nxd4 Bd7

A) 10.Qe2 was played in Melkumyan-Adams (covered in the Archives). Going into more depth, I like the move a6! 11.Rd1 Qa5!? *(11...Qc7 12.e4 Ne5 13.Bf4 Qxc4 14.Bxe5 Qxe2 15.Ndxe2 Bc5=* is also very solid for Black.*)* 12.Nf3 Ne5 13.Nxe5 Qxe5 14.e4 Rc8 15.g3 Bc5 16.Bf4 Qh5 and the resulting endgame is just fine for Black.;

B) 10.e4 however still looks like a good try to me, as the alternative Bb4 (I analysed 10...Nxd4 previously) 11.Nf3 Qa5 1-0 (36) Berkes, F (2651)-Zatonskih, A (2462) Gibraltar 2009 12.Bf4! *(12.Qe2 0-0 13.e5 Nd5* was played in the game, and even then *14.Nxd5 exd5 15.Rd1 Be6 16.Bd3* feels easier for White to play. *)* 12...Rc8 13.Qe2 0-0 14.Rfd1± gives White a strong initiative with his more active development.;

C) 10.Nf3 a6 11.e4 Qc7 12.h3 Bd6 *(12...Ne5!? 13.Nxe5 Qxe5 14.Be3 Bc5* is also quite decent for

Black, who has no weaknesses at all. *)* 13.Qe2 *(⌓13.Be3 0-0 14.Rc1=)* 13...0-0 14.Bd3 Ne5 15.Nxe5 Bxe5 and thanks to White's insipid play, Black even had the better side of equality in 1/2-1/2 (30) Karjakin, S (2760)-Svidler, P (2757) Moscow Candidates 2016]

9...Be7 Of course, this is a standard QGA position, except that in the QGA version Black would have a pawn on a6 instead of a7 (Black spent two moves playing his pawn to c5 earlier in our version). Naturally this is in White's favour as it allows him to play a5 in certain positions (after Black's ...Nb4), but arguably not enough to give White a serious advantage. **10.Qe2**

[10.d5 exd5 11.Nxd5 Nxd5 12.Bxd5 0-0 13.Be3 is a very safe way for White to play, but it fails to provide any advantage after Bf5 1/2-1/2 (90) Heinig, W (2334)-Hera, I (2557) Dresden 2009 14.Qb3 Nb4! 15.Rfd1 *(15.Bxb7? Rb8∓)* 15...Qa5 16.Ne5 Nxd5 17.Rxd5 Qa6 18.Nd7 Be6 19.Nxf8 Rxf8 20.Rad1 Bxd5 21.Rxd5 Qc6= and Black will not have trouble making a draw.]

[10.Bf4 0-0 11.Rc1 is a bit too simplistic for my taste - in general in these IQP positions one needs to do more than develop primitively, and after Nb4 12.Ne5 Bd7! *(12...Nfd5 13.Be3! Bf6* 1-0 (55) Illescas Cordoba, M (2604)-Fridman, D (2630) Dresden 2008 *14.Qf3 Nxe3 15.fxe3* might offer White some pressure as Black has issues completing his development.*)* 13.d5 exd5 14.Nxd5 Nbxd5 15.Bxd5 Nxd5 16.Qxd5 Bc8! 17.Qf3 Qb6 18.Rfe1 Be6= Black's position was fully sound in 1/2-1/ 2 (34) Zhou, J (2587)-Barbosa, O (2567) Tagaytay City 2013]

[10.Be3 will be considered in Aronian-Svidler.]

[10.Bg5 0-0 11.Qd2 *(11.Re1* shall be addressed under the 10.Re1 move order.*)* 11...Nb4 12.Ne5 h6 13.Bh4 b6 will just be rock solid for Black if he gets in ...Bb7, but the ambitious 14.f4!? can be met with Nd7! *(14...Nfd5!?* however is not bad either. *)* 15.Bxe7 Qxe7= and since White can't get in f5, Black looks to be all right after 16.Rae1 Nxe5 17.fxe5 Bb7=]

[10.Re1 0-0 leads to a fork between 11.Bf4, covered in Onischuk-Volokitin in the Archives, and 11.Bg5 examined in Shirov-Svidler (also in the Archives). But both these games were played in 2008, so let's refresh our existing knowledge:

A) 11.Bf4 was met with 11...Nb4 in the ChessPub game, but the most recent games saw the more flexible Bd7!? encouraging White to play d5 and liquidate everything. 12.Ne5 *(12.d5 exd5 13.Nxd5 Nxd5 14.Bxd5 Be6! 15.Bxe6 fxe6* as in 1/2-1/2 (36) Korobov, A (2660)-Eljanov, P (2712) Kiev 2011 is symbolically better for White because of the isolated e6-pawn, but Black can defend without particular difficulty, e. g. *16.Bd2 Qd5 17.Bc3 Bf6* and the open lines for Black's pieces partly make up for the inferior structure. In any case, it is not hard to defend just one weakness.*)* 12...Rc8 Why play ...Nb4 when it is possible to develop? 13.Nxd7 Qxd7 14.d5 exd5 15.Nxd5 Nxd5 16.Qxd5

Qxd5 17.Bxd5 Bf6 18.Rab1 Rfd8 19.Be4 g6= The bishop pair gives White a symbolic edge, but Black's position is extremely robust and I would feel confident in holding this ending.;

B) 11.Bg5 Bd7 *(11...h6* was criticised by Scherbakov in the Archives, and in general the h6-pawn can be a target after *12.Bf4* , but in this exact position Black could try *Bb4!?* with the idea *13.Qd2 Nd5* thwarting White's Bxh6 idea. Even so, 11...Bd7 seems more coherent. *)*

B1) 12.Qd2 This was Shirov-Svidler, when I can recommend Nb4! 13.Ne5 Bc6 with a very safe position for Black due to his pincer grip on d5: 14.Nxf7?! *(14.Nxc6 bxc6!* is a crucial theme, keeping a strong grip on the d5-square and thus fixing the d4-pawn as a target. Meanwhile, the b-file is now half-open, making b2 a potential target as well.*; 14.Rac1* is probably best, but Black doesn't face any threats after *Bd5 15.b3 Rc8=* with an impregnable position.*)* 14...Rxf7 15.Bxe6 Qf8! 16.Re5?! Kh8 17.d5 0-1 (27) Sakaev, K (2626) -Vitiugov, N (2694) Khanty-Mansiysk 2009 Bd6! 18.Rf5 Re7∓ and Black would retain a serious advantage.;

B2) 12.Qe2 This queen deployment has taken over from 12.Qd2. 12...Nb4 *(* The lazy player might prefer Svidler's old *12...Re8!? 13.h4 h6 14.Bf4 Nb4 15.Ne5* 1/2-1/2 (41) Grischuk, A (2746)-Svidler, P (2739) Moscow 2011 *Rc8 16.h5 Nfd5=)* 13.Ne5 Rc8 14.Rad1 *(14.h4 Be8 15.Rad1 Rc7! 16.Bb3 Nfd5 17.Nxd5 Nxd5 18.Qg4 Kh8 19.Bxe7 Rxe7=* was entirely safe for Black in 1/2-1/2 (41) Pellen, M (2490) - Marcinkiewicz, J (2488) ICCF email 2011*)* 14...Nfd5 15.Nxd5 Nxd5 16.Bxd5 Bxg5 17.Bxb7 Rc7!? Rublevsky has held on fine with 17...Bxa4, but I want to show that this novelty also works. 18.Be4 *(18.Nxd7 Rxd7 19.Qb5 Rxd4 20.Rxd4 Qxd4 21.Qxg5 Qb4 22.Rd1 Qxb7=)* 18...Bxa4 19.Ra1 Be8 20.Red1 g6= and Black's bishop pair ensures he will come out of this with equality.]

10...0-0 11.Rd1

[11.Be3 transposes to Aronian-Svidler.]

11...Nb4

[11...Nd5 was already covered well by Scherbakov in Kramnik-Korobov, and since that game players largely switched to 11...Nb4.]

12.Bg5 This is generally how good players are playing nowadays, but there are alternatives at nearly every move, including this one:

[12.a5 Bd7 13.Ne5 just transposes to 12.Ne5.]

[12.Ne5

A) 12...b6!? isn't a move I've seen suggested anywhere, but it appears very logical to fianchetto, e.g. 13.Bg5 *(*or *13.Qf3 Rb8 14.Qg3 Bb7 15.Bh6 Ne8=* and the Black position holds firm.*)* 13...Bb7 *(13...Nfd5 14.Bxe7 Qxe7 15.a5*

bxa5 16.Rxa5 Bb7= may give White a hint of pressure on the queenside, though this also seems equal. *)* 14.Nxf7!? I don't see how White can achieve anything without this move, but the complications are not worse for Black. Rxf7 15.Bxe6 Qe8 16.Qc4 *(or 16.a5 bxa5 17.Rxa5 Kh8 18.Bxf7 Qxf7=)* 16...Bc8 17.Bxf7+ Qxf7 18.Qxf7+ Kxf7 and the endgame seems about equal, but easier to play for Black.;

B) 12...Bd7

B1) 13.Bg5 Bc6 14.Nxc6 *(14.a5 Bd5 15.Nxd5 Nfxd5 16.Bd2 Rc8=* is very safe for Black, as with the knight on b4 White is unable to play for a kingside attack with Bd3 or Bb3-c2. *)* 14...bxc6 15.a5 Nbd5 16.Bh4 Rb8 17.Bg3 Bd6= was pretty comfortable for Black in 1/2-1/2 (34) Caruana, F (2646)-Popov, I (2541) Budva 2009 thanks to his grip on the centre especially d5.;

B2) 13.a5

B2a) 13...a6 14.Bg5 Rc8 15.Bb3 Be8 16.Qf3 Bc6 *(16...Nc6!?; 16...Rc7!?)* 17.Nxc6 bxc6 is equal according to Predojevic, but I would give White a slight preference when he can achieve the thematic 18.Bf4 Bd6 19.Be5!± as in this case it is not so pleasant for Black to keep the tension.;

B2b) 13...Bc6!? 14.a6 Nfd5 15.Ne4 bxa6! 1/2-1/2 (24) Anton Guijarro, D (2641)-Shen, Y (2466) Moscow 2016 16.Nc5 Bb5 17.Bd2 Bxc4 18.Qxc4 a5= is very sturdy for the second player.;

B2c) 13...Rc8 14.a6 This was already suggested by Scherbakov in the Archives, but the theory has already continued with some games: bxa6 *(14...b6* is also possible, but then the a6-pawn can be a thorn in Black's side in the long-term.*)* 15.Bxa6 Nxa6 16.Rxa6 Rc7 17.Bf4 Bc8 18.Raa1 *(18.Rc6 Rb7 19.h3 Rb4=* was quite harmonious for Black (with the bishop pair in tow) in 0-1 (62) Ding, L (2680)-Jakovenko, D (2736) St Petersburg 2012*)* 18...a6 19.Rd3 Bb7 20.Rg3 This position occurred in 1/2-1/2 (40) Tomashevsky, E (2730)-Balogh, C (2668) Istanbul 2012, and here I think Black could have ignored White's ideas with Qxd4! 21.Ng6 *(21.Bh6 Ne8 22.Rd1 Qh4 23.Bd2 Bd6* is also leading nowhere for White. Black's position is too resilient.*; 21.Ra4?! Qd8 22.Bh6 Ne8 23.Rag4 Bf6∓)* 21...hxg6 22.Bxc7 Qc5 23.Bf4 Nh5 24.Rg4 Nxf4 25.Rxf4 Rc8= and Black's strong bishop pair gives him superb compensation for the exchange.]

12...h6! This is the move of today, as Scherbakov already showed in the Archives why 12...Bd7 isn't so great.

13.Bxf6 White shouldn't waste any time, as if Black can get his light-squared

bishop to the long diagonal, his position will be extremely steady.

[There's not much to add to Scherbakov's earlier comments on the unambitious 13.Bh4 Bd7 14.Ne5 Bc6 , with a recent game going 15.Rac1 Bd5!? 16.Nxd5 Nfxd5 17.Bg3 Bg5! 18.Rb1 Rc8 19.Bb3 Qe7 20.Re1 Rfd8= and Black even had the better side of equality in 1/2-1/2 (40) Urkedal, F (2524)-Johannessen, L (2527) Fagernes 2015]

13...Bxf6 14.Ne4

[14.d5 exd5 15.Nxd5 Nxd5 16.Bxd5 Qe8!= is nothing for White, as Black is ready to develop the c8-bishop next turn.]

[14.Ne5 was Scherbakov's dated suggestion back in 2012, but it was neutralised by Svidler's second for the Candidates in the following game: Bd7 15.d5 exd5 16.Nxd5 Nxd5 17.Rxd5 Bxe5 18.Qxe5 Qe8! 19.Qxe8 Bxe8= and unless Carlsen is playing White, the endgame is just a draw, 1/2-1/2 (32) Bluebaum, M (2590) -Matlakov, M (2684) Doha 2015]

14...b6 This is the most natural move, continuing logical development. Instead it feels too ambitious to keep the bishop pair at all costs with

[14...Be7 15.Ne5 Nc6 16.Rd3!? *(16.Ng4* also seems a very plausible attacking try, going for Nc3 and d5. If *f5? 17.d5!* is strong.*)* 16...Qc7 17.Nxc6 bxc6 18.Rc1± and White has a nice grip on the centre, even if the machine doesn't think too much of it.]

15.Ne5 Bh4! This is an important nuance, provoking g3 to stop a rook lift along the third rank to attack Black's king.

[15...Bb7?! 16.Nxf6+ Qxf6 17.Nd7 Qg6 18.d5! Rfe8 19.Ne5 Qg5 1/2-1/2 (56) Bacrot, E (2711)-Kempinski, R (2625) Jerusalem 2015 20.Nf3! Qg6 21.dxe6 fxe6 22.g3± gives White a small plus because of his better structure for free.]

16.g3

[16.Ra3 Bb7 17.Rh3 was a good practical attacking try by Tomashevsky, but it stands to reason that the Russian team probably worked on this position during the European Team Championship last year and that Svidler was ready with an improvement, possibly at this point.

A) 17...Nd5! 18.Qg4 *(18.g3 Be7 19.Ng4 Nf6 20.Nexf6+ Bxf6=* sidelines the h3-rook too much for White to hope for an edge.*)* 18...Bg5 19.Rf3 Nc7 20.Nxg5 Qxg5= is forcing an equal endgame.;

B) 17...Bd5?! 18.Nc3 Bxc4 19.Qxc4 Be7 20.Qe2! Rc8 21.Qg4± with the easier game because of the straightforward kingside attack with the pieces in 1-0 (34) Tomashevsky, E (2743)-Mchedlishvili, M (2618) Reykjavik 2015]

16...Be7 17.Nc3! At first the machine gives White an edge, but Svidler had prepared this line very deeply for the Candidates and shows his work in this game.

[or 17.a5 bxa5 18.Nc3 Bd6!?= (Predojevic)]

17...Bf6!

[17...Bb7?! 18.a5 bxa5 19.Nxf7! Rxf7 20.Qxe6 Qf8 21.Rxa5± is a very annoying machine line - the

move Rf5 is a problem in many lines.]

18.d5

[18.a5!? bxa5 19.d5 is an interesting try, playing in the same vein as after 17. ..Bb7. I think Svidler intended to reply with the simplifying Bxe5! *(19...Qc7 20.d6 Qc5 21.Ng4* is not working for Black after *Bxc3 22.bxc3 Nd5 23.Rd4! Rd8 24.Nxh6+ gxh6 25.Qd2 Rxd6 26.Qxh6 Ne7 27.Rad1±* with a smashing attack.*; 19...Qe8 20.d6↑* is also an issue for Black as the White pieces are so much more active.*)* 20.Qxe5 Qb6 21.Na4 *(21.b3 Rd8 22.dxe6 Bxe6* peters out to equality very fast.*)* 21...Qb8 22.d6 Rd8 23.Rac1 Nc6 and White lacks a great way to capitalise on the passed d-pawn, e.g. 24.Qf4 *(*or *24.Qe4 Rxd6 25.Rxd6 Qxd6 26.Bd3 f5! 27.Qxc6 Qxc6 28.Rxc6 Bd7 29.Rc4 Bb5 30.Rd4 e5 31.Rd5 Bxa4 32.Bxf5 Bc6 33.Rxe5 Rd8=* with sufficient activity for a draw.*)* 24...Qb4 25.Be2 Qxf4 26.gxf4 Nb4 27.Bf3 Rb8 28.Rc7 Na6 29.Rxa7 Bd7 30.Rxa6 Bxa4 31.Rd2 Rb4 32.Rxa5 Rxf4= and we have liquidated to an equal endgame with White's passers well and truly covered.]

18...Qc7 19.d6

[19.Ng4 Bxc3 20.d6 Qc5 transposes.]

[19.Nxf7 Rxf7 20.dxe6 Re7= doesn't bring White anything.]

19...Qc5 20.Ng4 Bxc3 21.bxc3 Nc6 22.Rab1

[22.d7 Bb7 23.Rab1 a6 transposes to the game.]

[22.Bb5 Bb7 23.Qe3 Qxe3 24.Nxe3 Na5= is not dangerous for Black either, as the d-pawn is not hard to contain.]

22...a6 23.d7 Bb7 24.Bd3 Rfd8

It transpires that the invasion of the White queen actually doesn't lead anywhere. **25.Qe4 Kf8! 26.Qh7?!** This natural move is actually a mistake that gives Black the initiative.

[26.Bc2 Ra7 can only be worse for White as the d7-pawn is in mortal danger, but]

[26.Be2 Rab8! 27.Qh7 *(27.Qf4 h5 28.Ne3 Ne5 29.Bxh5 f6 30.Be2 Qc6=* is also equal.*)* 27...h5 *(27...Ne7* was Svidler's intention, allowing *28.Nxh6 gxh6 29.Qxh6+ Kg8=* but it turns out White's attack only gives him a draw after correct play by both sides.*)* 28.Ne3 Ne7 29.Qh8+ Ng8 30.Qxh5 Qxh5 31.Bxh5 Nf6 ultimately peters to equality, as demonstrated in some annotations by Vachier-Lagrave.]

26...h5! 27.Ne3 Ne5 28.Be4 Bxe4 29.Qxe4 Ra7∓ Now Black effectively wins a pawn, though Nakamura ultimately managed to save a rather difficult endgame later. **30.Nd5 Ng4 31.Ne3 Nf6 32.Qb4 Qxb4 33.Rxb4 Nxd7 34.Rxb6 Nxb6 35.Rxd8+ Ke7 36.Rd4 a5 37.Nc4 Nd5 38.Rd3 Rc7 39.Nxa5 Nxc3 40.Kg2 Nxa4 41.Ra3 Nc3 42.Nb3 g5 43.Nd2 f5 44.h3 Kf6 45.g4 Nd5 46.gxf5 Kxf5 47.Nf1 Nf4+ 48.Kg3 Rc1 49.Ne3+ Kg6 50.Kh2 Rb1 51.Ng2 Rb2 52.Nxf4+ gxf4 53.Kg1 e5 54.Ra5 Re2 55.h4 f3 56.Kh2 Rxf2+ 57.Kg3 Re2 58.Kxf3 Re1 59.Ra8 Rh1 60.Ke4 Rxh4+ 61.Kxe5 Rb4 62.Rg8+ Kh7 63.Rg1 Kh6 64.Kf5**

A really interesting fight! Black is probably better after the opening but it's not easy to prove it. I think exchanging the queens was a bad idea. For White I would take a look at 11.Ne4!? **1.c4 g6 2.e4 e5 3.d4 Nf6!? 4.Nf3**

[4.dxe5 Nxe4 5.Qd5 was fashionable in the 70's and here Black can choose between f5 *(or 5...Bb4+ 6.Nd2 Bxd2+ 7.Bxd2 Nxd2 8.Qxd2 Nc6)* 6.exf6 Nxf6 Najdorf, M (2540)-Ribli, Z (2505)/Hoogovens Wijk aan Zee 1973]

[4...Bb4+ was played sometimes, but I'm not a fan of trading the fianchettoed bishop so quickly 5.Bd2 Bxd2+ 6.Qxd2 Nxe4 *(6...Qe7 7.dxe5 Nxe4 8.Qe3 Qb4+ 9.Nbd2* was Poluljahov, A (2554)-Sutovsky, E (2587)/MK Cafe Cup-A 1999.*)* 7.Qe3 d5 8.cxd5 Qxd5 9.Nxe5 0-0 10.Bc4 Qa5+ 11.Nc3 and this g7-bishop will be missing at some point.]

5.e5 Ne4

[5...Bb4+ now it makes more sense 6.Bd2 Qe7 7.Bxb4 Qxb4+ 8.Qd2 Qxd2+ 9.Nbxd2 Nh5 10.Nxd4 Nc6 11.Nxc6 dxc6 with some strange kind of Berlin, but since Black can castle I assume that the position is ok.]

6.Qxd4 Bb4+ 7.Nbd2

[7.Nc3 was seen in a recent game and is an ambitious try Nxc3 8.bxc3 Nc6 9.Qd3 Be7 10.Bh6 with an interesting position in Cmilyte, V (2524)-Lahno, K (2553)/Beijing Sportaccord (Women) blitz 2012]

7...Ng5 This doesn't look so natural, but with 8...Nc6 ideas it's a good way to check White's setup. **8.a3** A novelty, but I'm not sure if it's a good one. The idea is to clarify the tension and to try to build a center with f4 later.

[8.Be2 was the move played before and I think Black is fine after Nc6 9.Qe3 Nxf3+ 10.Bxf3 0-0 11.0-0 Re8 12.Bxc6 dxc6 13.Nf3 Bg4 Vitiugov, N (2726)-Volokitin, A (2686)/ Bundesliga 1112 2011 (11.1)/0-1]

8...Nxf3+ 9.gxf3 Nc6 10.Qe3 Bf8 Coming back and going to the ideal square on g7 **11.b4**

[11.Ne4!? I like this move, it makes Black less comfortable and tries to pose some problems from the start Bg7 12.Nf6+ Kf8 13.f4 and here Black has two continuations Bxf6 *(13...d6 14.Bd2 Bh6 15.Nd5 dxe5 16.0-0-0* with good compensation*)* 14.exf6 Qxf6 15.Bd2 Qe7 16.0-0-0 Qxe3 17.fxe3 with an unclear endgame]

11...Bg7 12.Bb2 0-0 13.f4 Now if White can hold the pawns in the center and queenside then everything is fine, but his position is overextended. The computer assesses it as good for Black, but to find a improvement over the game is not an easy task **13...d6 14.0-0-0 dxe5 15.fxe5 Qh4 16.b5 Ne7 17.Qg3 Qh5**

[17...Nf5 is one of the possibilities, but why change queens when White's king is much more open than Black's? 18.Qxh4 Nxh4 19.Bd3 Re8 20.Kc2 a6! can give an edge, but nothing concrete]

18.f4

[18.Ne4 Bg4 19.Rd2 Rad8 20.Rg1

Rxd2 21.Nxd2 Be6 22.f4 looks like the same kind of position as in the game, but with one defender less for White]

18...a6 19.a4 axb5 20.axb5 Bg4

[20...c6 here or on the next move this can be played, trying to open the position even more. 21.bxc6 *(21.b6 now the endgames are more* interesting for Black, the b6-pawn can fall at any moment *Rd8 22.Re1 Nf5 23.Qf2 Qh4∓)* 21...bxc6 22.Ne4 is logical and now Bg4 23.Rd2 Nf5 24.Qe1 Rfb8 can give Black good prospects even if the position is still not clear]

21.Re1 Rfd8

[21...c6 22.bxc6 bxc6 23.h3 *(23.Rg1 Be6 24.Be2 Qh6* looks like this is the square for the queen and after 25...Rfb8 Black is much better*)* 23...Be6 24.Ne4 Rfb8∓]

22.Rg1 Be6 23.Be2 Qf5

[23...Qh6 again Black can try to put the queen on this weird square and keep the initiative. In the 6.Be3 e5 Najdorf, Black's main idea is to develop the queenside first. Shirov's 15.h4 looks like a superior choice to 15.Rg1 of a Leko-Kasparov game (although it should be noted that the Leko game was played after Shirov-Svidler). Black needs to fight against the f4 advance neglecting this threat gave White the better prospects in the centre. Finally White has made a mistake and the game ended in a draw, but White's plan may find followers. **1.e4 c5 2.Nf3 d6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 a6 6.Be3 e5 7.Nb3 Be6 8.f3 Nbd7 9.g4 b5** This is the quick queenside development plan. **10.g5 b4 11.Nd5 Nxd5**

A transposition from the Slav to the QGA with an extra tempo for White is not such a rare guest in tournament practice these days. Black gets a solid position and White should play very precisely to achieve anything substantial. In this game Svidler almost equalised but then missed a tactical shot and found himself in a difficult rook ending.
1.d4 d5 2.c4 c6 3.Nf3 Nf6 4.Nc3 dxc4 5.a4 e6 6.e3 c5 Black goes for the QGA with White's extra move a2-a4. **7.Bxc4 Nc6 8.0-0 cxd4 9.exd4 Be7 10.Bg5**
[We have already considered 10.Re1 0-0 11.Bf4 Nb4 12.Ne5 Bd7!? and Black eventually neutralized White's pressure in the game Onischuk - Volokitin/Poikovsky 2008.]
10...0-0 11.Re1 Bd7
[As a rule, Black should think twice before playing 11...h6?! In such a position with the opponent's isolated pawn since White is looking for K-side attacking play anyway: 12.Bf4 Nb4 13.Qd2 The game Radjabov - Svidler, Morelia/Linares 2006 continued Bd7 14.Bxh6! Rc8 15.Bb3 gxh6 16.Qxh6 Nh7?! *(16...Ng4* should have been played: *17.Qf4 f5 18.Rxe6! Kg7 19.Re2±* with better chances for White but Black was still in the game*)* 17.Re5 f5 18.Rxe6! Bxe6 19.Bxe6+ Kh8 and here it was even more promising to play 20.Ne5!? Rf6 21.Ng6+ Rxg6 22.Qxg6± with a big advantage.]

[A typical manoeuvre 11...Nb4 does not equalise: 12.Ne5 *(or 12.Qb3 a5 13.Rad1 Nfd5 14.Nxd5 Nxd5 15.Bxe7 Nxe7 16.Ne5* with a clear advantage, Malakhov - Perez Candelario, Villarrobledo 2008*)* 12...Bd7 13.Qb3 Bc6 14.Nxf7! 12.Qd2

[12.Qe2 is a natural and popular alternative.]

12...Rc8 13.Rad1 Nb4 14.Ne5

[Svidler already played this position, in the game P.H.Nielsen - Svidler, Monte Carlo 2006, White came up with the central breakthrough 14.d5 but it promised nothing: exd5 15.Bxd5 Bc6 16.Bxc6 Qxd2 17.Rxd2 Nxc6 18.Bxf6 Bxf6 19.Nd5 Rfd8 20.Nxf6+ gxf6 and a draw was soon agreed.]

14...Nbd5

[14...Bc6!? was worthy of consideration, increasing control over the key d5-square.]

15.Bxf6!? This concrete option allows White to advance his central pawn and get the initiative. However, Black still keeps sufficient defensive resources.

15...Nxf6 16.d5 Bb4! This precise reply practically solves all the problems.

[Perhaps the restrained 20.h3!? was more promising but Black was fine anyway: Rc7 21.Nf3!? Rfc8 22.Nd4 Bxc3 23.bxc3 Rxc3 24.Qd2 with some initiative but Black's position should be defendable.]

20...Bxc3 21.bxc3 Nd5

[After 21...Qc6 Black could hardly face any problems.]

22.c4 Nb4 23.Nxb4 Qxb4 24.Re4 b5? A careless trick - Black just missed some tactics.

[24...Rcd8 was much more reliable, reducing the material on the board: 25.h3 *(25.Rde1? Rd2)* 25...Rxd1+ 26.Qxd1 b6 with roughly equal play.]

25.Rh4! h6

[25...g6 wasn't better: 26.axb5 Qxb5 27.Qxg6+! hxg6 28.cxb5±]

26.axb5 Qxb5 27.Rxh6! This is the point - the rook is untouchable! **27...Qf5**

[Of course, not 27...gxh6?? 28.Qg6+ and 29. cb5.]

28.Qxf5 exf5 Certainly Black didn't want to give two extra pawns on the K-side to his opponent. Yet the ending still looks defendable... **29.Rh4 f4 30.Rd4 Rb8?!** Logical, but possibly not the best continuation.

[Both 30...f3!? 31.Rh5 fxg2 32.Kxg2 Rc7 33.Ra5 Rfc8 34.Ra4±]

[and the immediate 30...a5 seemed preferable but White would still play on.]

Thessaloniki (1.5) 22.05.2013

[R.Scherbakov]

Peter Svidler managed to put pressure on his opponent and eventually gained a full point in a recently popular line, but objectively Black's position was defendable until he came up with a series of suicidal manoeuvres. **1.d4 d5 2.c4 e6 3.Nc3 Nf6 4.cxd5 Nxd5!?** This approach is recently becoming more and more popular.

[Black used to play 4...exd5 here but 5.Bg5 promises White a small but stable advantage. I believe that

Etienne Bacrot and other top players can go for 3...Nf6 only with the intention to recapture on d5 with the knight.]

5.e4

[A transposition to the line 5.Nf3 c5 6.e3 Nc6 looks like a concession but if a player likes this type of isolated pawn position then he may certainly go for it - see "D42 Semi-Tarrasch - 6. e3" for more details.]

5...Nxc3 6.bxc3 c5 7.Rb1!?

[Another deviation from the main line is 7.a3 , which Svidler played himself not long ago: cxd4 8.cxd4 e5!?

A) 9.dxe5 does not promise much: Qa5+ *(9...Qxd1+ 10.Kxd1 Bc5 11.Ke1 Bd4 12.Rb1 Bxe5 13.Nf3)* 10.Bd2 Qxe5 11.Bd3 Bc5 *(11...Bg4! 12.f3 Be6* given by Michael Roiz, looks even more convincing*)* 12.Nf3 Qe7 13.0-0 Nc6 14.Bc4 Be6 15.Bd5 0-0 though after 16.Qb3 White maintains a slight plus, Semcesen - Stupak, Lublin 2013;

B) 9.d5 Bd6 10.Nf3 0-0 11.Be2 Nd7 is okay for Black, according to the praxis;

C) 9.Nf3 exd4

C1) 10.Bc4!? is worth considering: Nc6 11.0-0 Be7 12.Rb1 *(12.Bd5 0-0 13.Bb2 Bf6* is okay for Black, Aleksandrov - Rausis, Abu Dhabi 2005 *)* 12...0-0 13.Bd5 and White can still maintain some pressure, though in the game Lerner - Golod, Ramat Aviv 2004, a draw was agreed soon after Bf6 14.Bf4 Re8;

C2) 10.Qxd4

C2a) 10...Be7!? is playable: 11.Bb5+ *(11.Qc3!? 0-0 12.Bc4)* 11...Nc6 12.Bxc6+ bxc6 13.Qc3 0-0 14.0-0 c5 15.Bb2 f6 with acceptable play for Black, M.Muzychuk - Savina, Belgrade 2013;

C2b) 10...Qxd4 11.Nxd4 Thanks to his advantage in the center White keeps a small advantage but it can hardly promise winning chances against accurate defence. Black has a choice:

C2b1) 11...Be7 12.Be3 0-0 13.Bc4 *(a restrained 13.Be2!?±* followed by 0-0 would also promise an edge *)* 13...Nd7 14.Ke2 Nb6 *(*after *14...Ne5 15.Bd5 Ng4 16.Rhb1 Nxe3 17.Kxe3 Rb8 18.Rc1 Bd8! 19.a4* Black was still under pressure *)* 15.Bb3 Bd7 16.Nf5 and Black still had some work to do, Svidler - Kramnik, London Candidates 2013;

[7.Nf3 cxd4 8.cxd4 Bb4+ 9.Bd2 Bxd2+ 10.Qxd2 0-0 used to be the main line and it is more often reached via a different order of moves, when White plays Ng1-f3 earlier.]

7...cxd4

[7...Be7 is a decent alternative but White should be able to maintain some edge: 8.Nf3 0-0 *(or 8...Nd7 9.Bd3 b6 10.Bf4 Bb7 11.0-0 0-0 12.Qe2* , Narciso - Mascaro, Barcelona 2012*)* 9.Bc4 Nd7 *(or 9...Nc6 10.0-0 Qc7 11.Qe2 b6 12.Rd1 Na5 13.Bd3 Bb7 14.d5 c4 15.Bc2 e5 16.Be3 Bc8 17.h3* , Polugaevsky - T. 8.cxd4 Nc6

[After 8...Be7 9.Nf3 *(9.Bb5+!?)* 9...0-0 10.Bc4 practice does not promise Black full equality though it might be playable, too: Nc6 *(10...b6 11.0-0 Bb7 12.Qe2 Nd7 13.Rd1 Rc8 14.Bd3 Qc7 15.a4 Rfd8 16.Bd2±* Lysyj - Panarin, RUS-ch HL Yekaterinburg 2013*)* 11.0-0 b6 12.Be3 *(12.Bb2!?)* 12...Bb7 13.Qe2 Rc8 14.Rfd1 Qc7 15.Bb5 Rfd8 and so on, Kaplun - Gasthofer, Katowice 1993.]

9...a6

[9...Bd7 10.Nf3 Bb4+ 11.Bd2 Bxd2+ 12.Qxd2 0-0 should be better for White:

A) 13.Bd3 Rb8 14.0-0 Ne7 15.Rfe1 *(15.Rfc1!? Bc6 16.Qb4 h6 17.a4±)* 15...Bc6 16.d5!? exd5 17.e5 d4 *(17...Bd7!?)* 18.Nxd4 Qd5 19.Be4 Qd7 20.Qd3 Bxe4 21.Qxe4 Nc6 22.Nf5± , Kuljasevic - Berkes, EU-ch Legnica 2013;

10.Bxc6+ bxc6 11.Nf3 c5! This pawn push should be played despite all the dangers - Black must get rid of this weak pawn and open a diagonal for his light-squared bishop.

[11...Qa5+?! 12.Bd2 Qxa2 13.0-0 was too dangerous for Black, e.g., Bd6 14.Qc1 Qa4 15.Ra1 Qb5 16.Qc2 c5 17.Rab1 Qc6 18.dxc5 Qxc5 19.Qa4+ Bd7 20.Qa1↑ and Black is in trouble since 0-0? fails to 21.e5 Be7 22.Bb4 Qxb4 23.Rxb4 Bxb4 24.Qd4 Bb5 25.Qxb4 Bxf1 26.Kxf1 with a decisive advantage.]

18...Rb8 19.Qe4 h6

[Black also takes time to make a hole for the king, though an immediate 19...Rxb1 20.Rxb1 Qc8 came to mind as well.]

20.Rdc1

[20.Rb7 could be parried by Qc8 21.Rdb1 Rxb7 22.Rxb7 Rd8]

[but 20.Rbc1!? was worth considering.]

20...Qd8?! This is dubious.

[20...Rxb1 21.Rxb1 Qc8 looked acceptable for Black.]

21.Rb7 Ba3? Black loses control.

[21...Rc8 had to be played: 22.Rc2!? *(22.Nc6 Bxc6 23.Rxc6 Rxc6 24.Qxc6 Bg5 25.Bc5 Qd1+ 26.Kh2 Qc2 27.Qc7 h5!⇄)* 22...Rc5! 23.Rxc5 *(23.Nxe6 Bxe6 24.Bxc5 Qd1+ 25.Kh2 Bd5 26.Rd7 Bxe4 27.Rxd1 Bxc2 28.Bxe7 Bxd1 29.Bxf8* should be drawish*)* 23...Bxc5 24.Nc2 Bxe3 25.Nxe3± with a slight edge only.]

22.Rc3

[22.Rcc7 seemed even stronger, but the text move is also good.]

22...Be7? Black helps his opponent's plans with every move.

[22...Rxb7 23.Qxb7 Qa5 was the only way to stay in the game: 24.Rxa3 *(24.Rc7 Be8 25.Nc2±)* 24...Qxa3 25.Qxd7 Qxa2 26.Nc6 Qd5 27.Qc7± and White's task was still not easy.]

23.Rcc7 Bc8? Getting the bishop back home is really too much.

[Yet, after 23...Rxb7 24.Qxb7 he still had to move his poor bishop

back: Bc8 25.Qb6 Ba3 26.Nc6 Qd1+ 27.Kh2 Qd5 28.Qb3!? Qxb3 29.axb3 (threatening Nc6-a7) a5 30.Ra7 , winning the pawn and securing excellent winning chances.]

24.Ra7 Now Black's position is almost the same as it was some moves before... not surprisingly, he is just lost. **24...Ba3 25.Rxf7 Rxf7 26.Rxf7 Qg8 27.Qf3** Black is defenseless against the numerous threats, and after **27...Bb2** he resigned, not waiting for the obvious 28. Rf8.

EU-chT (Men) 16th (1.1) 28.10.2007
[John Watson]

The best way to examine this line is to return to a game published in ChessPublishing a couple of years ago with a very different set of notes. Here I have the help of Emmanuel Berg and Rybka 4 to get closer to the truth of things. **1.e4 e6 2.d4 d5 3.Nc3 Bb4 4.e5 c5 5.a3 Bxc3+ 6.bxc3 Ne7 7.Qg4 cxd4 8.Qxg7 Rg8 9.Qxh7 Qc7 10.Ne2 Nbc6 11.f4 Bd7 12.Qd3 dxc3 13.Rg1!?** We see this in the Shirov-Shulman game as well, where I analyse it in considerable detail. **13...0-0-0**

[Berg, annotating this game, is critical of 13...Qb6!? due to 14.Be3 Qb2

A) I think he underestimates White's chances after 15.Qxc3! Qxc3+ 16.Nxc3 d4 , when he doesn't mention 17.Ne4! *(17.Nb5? dxe3 18.Nc7+ Kf8 19.Nxa8 Nd4)* 17...dxe3 18.Nf6+ with a nice advantage, in view of Kd8 *(18...Kf8! 19.Nxd7+ Kg7* is the lesser of evils*)* 19.Rd1 Nb8 20.Bb5 *(20.Nxg8 Nxg8 21.Ke2 Ne7 22.Kxe3)* 20...Nd5 21.Rxd5! exd5 22.Bxd7 Rh8 23.Bh3 . Black has to resolve this problem if he wants to play 13...Qb6, and it's doubtful that he can;

B) 15.Qd1! , and here I think Black should try 15...0-0-0 16.Qb1!

B1) 16...Nf5 17.Bf2 *(17.Bc1 Qxb1 18.Rxb1 Ncd4=)* 17...Na5 18.Qxb2 cxb2 19.Rb1 Nc4 20.Nd4 Nxd4 21.Bxd4 Ba4 22.Bxb2 Rh8 23.h3 Bxc2 24.Rc1 Bb3 25.Bd4±;

B2) 16...Rh8 17.h3 d4! 18.Bc1 *(18.Bxd4? Nxd4 19.Nxd4 Ba4-+; 18.Nxd4 Nd5 19.Bf2 Nxf4∓)* 18...Qxb1 19.Rxb1 Nd5 and perhaps the bishops slightly outweigh Black's space after 20.g4!]

14.g4

[Berg gives a game with 14.Nxc3 Nf5 *(14...Na5!* is solid and gives plenty of play *)* 15.g4 Nxe5!? 16.fxe5 Qxe5+ 17.Kd1 , and now *(17.Be2)* 17...d4! is strong: *(17...Qxh2 18.Ne2 Nd6 19.Bf4* favoured White in Mitkov, N-Aguera Naredo, J/Aviles 1992*)* 18.Ne2 *(18.Ne4 Bc6; 18.Nb5 Bxb5 19.Qxb5 Ne3+)* 18...Bb5 19.Bf4 Qc5 followed by ...Ne3+.]

14...d4 15.Rb1 Now we're back to a line which might have begun with 13 Rb1.

[We've seen 15.Nxd4 Nxd4 16.Qxd4 Bb5! before, e.g., 17.Qxa7 Bxf1 18.Rxf1 *(18.Kxf1? Rd1+ 19.Ke2 Rxg1 20.Qxg1 Qc4+ 21.Kf2 Qe4 22.Qd1 Rh8! 23.Kg1 Rd8)* 18...Rxg4 19.Be3 Nd5 with dynamic equality or

better for Black.]

[15.h4!? is featured in this month's Shirov-Shulman game.]

15...Be8 The idea is ... f6 and ...Bg6.

[One possible manoeuvre for Black which I've used in my games is ...Kb8/ ...Bc8/...b6. In this position it looks okay, e.g., 15...Kb8 16.Rg3 Bc8 17.h4 b6 18.h5 Bb7 19.Kf2 Qc8

A) 20.a4 Ba6 *(20...Nd5)* 21.Rb5?! Nb4! 22.Qe4 Bxb5 23.axb5 Qc5 24.Bg2;

B) 20.Bg2 Nd5 21.h6 Ba6 22.Qe4 Bb7 23.h7 Rg7 . This is unclear, with roughly equal prospects.]

16.Rg3 Berg likes this move. **16...f6?!** Probably not the best. Compare Shirov-Shulman, where the non-developing h4 had been played (instead of Rb1 and Rg3), so Black sucessfully broke down the centre with this move.

[A major option is 16...Nd5 , when 17 g5 and other moves are discussed in Papp-Liedl. The alternative 17.Qh7!? , although given an '!' by Berg and mentioned by Svidler during the post-mortem, isn't very impressive after one of two moves: Rf8 *(or 17...Bd7* , when White might want to retreat and start over after 18 Qd3 Be8. The move *18.Qxf7* is better than it was in the Shirov position. However, *Rdf8 19.Qh7 Rh8 20.Qe4 Rxh2* is still equal, e.g., *21.Nxd4 Nxd4 22.Qxd4 b6! 23.Bg2 Bc6 24.Bxd5!? Bxd5 25.Rxc3 Rh1+ 26.Kf2 Rh2+* with perpetual check!*)* 18.Bg2 Qa5! *(18...Qe7!? 19.g5 Nb6!?)* 19.Kf1 *(19.h4; 19.g5 Qa4!)* 19...Qa4 with the idea 20.h4?! Rh8!! 21.Qxh8 Qxc2 and 22.Ra1? fails to d3]

[Someone in the Forum mentioned 16...Rh8 , to prepare ...Nd5 without allowing Qh7, but it's unnecessary and there are positions in which the rook can be very handy on g8.]

17.exf6 Nd5

[Berg mentions 17...Bg6? can be met by 18.fxe7! *(or 18.f5)* 18...Bxd3 19.exd8Q+ Qxd8 20.cxd3 with a clear advantage to White.]

18.Qc4?!

[Berg says that both he and Shirov missed 18.Nxd4! Nxf6 19.Nb5! Rxd3 20.Nxc7 Rxg3 21.Nxe8 Nxe8 22.hxg3 Rxg4 23.Kf2 with a clear advantage to White. That seems correct. This wasn't mentioned in the earlier ChessPub notes to this game, which gives more credibility to White's setup.]

18...e5

[Neil had analysed 18...Qh7 '!' as a major improvement, but White looks to gain a substantial edge by 19.f5! exf5 20.Bg2 Nb6 21.Rxb6! axb6 22.g5! with wonderful pawns and pieces for a mere exchange.]

19.g5!?

[Berg correctly mentions 19.fxe5 Bf7 , although 20.e6 Bxe6 21.Nxd4 Nxd4 22.Qxd4 may not allow Black enough attack.]

19...Bf7?

[Berg gives 19...exf4! 20.Bxf4 *(20.Nxf4!?)* 20...Nxf4 21.Qxg8 d3! 22.cxd3 Nxe2 (actually not very good nevertheless, Black has decent chances after *(22...c2! 23.Rc1 Qa5+)* 23.Bxe2 Nd4 , 'as mentioned by Svidler.' Then 24.Qc4! is very strong.]

20.Qd3! Bg6

[White seems to stand much better

following 20...exf4 21.Qf5+ Kb8 22.Bxf4! (earlier ChessPub notes gave *22.Nxf4 Rge8+ 23.Be2 Ne3 24.Bxe3 dxe3* with a good game) 22...Nxf4 23.Qxf4 Ne5 24.Bg2 b6 25.Kf1! Bc4 26.Kg1! , with the idea Bxe2 27.Qe4]

21.f5 Bh5

[Neil correctly analyses 21...e4 22.Qxe4 Bh5 23.Nxd4 to a winning position for White.]

22.Qe4 Rge8 23.Kf2 White is safe from attack, and goes on to win: **23...Bf7 24.Bg2 Nb6 25.g6 Bd5 26.Qg4 e4 27.f7 Ne5 28.Qf4 e3+ 29.Kg1 Re7 30.Bxd5 Nxd5 31.Qxd4 Nxf7 32.gxf7 Rxf7 33.Bxe3 Rxf5 34.Qxa7 Re8 35.Qa8+ Qb8 36.Qxb8+ Kxb8 37.Nd4 Nxe3 38.Rxe3 Rxe3 39.Nxf5 Re2 40.Nd4 Rd2 41.Rb4**

Preparing an aggressive plan with a quick ...f5, consistent with the rest of Magnus' Sveshnikov and Rossolimo repertoire. Black has many playable alternatives although they're difficult to analyse since engines seem to have a strong preference for White, perhaps hypnotised by the d5-outpost.

[12...Ne7 13.Qb3 Bd7 14.a4 Bc6 15.Nd5 Bxc1 16.Nxe7+ Qxe7 17.Rfxc1 was level in V.Atlas - U. Boensch, Austria 2016 (1/2-1/2 in 51).]

Tata Steel Masters (6.1) 19.01.2018
[David Cummings]

1.c4 e6 2.Nc3 Bb4 A slightly offbeat try that surprisingly appeared twice in the Tata Steel Masters this month. **3.Qb3** Trying to take specific advantage of Black's 2nd move. We have also looked at:

[3.e4 Ne7 4.Nf3 c5 - see Wells-Barsov, in the Archives]

[3.Nf3 is a standard developing move when:

A) 3...Nf6 transposes to the more standard Nimzo-English with either 4.Qc2 or *(4.g4)*;

B) 3...b6 4.e4 Bb7 5.Bd3 Ne7 is an English Defence - see Milov-Rozentalis and earlier games in the Archives;

C) 3...c5 4.g3 Nc6 5.Bg2 Nge7 is an option if Black wants to stay off the beaten track, refer to Lautier-Sokolov, again in the Archives]

3...c5!? This has sometimes been annotated with?! or characterized as "falling into an opening trap" because of Svidler's reply. Matters are not as clear cut as this, but it remains to be seen whether or not Carlsen views this line as a one-off surprise weapon. Meanwhile Black has also played:

[3...Qe7 4.Nb5 Na6 5.a3 Ba5? 6.Qg3 was bad news for Black in Le Quang Liem-Kurajica, which is analyzed in the PGN Archives]

[3...a5 was played in another high level game last year. 4.a3 Bxc3 5.Qxc3 Nf6 6.b3 0-0 7.Bb2 d6 8.e3 e5 9.d4 Nc6 10.dxe5 dxe5 11.Bd3 Bg4 12.Ne2 Bh5 13.Ng3 Bg6 14.Be2 h5 15.h4 and White wasn't able to make his two bishops count for anything concrete, as Black held in Aronian,L (2785) -Riazantsev,A (2671) Sharjah 2017 1/2-1/2 (29)]

[3...Ba5!? was Kramnik's choice in an earlier round at Wijk aan Zee. Now 4.Nf3 c5 and here:

A) 5.d4 was a novelty from Giri but initially he wasn't too happy with the resulting Nimzo-style position. Nf6 6.dxc5 Na6 7.Be3 Ne4 8.g3 Naxc5 9.Qc2 Bxc3+ 10.bxc3 b6 11.Bg2 Bb7 12.0-0 0-0 13.Rfd1 Qe7 *(13...Qc7!* leaves Black at least equal*)* 14.a4 d6 15.a5 and although objectively the position is balanced, White's queenside initiative gives him some clear targets. White eventually won in Giri,A (2752)-Kramnik,V (2787) Tata Steel Masters 2018 1-0 (35).;

B) 5.g3 is more solid but after 5...Nf6 6.Bg2 Nc6 7.0-0 0-0 8.d3 d6 Black is in reasonable shape, Bezman,V (2395)-Jascenko,O (2180) St Petersburg 1994 1-0 (47)]

4.Nb5 The principled answer, securing the two bishops and displacing Black's king. Alternatives are:

[4.Nf3 Nf6 5.g4 was tried in Williams-Jones, covered in the Archives]

[4.a3 and now:

A) 4...Ba5?! this really is falling into "the trap" since 5.Ne4 Qc7 *(5...Nf6 6.Nxc5* just wins a pawn, per Gurevich-Kurajica in the Archives. *)* 6.Qg3 Qxg3 7.hxg3 Na6 8.b3 Bc7 9.Bb2 and White is better due to his much more active pieces - Georgiev-Adla in the Archives.;

B) 4...Bxc3 is the solid answer, when 5.Qxc3 Qf6 6.Qxf6 Nxf6 7.b4 b6 8.Nf3 Nc6 9.Rb1 d6 10.e3 e5 11.bxc5 bxc5 12.d3 Bf5 was balanced in Giri,A (2764)-Kramnik,V (2789) Leuven (rapid) 2017 1/2-1/2 (54)]

4...Nc6 Instead:

[4...d6? is refuted by 5.Qg3 with a double attack on the d6- and g7-pawns]

[4...Nf6 5.a3 Ba5 6.Nd6+ Ke7 *(6...Kf8* a la Carlsen may be better*)* 7.Nxc8+ Qxc8 8.g3 Nc6 9.Nf3 Rb8 10.Bg2 a6 11.0-0 is analyzed in Hansen-Lobron in the Archives. This illustrates the downside of this variation - White gets the two bishops and a flexible pawn structure, while Black must waste more time safeguarding his king.]

5.Nd6+ Kf8 6.Nf3 Svidler criticized this move after the game, since the f3-knight later gets pushed back to the g1-square.

[6.g3 should give White a pleasant position, along the lines of the previous note]

6...Qe7 7.Nxc8 Rxc8 8.e3 White could improve here with:

[8.g3 since this gives White the h4-square, for example e5 9.Bh3!? e4 10.Nh4 when White's knight is more active than in the game.]

8...e5 9.Qc2 e4 10.Ng1 This loss of time enables Black to establish an initiative before White can complete development. **10...Nf6 11.Ne2 Ba5 12.a3 h5!?** A kind of constructive waiting move. Black would like to open the centre, but:

[12...d5 played immediately allows 13.cxd5 Nxd5 14.Nc3 which defuses Black's immediate threats, although this is still fine for Black.]

13.b3 Instead:

[13.Nf4 Qe5 14.Be2 g5 reveals one key point behind 12...h5]

13...Rd8 Black puts weight behind the ...d7-d5 break, but this does give White a precious tempo for development. Instead:

[13...d5 14.cxd5 Nxd5 15.Ng3 *(15.Bb2 Ncb4 16.axb4 Nxb4 17.Qb1 Nd3+* when Black has a draw in hand with *18.Kd1 Nxf2+ 19.Ke1 Nd3+ 20.Kd1* but can also play on with *Bb4)* 15...Nf6! 16.h4 Rd8 prevents White from developing the c1-bishop, although there is still nothing clear about this position.]

14.Bb2 d5 15.cxd5 Rxd5 The players debated which recapture was better in a great video post-mortem. After:

[15...Nxd5 and now:

A) 16.Ng3 Nxe3 17.fxe3 Rxd2

18.Qxd2 Bxd2+ 19.Kxd2 h4 20.Bxg7+ Kg8 21.Bxh8 Kxh8 22.Ne2 and before White can consolidate, Black has Qd8+!! *(22...Qd6+ 23.Ke1 Qd3 24.Rc1* is less clear cut*)* 23.Ke1 Qa5+! 24.Kf2 Ne5 and Black's queen and knight combine for a winning attack.;

B) 16.0-0-0 Ncb4 17.axb4 Nxb4 18.Qc4 Nd3+ 19.Kb1 Nxf2 and the engine gives dynamic equality after 20.Ng3 Nxd1 21.Bxg7+ Kg8 22.Be2 Rxd2 23.Rxd1 Rxd1+ 24.Bxd1 Qd7 etc.]

16.0-0-0 Ng4 17.Ng3 An important option here was:

[17.Nf4 Rf5 18.f3 Nf2 19.Bc4 Nxh1 20.Rxh1 Rxf4 21.exf4 exf3 22.gxf3 Nd4 23.Qd3 when despite his broken pawn structure, White is the one pressing]

17...Nxf2 18.Bc4 Nxd1 19.Rxd1 White has good compensation for the exchange with his two raking bishops pointing at the kingside. **19...Rg5 20.Rf1 Nd8 21.Nf5** After this, the play takes on a forcing nature. White could maintain the tension with either of:

[21.Kb1 or]

[21.Rf2 when Black should probably return the material with Rxg3 22.hxg3 Bc7 etc., although White retains more active pieces]

21...Qd7 Black generates crucial counterplay against the d2-pawn to relieve the pressure. **22.Qxe4 Rg4!** A critical intermediate move, since:

[22...Qxd2+?? 23.Kb1 Rg4 24.Qe7+ Kg8 25.Nd6 gives White a winning attack.]

23.Bxg7+! White calculates a forced draw. Instead:

[23.Qc2 Rxg2 or]

[23.Rf4 Qxd2+ 24.Kb1 Rxg2 is only inviting trouble if White doesn't bail out.]

23...Rxg7 Another draw ensues after:

[23...Kg8 24.Qe5 Rxc4+ 25.bxc4 Qxd2+ 26.Kb1 Qd3+ etc.]

24.Nxg7 Qxd2+ 25.Kb1 Bc3 Now White goes for the perpetual. **26.Rxf7+ Nxf7 27.Qe8+ Kxg7 28.Qxf7+ Kh6 29.Qf4+ Kg6 30.Qf7+ Kh6 31.Qf4+** A spectacular game!

Sinquefield Cup (9.5) 11.08.2017
[David Cummings]

1.c4 e5 2.g3 Nf6 The Keres system with the immediate 2...c6 (but otherwise similar moves by both sides) has some differences to the game:

[2...c6 and if 3.Nf3 e4 4.Nd4 d5 and now:

A) 5.d3 Bc5 *(5...Nf6* would transpose to the main game*)* 6.Nb3 *(6.dxe4!?* is worth considering*)* 6...Bb4+ 7.Bd2 Bxd2+ 8.Qxd2 dxc4 9.dxc4 Qxd2+ 10.N1xd2 f5 11.c5 Nf6 12.e3 g6 13.Nc4 Ke7 14.Nd6 Nbd7 15.Rc1 b6 16.Be2 with a quick draw in Salem,A (2633)-Hammer,J (2621) Moscow 2017 1/2-1/2 (16);

B) 5.cxd5 Qxd5 6.Nc2 Nf6 7.Nc3 Qh5 is covered in Navara-Nisipeanu in the Archives]

3.Bg2 c6 4.Nf3 e4 5.Nd4 Qb6

The latest try, which Caruana has played in multiple recent games. For the alternative:

[5...d5 6.cxd5 see Gelfand-Inarkiev in this month's Update *(6.d3!?* was examined in Ding Liren-Inarkiev, see the game in the Archives *)*]

6.Nb3 White has also played:

[6.Nc2 d5 7.cxd5 cxd5 8.d3 Nc6 9.0-0 Be7 10.Nc3 0-0 11.Bg5 Rd8 with balanced chances, Howell,D (2644) -Pert,N (2568) London 2016 1-0 (55)]

6...a5 Black pursues the itinerant knight, before White can consolidate. Instead:

[6...d5 7.cxd5 cxd5 *(7...a5!?* is still possible*)* 8.Nc3 Bf5 9.d3 Bb4 10.0-0 White has pressure against Black's centre, but after 0-0? 11.Nxd5 Nxd5 12.dxe4 Bxe4 13.Bxe4 Black lost a central pawn for nothing in Sadzikowski,D (2547)-Harff, M (2351) Karlsruhe 2017 1-0 (35)]

7.d3 a4 Black has also played:

[7...Bb4+ 8.Nc3 a4 9.Nd2 exd3 10.0-0 0-0 11.exd3 Qa5 and now 12.Qc2 *(12.Nde4 Nxe4 13.dxe4 a3* was at least equal for Black in Bach, M (2247)-Romanov,E (2654) Bad Wiessee 2013 0-1 (36)*)* 12...d5 13.a3 Bxc3 14.bxc3 Bf5 15.cxd5 cxd5 16.Nf3 is preferable for White due to his two bishops]

8.N3d2 d5 Another candidate is:

[8...Bc5 9.e3 *(9.0-0* improves. If now *e3 10.fxe3 Bxe3+ 11.Kh1 Ng4 12.Ne4* White stops the immediate threats and emerges with a better long term structure*)* 9...exd3 10.Nc3 Qa6 11.b3 Meier,G (2657)-Baklan,V (2618) Biel 2016 1/2-1/2 (38), and now d5! makes life awkward for White]

9.cxd5 An improvement over an earlier blitz game played by Caruana:

[9.dxe4 dxe4 10.e3 Bg4 11.Qc2 Topalov,V (2749)-Caruana,F (2808) Paris 2017 0-1 (35), and here Na6 12.Nxe4 Nb4 13.Nxf6+ gxf6 14.Qe4+ Be6 gives Black a lot of play for the pawn]

9...exd3 This is more critical than:

[9...Bc5 10.0-0 Bxf2+?! 11.Rxf2 e3 12.Rxf6 exd2+ 13.Rf2 dxc1R 14.Qxc1 0-0 15.Nc3 with a clear extra pawn, Cummings,D (2371)-Gurevich,A (2165) Toronto 2000 1-0 (25)]

10.0-0 cxd5 11.exd3 Be7 An earlier game continued:

[11...Be6 12.Nc3 Qa5 13.Nf3 Nc6 14.Bd2 Be7 and now 15.Ne2 *(15.Ng5 Bg4 16.Bf3 Bxf3 17.Nxf3 0-0* was equal in Lenderman,A (2593)-Karavade,E (2421) Douglas 2016 1/ 2-1/ 2 (69)*)* 15...Qb6 16.Be3 Qa6 17.Ned4 gives White good central control]

12.Nc3 Qa5 13.Re1 Nc6 14.b4!? A dynamic move, aiming to blow open the position before Black has finished development. Interestingly, Caruana didn't mind repeating this line in a later game, albeit that was in a blitz encounter:

[14.Nf3 0-0 15.Bd2 Qa6 16.Bg5 Be6 17.Ne5?! Nxe5 18.Rxe5 h6 19.Bf4 a3 20.Rb1 Bd6 and Black was better, Navara,D (2737)-Caruana,

F (2807) Saint Louis (blitz) 2017 0-1 (34)]

14...axb3 15.Bb2 Qd8 Black has to spend a tempo here, since:

[15...0-0?? 16.axb3 skewers the a8-rook]

16.Qxb3 This works out well for White, however:

[16.Nxb3 may objectively be a better try for a small advantage]

16...Be6?! Defending the d5-pawn, but giving White extra targets. Instead:

[16...Nd4 was Caruana's suggestion after the game. 17.Qd1 Bg4 and Black is OK]

[16...0-0 is also possible, since 17.Nxd5 Nxd5 18.Qxd5 Bb4 19.Red1 Qxd5 20.Bxd5 Rd8 gives Black sufficient counterplay for the pawn]

17.Ne2 Bb4? Black should settle for:

[17...Na5 18.Qc2 0-0 when White is slightly better due to his more active pieces]

18.Red1?! Missing a great chance:

[18.Nf4! and the tactics work out for White, for example Bxd2 19.Nxe6 fxe6 *(19...Qd6 20.Nxg7+ Kf8 21.Nf5* winning material*)* 20.Rxe6+ Kf7 21.Bxf6 gxf6 22.Bxd5 Kg6 23.Be4+ Kh6 24.Qxb7 and White wins]

18...0-0 19.Nf4 Bc5 20.Nf3 Bg4 21.Rac1 White has completed development and retains a pleasant edge, with pressure on Black's d5- and b7-pawns **21...Bxf3** After this, White gets a powerful grip on the light squares. Instead:

[21...Bd6 22.Nxd5 Nxd5 23.Qxd5 Qd7 Black keeps both bishops on the board, and so retains some more counterchances]

22.Bxf3 Nd4 23.Bxd4 Bxd4 24.Rc2 b6 25.Bxd5 Ra7 26.Bf3 Re8?! Now White is able to lift the blockade of his d-pawn. After:

[26...Nd7 27.Ne2 Nc5 White is only slightly better]

27.Ne2 h5 Or:

[27...Bc5 28.d4 and the d-pawn starts rolling]

28.Nxd4 Qxd4 29.Rc4 Now White has a clear plan of gradually advancing his d-pawn step by step, to which Black has no real answer. **29...Qe5 30.a4 Qa5 31.Kg2 Rd8 32.d4 Nd5** Stopping the d-pawn for now, but White quickly makes progress **33.Rdc1 g6 34.Rc8 Rad7 35.Qc4 Kg7 36.Rxd8 Rxd8 37.Rb1** The threat of 38 Rb5 means that Black must give way. **37...Nf6 38.d5! Ra8** Instead:

[38...Nxd5 39.Qd4+ f6 40.Rd1 pins and wins]

39.d6 Ra7 40.Rd1 Nd7 41.Bc6 Qc5 42.Qd4+ Qxd4 43.Rxd4 Kf6 44.Re4 Black threw in the towel as he is already in a kind of zugzwang, for example:

[44.Re4 Nc5 45.Re8 g5 46.Kf3 g4+ 47.Ke3 and Black has run out of moves. Now Kg7 48.Re7 and the d-pawn proceeds.]

11.0-0 Be7 12.f4 h6 Black had no opportunity to keep his Bishop in play. **13.f5 Bh7 14.c5!** White maintains his initiative with very strong and natural moves. **14...N6d7**

[14...Bxc5!? comes into consideration although it looks dangerous: 15.Re1+ Kf8 *(15...Be7* was weaker because of *16.f6! gxf6 17.Bxh6 Nc4 18.Bg7 Nxb2 19.Qd2* winning (found by Alexander Finkel)*)* 16.Be3 Na6 and now White has a lot of possible continuations, for example 17.Ne4 with the clearly better chances because all the Black pieces are very passive and his king is not castled. *(*or the prophylactic *17.b3!?)*]

15.g5!! Excellent! Although White's position looks very promising anyway he chooses the most energetic way. **15...0-0** Black decides to give up the exchange to get his king away from the centre.

19.Kh1 Bxf8 20.fxg6 Bxg6 It could seem that Black is more or less okay here as he has enough pawns for the exchange, and White kingside pawn structure is also damaged but it's White turn and he continued with the unexpected and crushing **21.Bxh6!! Ne5**

30...Qxe5

[30...Nxe5 31.Rae1 Re8 32.Be4 winning]

31.Qf7+ Kh8 32.Rf5 Nf2+ Trying to confuse his opponent but White is winning anyway. **33.Kg1**

1.e4 c5 2.Nf3 Nc6 3.Bb5 g6 4.0-0 Bg7 5.c3 Nf6 6.Qa4 An interesting idea which defends the e4 pawn and is well placed to restrict Black's queenside. White still hopes to create a pawn centre with d2-d4.

[6.Re1 is also possible.]

6...0-0

[6...Qb6 is the serious alternative: 7.Re1 0-0 8.d4 cxd4

7.d4 White provides the main idea of his previous move. He sacrifices the e4 pawn, but hopes to get a very strong initiative. **7...cxd4 8.cxd4 d6!?** Gelfand offers a pawn sacrifice to complicate matters.

[8...Nxe4?! 9.d5 Nc5 10.Qa3! *(10.Qc4 Qb6! 11.dxc6? bxc6 12.Ba4 Ba6* wins *)* 10...Qb6 11.Nc3 with compensation for the pawn.]

9.Bxc6 White chooses the most principal continuation. He has the following possibilities as well:

[9.Nc3 Bd7 10.d5 Nb8 11.Be3 a6 12.Bxd7 Nbxd7 13.Qb3 with an edge, Morozevich,A-Anand,V/Frankfurt 2000.]

[9.d5 Nb8 10.Nc3 Nbd7 11.Be3 a6 12.Be2 Ng4 13.Bd2 *(* I prefer *13.Bd4* when *Nge5 14.Nxe5 dxe5 15.Be3 f5 16.exf5 gxf5 17.f4* is double-edged *)* 13...Nge5 14.Ne1 Nc5 15.Qc2 led to equal chances in Totsky-Mochalov, Spasskoe 1996.]

9...bxc6 10.Qxc6 Bg4 11.Nbd2 Qc8 The offer to exchange queens is designed to bring Black's rooks into the game.

[Instead 11...Rc8 is the standard move when 12.Qa4 Qb6 13.Re1 Qb7 14.Qb3 Qxb3 15.Nxb3 Rc2 gave Black plenty of play in the ending for the pawn, Alekseev-Ramirez, Santo Domingo 2003.]

12.Qxc8

[12.Qa4 seems dubious, in view of Bxf3 13.gxf3 Qh3 14.Qd1 Nd7 offers Black the brighter prospects because of the long-term damage to White's kingside pawns.]

12...Rfxc8 13.Re1 Bh6!? Black reserves the right to plan a rook on the second rank. Other tries:

[13...Rc2 14.Nf1 Bxf3 15.gxf3 Rac8 16.Ne3 R2c7 17.Bd2 Nh5 18.Nd5 is better for White.]

[Perhaps 13...Bxf3!? 14.Nxf3 Rc2 is worth considering. For instance: 15.b3 d5 16.e5 Ne4 with compensation for the pawn mainly in the shape of the rook on c2.]

14.Nc4

[It is worth trying 14.e5!? Nd5 15.h3 Bf5 16.b3 Rc2 17.Nc4 and White is better.]

[14.Nb3 Bxc1 15.Raxc1 Rxc1 16.Nxc1 Rc8 intending ...Rc4 or ...Rc2 to put pressure on White's queenside pawns.]

15.Raxc1 d5 Gelfand is a pawn down and needs to do something quick before White consolidates. In this instance Black challenges the pawn centre.

16.exd5? Quite serious mistake. White

throws away his advantage, while after

16...Bxf3 17.gxf3 Nxd5 Black is back in the game because the white pawns are weakened and the knight on d5 is very influential. **18.Na5 Kg7 19.Kf1 Nf4** Black makes sure the white king cannot emerge on e2 to join in the action. **20.Red1**

24.Nc8 Rda6 25.a4
[25.Nxe7 Rxa2 26.d5 R8a3 when White has to be wary of mate threats!]

26.a5 Nxb4
[26...e6 27.Rc4 Rb8 28.Nb6 Nxb6 29.Rc6 gives White an edge.]
27.Nxe7?! In a difficult ending White a little bit inaccurate.
[27.d5! is the right way to continue because the knight still threatens to take the e7 pawn but now the black rook can longer safely go to e6. Rxa5 28.Nxe7 Ra2 29.d6 is good news for White.]
27...Re6! 28.Rc4

[We also looked at the weaker 6...b6?! in Svidler, P (2746)-Ushenina, A (2500) Tromso 2013 (1-0, 40).]

7.Bc2 Bb7 8.Qe2

[In the notes to Svidler-Ushenina, I mentioned that 6...b5 was best, and suggested that 8.Re1 e5 9.d4 Be7 10.Nbd2 0-0 11.Nf1 Re8 12.d5 actually reaches a line of the Breyer Spanish, but without the move h3. [As a rule, in such a position White develops his bishop to g5 and, as a rule, it does not promise much! After 12.Bg5 h6 13.Bh4 c5! 14.d5 c4 15.Bc2 Nc5 Black has achieved good play in the game Gelfand - Leko, Dortmund 2007.]

12...Re8 13.Bb2 Bb7 14.Rc1!? A new and rather interesting continuation.

[The straightforward 14.dxe5 does not promise much again: Nxe5 15.Nxe5 Bxe5 16.Bxe5 Rxe5 17.Ng3 *(or 17.Qc2 Qb6∞* C.Horvath - Markus, Hungary 2003*)* 17...c5 18.Qc2 Qb6 with good play, D'Costa - Neelotpal, Le Touquet 2008.]

14...exd4 15.Nexd4 c5 16.Nf5 Bf8?! Now White's initiative is escalating smoothly.

[16...Bf4! should have been played. White had no other choice than to give up the exchange by playing 17.g3! Bxc1 18.Qxc1 , getting reasonable compensation. A possible line would be Bxe4 *(18...Rxe4!? 19.Qg5* was also very unclear*)* 19.Bxe4 Rxe4 20.Rd1 h6 21.Ne5↑ with the initiative but Black's position seems defendable.]

17.e5 Ng4 18.Nd6 Bxf3

[After 18...Bxd6 19.exd6↑ would hardly be satisfactory for Black.]

19.Qxf3 Ngxe5? Underestimating his opponent's reply.

[19...Ndxe5 was the only way to keep fighting: 20.Bxh7+! Kxh7 21.Qh3+ Kg8 22.Nxe8 Qb6!? 23.Rce1 Rxe8 24.Bxe5 *(or 24.Qg3 f6 25.Bxe5 Nxe5 26.f4 Bd6)* 24...Nxe5 25.f4 Bd6 with chances to hold on.]

20.Bxh7+! Kxh7 21.Qf5+!

[Perhaps Black missed this check, only counting on 21.Qh3+ Kg8 22.Nxe8 Qxe8 23.Rfe1 g5! 24.Qg3 Bg7 25.Qxg5 but here he had two minor pieces for the rook although

White's chances would still be preferable.]

21...Kg8

[With the inclusion of 21...g6 White could already play 22.Qh3+ Kg8 23.Nxe8 Qxe8 24.f4!]

22.Nxe8 Qxe8 23.Rce1 g6 24.Qe4 Bg7 25.f4 White wins the knight, getting a technically winning position with an extra exchange and without any Black counterplay. **25...Rb8 26.Qd5 Rb6 27.fxe5 Re6 28.Rd1 Nxe5 29.Qxc5 Nf3+** This exchange does not help much. **30.Rxf3 Bxb2 31.Qd5 Bf6 32.Rdf1 Qe7 33.g3 Kg7 34.Kh1 Rd6 35.Qa8 b4 36.Rf4 Bc3 37.Re4 Qc7 38.Rh4 Rd8**

[38...Qd8 was more tenacious but White was obviously winning after 39.Qxd8 Rxd8 40.Rc4 *(*or a preliminary *40.Kg2)*]

39.Qxa6 f5 40.Rc4 Qe7 41.Qc6 Kh6 42.Qf3 Black decided he had had enough.

1.e4 c5 2.Nf3 d6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 a6 6.h3 This fairly trendy line continues to acquire adherents, with Svidler but the latest grandmaster to give it a whirl. **6...e6** There have also been some important developments after two of Black's various alternatives:

[a) 6...Nc6 7.g4 *(* consistent, but in Nepomniachtchi-Grischuk, Russian Team Championship 2010, White preferred *7.Be3* , as we've seen before *)* 7...g6 8.Be3 Bg7 9.Bg2 0-0 10.Nde2!? *(* a novelty Howell borrows an idea from the Fianchetto variation of the Dragon, whereas before we've covered both *10.Qd2;* and *10.0-0* - see the Archive for Carlsen and Dominguez's efforts*)* 10...a5!? *(* not the most obvious move, but the ever-creative Serbian grandmaster wants to play ...a4 and only then ... Ne5-c4 Black might also play more routinely, but *10...Bd7 11.b3 Rc8 12.0-0 b5 13.Qd2* is perhaps a shade more comfortable for White*)* 11.a4 Be6 12.Nd5 Nd7! 13.c3 Nce5 14.0-0 Nc4 15.Bc1 Nc5 gave Black good counterplay in D. Howell-Ljubojevic, , Amsterdam 2010.]

[b) 6...e5 7.Nde2 *(* not forced, and with *7.Nf3 Nbd7 8.a4* in Timofeev-Khismatullin, Irkutsk 2010, White took play into a kind of 6 a4 variation whether Black wants to have committed to both ...e5 and ...Nbd7 so early is perhaps debatable, but after *Qc7! 9.Be3 b6 10.Nd2! Bb7 11.Bc4 Nc5 12.Qf3 h6 13.0-0 Be7* Khismatullin's position didn't appear too bad *)* 7...h5!? *(* I've previously wondered when this move would receive further testing, but it's not forced, of course, and *7...Be6* is a decent alternative from what I can see, angling for ...d5*)* 8.Bg5 Be7 *(* a new move for us previously we've noted the course of Naiditsch-Anand, Moscow (blitz) 2009, where *8...Be6 9.Bxf6 Qxf6 10.Nd5 Qd8 11.c3 Nd7* seemed acceptable enough for Black*)* 9.Ng3 h4!? *(* Van Wely comes armed with a new, quite critical approach previously in Vallejo Pons-Rytshagov,

Istanbul Olympiad 2000, *9...g6 10.Bc4 Be6 11.Bb3 Nbd7 12.0-0 Rc8 13.Qf3 Nc5* had looked about equal *)* 10.Nf5 (Howell is up to the challenge and plays critically to conquer d5) Bxf5 11.exf5 Nc6 12.Bc4 Nd4 13.Bxf6 Bxf6 14.Bd5! Howell-Van Wely, Amsterdam 2010, and now one important line must have been 0-0!? 19.Bxb7 Rab8 20.Bd5 a5 21.Kb1 a4 .]

7.g4 Be7 8.Bg2 Nfd7!? Ivanisevic is happy to follow in Topalov and Ivanchuk's footsteps with this prophylactic retreat, which currently appears to be quite a good option for Black in what is now a line of the Keres Attack. **9.Be3 Nc6 10.Qd2**

[As we've noted before, after 10.0-0 0-0 11.f4 Nxd4 12.Qxd4 both e5 *(*and Ivanchuk's *12...b5!?* should give Black enough counterplay. *)*]

10...0-0

[This natural move is surprisingly a novelty! We really are in fertile territory after 8...Nfd7. Previously no lesser game than Dominguez Perez-Topalov, Sofia 2009, had seen 10...Nde5 11.b3 Nxd4 12.Bxd4 0-0 13.0-0-0 b5 14.Ne2 Bb7 15.f4 Ng6 with a double-edged, roughly level middlegame in full flow.]

11.0-0

[Svidler plays it safe. The critical test must be 11.0-0-0!? , but presumably the St Petersburg grandmaster wasn't entirely happy about White's position after Nde5 . Then 12.Qe2 b5 13.f4 Nxd4 14.Bxd4 Nc6 is one possible continuation, and Black should be OK here. He has easy counterplay on the queenside and certainly shouldn't fear the centre taking on French-like characteristics with 15.e5 Nxd4 16.Rxd4 d5 .]

11...Nde5 12.b3 This avoids moving the queen again, but such an approach is hardly going to trouble Black. Perhaps 8...Nfd7 is just something of a problem for White and it will be interesting to see what the leading 6 h3 aficionados like David Howell come up with here.

12...Nxd4 13.Bxd4 b5 14.a4

[Playing on the queenside doesn't lead to much, but neither would 14.f4 Nc6 15.Be3 Bb7 16.Ne2 Rc8 have been especially troubling for Black.]

14...bxa4

[This turns out well, but if Black had wanted a more complex struggle, he might have preferred 14...b4!? 15.Ne2 a5 *(15...Nc6* is fairly sensible too, meeting *16.Bb2* with *e5)* 16.c3 when Ba6 17.c4 Bb7 gives White a Maroczy Bind, but Black will pressure the b3-point with ...Nd7-c5.]

15.Nxa4 Bb7 16.Nb6 Rb8 17.Bxe5

[Evidently Svidler wasn't too enamoured with his opening experiment. Certainly after 17.Bxe5 dxe5 18.Qa5 Bxe4 19.Rfd1 Qxb6 20.Bxe4 Bc5 21.Qxb6 Rxb6 the opposite-coloured bishops make a draw very likely.]

[If White wanted to play on 17.Qe3 was one option, but then, as well as Qc7 , *(* Black might consider *17...Ng6!?* , setting up ...Bg5 ideas. *)*]

FIDE World Cup (7.3) 03.10.2015
[Dave Smerdon]

This was a tragic game to watch, so I won't even try to imagine how it must have felt for Peter. At this stage of the epic World Cup final, Peter needed only a draw with White to secure the win. If you don't know how the rest of the match actually played out, I won't spoil it for you - but go check it out! It was perhaps the most drama-filled tiebreak I've ever witnessed. **1.e4 c5 2.Nf3 d6 3.d4 cxd4 4.Qxd4** One could have predicted Peter to go for an Anti with only a draw needed, but I would have bet on 3.Bb5+. **4...a6**

[One reason why Karjakin may have wanted to avoid the main line with 4...Nc6 is that it leads to more forcing variations, including the well-known 5.Bb5 Bd7 6.Bxc6 Bxc6 7.Nc3 Nf6 8.Bg5 e6 9.0-0-0 Be7 10.Rhe1 0-0 11.e5 dxe5 12.Qh4 Qc7 13.Nxe5 Rfd8 14.Ng4 Nxg4 15.Bxe7 Rxd1+ 16.Rxd1 Nh6 17.Bd6 Nf5 18.Bxc7 Nxh4 19.g3 Nf3 20.h4 with practically no winning chances for either side.]

5.c4 Nc6 6.Qe3! Svidler comes well prepared. This rare(ish) move is better than the popular main line with Qd2.

[6.Qd2 allows several well-trodden paths to equality, with the strongest in my opinion being Bg4=]

6...Nf6

[6...g6 7.h3 Bh6?! *(7...Bg7* transposes to the main game*)* 8.Qc3 Qa5 9.Qxa5 Nxa5 10.Nc3± 1-0 (51) Kryvoruchko, Y (2687)-Gupta, A (2640) Al Ain 2014]

7.h3 g6 8.Nc3 Bg7 9.Be2 White has gotten the setup he wanted. Black's position is passive, but acceptable. Normal business-as-usual would dictate a wait and see approach, but that wasn't practical for Sergey in this game. Hence, he goes for the only active plan: pushing ...f5. **9...Nd7**

[9...0-0 10.0-0 Nd7 11.Rb1! is slightly more comfortable for White. Still, Gawain found a really interesting way to make the game exciting against Carlsen: a5 12.b3 Nc5 13.Bb2 f5 14.exf5 Bxf5 15.Rbd1 a4 16.Ba3 Qa5 17.Nb5 axb3 18.axb3 Qxa3!? 19.Nxa3 Rxa3⩲ 1-0 (38) Carlsen, M (2848)-Jones, G (2644) London 2012]

10.Rb1 Nde5 11.0-0 0-0 12.Rd1 Nxf3+ 13.Bxf3 f5! Practically forced, given that Black had to play for a win. Still, after this White is also slightly better.

[R.Scherbakov]

Peter Svidler came well-prepared and gave Black problems in the line in which Vishy Anand just scored a nice win against Boris Gelfand. White's novelty on move 18 gave him the initiative, which he eventually converted into a full point. However, Black's play might still be improved. **1.d4 d5 2.c4 c6 3.Nf3 Nf6 4.Nc3 e6 5.e3 Nbd7 6.Bd3 dxc4 7.Bxc4 b5 8.Bd3 Bd6 9.0-0 0-0 10.a3 Bb7 11.Qc2 a6 12.b4 a5 13.Rb1 axb4 14.axb4 Qe7 15.e4 e5**

16.Ne2

[This is more promising than the immediate 16.dxe5 , which has just been considered in the game Gelfand - Anand/Monaco 2008.]

16...Bxb4! A principled choice.

[Otherwise White can simply protect the pawn, for example: 16...Rfe8 17.Bd2 Ra3 18.Rb3 Rxb3 19.Qxb3 exd4 20.Nexd4± with the better chances for White, Gligoric - Nikcevic, Niksic 1997.]

This line certainly required more analysis - White has to find something more convincing to prove his advantage. *)*]

18.dxe5! A new continuation.

[In the game Grachev - Poliakov, Pardubice 2007 White played 18.Bg5 and here the simple Bd6!? was worthy of consideration, after which White had to do a lot of work to prove his compensation for the pawn.]

18...Ng4 19.Bg5 Qc5 20.e6! Nde5

[After 20...fxe6!? 21.Qb3 Nde5 22.Qxe6+ Rf7 23.Nxe5 Nxe5

21.Nxe5 Nxe5

[In case of 21...Qxe5 22.Rxb4 Qxg5 White would have maintained the initiative by 23.Bc4!?↑]

22.Bf6 Qxc2 Black prefers safe approach but in the ending White still gets the edge.

[22...Nxd3!? was a natural alternative - after 23.Qxd3 fxe6 24.e5 Qc3 25.Qe4 White had excellent compensation for the pawn.]

23.Bxc2 Bd6

[23...Ng4?! wasn't better: 24.e5! Nxf6 25.exf6 Bc3 26.Ne4 followed by e6-e7.]

24.Bb3 fxe6 25.Bxe6+ Nf7 26.f4 As a rule, flank pawns are more important in the ending than the central ones but here White keeps the initiative.

[Perhaps 26.Rfd1!? Bf4 27.e5↑ was more promising.]

26...Bc8! 27.Bb3 Re8 28.f5

[White could have thought about 28.Bd4!? Be6 29.Bxe6 Rxe6 30.e5 Be7 31.Ne4± with somewhat better chances.]

28...Bxg3!

[Otherwise White's initiative could become threatening: 28...Ra7?! 29.e5 Bc5+ *(29...Bxe5?? 30.Rbe1 c5 31.Bxe5 c4 32.Bd4+-)* 30.Kh1 gxf5 31.Nxf5↑]

A rather complicated line of the Latvian Bayonet led to a complex position. White sacrificed a pawn and got sufficient compensation, the somewhat creative play of both sides wasn't free from mistakes and after a series of exchanges the game simplified into a drawish ending. **1.d4 d5 2.c4 c6 3.Nf3 Nf6 4.Nc3 e6 5.e3 Nbd7 6.Qc2 Bd6 7.g4 h6** This continuation has gained some popularity during the last few years. **8.Bd2 dxc4 9.Bxc4 b5 10.Be2 Bb7 11.g5**

13...b4

14.Na4

[Or 14.Nce4 Nxe4 15.Nxe4 Be7 with good play for Black.]

[For example, 15.f4?! c5 16.Bf3 Bxf3 17.Nxf3 Rc8 18.Kb1 0-0 and so on.]

15...Rxh2 16.Be1 White has got reasonable compensation for the pawn - Black's forces are not well coordinated while his king is still in the center.

[16.Nxf7? did not bring the desired effect since after Kxf7 17.Qg6+ Black's king could easily escape by Ke7 18.Qxg7+ Kd8]

16...Rc8?! This logical move seems to be an inaccuracy.

[16...Ba6!? was stronger: 17.Bxa6 Qxa6 18.Kb1 Nd5 with unclear play.]

17.Bf3? White returns the favour.

[17.Nf3! Rh7 18.Nd2 could have already promised the better chances for White. For example, Ba6 19.Nc4 Bxc4 20.Bxc4 and if c5 then 21.d5 exd5 22.Rxd5]

17...Rh6? A wasteful move – Black was probably worried about a possible sacrifice on f7.

1.e4 c5 2.Nf3 d6 3.d4 cxd4 4.Qxd4 Nc6 5.Bb5 Bd7 6.Bxc6 Bxc6 7.Nc3 Nf6 8.Bg5 e6 9.0-0-0 Be7 10.Rhe1 0-0 This is the tabaiya position for the line with 7.Nc3. At first blush, it looks promising for White, who is fully mobilised and centralised. However, now is where White has to face the limitations of his position. Without a light squared bishop, his attacking chances on the kingside are reduced, and he has to be much more careful about playing e5, due to the strength of the bishop on c6. Moreover, a pawn storm on the kingside doesn't look too promising, because it looks slow, there are no real targets there, and the bishop on g5 and knight on f3 do not seem to be suitably placed for this to work in white's favour. I used to think I would prefer to be White here, but now I think I would slightly prefer to be Black. Most GMs seem to play Kb1 here and for a while this didn't make much sense to me, but there does seem to be a hidden logic. White would like to move his queen(to d2 or d3) and play Nd4. This would free his f-pawn to go to f3 or f4, and attack the bishop on c6, which is Black's main asset. This idea of retreating the queen and playing Nd4 is the only idea with any significant sting, but it is not so easy to implement. **11.Kb1**
[11.Qd3 Qa5! Prevents Nd4 by attacking g5 while 12.h4 Rfc8 13.Nd4 Be8 leaves Black with a well organised position and a clear plan of b5-b4 etc. 14.f4 h6 then looks fine for Black.]
[11.Qd2 h6! is awkward, because the natural 12.Bh4 *(12.Bf4* is then best, but after *e5! 13.Bg3 Rc8!* I like Black's position.*)* 12...Nxe4! 13.Rxe4 I thought this refuted Ne4, but Bxh4 is just good for Black after either recapture. 14.Rxh4 *(14.Nxh4 Bxe4)* 14...Bxf3]
11...h6! A useful move to insert **12.Bh4**
[12.Bc1 looks tidy, but not too scary and I think Black should probably play Qa5 with several ideas, including ...d5 and if e5 then ...Ne4]
[12.Bxf6 Bxf6 13.Qxd6 Bxc3 14.bxc3 *(14.Qxd8 Raxd8 15.Rxd8 Bxe1! 16.Rxf8+ Kxf8 17.Nxe1 Bxe4∓)* 14...Qb6+! 15.Qb4 Qxf2]
12...Re8 Kasparov's moves are always worth considering carefully, but (even) more adventurous spirits might be interested in ...Qh5 which we examine in the game Timman-Topalov. The point of Re8 seems to be partly to over-protect

the bishop on e7 to make ...d5 and ... Ne4 ideas more plausible, and partly just to wait a move, because White is full mobilised and will probably do something a little committal. **13.Bg3 d5!?** This amounts to a pawn sacrifice, in return for which Black creates some disharmony in White's position and gets the bishop pair. **14.e5 Ne4 15.Nxe4 dxe4 16.Qxd8**

[16.Qe3!? Qa5 17.Nd2 Rec8 18.Nxe4 Bd5 to be followed with b5 looks like full compensation: 19.a3 b5 20.Nd6 b4! even looks better for Black, but this line should be checked carefully.]

16...Rexd8 17.Nd4

[17.Nd2 e3]

17...Be8 Curious decision.

[17...Bd5 was also possible, but I suspect Kasparov didn't like the look of 18.Nb5 when Black should be ok, but White is more active than he was in the game.]

18.c3

[18.Rxe4 Bc6 19.Re2 Bxg2∓]

18...Rac8 19.Kc2 b5 20.Rxe4 b4 When I first saw this game, I didn't think that Black had full compensation, but now I think he probably does, at least enough for a practical game. **21.Re3 a5 22.Ne2?** A bad move, allowing Black to activate his bishops.

[22.Red3!∞ aiming to improve the position of the bishop on g3, is at least not worse for White.]

EU-Cup 31st Skopje (4.1) 21.10.2015

[Illingworth, Max]

1.c4 e6 2.Nc3 d5 3.d4 Nf6 4.Nf3 Be7 5.g3 This move order is sometimes used as a way to avoid a theoretical battle, and indeed we've seen this Catalan transposition before on the site, but Kramnik's 7th move fully neutralises the concept. **5...0-0 6.Bg2 dxc4 7.Ne5** This is the only way to justify the Nc3 move order, as castling transposes to a dubious Catalan sideline, while Qa4 would be a bit too slow. **7...Qd6!** The idea behind this move is to bring the queen to a6, clearing the way for ... Rd8 and potentially . ..c5 to liquidate White's centre. **8.Nxc4**

[8.0-0 is a curious pawn sacrifice, it

can be played but Black does not have trouble keeping the game in balance as White will need some time to regain the pawn: Qa6 *(8...Rd8 9.e3 Qa6 10.Qe2 c5 11.dxc5 Nbd7 12.Nxc4 Nxc5=* is also possible, although it seems slightly curious to provoke e3 like this.*)* 9.a4! White's idea is to play Nb5 and thereby regain his pawn. Nc6 *(9...Nbd7 10.Nb5 Nxe5* transposes to the game.*)* 10.Nb5 *(10.Bf4* isn't a very inspiring option, as Black will be able to hang on to his extra pawn after *Na5 11.Nb5 Ne8 12.Qc2 c6 13.Na3 Nd6=* , with the point that if Rac1, ...Nb3 can be played.*)* 10...Nxe5 11.dxe5 Rd8 12.Qc2 *(12.Bd2* is slower, and Black can use the time to activate his passive c8-bishop with *Ne8 13.Qc2 Bd7 14.Qxc4 Bc6!=* and Black has no problems. *)* 12...Nd5 13.Qxc4 c6 Since Black has less space, he should not hesitate to trade pieces. *(13...Bd7* gives White the time to set up a strategic bind with *14.b3 Qb6 15.Bd2 a6 16.Na3 Bc6 17.Rfc1±* when it is not easy for Black to find a liberating move. *)* 14.Nd6 Qxc4 15.Nxc4 b6 16.Bd2 Ba6 17.Rfc1 A draw was agreed in 1/2-1/2 (17) Efimenko, Z (2647)-Kravtsiv, M (2623) Lvov 2015, as the ending is absolutely fine for Black after the normal plan Rac8 18.b3 *(18.a5 Bxc4 19.Rxc4 b5 20.Rcc1 c5=* is quite pleasant for Black, who managed to mobilise his queenside pawns, while White's bishops are not doing very much at present. *)* 18...c5= and Black has no weaknesses in his structure.]

8...Qa6 9.Qb3 This is the most frequent and logical move, getting out of the way of ...Rd8 while developing.

[9.Ne5 loses a little too much time to give White hopes for an opening advantage, e.g. Rd8 10.0-0 *(10.Qc2* is a bit hard to believe after *Rxd4 11.0-0 Rd8 12.Bf4 Nbd7=)* 10...c5 11.Qb3 cxd4 12.Nb5 Ne8 13.Bf4 Nc6= and White has no more than compensation (in his lead in development) for the pawn.]

[9.Qa4 is not dangerous for Black, as the endgame tends to be quite easy for him to play: Qxa4 *(* Similar is the move order *9...Rd8 10.e3 Nd5 11.Qxa6 Nxa6 12.0-0* and in 1/2-1/2 (32) Gnusarev, P (2357)-Lutz, C (2596) Mallorca 2004, the easiest way to equalise would be to trade White's central pawn with *c5=)* 10.Nxa4 Rd8 11.e3 Nd5 12.Nc3 c5 13.dxc5 Nxc3 14.bxc3 Bxc5= and Black can neutralise White's pressure against the b7-pawn without too many problems.]

[9.b3 Rd8 10.a4 looks a little bit convoluted, taking hold of the queenside but failing to develop, and after Nd5 11.Bb2 *(11.Nxd5 exd5 12.Ne3 Nc6 13.0-0* as played in 1-0 (26) Ju, W (2557) -Zhao, X (2527) China 2015 seems a fairly promising structure for Black, as the White knight is strange on e3 and after *Be6 14.Bb2 Qb6=* it is not easy to figure out White's pawn break.*)* 11...Nxc3 12.Bxc3 c5 Black equalises by taking the d4-pawn and hanging on to it. 13.0-0 cxd4 *(* It is also possible to play for the initiative rather than material with *13...Nc6 14.e3 Bf6 15.Re1 cxd4 16.exd4* and now, rather than taking on d4, it is stronger

to complete development with *Rb8! 17.Qe2 b5⇄* , when it is very likely that the whole queenside will be liquidated.*)* 14.Ba5 Re8 15.Rc1 White didn't take on d4 because of ... Bf6. e5 16.b4 Qe6 17.b5 Nd7= White has clear compensation for the pawn, as the c8-bishop and therefore the a8-rook is hard to get into the game, but objectively Black appears to be fine. He can always play ...Nc5 and ...Bd7, for instance.]

9...Nc6 It makes more sense to start with this move as ...Rd8 has lost some of its strength. **10.e3**

[10.Be3!? is an unexplored try which leads to quite an interesting middlegame, although I don't believe it gives any edge - somehow it is too artificial.

A) 10...Rb8 11.0-0 b5 isn't as good with the bishop on e3 as White has a lead in development to work with after 12.Ne5 *(12.Bxc6* makes a very unnatural impression after *Qxc6 13.Ne5 Qa8=* and in the long-term White's king safety is a bit iffy.*)* 12...Bb7 13.Qxb5 This is the start of a long forcing line ending in a slightly better endgame for White after Qxb5 14.Nxb5 Nxe5 15.dxe5 Ng4 16.a4 Nxe3 17.fxe3 Bc5 18.Nd4 Bxg2 19.Kxg2 Rxb2 20.Kf3 Bxd4 21.exd4 Rb4 22.Rfc1 Rxd4 23.Rxc7± , which should not be hard for Black to draw, but even so, he probably wouldn't volunteer for the task.;

B) 10...Nd5 This is the key move for Black, exploiting the position of the bishop on e3, and using tactics to stop White taking twice on d5. 11.0-0 *(11.Nxd5 exd5 12.Bxd5? Nb4∓* would be bad for White, as retreating the d5-bishop runs into ... Be6. *)* 11...Nxe3 12.fxe3 Na5 Exchanging the minor pieces is sensible when Black is a bit behind in space, plus the c4-knight was doing a good job of constricting Black's position. 13.Qa4 *(13.Nxa5 Qxa5 14.Rac1 c6=* is not dangerous for Black, who can later play ... e5 to free himself.*)* 13...Qxc4 14.Qxa5 c6 15.Rac1 Rd8= White's pawn structure is not flexible enough for him to count on any advantage here.]

10...Rb8 11.Qb5 The arising endgame is safe for Black, but he is also doing fine after the alternatives, as Black is ready to grab counterplay with ...b5:

[11.a4 is aimed against ...b5, but funnily enough it can be played anyway due to the queen's placement on b3: b5!? *(* Black can also play the quieter *11...Bd7 12.Qb5 Nb4 13.Qxa6* , but now there is a nice dynamic option of *bxa6! 14.0-0 Bc6=* when Black has good counterplay along the b-file, and it is not so easy for White to complete his development.*)* 12.Nxb5 Bd7 *(* It is also possible, although a bit less obvious, to play *12...Bb7!? 13.0-0 Na5 14.Nxa5 Bxg2 15.Kxg2 Qxa5 16.Qd3 Rfd8⩱* when Black's compensation lies in White's problems completing development without giving back the extra pawn.*)* 13.0-0 Nxd4 14.exd4 Bxb5 15.axb5 Qxa1 16.Ne5 Bd6 17.Nc6 Rb6= and White has enough compensation for the pawn, but not more than that - note that any move by the bishop on

c1 can be met with ...Qa6.]
[11.0-0 is not very threatening after the direct b5 12.Nd2 e5! and Black has successfully taken the initiative in the centre. 13.d5 *(13.Nde4 exd4 14.Nxf6+ Bxf6 15.Nd5 Be5=* is quite pleasant for Black, who after all is currently a pawn ahead.*)* 13...Na5 14.Qc2 b4 15.Na4 Qb5 16.b3 This was the continuation of the old game 1-0 (26) Khasin, A (2450)-Feher, G (2375) Kobanya 1991. Now I don't see any problems for Black if he connects the rooks with Bb7=]

11...Qxb5 12.Nxb5 Nb4 This is the most natural move, preparing the standard ...c5 break, although it is quite possible to do without this move, by means of
[12...Bd7 13.0-0 a6 14.Nba3 b5 15.Ne5 Nxe5 16.dxe5 Nd5 17.Rd1 c5!?= when accepting the pawn sacrifice would give Black amazing compensation.]
[12...a6 13.Nba3 Bd7 14.0-0 transposes to 12. ..Bd7.]

13.0-0 Bd7 14.Nc3 Of course, taking either pawn would just lose a piece.

14...Rfc8 Black waits with ...c5, claiming it won't run away, although there are other good moves, such as
[14...Rfd8!? 15.a3 Nbd5 16.Bd2 Nxc3 17.Bxc3 Nd5 18.Ba5 Bb5= with a solid game, or indeed the direct]
[14...c5=]

15.a3
[15.Ne5 Be8 16.a3 Nbd5 17.Bd2 Nxc3 18.bxc3 Nd7= is very safe for Black. The position reminds me very much of some equal Lasker/Ragozin positions.]

15...Nbd5 16.Bd2 c5 This is the most obvious move and it equalises, although he could also start with
[16...Nxc3 17.Bxc3 Nd5=]

17.dxc5 Rxc5 18.Ne5 Be8 19.Nxd5 Nxd5= Black went on to outplay his opponent in impressive fashion, though from a theoretical perspective this position is just equal. **20.Rfc1 Rxc1+ 21.Rxc1 Bf6 22.Nc4 Rd8 23.b4 b5 24.Na5 Nb6 25.Bc3 Rc8 26.Bc6 Bxc6 27.Bxf6 Bd5 28.Rxc8+ Nxc8 29.Bd4 f6 30.Bc5 Kf7 31.Kf1 e5 32.Ke2 Ke6 33.f3 f5 34.h4 g6 35.Kf2 Nb6 36.g4 fxg4 37.fxg4 h5 38.Kg3 Na4 39.Bxa7 Nc3 40.Bb8 Ne4+ 41.Kh3 Nf2+ 42.Kg3 Nxg4 43.e4 Bxe4 44.Nb3 Kd5 45.Nd2 Ne3 0-1**

FIDE Candidates 2014 (3.3) 15.03.2014
[Fier, Alexandr]

One of the few games where it's possible to see Kramnik caught without any good preparation. Svidler leaves the opening with the better position and Kramnik had to find some truly amazing resources to hold the game. **1.c4 c5 2.Nf3 Nf6 3.Nc3 Nc6 4.g3 g6 5.d4 cxd4 6.Nxd4 Bg7 7.Bg2 0-0 8.0-0 Nxd4**
[8...Qa5 is more popular nowadays and was seen last month on Chess Publishing 9.Nb3 Qh5 10.c5 was analyzed in Hammer, J (2612)-Goganov, A (2581)/Rilton Cup 43rd 2013 (6). *(10.h3* was Ivanchuk, V (2739)-Vachier Lagrave, M (2745)/ Gibraltar Masters 12th 2014 (10). *)*]

9.Qxd4 d6 10.Qd3 Now there are

plenty of moves for Black. **10...Be6** One of the possible ideas. I show some of the other possible moves:

[10...Bf5 11.e4 Be6 12.b3]

[10...Qa5 11.h3 Be6 12.Bd2 Qa6]

[10...Nd7 11.b3 Nc5 12.Qd2 Rb8]

[10...Rb8 11.Be3 a6 12.Ba7 is thematic Ra8 13.Bd4 Rb8]

[10...a6 11.Bd2 Rb8 is the main line and was well analyzed in Bu Xiangzhi (2656)-Zhang Ziyang (2323)/zt 3.5 Shandong CHN 2007 (2).]

11.Bd2

[11.Bxb7!? this obviously should be critical. In the main variation Black recovers the pawn, but I think White has good chances to get an advantage Rb8 12.Bg2 Qa5 13.b3 Rxb3 *(13...Ng4* Black can play for an attack, but this move is hard to believe *14.Bd2 Qh5 15.h4* and White has no problems defending the king*)* 14.axb3 Qxa1 15.Nb5 *(15.Bd2 Qa6 16.Nb5 Rc8* is a better version for Black compared to the game*)* 15...Qa2 *(15...Bf5 16.Qd4 Qxd4 17.Nxd4* and White has the advantage due to Black's a-pawn*)* 16.Nd4 Bd7 17.Bd2 Qa6 18.b4 Ng4 19.b5 and I prefer White's position]

11...Qc8 I'm not that convinced about Black's idea. In the game it looks like White has a solid space advantage, but Black has no clear plan.

[11...Qd7 was played against Kramnik in a blitz game and I think this is a better square for the queen. Black still has the plans with ...Bh3 and the rook can go to c8 without any tempo loss 12.Rfd1 Ng4 13.b3 Ne5 14.Qe4 was Kramnik, V (2772)-Anand, V (2788)/Wch Blitz 5th blitz 2009 (3). and here I would suggest Nc6 15.Rac1 Rac8 with a solid position]

12.b3 Bh3 13.Rac1 Bxg2 14.Kxg2 Qc6+ 15.f3

[15.e4 was also possible, but we can see in the game that Svidler was not in hurry to play this move]

15...e6 Avoiding any idea with Nd5, but leaving the weak pawn on d6. In a few moves this pawn is going to be the main theme of the game.

[15...Nd7 tries to keep the pawn on e7 and transfer the knight to a better position, opening the diagonal for the bishop 16.Nd5 Rfe8 17.Bg5 Nc5 18.Qd2 Qd7 and sooner or later Black will need to play ...e6 in order to find a plan]

16.Rfd1 Rad8 17.Bf4 with the queen on c6 Black is not able to play 17...d5, so White slowly improves all his pieces.

[17.Bg5 would be another idea, to provoke ...h6, but it's not so clear it's necessary h6 *(17...Rd7* loses a pawn *18.Qd4! Ne8 19.Qxa7* and White is winning*)* 18.Bf4 Rd7 and it would be more or less similar to the game]

17...Rd7 18.Qe3 Preparing to triple on the d-file.

[18.e4 would be another setup, but Svidler prefers to stay with the queen between the rooks on the d-file b6 19.Rc2 Rfd8 20.Rcd2 Ne8 with the usual advantage for White]

18...b6 19.Rd3 Rc8 20.Qd2 Ne8

[20...Ng4 could be an alternative to release the pressure at the cost of the d6-pawn, but it's not even clear that White needs to take it 21.Bxd6 *(21.Nb5 Rcd8 22.Bg5 Nf6 23.e4* is also reasonable*)* 21...Rcd8 22.Bf4 Rxd3 23.exd3 Ne5 24.Bxe5 Bxe5 25.Ne2 and Black managed to

activate his pieces, but still it's not enough to fully compensate the pawn]

21.e4 Finally White is ready to advance the e-pawn. **21...a6** **22.e5!?** Now the game becomes sharp. **22...h6!?** A brave decision, Black tries to bother White's bishop and to create counterplay in the center. The problem is that now he always needs to take care of some quick attack on his king, since all the pieces are focused on d6.

[22...Rcd8 would be a similar idea, compared to the game 23.Rd1 b5 24.c5 again this move is strong d5 *(24...Qxc5 25.Ne4 Qa7 26.Nxd6 Nxd6 27.Rxd6 Rxd6 28.exd6 Qd7* is better for White*)* 25.b4 and Black is cramped]

23.h4 I like this move, keeping the pressure on the position.

[23.Bxh6 was not clear and Black can even give the fianchettoed bishop for the c3-knight Bxe5 24.Bg5 f6 25.Bf4 Bxc3 26.Rcxc3 e5 27.Be3 Nc7 and Black's position is free, even if White can still keep an edge]

23...Rcd8 **24.Rd1** **b5** Forcing matters.

[24...Kh7 Black could try to hold the tension for one more move 25.a4 *(25.Ne4 d5 26.a4* is unclear*)* 25...f6!? 26.exf6 Nxf6 27.Qe2! and White forces Black to move one of the pawns d5 *(27...e5 28.Be3±)* 28.Re3 Ne4! this is an important resource, but even with this shot, Black will suffer 29.Nxe4 dxe4 30.Rxd7 exf3+ 31.Qxf3 Qxd7 32.Re2 h5 and White's position is better, but Black has chances to hold]

25.c5! White finds the best move and the position is really dangerous for Black.

[25.cxb5 axb5 26.Bxh6 Bxe5 is similar to the game, but in a worse version for White]

[25.exd6 bxc4 26.bxc4 e5! Black will recover the d6-pawn, and c4 is also hanging 27.Bxh6 Rxd6 28.Nd5 Qxc4 29.Bg5 R8d7 and Black is fine]

25...Qxc5

[25...d5 26.b4 a5 27.a3 axb4 28.axb4 is much better for White]

26.Ne4 **Qb6** Now White needs to decide between 3 tempting ideas, and this is sometimes not so easy. **27.Nxd6?!** The simplest of the options, but also the least ambitious. Now Black has only got to care about the passed pawn.

[27.Be3 wins an exchange by force Qb8 28.Nc5 and Black has no way to defend the rook. Still, Black has a pawn for the exchange and a good center Bxe5 29.Nxd7 Rxd7 30.Bxh6 Nf6 31.Re1 Followed by 32.Bf4 gives White an edge]

[27.Bxh6! this was the best move, but it was not so easy to see the idea when compared to the other two variations. White doesn't care about winning material much and goes directly for the king Bxe5 28.h5! the last move is linked with this idea, which is easy to overlook or misevaluate. Black's pieces are badly placed and there is no time to defend the kingside properly Nf6 *(28...Rc8 29.hxg6 fxg6 30.Qg5 Kf7* falls into a beautiful idea *31.Qxe5! dxe5 32.Rxd7+ Kg8 33.Re7* and White's pieces are too active, Black is helpless. For example: *Qc6 34.Rdd7 a5 35.Rxe8+ Rxe8 36.Nf6+ Kh8 37.Bg7#)* 29.Nxf6+ Bxf6 30.Bg5 Bxg5 31.Qxg5 and White will win the

g6-pawn and open Black's king]

27...Bf8 28.h5

[28.Bxh6 is chaotic, but Black is holding tactically Nxd6 29.Bxf8 Ne4 30.fxe4 Rxd3 31.Qh6 Rxg3+! 32.Kxg3 Rxf8 33.h5 Qc5 34.Qf4 Kg7 and White's king is also exposed]

28...Nxd6 29.exd6 g5 30.Be5 Rc8?! Both players are short of time and practical decisions are required. With one rook exchanged the position is apparently better for White. One of Black's rooks should block the d-pawn and the other one take care of the last rank.

[30...Bg7 was interesting, without the bishops the pawn on d6 is more vulnerable 31.Bxg7 Kxg7 32.b4 Rc8 with an unclear position]

31.Rc1! Rxc1 32.Qxc1 Qb7 33.g4 Now Black's pieces are too passive.

33...b4

[33...Bg7 was still possible, but less good than 30...Bg7 34.Bxg7 Kxg7 35.Qc3+ Kg8 36.b4 and White has good chances]

34.Qc4 Bg7 35.Bg3 Qb5 36.Be1?! Now White gives Black the chance to activate the queen.

[36.Qxb5 White can change the queens to get the b4-pawn axb5 37.f4! White need to hit the h6-pawn *(37.Be1 Bc3* gives nothing*)* 37...gxf4 38.Bxf4 Kf8 39.Bd2 Ke8 *(39...Bc3* now drops the h6-pawn*)* 40.Bxb4 Ra7 41.a3 Kd7 with a healthy pawn up for White]

36...Qe5 37.Bg3 Qe2+ 38.Bf2 Bf8 39.Qxa6 e5 A quite risky decision! Black goes for counterplay instead of trying to take the d6-pawn.

[39...Qe5 was enough for equality 40.Qc8 Rxd6 41.Qb8 Rd5 42.Qxe5 Rxe5 43.Rd8 f5=]

40.Qc4 Qxa2 41.Qc6 The last mistake of the game, just after the time control. White's position looks winning after the move from the game, but Black has an amazing resource at his disposal.

[41.Qxb4 Qa6 42.Rd5 Rxd6 43.Rxe5 was still better for White]

41...e4! 42.fxe4 Qe2 43.Rf3 Rxd6 44.Qe8 f6 45.e5 This was White's plan, Black cannot take the pawn. **45...f5!** First this.

[45...Qxe5 46.Qxe5 fxe5 47.Rxf8+ Kxf8 48.Bc5 Ke7 49.Bxb4! and Black is hopelessly lost]

46.gxf5 Rf6! And Black is back to the game, he threatens 47...Rxf5. **47.Kg3 Qe4 48.Bc5 Qe1+ 49.Bf2 Qe4 50.Bc5 Qe1+ 51.Bf2**

World Cup Khanty Mansiysk (3.5)

[R.Scherbakov]

At the last FIDE World Cup Peter Svidler and Arkady Naiditsch had a theoretical dispute in one of the main lines. At first sight White's chances seem preferable with two rooks vs queen but in reality he failed to activate his forces and scored only half a point in two games... **1.d4 Nf6 2.c4 e6 3.Nf3 d5 4.g3 dxc4 5.Bg2 c5 6.0-0 Nc6 7.Ne5 Bd7 8.Na3 cxd4 9.Naxc4 Bc5 10.Qb3 0-0 11.Bf4** This developing move is known to be White's main option. **11...Rc8** Black's recent choice.

[11...Qc8 is a well-known alternative,

which was defended in the 1980-90's by Andrey Sokolov:

A) in case of 12.Rfd1 Black defends by Rd8 *(not 12...Nd5?! 13.Nxd7! Qxd7 14.Ne5 Nxe5 15.Bxe5* with a certain advantage, Tukmakov - Beliavsky, Reggio Emilia 1987 *)*

A1) 13.Nd3!? is worth considering: Bf8 14.Nd6 *(14.Rac1!?⩱)* 14...Bxd6 15.Bxd6⩲;

A2) 13.Rac1 Nd5 and here a rather unexpected blow *(after 13...Be8 14.Nxc6 Bxc6 15.Bxc6 bxc6 16.Ne5 Rd5 17.Qa4* White maintains the pressure*)* 14.Nxf7!? is supposed to be sufficient only for a draw: Kxf7 *(not 14...Nxf4? 15.gxf4 Kxf7 16.Bxc6 Bxc6 17.Ne5+* followed by Rc1xc5*)* 15.Ne5+ Nxe5 16.Bxe5 b6 17.Qf3+ *(17.Bxd4?! Sokolov, Brussels 1988;

B) 12.Nd3!? deserves attention: Be7 13.Rfc1 *(13.Rac1 Nd5 14.Bd6 Bxd6 15.Nxd6 Qc7 16.Nb5 Qb6* was okay for Black in the game Nogueiras - A. Sokolov, Montpellier (ct) 1985*;* but *13.Nd6 Bxd6 14.Bxd6 Rd8 15.Rac1⩱* is worth considering*)* 13...Nd5 14.Nce5 *(after 14.Bxd5 exd5 15.Nce5 Rd8 16.Qxd5 Be8* Black was doing well in the game Ivanchuk - Dokhoian, Irkutsk 1986*)* 14...Nxf4 15.gxf4 Rb8 16.Rc4 Bf6 17.Nxc6 Bxc6 18.Bxc6 bxc6 19.Qc2 Qe8 20.Rc5⩲ and White still hoped for a slight edge, Tkachiev - A.Sokolov, EU-ch Ohrid 2001;

C) 12.Rac1 Nd5 *(here 12...Rd8?* fails to *13.Nxf7! Kxf7 14.Bxc6! Bxc6 15.Ne5+* followed by Rc1xc5 *)* 13.Nxd7 *(13.Nd3!?)* 13...Qxd7 14.Ne5 Nxe5 *(14...Qe7!?)* 15.Bxe5

C1) in case of 15...Rac8 White maintains a slight edge by 16.Rcd1 but Black still should be okay: b6 *(or 16...a5!? 17.Bxd4 a4 18.Qd3 Bxd4 19.Qxd4 Qb5)* 17.Bxd4 Qe7 18.Bxc5 Rxc5 19.Bxd5 exd5 20.e3 Qe4 21.Rd4 Qc2 22.Qb4 Rfc8 23.Rfd1⩲ and Black has eventually defended this position, Ribli - A.Sokolov, Reykjavik 1988;

C2) 15...Bb6 16.Rfd1 Rac8 *(16...Ne7?! 17.e3)* 17.Rxc8 Rxc8 18.Bxd5 Qxd5 19.Qxd5 exd5 20.Bxd4 Bxd4 21.Rxd4 White wins the d5-pawn but Andrey Sokolov proved that this ending is drawn: Rd8 *(both 21...Rc2 22.Rxd5 g6 23.Rb5±;* and *21...Rc5 22.b4 Rc2 23.Rxd5±* are far from a draw*)* 22.e4 Kf8 23.exd5 Ke7 24.Kg2 Kd6 25.Kf3 Rc8 26.Rd2 Re8

*(*after *26...Rc5 27.Ke4 Rc4+ 28.Kf5 Rc1 29.h4* he eventually failed to hold the balance, Tukmakov - A.Sokolov, Biel 1992 *)* 27.Kf4 Re5 28.h4 h5 29.f3 f6 30.g4 g5+ 31.Kg3 hxg4 32.Kxg4 gxh4 33.Kxh4 and here a draw was agreed, Kharlov - A.Sokolov, St. Peterburg (zt) 1993]

12.Qxb7

[12.Nd3!? is rather interesting. Then after b6 *(12...b5 13.Nxc5 bxc4 14.Qxc4 e5 15.Bg5±* seemed to be better for White but it should be examined more closely*)* 13.Nxc5 bxc5 14.Bd6 Re8!? *(14...Na5 15.Nxa5 Qxa5 16.Bxf8 Kxf8* was not fully acceptable for Black in the game Vidit - Adhiban, Mumbai 2009 *)* 15.Bxc5 *(15.Qa3 Nb4∞)* 15...Ne5! 16.Bb6! axb6 17.Nxe5± White may still hope for a small advantage.]

12...Nxe5 13.Nxe5 Rb8 14.Qxb8

[14.Qf3 is another way - see Sasikiran - Bacrot/Aeroflot Open Moscow 2010.]

14...Qxb8 15.Nxd7 Qb5 16.Nxf8 Bxf8

This position seems preferable for White but in fact it is not so easy for him to activate his forces as Black's pieces and central pawns are powerful enough.

17.Rfd1

[17.Rad1!? deserved attention: Qxb2 *(17...e5!? 18.a4 Qb8 19.Bg5* would be better for White as well*)* 18.e3 dxe3 19.Bxe3 and White's pieces would be active enough to apply some pressure.]

17...h6! This restrained pawn advance is rather useful.

[In their previous encounter Black played the more aggressive 17...g5?! but after 18.a4! Qxe2 19.Rd2 Qh5 20.Be5 Ng4 21.Bxd4 Qxh2+ 22.Kf1 White has got the better chances. However, Black K-side assault wasn't easy to refute in rapid chess: h5!?

A) after the correct 23.Rc1! Black was in trouble: e5 *(or 23...h4 24.Rc8 hxg3 25.f3)* 24.Bxa7 h4 25.Rc4! h3 *(or 25...Nf6 26.gxh4 gxh4 27.Bb8! h3 28.Bf3+-)* 26.Bb7 Nf6 27.Ke2! e4 28.Rxe4! Nxe4 29.Bxe4 and Black's queen is locked up in the corner: Qg1 30.Rd1 h2 31.a5 and so on;

B) 23.Bxa7?! h4 24.Rd3 Ne5!

B1) 25.Re3! should have been played: Nc4!? *(25...Ng4 26.Rc3)* 26.Re2 Bb4 27.Rd1 hxg3 28.b3 Nd6⇄;

B2) 25.Rc3?! g4 26.gxh4 *(* after *26.Rd1!? Nf3 27.Bxf3 gxf3 28.Rxf3 h3 29.Ke2 Qg2 30.Rf4 f5* White had to defend as well*)* 26...Nf3! 27.Rxf3! *(27.Bxf3?? gxf3-+)* 27...gxf3 28.Bxf3 and White eventually held the balance in the game Svidler - Naiditsch, World Cup (m/3) Khanty-Mansiysk 2009]

[17...e5 is another option, which deserves attention: 18.a4! Qb8 *(or 18...Qxe2 19.Re1 Qxb2 20.Rab1 Qa2 21.Bxe5 d3 22.Red1 Ng4 23.Bd4 Qc4 24.Bxa7 Qxa4 25.Ra1±* with good chances to win Black's d3-pawn *)* 19.Bg5 Nd7 20.Bd5 *(20.Rab1!? Qb3 21.Bd2 Qxa4 22.e3±)* 20...h6 *(20...Qxb2!?* seemed acceptable for Black: *21.Rdb1 Qxe2 22.Rb7 Qg4 23.Rxa7 h6* with unclear play*)* 21.Bd2

Here White had to play 31.Ba5! Ng4 32.h3 Nf2 33.Kh2 with a possible draw after Ng4+ 34.Kg1 Nf2 35.Kh2∞]

[Finally, 17...Qxe2 couldn't solve the problems completely: 18.Rxd4 Qxb2 19.Rad1 Ng4 *(19...Qxa2? 20.Rd8)* 20.R4d2± with somewhat better chances for White]

18.Bf1

[18.Bf3 was fine for Black: e5 19.a4 Qb8! 20.Bc1 e4 21.Bg2 Bc5]

[as well as 18.Kf1 Qxb2 19.Rac1 *(19.Be5 Bc5 20.Rac1 Bb6∞)* 19...Qb5∞ with acceptable play.]

[A thematic 18.a4 was already harmless for Black: Qxe2 19.Rxd4 Qxb2 20.Rad1 since he would simply play Bc5]

18...e5!?

[18...Qxb2 was okay for Black but he probably did not want to increase his opponent's chances to activate his rooks.]

19.Bc1 Qb6 20.a3

[An attempt to activate the bishops by 20.e3 was met by Bc5]

[while 20.Bg2 Qb5 21.Kf1 a5 was also good for Black but perhaps this way was more reliable for White.]

20...a5 21.b4?! White did not like to see his Q-side under pressure after the forthcoming ...a5-a4 but giving up the pawn seems to be too high a price.

[21.e3! should have been played: Bc5 22.b4! and here Black had to play dxe3! 23.bxc5 exf2+ and here the most reliable continuation seemed to be

A) both 24.Kg2 Qc6+ 25.Kxf2 *(25.Kh3 g5!↑)* 25...Ng4+ 26.Ke1 Qxc5 27.Ra2 Qc3+ 28.Bd2 Qb3↑;

B) and 24.Kh1 Qxc5 25.Ra2 Ng4↑ were not quite safe for White;

C) 24.Kxf2 Ng4+ 25.Kf3 Qb3+ 26.Ke2 Qc4+ 27.Kf3 Nxh2+ 28.Kg2 Nxf1 29.Rxf1 Qd4 30.Bxh6! with a probable draw.]

21...axb4 22.axb4 Bxb4 23.Bd2

[23.e3 Bc5 was already not quite satisfactory for White.]

23...Bxd2 24.Rxd2 Ne4 Now White faces a very difficult task to oppose Black's powerful queen and knight.

25.Rd3?!

[White should have kept his rooks together: 25.Rda2!? Qf6 26.e3 dxe3 27.fxe3 Qb6 28.Re1 Qb4 29.Rae2 with chances to hold on.]

25...Qb2 26.Ra5 f6 27.f4?! This weakening move makes Black's task easy but White already needed good advice. **27...Qc1 28.Ra2 Nc3 29.Ra8+ Kh7 30.fxe5 fxe5-+ 31.Kg2 Nxe2! 32.Rda3**

[32.Bxe2 Qc6+-+]

32...Qc2 33.Ra2 Qe4+ 34.Kf2 Qe3+ White resigned.

In the quiet positional 6.Be2 e5 Najdorf, Svidler has tried the 10.Nd5 and 11.

Qd3 line. After Judith's energetic 13... Nfe4 it became clear that the queenside will be closed and Black has chances on the kingside in the long run. This is a fine illustrative game showing Black's blockade strategy on the queenside and her attacking possibilities on the kingside. White's whole plan received a severe blow in this game. **1.e4 c5 2.Nf3 d6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 a6 6.Be2 e5 7.Nb3 Be7 8.0-0 0-0 9.Be3 Be6 10.Nd5** The idea is to put pressure on the queenside. Black has to take the N, and after exd5 White has a queenside pawn majority. However to build up the ideal set of pawns a5-b4-c4-d5 is far from easy. The breakthrough on c5 can easily be stopped, while in the meantime Black can advance in the centre with the ... f5 advance. **10...Nbd7 11.Qd3** Now c4 is already threatened. **11...Bxd5 12.exd5 Nc5 13.Qd2**

FIDE Grand-Prix (2) 11.05.2010
[Ponomariov, Ruslan translated from Ru..

It happened that for some unclear reasons I wasn't included in the FIDE Grand Prix, which had already started in 2008. Only after Levon Aronian qualified for the World Championship in advance was I invited to play in the last leg in Astrakhan. I didn't give myself any goals for the tournament as winning the tournament wasn't even sufficient to qualify for the candidate matches. That's why I just tried to show good play and played for fun. The following game was played in the second round: the pairings weren't comfortable as I had to play my first two games with Black, and you'll see later what came of this. **1.e4 e5 2.Nf3 Nc6 3.Bb5 Nf6**
[After some unfortunate results in Nizza, where I played too riskily: 3...a6 4.Ba4 g6 I decided to choose something more solid, the "Berlin wall", for Astrakhan, the tournament with a 7-hour time rate.]
4.0-0 Nxe4 5.d4 Nd6 6.Bxc6 dxc6 7.dxe5 Nf5 8.Qxd8+ Kxd8 9.Nc3 h6 10.h3 Bd7 11.b3 c5
[Last year when I played against the same opponent in the Tal Memorial in Moscow I started with 11...Kc8 12.Bb2 b6 *(*Victor *12...Ne7* Grischuk, A (2748)-Eljanov, P (2693)/ Odessa UKR 2009/[Mikhalevski, V].*)* 13.Rad1 and only then c5 That game followed my analysis up to move 25 and I solved my opening problems quite easily. 14.Nd5 a5 15.a4 c4 16.g4 Ne7 17.Nf4 Nc6 18.e6 fxe6 19.Ng6 Rg8 20.Nfe5 Nxe5 21.Nxe5 Be8 22.Nxc4 b5 23.axb5 Bxb5 24.Rd4 a4 25.Ra1 Rb8 The material and resources have been gradually exhausted and soon we agreed to a draw. 26.Ba3 axb3 27.cxb3 Bxc4 28.bxc4 Ra8 29.Bb2 Rxa1+ 30.Bxa1 Bd6 31.Re4 1/2 Svidler, P (2754)-Ponomariov, R (2739)/Moscow/2009/ However, this time I wanted to surprise my opponent and play something different. I can't say that the text move is a superb novelty. It's more an attempt to cleverly carry out

my plan with a different move order. Though as it turned out my opponent was ready for this scenario.]

12.Rd1 It seems that White has to play this way as 12...Nd4 was threatened. I considered the fact that White has to put the king's rook on d1 instead of the queen's rook to be my small victory. I think it's more useful on f1 as it may help to carry out the f4-f5 plan.

[12.Bb2 Nd4 13.Nxd4 cxd4 14.Nd5 *(14.Ne4 c5 15.c3 dxc3 16.Nxc3 Kc7 17.f4 Bc6 18.f5 Be7)* 14...c5 15.f4 Bf5 *(15...Bc6 16.c4 b5 17.f5 bxc4 18.bxc4 Bxd5 19.cxd5 f6 20.e6 Kc7 21.Rfe1 Kd6 22.Bc1 Be7 23.Rb1 Kxd5 24.Rb7 Bd6 25.Rxg7 c4∞)* 16.c3 Be6 17.c4 g6 18.g4 h5 19.f5 gxf5 20.gxf5 Rg8+ 21.Kh1 Bxd5+ 22.cxd5 f6 23.e6 Ke8 24.b4 Rd8 25.bxc5 Bxc5 26.Rac1 b6 27.Rfd1 Rxd5 28.Bxd4 Rxf5 29.Bxc5 Rxc5 30.Rxc5 bxc5 31.Rd7 a5 32.Ra7 Rg3 33.Rxa5 Rxh3+ 34.Kg2 Rc3 35.Ra7∓]

12...Kc8 13.a4!? And here is an improvement prepared by Peter Svidler.

[Just a couple of weeks before our tournament in China the game of my Tomsk club teammate saw 13.Bb2 Be6 14.Nd5 g5 15.c4 b6 16.Rd2 Kb7 17.Rad1 Ne7 18.Nf6 1/2 Motylev, A (2705) -Zhou Jianchao (2650)/Ningbo CHN 2010, and Black solved his problems easily. However it's difficult to leave anything unnoticed in our information age.]

13...a5 I decided not to philosophize and just to try finishing development by analogy with Motylev's game.

[After 13...Be6 14.a5 is rather unpleasant and it's not so clear how to bring my king and rook into play. Probably I can undouble pawns by means of c4 15.bxc4 Bxc4 16.Ra4 Be6 17.a6± but Black still experiences some difficulties.]

14.Nd5 g5 This slightly weakens the kingside and gives new outposts to the white knights. However, it's necessary to secure the e6-square for the black bishop. That's why 11...c5 and now 14...g5 was played. **15.Bb2 Be6 16.c4 b6** Everything is going parallel with the above. I was happy that I'm managing to finish development and connect the rooks, which is not always easy after losing the right to castle. However, I've started to gradually understand that despite the solidity of Black's position it will be rather problematic to obtain active counterplay after the inclusion of the moves a4 and ...a5. The queenside is almost entirely locked and it's becoming much more difficult to break through with the help of ...b6-b5. Black's dream is to get an endgame with opposite colour bishops. Then the white pawns will become an easy target, though right now it's more a flight of fancy. **17.Kh2** One more improvement. It's obvious that if White wants to win he has to use his pawn majority on the kingside. So the decision to start playing there immediately instead of doubling rooks along the d-file looks very logical.

17...Ne7

[After the straightforward 17...Kb7 I didn't like 18.g4 Ne7 19.Kg3 and it's not so clear how to stop White's direct play. Ng6 20.h4 gxh4+ 21.Nxh4 h5 22.g5 Bg7 23.Nf4!? Nxf4 24.Kxf4 It may happen that Black will find himself in a strategically unpleasant situation after making natural moves.]

18.g4 Ng6 19.Kg3 Be7 Preventing h4.
[Maybe it was worth thinking of an alternative - 19...Bg7!? attacking the e5-pawn in order to restrain the white pieces by its defence. 20.Nf6 *(20.Ne3 Kb7 21.Nf5 Rag8 22.Rd2 Bf8 23.Rd8 Ne7! 24.Rxf8 Nxf5+ 25.gxf5 Rxf8 26.fxe6 fxe6* looks pretty good for Black.*)* 20...Kb7 21.Nh5 *(* During the game I didn't like *21.h4 gxh4+ 22.Nxh4 Bxf6 23.exf6 Rhg8 24.f3* , but there is a very important resource *Nf8!* keeping the knight away from exchange and White is unable to prevent Black's counterplay. *⩲25.Kf4 h5 26.g5 Bc8)* 21...Rhg8 22.Rd3 Bh8 23.Rad1 Rae8 Black is a little bit passive, but it's also unclear how White is going to break through. 24.Nf6 Bxf6 25.exf6 Bc8]

20.Nf6 Obviously the transition into an endgame with opposite colour bishops is in Black's favour. However White is ready for a trade after f6 as it gives him new opportunities based on the e5-square and the open e-file.
[Nevertheless, Black can sometimes go for the exchange, as for example after 20.Rd2 Kb7

1.Nf3 d5 2.g3 Nf6 3.Bg2 c6 4.0-0 This move-order allows White to gauge Black's intentions before choosing between a c2-c4 plan or an d2-d3/e2-e4 plan. Instead, after

[4.c4 Black can of course continue with Bf5 but this move-order also allows Black several additional options such as *(4...dxc4 5.0-0 b5* - see Petrosian-Anand from the November 2015 Update, while for*; 4...Bg4 5.Ne5 Be6* see Harikrishna-Quesada Perez and earlier games in the Archives*)* 5.Qb3 Qb6 6.d3 e6 7.Be3 was played in Wang Yue-Lu Shanglei in the Archives.]

4...Bf5 This continues to be a popular choice endorsed by the likes of Tomashevsky. Meanwhile

[4...Bg4 is also well covered in the Archives, see Kramnik-Vachier Lagrave and others.]

[4...h6 preparing a retreat square for the f5-bishop, is a rather rare choice, see Markowski-Burmakin in the Archives]

5.c4 e6

[5...dxc4 6.Na3 b5 7.b3 is a gambit line that has scored well for White]

6.cxd5 Another approach is to delay the capture on d5, for example

[6.Qb3 Qb6 7.d3 *(7.Qxb6 axb6 8.cxd5* can now be answered by *exd5* keeping a compact pawn structure*)* 7...Nbd7 8.cxd5 Qxb3 9.axb3 exd5 10.Bd2 Nc5 11.Nd4 Bd7 12.b4 Ne6 13.Nb3 Be7 14.Bc3 0-0 15.N1d2 a6 16.Nf3 Rad8 17.Rfc1 Ne8 when Black is extremely solid because he can cover the b7-weakness quite comfortably, Giri, A (2798) -Tomashevsky, E (2728) Wijk aan Zee 2016 1/2-1/2 (57)]

6...cxd5 7.Qb3 Qc8

[7...Qb6 is also often played. After 8.Qxb6 axb6 9.Nc3 Nc6 10.d3 Black has:

A) 10...Be7 11.Bf4 0-0 and now:

A1) 12.Rfc1 Rfc8 13.Nb5 Bg4 14.Nd6 *(14.h3* is better, securing either kingside space or the two bishops*)* 14...Bxd6 15.Bxd6 Bxf3 16.Bxf3 Nd4 with equality, Fressinet, L (2700) -Navara, D (2734) Huaian (blitz) 2016 1-0 (35);

8.d3 Nc6 9.Bf4 A refined move order, White delays Nb1-c3, thus saving a tempo to put a rook on c1 opposite Black's queen. The well-tested alternative

[9.Nc3 also performs well for White, however. Play typically continues Be7 10.Bf4 0-0 and now White can choose which rook to put on the c-file:

9...Be7 10.Rc1

[10.Nc3 transposes to the previous note after 0-0]

10...Qd7 Black moves his queen out of the pin along the c-file, although this loses a tempo and its not clear this is strictly necessary. Instead after

[10...0-0 11.Ne5 Nd7 12.Nxc6 bxc6 13.Nc3 and now after Bg4 the changed pawn structure isn't the end of the world for Black. *(13...e5??* Bukavshin, I (2648)-Shemeakin, A (2247) Sochi 2015 1-0 (43), allowed *14.Nxd5* winning material *)*]

11.Ne5 Nxe5 12.Bxe5 Rc8 If Black ignores the threat of 13 Rc7, then after

[12...0-0 13.Rc7 Qd8 White should capture with the queen 14.Qxb7 when he is clearly better. Instead *(14.Rxb7 Nd7 15.d4 Nxe5 16.dxe5 Bc5* was only equal in Shahinyan, D (2455)-Mari Ooriad, P (2200) Yerevan 2015 1/2-1/2 (42) *)*]

13.Nc3 Perhaps White can improve here with

[13.Rxc8+ Qxc8 14.Nc3 0-0 15.Rc1 Qd7 16.e4 dxe4 17.dxe4 Bg6 18.Rd1 Qc6 19.Bd6 which is the same as the main game but with one pair of rooks exchanged. This seems to favour White as a passed d-pawn will be relatively more dangerous.]

13...0-0 14.e4 This move comes with tempo, in contrast to the lines in the note to White's 9th move **14...dxe4** The first new move. An older game continued

[14...Bg6? 15.exd5 Ng4 16.d4 Nxe5 17.dxe5 with a clear extra pawn for White, Hammer, P (2280)-Vilagas, N Switzerland 1995 1-0 (44)]

15.dxe4 Bg6 16.Rd1 Qc6 17.Bd6! Taking advantage of the awkward position of Black's queen **17...Bxd6 18.e5 Qc5 19.exd6 b6 20.d7 Rcd8 21.Qa4** After White's mini-combination, White is pressing thanks to his passed d7-pawn, although the position is still close to equal **21...Qc7 22.Nb5 Qc2 23.Qxc2 Bxc2 24.Rd2 Ba4 25.Nxa7 Rxd7 26.Rxd7 Bxd7 27.Rc1** White has swapped his passed d-pawn for a queenside majority, which is tricky to defend against when combined with the g2-bishop **27...e5 28.Bb7 Rd8?!**

[28...Rb8 kicking the bishop away should leave Black in reasonable shape]

29.Nc6! Re8 30.a4 White has gained time to get his queenside rolling **30...Kf8 31.b4 Bc8?!** A further inaccuracy. Although it seems a bit counter-intuitive to give up bishop for knight,

[31...Bxc6 gives better drawing chances, for example 32.Bxc6 Rc8 33.a5 bxa5 34.bxa5 Rc7 35.Kf1 Ke7 36.a6 Kd6 37.Ra1 Ra7 38.Bb5 Kc5 with a dark-squared blockade]

32.Bxc8 Rxc8 33.a5 bxa5 34.bxa5 Now White is clearly better as the rook and knight help the pawn to advance **34...Nd5 35.a6 Ne7?**

[35...Nb6 was more tenacious]

36.a7 Ra8 37.Nxe7 Kxe7 38.Rc7+ This rook endgame is hopeless for Black as his rook is passive and his kingside pawns are not fast enough to create counterplay **38...Ke6 39.Kf1 h5 40.Ke2 g5 41.Kd3 f5 42.Kc4 f4 43.Kc5 Kf5 44.Kb6 e4 45.gxf4 gxf4 46.Kb7** White wins the rook and can get back to the kingside comfortably in time to stop the pawns **46...Rxa7+ 47.Kxa7 Kg4 48.Rc3 f3 49.Kb6 Kh3 50.Kc5 1-0**

[Svidler was later happy to repeat this line, and 15...Bxb3!? 16.cxb3 a4 17.bxa4 Rxa4 18.f6!? *(18.b3*

is the alternative, after which *Ra5 19.Ng3 d5! 20.exd5 Bc5 21.Kb1 Nd6!? 22.h4 Qb6 23.Bxc5 Nxc5 24.Qe3?! However, after Kh8! Black had sufficient defensive resources and the game was, indeed, later drawn.]

16.Nbd4

[In this ultra-modern position White has also been known to trade pieces by means of 16.fxe6 axb3 17.exf7+ Rxf7 and then 18.Kb1 bxc2+ 19.Kxc2 Nb6 20.Nc1 d5 21.exd5 Nd6 22.Kb1 Nbc4 23.Bxc4 Nxc4 24.Qe2 Nxe3 25.g6! *(*better than *25.Qxe3?! Bxg5 26.Qb3 Qd6* , which left Black for choice in Abrahamyan-Hou Yifan, Yerevan 2006*)* 25...Nxd1 26.gxf7+ Kxf7 27.Rxd1 Bd6 followed a long piece of analysis from 'The Sharpest Sicilian' and was about equal in Erdogdu-Banikas, Kocaeli 2008.]

16...exd4 17.Nxd4 b3 18.Kb1 bxc2+ 19.Nxc2 Bb3! Black wants to open the a-file, but this wouldn't have come as a surprise to Svidler - we are still deep in theory at this point. **20.axb3 axb3 21.Na3 Ne5 22.h4 Ra4**

[Currently considered the most accurate. 22...Ra5 23.Qc3 was Karjakin-Anand, Wijk aan Zee 2006 (see the Archive for Tony's notes), but nowadays *(23.Qb4* is believed to turn out a little better for White. *)*]

23.Qc3!?

[A novelty from the ever-creative Svidler. Instead 23.Qg2 Qa8 24.f6 Bd8 can be found in the Archive - see both Shirov-Van Wely, Wijk aan Zee 2007, and Movsesian-Hracek, Ostrava 2007.]

[The correspondence world has also been busy debating 23 Qg2 of late, as well as both 23.Bd4!?]

[and 23.Rh3!? options which we may well have to return to in future updates.]

23...Qa8 24.Rd4 The point behind White's play. He is covered against an exchange sacrifice on a3 and so can aim to reduce Black's attacking chances through a trade of rooks. **24...Rxd4 25.Qxd4 Nc7 26.Rh3**

[I wouldn't be surprised if future games were to debate 23 Qc3 and, if so, they will probably follow in Svidler's footsteps at this point. White might like to attack, but both 26.f6?! gxf6 27.gxf6 Bxf6 28.Rg1+ Kh8 ,]

[and 26.h5?! Nf3 27.Qc4 Bxg5 28.Bxg5 Nxg5 29.Bg2 Na6 don't seem to offer quite enough for a pawn.]

26...Rb8 27.Bf2

[Now that the f3-square is covered, I wonder why Svidler didn't try 27.h5!? and perhaps this was what he would have played against Bu had Black played differently on the 15th move. Here Na6 *(27...Nc6 28.Qc3 d5!?* also deserves attention*)* 28.h6 gxh6 29.gxh6 looks rather dangerous for Black, but perhaps he is just about able to hold the balance with Nc5 30.Bg2 Qa6 .]

27...Nc6 28.Qd1 Qa4 29.Rc3?

[Now Black gets to break in the centre and activate his pieces. Thus White should probably have preferred

29.f6!? , after which gxf6 30.gxf6 Bxf6 31.Bc4 offers reasonable play for a pawn. A sample continuation then runs Ne5 32.Rg3+ Bg7 *(*and not *32...Kh8? 33.Qxd6)* 33.Qg1 Ne8 34.Bd4 Rb4 35.Bxe5 dxe5 36.Qf1 with a rough balance.]

[Another possibility is 29.Bc4 when Na5 30.Qd4 Rb4 31.Rc3 d5! should give Black enough counterplay, as demonstrated by 32.Qe5 Rxc4 33.Rxc4 Nxc4 34.Qxe7 Nxa3+ 35.bxa3 Ne6! 36.fxe6 Qxe4+ and it's perpetual.]

29...d5! 30.Qc1?

[Now White is in some trouble and thus he should probably have tried 30.Bc5!? when Bxc5 31.Rxc5 Qxe4+ 32.Bd3 Qe8 favours Black, but would have been by no means totally clear.]

30...Bxa3?

[This looks very dangerous, but White is just about able to defend on the queenside. However, after Rybka's 30...Bb4!! Black would have won! The main point is that 31.Rxc6 Bxa3 32.bxa3 *(32.Rxc7* is probably a better try, although *Qxe4+ 33.Ka1 Bf8 34.Ra7 Qc2! 35.Be3 Bc5!* still wins however, finding such a deep and hard-to-see sequence would have been very hard over the board, even for a player as creative as Van Wely*)* 32...b2 now wins, as the rook isn't defending a3.]

31.bxa3! b2 32.Qc2 Nb5 33.Bxb5 Qxb5 34.Be1! The simplest defence and now Black has nothing better than to acquiesce to a repetition. **34...Qf1 35.Qf2 Qb5 36.Qc2 Qf1 37.Qf2 Qb5 ½-½**

Linares (4) 1998
[Rogers]

The 7.Bb5+ variation of the Exchange Grunfeld has gone from being an oddity to something of a main line in the last few years. The following dramatic game shows some of the dangers awaiting Black if he tries to follow standard Grunfeld strategy Svidler must have been extremely grateful when Topalov's outstanding attacking play stalled when the win was in sight. **1.d4 Nf6 2.c4 g6 3.Nc3 d5 4.cxd5 Nxd5 5.e4 Nxc3 6.bxc3 Bg7 7.Bb5+ c6 8.Ba4 0-0**

[8...b5 9.Bb3 b4 is the other main line, but the text move indicates that Black is not averse to leading the game into a typical Grunfeld exchange position where he hopes that bishop on a4 will prove misplaced.]

9.Ne2 c5

[9...e5 is also playable.]

10.0-0 Nc6 11.Be3 Na5

[11...Qc7 was tried by Svidler many years earlier but it is less logical here than in a Bc4 main line - there is no disguised threat to the bishop on c4.]

12.Rb1!

[12.dxc5 works out w ell after12...Qc7 13.Nf4, but in another game from the 1998 Linares tournament Kasparov proved to Topalov that Nc4! 13.Qxd8 Rxd8 14.Bg5 Bd7! 15.Bb3 Na5 16.Bxe7 Re8 leads to a dead drawn endgame.]

12...Nc4 12...Nc4 dramatically declined in popularity after this game, attention

turned to ...b6 based plans, with or without exchanging on d4.

[12...cxd4 13.cxd4 b6 14.d5 e6 15.Bd2! Ba6 16.Bb4 worked out well for White in Dautov-Labunskiy, Leningrad 1989, so]

[12...b6 is the move most frequently seen today. 13.Bb5 *(13.dxc5!? Ba6! 14.Bb5 Bxb5 15.Rxb5 Nc4* is a typical Grunfeld pawn sacrifice. White is slightly better after *16.Bg5* but his disconnected queenside pawns always give Black compensation.*)* 13...Be6!? The latest twist, but *(13...Bb7* is less provocative.*)* 14.d5 Bd7 15.Bd3 e5 16.f4 f5 17.Ng3 c4 18.Bc2 g5 Provocation plus! 19.fxe5 f4 Avrukh-Timman, Amsterdam Lost Boys 1999, and now 20.Bd4 fxg3 21.Rxf8+ Qxf8 22.hxg3 would have given White good compensation for the piece. (Instead Avrukh played 20. e6 and went on to lose after 20... Bxe6!)]

13.Bg5 h6?! This turns out to be a serious weakening of Black's kingside.

[13...Qc7 is the logical move, although White can claim a slight edge after 14.Qd3]

14.Bh4 b6 15.Bc6 Rb8 16.Bd5! Now the c4 knight is seriously embarrassed as any retreat allows 17. dxc5. **16...Ba6 17.Qd3! b5 18.a4!** Now Black's position is on the verge of collapse and he must make major concessions - including giving up his treasured dark-squared bishop - to keep the game going. **18...cxd4 19.Nxd4 Bxd4 20.cxd4**

[20.Qxd4 was also very strong, as e5 21.Qxa7 Qxh4 22.Qxa6 Nd2 23.axb5 Nxf1 24.Rxf1 gives White winning passed pawns.]

20...Nd6 21.Rfc1 Rb6?! 22.a5 Rb8 23.Rc6! Bb7 24.e5!! Great play. g6 is threatened and Svidler is lucky that he has any defence at all. **24...Nf5! 25.Rxg6+ Kh8 26.Bxf7!**

[The sober 26.Rg4 was also powerful, but the text move continues the assault in the most vigorous way.]

26...Rxf7 27.e6? This looks crushing, but

[27.Bf6+!! exf6 28.Qxf5 Qf8 29.Rxb5 would have been even more spectacular and probably decisive.]

27...Rf8 28.Bg3 Kh7! 29.Rg4 Rc8 At the time this looked like a glorious defensive concept, yet

[29...h5! would have kept the game in balance, e.g. 30.Rxb5 Qc8 31.Rc5 Ba6 32.Qe4 Bb7 33.Qd3 with an unlikely draw by repetition.]

30.Be5 Rc5! 31.Rg7+ Kh8 32.dxc5! Nxg7!

[On 32...Qxd3 33.Rg3+ wins for White.]

33.Qg6 Rf6 34.Bxf6 exf6 35.Qxh6+ Kg8 36.Re1?! The first serious misstep.

[36.Qg6 followed by the advance of the h pawn, should be easy.]

36...Nxe6 37.h4 Ng7 38.Qf4 Qd5 39.Qg3? Now the win disappears completely.

[39.Qg4! Kf7 *(39...Qxc5 40.Qg6* is no better for Black.*)* 40.Rd1 - the point - would have made all the difference.]

39...Kf7 40.Qc7+ Kg6 41.Qg3+ Kf7 42.Qc7+

47.Nxe8 Nxe8 48.fxg6+ Kxg6 49.Bxd5 Nf6 50.Bf3 Re5 This is the position Peter was striving for. Black's drawing resources are very big, in particular the h8-square is dark, which is a good sign when you defend against the light-squared bishop. **51.Kg3 Rg5+ 52.Kf2 Ra5 53.Rc4 Kg5 54.h4+ Kg6 55.g4 Ra7 56.Kg3 Kg7 57.Rc6 Re7 58.Bd1 Rd7 59.Bc2 Re7 60.Bf5 Re3+ 61.Kf2 Re7 62.Kf3 Ra7 63.Be6 Ra3+ 64.Kf4 Ra4+ 65.Bc4 Ra7 66.h5 Ra5 67.Rc7+ Kh8 68.Kf3 Re5 69.Rf7 Nxg4 70.Rf8+ Kh7 71.Rf7+ Kh8 72.Kxg4 Re4+ 73.Rf4 Rxf4+ 74.Kxf4 Kg7 75.Kf5 Kh8 76.Kg6** The Russian GM holds without visible problems. An interesting game, which demonstrates the latest developments in the opening theory of the Giuoco Piano. It seems that both retreats of the knight 11...Ne7 and 11...Na7 are sufficient for equality.

Once again we take a look at the fashionable 7 h4. This time Vachier plays an interesting idea trying to improve on the Nepomniachtchi - Kramnik game. Svidler reacts well and managed to equalize without any big problems. Still, Black needs to be careful, since a more direct approach like 13... c4 can bring huge complications. **1.Nf3 c5 2.c4 Nc6 3.Nc3 Nf6 4.g3 d5 5.cxd5 Nxd5 6.Bg2 g6 7.h4 Bg7 8.h5 Bf5 9.Qb3 Ndb4 10.Kf1 Be6 11.Qa4 Qa5 12.Qxa5 Nxa5** Until here we are on the same path as the game we saw in Chess Publishing last month. 13.d3 is a natural move and is certainly not worse than 13.Ng5. But I still believe that Black should be fine here with one or more precise moves.
13.d3
[13.Ng5 was the subject of Nepomniachtchi, I (2702)-Kramnik, V (2796)/ 66th ch- RUS 2013 (9.3).]
13...Rc8 A simple and good approach.
[13...c4 is more forcing, but somehow Black can't defend the c7-square in a proper way. I couldn't come to a clear verdict on this position, for sure there is a lot of life. 14.Nb5!
A) 14...Kd7 is not ideal, White now has time to bring the bishop to the long diagonal 15.Bd2 Nac6 16.Bc3 and Black has problems with the knights Bxc3 17.bxc3 Nc2 *(17...Na6 18.d4* with big advantage *)* 18.Rd1 cxd3 19.Rxd3+ Kc8 20.hxg6

and Black's pieces are all misplaced. White has a clear advantage.;

B) 14...0-0-0 15.Ng5 *(15.Nxa7+* is also possible *Kb8 16.Nb5 cxd3 17.Bf4+ Kc8 18.Rc1+±)* 15...cxd3 16.Nxe6 fxe6 17.Bd2 and even if Black can keep the extra pawn there is enough activity for White to give him an advantage;

C) 14...cxd3 would be good if White takes the rook, but it's not the case 15.Nc7+ Kd7 16.Nxe6! *(16.Nxa8* allows counterplay *dxe2+ 17.Kxe2 Bc4+ 18.Kd1 Nd3 19.Be3 Rxa8* with compensation*)* 16...fxe6 *(16...Kxe6* gets problems with the knight *17.Ng5+ Kd7 18.Nxf7±)* 17.Bf4 Nd5 18.Rd1 dxe2+ *(18...Nxf4 19.gxf4* is also good for White.*)* 19.Kxe2 Nc6 20.Bh3 with good compensation.;

D) 14...Rc8!? is an ingenious sacrifice in order to open the a-file 15.Nxa7 Ra8 16.Nb5 Kd7

D1) 17.Bd2 Nb3 this is the difference! 18.Rd1 *(18.Bc3* is a complete mess *Nxa1 19.Bxg7 Rhg8 20.Ne5+ Kd8 21.hxg6 hxg6 22.Nxc4 Rxa2* with a really unclear position. *)*;

D2) 17.dxc4 Bxc4 18.Bd2! and White can take the pieces off just in time Nxa2 *(18...Bxb5 19.Bxb4 Nc6 20.Bc3 Bxc3 21.bxc3* gives Black some compensation, but not enough for the pawn since White is always threatening hxg6.*)* 19.Na3 Bb3 20.Rh4! activating the pieces without defending the pawn on b2 Bxb2 21.Rb1 Bxa3 22.Bxa5 Rxa5 23.Rxb3 Bd6 *(23...Rb8 24.Ne5+ Rxe5 25.Rxa3 Nc1 26.Rc4 Nxe2 27.Bf3* wins the knight, but there are not so many pawns left for White so it should be draw. *)* 24.Rxb7+ Ke6 25.hxg6 fxg6 with better chances for White in the endgame.]

14.Bf4 b6 Black just consolidates the position and is in no hurry with any pawn break **15.Bh3** Exchanging the bishops means Black has no problems, because one of White's typical ideas is to chase this Bishop on e6, since it doesn't have a good square.

[15.Ng5 is thematic and possible here Bf5 16.a3 h6!? *(16...Nc2 17.Rc1 Nd4 18.h6 Bf6 19.Nge4* gets the bishop pair*)* 17.Nxf7 Kxf7 18.axb4 cxb4 19.hxg6+ Bxg6 20.Nb5 Rc2 and Black is fine.]

15...Bxh3+ 16.Rxh3 Bringing the knights back to life. **16...Nc2 17.Rc1 Nd4** Black has no reason to be worse, but after a long endgame Vachier had chances to fight for a win. Probably there will be more games in this variation since it's a chance to play chess in rich positions. **18.Be5**

[18.Nxd4 cxd4 19.h6 Bf6 20.Ne4 Rxc1+ 21.Bxc1 Be5 is also equal.]

18...Bxe5 19.Nxe5 g5 Avoiding any hxg6 idea. Now that the dark-squared bishops are exchanged there is no problem in putting the pawns on dark squares. **20.g4**

[20.e3 Ndc6 21.Nxc6 Nxc6 22.Ke2 is almost the same.]

20...f6 21.Nc4 Nac6

[21...Nxc4 22.dxc4 Nc6 23.b3 Rd8 24.Rd1 and after the rook exchanges

the position will be drawn.]
22.e3 Ne6 23.Ke2 Kf7 24.Rhh1 Rhd8 25.Rhd1 Nc7 26.Ne4 Nd5 27.a4 Ndb4 28.a5 Rb8 29.axb6 axb6 30.Ra1 Rd5 31.Nc3 Rd7 32.Nb5 Rbd8 33.Ra3 h6 34.Rb3 e6 35.d4 cxd4 36.Nxd4 Nxd4+ 37.Rxd4 Rxd4 38.exd4 Nd5 39.Kf3 Ke7 40.Ne3 Nf4 41.Ke4 Rd6 42.Ra3 Nh3?! After this move Black needs to be slightly careful. **43.d5!** Now the knight can have the f5-square. **43...Nxf2+ 44.Kf3 Nh3 45.Ra7+**
[45.dxe6!? with the rooks on there are more chances Kxe6 46.Nf5 Rd2 47.Rb3 Nf4 48.Rxb6+ Ke5 49.Rb5+ Ke6 50.Nxh6 with chances in the endgame.]
45...Rd7 46.Rxd7+ Kxd7 47.dxe6+ Kxe6 48.Nf5 Nf4 49.Ke4 Now Black can trap White's knight. **49...Nd5! 50.Nxh6 Ne7 51.b3 b5 52.Kf3**
